Sports committees and athletic clubs have been formed on several railways, e.g., the G I P and the East Indian Railways with the object of promoting athletic sports among the employees and organizing tournaments. The Indian Railway Athletic Association has been recently formed for the promotion and development of inter-railway athletic competitions of all kinds. This is a registered association and its membership is open to the Railway Board and its subordinate offices as well as to railways which are parties to the Indian Railway Conference Association. Inter-district or inter-divisional competitions are also run by local sports committees with the idea of encouraging sports among all classes of staff. The inter-railway boxing, wrestling and foot-ball competitions are arranged in four groups.

The cinema shows and magic lantern lectures which have been recently organized for the recreation of railway employees are growing in popularity with the staff.

Education—Almost all Railways provide facilities for the education of their illiterate staffs as well as the children of Railway employees. The progress made in this direction on each railway may be briefly stated as follows —

The N W Railway have started two experimental schools for adult workers in the run-

ning locomotive sheds at Lahore and Sibi respectively. It is also intended to open another at Kotri shed shortly. The experiment has so far been confined to the locomotive staff as the majority of the staff in this branch are illiterate and education provides a great inducement in that wages can practically be doubled by qualifying for promotion to the higher grades of running staff. The East Indian Railway provide 37 schools for the employees of the Operating Department. The Eastern Bengal Railway provide 9 night schools for adult employees, the daily average attendance at these schools being 300. On the Burma Railways educational facilities for adult workmen have hitherto proved a failure and another experimental school has recently been opened for firemen.

The B B & C I Railway has recently opened classes for imparting instruction in the three R's at 3 centres on the Broad Gauge and 3 on the Metre Gauge systems. As an inducement to study, a bonus of Rs 5 is paid to each man passing a simple test. On the A B Railway, the Locomotive Department holds classes at Lunding, Badarpur and Chittagong to assist drivers to qualify as "English speaking" which grade carries a higher pay. The only facilities given by the B & N W Railway are first aid classes and subjects of a technical nature in the Locomotive Department. The Bengal Nagpur Railway provides 14 schools for imparting elementary training in reading, writing and rudimentary arithmetic to Indian drivers, shunters and firemen so as to enable them to make themselves personally acquainted with the rules and orders affecting train working. On the M. & S. M. Railway there are two night schools at Hubli and Guntakal respectively both of which receive financial support from the Company.

Schools for the education of adult workmen do not exist on the G I P Railway but a school is established at Bina for imparting technical instruction and conducting refresher courses in Railway working

For Workers' Children—The facilities provided for the education of the children of railway employees are as under

97 schools for European and Anglo-Indian children and 123 schools for Indian children are maintained at suitable centres and the total number of pupils on the rolls is 4,155 and 15,967 respectively. The total expenditure from revenue on the European and Anglo-Indian schools is Rs 402 lakhs per annum and on the Indian schools Rs 14 lakhs. The Railway Department also aids certain schools for children of railway employees. The total number of children in railway aided schools is 3,521 (European and Anglo-Indian) and 7,704 (Indian) and the total annual grants made by the Railway are Rs 49,365 and Rs 46,584 respectively. The Railway Department also gives direct financial assistance to its employees towards the education of their children in certain hill schools. The total expenditure on this account in 1927-28 was Rs 3.5 lakhs for Europeans and Anglo-Indians and Rs 28.8 thousands for Indians.

Facilities are also afforded by the grant of passes and concession tickets to enable the children to attend schools.

The present methods of assistance have recently evoked public criticism on the score of their being more favourable to European and Anglo-Indian employees than to the Indian and with a view to eliminating all trace of racial discrimination the Railway Board placed Mr C E W Jones, CIE, ILS, on special duty in 1927 with instructions to collect all

facts and figures regarding the assistance given by railways for the education of the children of their employees. On a consideration of Mr Jones' report the Board have now formulated their future policy on the following lines—

All railway schools would be transferred to local authorities or private bodies, special grants being given out of railway funds where necessary. The assistance given by the Railway Department would be confined to employees who draw pay below a prescribed maximum and obliged to send their children to boarding schools. The assistance would take the form of grants to the employees of a fixed proportion not exceeding one half of the board and tuition fees, the proportion depending upon the pay drawn by the parent and falling with the increase in pay. The assistance would be open to all employees without distinction of community, race or creed.

Several companies' railways have also signified their willingness to adopt a similar policy. But the question is still receiving further consideration because of the representations received in connexion with the scheme.

Co-operation—The Railway Administration have noticed that heavy indebtedness, degrades the employee and impairs his efficiency and they have therefore encouraged the formation of co-operative credit societies and co-operative stores by the employees.

Co-operative Credit Societies have been formed on all railways and are managed by committees generally elected from among the shareholders. But in some cases, the heads of the departments are required to be the chairmen of the Committees and they have power to nominate some of the members of the committee.

WAGES

It was in 1873 that one of the earliest attempts to collect wage statistics in India was made by issuing instructions to District Officers to submit half yearly returns showing the average monthly wages of certain classes of skilled and unskilled labour. The returns thus collected were utilized for compiling a series of comparable statistics of wages for selected Districts in each Province and these statistics were published in the publication "Prices and Wages" issued annually by the Director-General of Commercial Intelligence and Statistics. A reference, however, to Mr Dutt's Report on an Enquiry into Rise of Prices in India would show that these statistics were found to be wholly unreliable and consequently these half yearly returns from District Officers have been discontinued since 1910. In their place a quinquennial wage census was adopted in all Provinces, except in the Central Provinces where an annual return was obtained from District Officers. The first quinquennial wage census was held in 1911-12 and the second in 1916-17. The statistics regarding wages continued to be published in "Prices and Wages" which gave the results of the quinquennial wage censuses in respect of a few urban and rural occupations. As the statistics were still far from satisfactory the third wage census, which was due in 1921-22, was abandoned except in Madras and the Punjab. In 1921 an attempt was made by the Government of India to hold an All-India census of industrial wages with the active and voluntary co-operation of employers, but nothing could be done partly because a number of employers either failed to submit returns or submitted incomplete returns and partly because neither the Central nor the Local Governments were able to provide the staff required for the purpose owing to financial stringency. The annual issue of Prices and Wages were also suspended in 1920 as a result of retrenchment and no regular official wage statistics are now published for British India as a whole.

In the United Provinces a scheme for a census of Industrial Wages to be taken along with the regular census was considered but was not carried through. A periodical survey of wages has been carried out over five years, viz. 1912-13 in the Punjab. The survey dealt with the wages of certain classes of workers in the principal towns in selected industries affected by urban conditions, and at certain industrial stations to secure a means of comparison with rural wages in the same industries. The average monthly wages were submitted.

Provinces every year for inclusion in the annual Reports on the Administration of the Indian Factories Act, no regular and detailed statistics of industrial wages are available in Bengal and in the Central Provinces and Berar. In Madras quinquennial wages censuses have been conducted since 1908 showing the average wages of certain artisans (as well as farm servants employed in agricultural labour) in respect of homogenous tracts and districts. These censuses, however only related to rural and urban wages and not to industrial wages. A thorough investigation of the conditions of labour, and particularly the rates of wages on tea estates in Assam, was made in 1921-22 by a Committee

appointed by the Government of that Province. The Labour Office of the Government of Bombay conducted three enquiries into the wages of workers in the cotton mills in the Bombay Presidency in 1921, 1923 and 1926 respectively. Apart from these enquiries, the Labour Office has also conducted enquiries into (1) Wages of peons in Bombay, (2) Agricultural Wages, (3) Wages of Municipal workers, (4) Clerical Wages in Bombay City and (5) Wages of Printing Press Workers in selected Printing Presses in Bombay City. The results of all these enquiries have been published either in the form of special Reports or in the "Labour Gazette".

WAGE RATES.

Agriculture—Whether wages paid to agricultural labour in India have kept pace with the increase in the cost of living is, for several reasons, a very difficult question to answer. Firstly conditions vary so markedly between province and province that it is almost impossible to obtain accurate and comparable figures of wages for different classes of agricultural labour. Secondly there exists a variety of methods adopted for remunerating the workers engaged in different agricultural areas in India. For example, in the Punjab, there are four forms of wages, such as (a) purely cash wages, (b) cash wages with supplements which may consist of food, tobacco, lodging, bedding, clothing, etc., (c) purely grain wages, and (d) wages other than in cash or grain. In the Punjab the last quinquennial wages survey was held in December 1927. This survey shows that the following were the average daily wages of the three important classes of agricultural labour in rural areas in the Punjab—

| | |
|---------------------|----------------------|
| Carpenters | 16 to 32 annas a day |
| Masons | 16 to 38 annas a day |
| Unskilled labourers | 5½ to 16½ annas day |

As regards the last occupation it may be pointed out that the most frequent wage was between 7½ to 8½ annas. The Labour Office of the Government of Bombay published a Report in 1924 of an Enquiry into Wages in Agriculture which gave the average daily earnings of three classes of agricultural labour, viz., skilled labour, ordinary labour and field labour in each of the 26 districts of the Bombay Presidency separately for urban areas and rural areas

for each of 23 years from 1900 to 1922. The figures for each year from 1923 to 1927 have been published in the Bombay Administration Reports. The wages prevailing in other provinces for similar types of labour do not compare very unfavourably with wages in the Bombay Presidency for any particular year for which a comparison is made. This statement requires an important qualification. It is not meant that the money amounts actually paid are similar. The rates of wages in different provinces vary according to the extent of their industrialisation and money wages in provinces which are mainly agricultural are on a lower level than the money wages in Provinces which are highly industrialised such as Bombay and Bengal. There is no doubt whatever that wages have considerably improved in all parts of India between 1918 to 1928. Taking the Bombay Presidency as a whole the downward tendency in the level of wages which set in 1925 and continued up to the end of 1927 was checked during the year 1928 during which period wages of all classes of agricultural labour, except field labour in urban areas and ordinary labour in rural areas, either remained stationary or showed a definite upward tendency.

Comparison of conditions in India to-day with the pre-war year shows that during this particular period the condition of the Indian labourer has undoubtedly improved. This is amply proved by the figures given below showing the index numbers of daily average wages of skilled labourers, ordinary labourers and field labourers for urban areas and for rural areas for the Bombay Presidency.

AGRICULTURAL WAGES (NOMINAL)

Index Numbers for the Bombay Presidency (including Sind) 1913=100

| Year | Urban areas | | | Rural Areas | | |
|------|--------------|-----------------|----------------|--------------|-----------------|----------------|
| | Field Labour | Ordinary Labour | Skilled Labour | Field Labour | Ordinary Labour | Skilled Labour |
| 1922 | 189 | 192 | 195 | 170 | 182 | 179 |
| 1923 | 200 | 200 | 196 | 171 | 171 | 187 |
| 1924 | 195 | 198 | 200 | 176 | 181 | 191 |
| 1925 | 221 | 208 | 224 | 206 | 181 | 211 |
| 1926 | 221 | 204 | 216 | 198 | 181 | 215 |
| 1927 | 200 | 192 | 211 | 176 | 176 | 206 |
| 1928 | 191 | 192 | 212 | 186 | 175 | 210 |
| 1929 | 188 | 193 | 206 | 180 | 179 | 213 |
| 1920 | 174 | 170 | 198 | 171 | 173 | 205 |

MINES.

The tables given below show the daily earnings in the month of December for each of the two years 1928 and 1929 for workers in the main occupations in coalfields and the other important mines in British India. The rates of wages for 1930 were very much the same.

Gins and Presses

The male coolies in the gin factories in Madras and the Punjab earn on an average annas 8 per day while the female coolies get only as 5-1 and as 6 respectively. In the Central Provinces the average daily earnings of male and female coolies are as 10-2 and as 5-10 respectively.

The average daily wages of female press coolies in Madras and the Central Provinces amount to annas 5-10 while those of male coolies amount to annas 9-6 and annas 13-10 respectively.

The Plantations — Labour in the tea gardens in Assam is paid on a piece-work basis.

In addition to the standard daily task which the worker must execute in order to earn his wages (called *Harira*) the labourer is given an opportunity at certain seasons to supplement his earnings by the performance of a second task the payment for which is known as *ticca*. In some cases where it is impracticable to prescribe a definite task as in leaf plucking at the beginning and the end of the season payment is made by time. A distinctive feature of work in the gardens is that the labourer usually brings his family with him and the wife and sometimes the children are also wage earners. The joint earnings of a family must always be taken into consideration. The average family of a labourer

has been calculated as consisting of one working man, one working woman, about three tenths of a working child and non-working child and about two-tenths of an adult non-working dependant. The following table give the average monthly earnings of the labourers in the tea gardens in Assam

Table showing the average family monthly earnings in the tea gardens in Assam calculated on the average daily strength in 1914, 1922 and 1928

Periods of Wage Payment—There is a complete absence of uniformity as regards the periods for which payments of wages are made in the various important branches of organised industry in India. In scarcely any industry is there a single period of wage payment. Different systems are found in establishments belonging to the same industry and in the same district and within the same establishment different classes of workers are frequently paid for different periods. The month, the fortnight and the week are generally the periods of wage payment in Cement and Brick Works, Cotton Ginning and Pressing Factories, Flour Mills and Engineering Works. Monthly payment of wages is mainly adopted for workers in Printing Presses, Municipalities, Tramways and Railways. In the Cotton Mill Industry wages are calculated on a monthly basis in all the mills outside Ahmedabad. In the case of the Ahmedabad mills, wages of process operatives are calculated on a fortnightly basis and of workers in the maintenance department on a monthly basis.

In mines, tea gardens and rice mills the predominant periods of wage payment are a month and a week. In jute mills wages are calculated per week. Wages are calculated on both the monthly and the fortnightly basis in the Iron and Steel Industry, Sugar Mills and in Tanneries. The system of monthly payment appears to be universal in its application to supervisory and clerical staffs engaged in all different industrial establishments, while the most general system in the case of casual labour is of a daily payment of wages.

Periods elapsing before payment—The "waiting period" or the time which elapses between the end of the period for which wages are earned and the date of payment varies considerably from industry to industry and from establishment to establishment in the same industry. It may be generally stated that the longer the wage period the more delayed is the payment of wages. Monthly wages are not paid so promptly as fortnightly wages, weekly wages are withheld for still shorter periods and daily wages of casual labour are nearly always paid on the day on which they are earned or on the following day. Speaking generally the average period of waiting may be considered to be 10 to 15 days in the case of monthly payments, 5 to 7 days for fortnightly payments, and 2 to 4 days in the case of weekly payments. Another factor which affects the period of waiting is the method of payments. Where workers are paid on piece rates, intricate calculations are required to ascertain the amount due, and consequently piece rate wages cannot be paid so promptly as wages of workers on fixed time rates of pay.

Indebtedness prevails to a very great extent among the labourers, but no reliable figures are available except those for the Bombay Presidency which were collected by the Bombay Labour Office during its enquiries into the workers' family budgets for different centres. From the statistics of the Empress Mills the percentage of labourers indebted appears to be more than 50. Though exact figures for the Punjab are not available it is reported that the volume of indebtedness amongst the agriculturists is greater than anywhere else in India. As regards urban and industrial labourers it may safely be assumed that a greater majority are in debt to their food suppliers. In Madras the indebtedness of the worker is heavy, especially in the case of plantations where it is reported that 75 per cent of the wages of the labourers are taken away by money lenders on pay days. The mine managers of the Jharia coalfields in Bihar and Orissa generally put this figure at one week's wages. It is also stated that the extent of indebtedness varies with caste and social custom. In Bombay City, interest on debts forms nearly three per cent of the total monthly expenditure. Of the families considered for the Labour Office enquiry no fewer than 47 per cent were in debt. The extent of the indebtedness of the family in debt is ordinarily the equivalent of two and a half months' earnings. The extremes were 14 months' and one-third of a month's earnings respectively. As regards single men, for whom 603 budgets were collected, 45 per cent were in debt, the average expenditure on interest being as 12-3 and the average expenditure on interest for those in debt being Rs 1-11-2 per month. Enquiries for the Bombay Port Trust workers showed that over 80 per cent of the families considered were found to be in debt. In the majority of cases the amount of debt varied from a month's income to four months' income. In Ahmedabad during 1926 about 69 per cent of the families were in debt. The amount of debt varied from a few rupees to many times the monthly income. According to an enquiry made by the Labour Office in the year 1925 into the family budgets of cotton mill workers in Sholapur City, 63 per cent of the cotton mill workers' families in

Besides the usual pay the employees of the railways are granted allowances and perquisites for special work, climatic and local conditions, etc.

Amount sent to villages—In the absence of a completely urbanised industrial labour force in India, the practice of remitting part of the wages earned by workers in industrial centres to their place of origin appears to be very common. But no authorised or statistical information for a definite period of time is available as regards the amounts sent by workpeople in this manner. If statistics pertaining to this subject were compiled, it would help a good deal in estimating the agrarian contact of Indian industrial workers. In the Central Provinces and Berar 80 per cent of immigrants from the United Provinces leave their families behind in their villages to look after cultivation. These labourers are reported to be remitting more than 50 per cent of their income home. The other immigrants in that province from Central India and the Bombay Presidency are said to be sending 25 per cent of their earnings to their homes. Estimates of amounts sent by money order by the various post offices in the jute mill areas in Bengal are annually published in the reports of the Indian Jute Mills Association. The figure for 1928 comes to Rs 1,73,57,816-1-2, but it does not purely represent the amounts sent by Jute mill employees only. Labourers from coal mines in Bengal coming from outside the coal fields are reported to send or take home to their villages from 30 to 40 per cent of their earnings. In the case of the miner in the mining fields of Bihar and Orissa it is roughly estimated that he sends home, all his savings—which amount to about 8 annas to Re 1-8-0 per week. Results of a special enquiry made in the case of an important cotton mill at Cawnpore in which wages are paid fortnightly showed that during

the particular period of two weeks covered by the enquiry, 38 per cent of the wages received by workmen was remitted by money orders through the office attached to that mill. In the course of its family budget investigation, the Labour Office of the Government of Bombay collected some information regarding remittance of amounts by workers' families. In Bombay City a large number of workers do not maintain an establishment, but live as boarders and though married keep their dependants in their native places. In the case of resident families the average monthly amount remitted comes to Rs 1-11-1 which constitutes 32 per cent of the family income which is Rs 52-4-6 per month. In the case of persons living singly in the Bombay City, the average monthly remittance comes to Rs 11-7-1 which constitutes 362 per cent of their monthly income. The labour force in Ahmedabad is not immigrant to the same extent as in Bombay and therefore remittances to dependants is not an important item in the worker's budget. It appears that nearly 7 per cent of the working class families in Ahmedabad remit money to their dependants living away from them. The average for only those families remitting money comes to Rs 6-6-0 per month. Sholapur draws its labour force from the immediate neighbourhood and the labour there is not of the same cosmopolitan character as in Bombay. Of the total number of families whose budgets were collected during the family budget enquiry at that centre only 6 per cent reported that they had to remit money every month to their dependants in villages. The average of the amount remitted by such families comes to Rs 4-12-7.

DEDUCTIONS.

In June 1926 the Government of India requested Local Governments to make enquiries, in their respective administrations as to the extent to which fines and other deductions were being realised by employers in India from their workpeople. The views of Local Governments were also invited on the desirability of taking any action legislative or otherwise to counter any abuses which might be found to prevail. The information given below is based mostly on the various Provincial enquiries made for the purpose, but there is no reason to believe that the conditions have changed materially since then.

The system of making deductions from wages in respect of fines is general in the textile industry, and other industrial concerns. With regard to factories the system exists in almost all Government and Local Fund factories and in the majority of the more organised and larger

workshops. It is also associated with municipalities, factories and establishments working regularly throughout the year. It does not appear to be the general practice in seasonal establishments such as gins and presses. In offices the system is almost wholly limited to the fining of peons and menials in the establishments where the system exists although in a few cases clerks are also occasionally fined. Fining is general in the large hotels, clubs and restaurants but it can be said to be almost absent in most of the larger commercial organisations such as shops, stores, etc. The only notable concerns in which fines are very rarely imposed are the tea gardens in Assam and Bengal and the coal fields in Bengal and Bihar and Orissa. The abuse is said to be limited by the consideration that the shortage of labour compels the employers to treat their employees with every consideration.

A cost of living index number based on the results of the enquiry into family budgets of cotton mill workers in Sholapur conducted by the Labour Office in 1925 has been published in

the *Labour Gazette* since February 1931
Sholapur working class cost of living index numbers by months (Average prices from February 1927 to January 1928=100)

Standard of Life—Very little information is available regarding the standard of living of the working classes in India. The most satisfactory method of obtaining this information is by means of a family budget enquiry in which information is collected regarding the composition, income and expenditure of the family. To enable general conclusions to be drawn from investigations of this type it is always necessary to conduct the enquiries by what is known as the extensive method, an attempt being made to secure the information from a large number of families so as to minimise the effect of the peculiarities of exceptional cases. The sampling method is often resorted to in conducting extensive family budget enquiries because of the impracticability of collecting data by the census method. It is essential that the sample should be representative in order to yield reliable results.

At the Third International Labour Conference of Labour Statisticians held at Geneva in October 1926, the Committee on family budgets passed a resolution that in order to provide adequate information with regard to actual standards of living, enquiries should be conducted generally at intervals of not more than ten years into the income, expenditure and conditions of living of families representative of large homogeneous sections of the population. It was also decided that for a complete enquiry information should be collected as to the district in which the family resides, the composition of the household, the industries and occupations of members of the family, the nature of the housing accommodation and the amount of each important item of family income and expenditure together with quantities of purchases, where practicable. It was agreed, however, that a less detailed investigation omitting the particulars of the family income would be sufficient where the sole object of the enquiry is to provide weights for the calculation of cost of living index numbers.

Family budgets were collected by the Labour Office for 3,076 working class families in Bombay City in 1921-22 and the report based on the results thereof was published in 1923. It has been decided to undertake a new family budget enquiry when industrial conditions become normal in Bombay City and to use weights based on the results of that enquiry in compiling a fresh cost of living index number for Bombay on a new base period. The Labour Office collected 985 budgets of working class families in Ahmedabad in 1926 and 1,133 budgets of cotton mill workers in Sholapur in 1925. The reports based on the results of these enquiries were published in 1928. A small family budget investigation for cotton mill workers in Bombay city was also conducted by the Labour Office in 1930 but the results of this investigation have not been published so far.

In the United Provinces a number of budgets were collected at Cawnpore with the object of compiling a cost of living index number. But the results of the enquiry were not found to be satisfactory and the province has not been compiling any cost of living index number.

The Labour Statistics Bureau, Rangoon, which was established by the Government of Burma in 1926, has made an extensive enquiry into the Standard and cost of living of the working classes in Rangoon and the report based on 4,309 budgets was published in 1928. The results of this enquiry have been separately analysed for Burmese, Telugu, Tamil, Uriya, Hindustani, and Chittagongian workers. Separate index numbers for each of the different classes of workers have also been published at the end of the report. 1,002 budgets for the working class families in Nagpur and 507 budgets for working class families at Jubbulpore were collected between September 1926 and January 1927 for compiling cost of living index numbers for these two centres.

Trade Unions

TRADE UNIONS.

The history of trade unionism in India is a history of recent years. It was not until 1918 that labour had begun definitely to organise itself. Previous to that year very little effort appears to have been made to establish organs of labour. The earliest association of workers in India was the Amalgamated Society of Railway Servants of India and Burma which had been registered under the Indian Companies Act and its main activities were in connection with the various benefits connected with the railway. It was Legal Defence Society in its name. A branch of it came into force in 1919. The Amalgamated Society of Indian Trade Unionists of India and Burma, this Association was established under the Indian Companies Act and its main activities were in connection with the railway. It was Legal Defence Society in its name. A branch of it came into force in 1919. The Amalgamated Society of Indian Trade Unionists of India and Burma, this Association was established under the Indian Companies Act and its main activities were in connection with the railway. It was Legal Defence Society in its name. A branch of it came into force in 1919.

which they really were, was the definitely hostile attitude of the employers to all combinations of their employees. It was not until the passage of the Indian Trade Unions Act which made it morally obligatory on employers to recognise those unions of their employees which had registered under the Act, that a change in the angle of vision was noticeable.

Nature of leadership—The Indian Trade Union movement, in its early beginnings, was essentially an economic one and to regard labour unions as being engineered solely by politicians as the result of their propaganda is to misread the origin of this movement. The Indian workman is predominantly illiterate and has even now few leaders from his own class to whom he can turn for guidance. In consequence, trade unions in India have been led by middle class men especially professional lawyers and others who have not perhaps in all cases made a distinction between economic and political considerations. In the words of Mr. A. R. Burnett Hurst, social workers did not take the initiative but allowed the lawyer-politician class to capture and control these bodies. Many of the so-called leaders of Indian Labour who were drawn from the lawyer-politician class often exploited the ignorance and credulity of the labour force for their own material advantage or for the propagation of their pet political doctrine in addition to looking after the welfare of the labourers. There were, however, several notable exceptions. Leaders like Mr. N. M. Joshi, Dewan Chaman Lal, the Rev. C. F. Andrews, Mr. M. K. Gandhi, Mr. V. V. Giri, Mr. B. Shri A. Rao and Miss Anasuya Sarabhai endeavoured to create unions for the benefit of the workers and for the general improvement in the conditions of life and work of the labouring classes. During the last few years, however, the principles of communism have been disseminated amongst the masses of India by the members of the Workers and Peasants Party which is an agent in India of the Communist International. The Communist agents took advantage of the economic unrest prevalent in the country early in the year 1928 and usurped the leadership of the working classes within a short period of time and were able to assume control over the executive of the principal textile and railway unions in Bombay, Madras and Bengal. The Communists captivated the minds of the workers by painting the existing conditions as black as possible and contrasting them with a supreme state of wealth and happiness which is promised under the regime of a dictatorship of a workers' proletariat. The discontentment amongst the workers over conditions of work has been aggravated by the incessant preachings of revolutionary doctrines. The credulity of the Indian labourer has been of great advantage to these emissaries of revolution in creating in him a class hatred against the employers and also instilling in his mind an abhorrence for the Government established by law in the country. These agitators, occupying positions of vantage, have instigated disastrous strikes in pursuance of purely political ends often with a callous disregard of the subsequent sufferings and losses incurred by the workers and the community.

The year 1918 may be said to be a landmark in the history of the Indian Trade Union movement for from that year onwards there has been a more or less steady growth of trade unions despite the inevitable fluctuations in their prosperity. The economic circumstances of the time must be regarded as the dominant factor contributing to the establishment of trade unionism in India. In the two years following 1918 the epidemic of industrial strife assumed serious proportions and reached a climax towards the close of the year 1920. The number of labour unions also increased very rapidly and unions were formed of workers in all possible industries and occupations. Most of these unions were, however, merely strike committees brought into existence either before or after particular strikes in order either to engineer or to conduct them. These committees were either dissolved as soon as their purpose was served or remained dormant until another strike in the trade broke out. Most of the remaining unions formed during the period 1918-20 were unstable and nearly 75 per cent of them died an early death in the following year. There was a definite check to the progress of the trade union movement in India during the next two or three years. But although individual unions collapsed as rapidly as they were formed the movement itself showed signs of permanence and vitality.

Perhaps the most important factor which retarded the growth in the movement immediately following the successes which met the earlier formations or strike committees, indicated by

The sanity and sobriety of moderate leadership have no great attraction for the large majority of the labourers. The moderate leaders have, however, been fighting their battles for leadership with the extremist revolutionaries, and were for a time successful in keeping the latter under control. At the moment of writing, it has become impossible for the moderates and the avowed Communists to work shoulder to shoulder in the labour movement, and a split has occurred between the two, the Unions standing for constitutional progress rallying under the banner of the Moderates with those in favour of Communist principles accepting the leadership of the Red Flag Organisations.

Progress of Trade Unions since 1918—The trade union movement spread to various industries and occupations in India during the years following the Armistice, but a number of them passed out of existence very soon after they were started. The more stable Unions were of clerks, railway workers, postal employees and seamen. The peculiar feature of the trade union movement in India is that it did not in the early stages of its progress make much headway in the more important manufacturing industries and this constituted a weak point in the movement. Whereas in other countries, the clerical employees organised themselves on the

model of the industrial workers long after the latter had well organised themselves in strong Unions, in India the former have come up if not first, at least simultaneously with industrial unions and have established themselves more permanently.

The following figures illustrate the growth of Trade Unions in the Bombay Presidency —

| Year | No of Unions | No of Members |
|------|--------------|---------------|
| 1922 | 22 | 51,472 |
| 1923 | 19 | 46,037 |
| 1924 | 36 | 52,227 |
| 1925 | 38 | 49,318 |
| 1926 | 50 | 74,875 |
| 1927 | 72 | 87,340 |
| 1928 | 94 | 108,072 |
| 1929 | 99 | 106,748 |
| 1930 | 93 | 110,791 |

The distribution of the membership as at 1st September 1930 by classes of industries is as follows —

| Class of Industry | No of Unions | Membership | Percentage of membership to total |
|--|--------------|------------|-----------------------------------|
| Textiles | 11 | 24,695 | 20.6 |
| Railways (including railway workshops) | 15 | 30,233 | 32.7 |
| Seamen | 3 | 30,265 | 25.3 |
| Posts and Telegraphs | 31 | 8,815 | 7.4 |
| Municipal | 7 | 2,892 | 2.4 |
| Miscellaneous | 26 | 13,891 | 11.6 |
| Total | 93 | 110,791 | 100.0 |

There are in addition two federations of Postal Unions, one of Railway Employees' Unions and a fourth which is a Central Union governing a number of individual Unions of textile workers in Ahmedabad. (For the constitution, membership and other particulars regarding these organisations, reference may be made to the issues of the *Bombay Labour Gazette*). The Central Labour Board and the Bombay Trades Council which had been included in the list of Federations in the Bombay Presidency are now defunct.

The Punjab has no heavy concentration of industrial labour and consequently the extent of organisation among both employers and employed is up to the present little. There is, however, a vague striving among the employed towards co-operation and combination especially for the purpose of demanding better remuneration and considering the question of resorting to direct action for enforcing their demands on their employers. No Communist influence has been

noticeable in the Punjab where industrial disputes have been stated to have occurred as a result of the normal antagonism between employers and employed. The only large employers of labour in the Punjab are the N-W Railway Administration, and four out of the 16 registered Unions are of the employees of the various departments of the N-W Railway and cover, in all, 5,436 members.

In the United Provinces the number of Associations of workers is rather small, compared to its industrial importance. There are in all about 8 Unions, all of recent growth. Some of the Associations formed during the general upheaval following the War and especially during the days of Non-Co operation have since died or become moribund. Organised labour forms a very small proportion of the total. Organisation of labour outside Cawnpore is almost non-existent and even in Cawnpore only about 10 per cent of the labour is organised. There has been

ALL-INDIA LABOUR ASSOCIATIONS

The All-India Railwaymen's Federation—This Federation was first organized in 1920 and was the first of its kind in India. It was formed by the merger of the Indian Railwaymen's Federation and the Indian Railwaymen's Association. The Federation has a membership of about 1,00,000 and is the largest labour organization in India. It has a wide representation in all the railway zones of the country and is active in the defence of the interests of the railwaymen. It has a strong financial position and is able to support its members in their struggles. It has a long record of successful action in the defence of the interests of the railwaymen. It has a strong financial position and is able to support its members in their struggles. It has a long record of successful action in the defence of the interests of the railwaymen.

The National Union of Railwaymen of India and Burma was started by the amalgamation of the Indian Railwaymen's Federation and the Indian Railwaymen's Association. It was formed in 1920 and has a membership of about 1,00,000. It is the largest labour organization in India and is active in the defence of the interests of the railwaymen. It has a strong financial position and is able to support its members in their struggles. It has a long record of successful action in the defence of the interests of the railwaymen.

registered as a Trade Union. It has a membership of over 2,000 employees.

The All-India and Burmah Covenanted Non-Gazetted Railway Services Association—This Association, whose membership is limited to covenanted Europeans employed as foremen in railway workshops in India, was started in October 1926 with the object of securing for its members the benefits of the ILO Commission's recommendations. It submitted a memorial to the Viceroy on this question in November 1926. It has a membership of about 200 employees scattered all over India and has its Head Office in Bombay. The Association registered with the Registrar of Trade Unions, Bombay Presidency, in March 1928.

The All-India Trade Union Congress—This organization was inaugurated in 1920 for two main purposes: (1) to co-ordinate the activities of the individual labour unions in India which till then remained inchoate and were unable to take concerted action and (2) to recommend workers' delegates to the International Labour Conferences. When the Government of India had to select a Labour

representative to attend the Washington Conference in 1919, there was no representative body of labour in India to be consulted and they therefore appointed Mr N M Joshi as the Workers' Delegate. In order, therefore, that responsible Labour opinion in India might have a voice in the selection of the delegates to the International Labour Conferences, the All-India Trade Union Congress was organised and the first session of the Congress was held in Bombay on the 31st October 1920. Eight hundred delegates from different parts of India were present and sixty Unions were affiliated and 42 others expressed their sympathy with the Congress. It became a central organisation of the trade union movement in India but from the beginning it had a strong political colour. Its presidents and secretaries have all been politicians first and labour leaders next, with the exceptions of a few persons like Mr N M Joshi. The Congress appointed itself a permanent body to meet once a year. It has a definite constitution, an elected Executive to carry on its work, and Provincial Councils which, under the Executive, are responsible for co-ordinating the work in the respective provinces. The main object of the Congress is "to co-ordinate the activities of all the labour organisations in all the provinces in India and generally to further the interests of Indian labour in matters economic, social and political. It may also co-operate and federate with organisations of labour having similar objects in any part of the world."

The Executive Council of the Congress consists of a Chairman, the Vice Chairman or Vice Chairmen, the Treasurer, the General Secretary or General Secretaries, the Secretary or Secretaries and the Assistant Secretary or Assistant Secretaries as ex-officio members and not more than ten additional members including the ex-Presidents of the All-India Trade Union Congress, elected at the annual session of the Congress and the representatives elected by the affiliated unions on the following basis —

- 1 Representative for unions with a membership upto 1,000,
- 2 Representatives for unions with a membership between 1,000 and 3,000
- 3 Representatives for unions with a membership between 4,000 and 5,000
- 4 Representatives for unions with a membership above 5,000

The individual Unions affiliated to the Congress are conceded full autonomy with regard to the management of their own affairs according to their rules.

The second Session of the Congress was held in 1921 at Jharia under the Presidentship of Mr Joseph Baptista. The third Session was held at Lahore in 1923 with Mr C R Das as President. The fourth Session held at Calcutta in 1924 was also presided over by Mr C R Das. Out of the 43 resolutions passed at this Session some dealt with the recruitment of Seamen and their eligibility for securing compensation under the Workmen's Compensation Act. The fifth

Session was held in Bombay in 1925 with Mr Dhundraj R. Thengdi of Nagpur in the chair. Mr V. V. Giri of Berhampur was the President of the sixth Session held in Madras in 1926. Delhi was the centre where the seventh Conference of the Congress was held in 1927 and the President was Rai Sahab Chandrika Prasad Dewan Chaman Lal, M L A, was the President of the Cawnpore Session of the Congress held in 1927. The ninth Session was held in 1928 at Jharia with Mr M Daud in the chair. It is significant that at this Conference Pandit Jawaharlal Nehru moved a resolution protesting against Imperialism.

The tenth assembly of the Trade Union Congress which met at Nagpur in 1929 under the presidentship of Pandit Jawaharlal Nehru will remain as the most important land-mark in the history of organised labour in India. It marked the culmination of a long period of mischievous activity inspired by Moscow and fomented by Communist Agents in India resulting in a split between the genuine trade union leadership on the one hand and the votaries of communism on the other. The fundamental issue upon which the split in the Trade Union movement occurred was whether the labour movement in India shall be inspired and conducted for the betterment of the industrial workers or whether it shall be utilised as a means to promote and bring about revolution in the country. The proceedings at the Session made it impossible for the rival forces to carry on any longer under a common organisation. The reasons contributing to the ultimate split were as follows — The Bombay Girni Kamgar Union and the G I P Railwaymen's Union applied for affiliation, the former with a membership figure of 54,000 and the latter 45,000. The Bombay Girni Kamgar Union could produce no audited documents as required. However it was admitted a member on the basis of a membership of 40,000. The G I P Railwaymen's Union was affiliated on a strength of 30,000 members. This meant that a large part of the voting power was vested in the representatives of these two Unions which were of communist persuasion. The Executive of the Congress was also captured by the revolutionaries, and resolutions for the boycott of the Royal Commission on Indian Labour, affiliation of the Congress to the League Against Imperialism, the appointment of the Workers' Welfare League, a Communist organisation in England as Agents of the Congress for Great Britain and the boycott of the International Labour Conferences at Geneva were passed both by the Executive Committee and the open session of the Congress. The moderate leaders of labour, including Messrs N M Joshi, V V Giri, B Shiva Rao, R R Bakhale and Dewan Chaman Lal seceded from the Congress and set up a separate federation under the name of the 'All India Trades Union Federation' in order to co-ordinate the activities of non-communist Trade Unions in India. Endeavours made to draw the seceders back into the fold of the All-India Trade Union Congress have not met with any success. The Labour Unions in Ahmedabad which draw their inspiration mainly from Mr M K Gandhi and are the best organised and most successful trade unions in India have not during the ten years of the Trade Union move-

Trade Unions

ment in India shown any desire to become affiliated to the Congress

The eleventh Session of the Trade Union Congress held in Calcutta in July 1931 led to further disintegration in the ranks of labour and once again the Communist from Bombay were responsible. The Girni Kamgar Union had split into two parts both bitterly opposed to each other. One led by Mr S V Deshpande, General Secretary of the Trade Union Congress and the other by Mr G H Kandalkar, President of the G K U and a Vice President of the Congress and both groups claimed to be the Girni Kamgar Union and therefore entitled to vote at the Congress. The President Mr S C Bose a Congress politician decided in favour of Mr Kandalkar whereupon Mr Deshpande and the representatives of a few other unions broke away from the Congress with the result that this organisation which should guide and control the Trade Union movement in India is a useless and effect body with no influence and trifling membership.

Trade Union Legislation

In 1920 a company owning a mill whose workers were on strike brought a suit against the leader of the local labour union which was conducting the strike and others, seeking to restrain them from inducing the plaintiffs workmen to break their contracts and suing for damages for their actions in this respect. The Madras High Court to whom the suit was referred gave their decision granting an *interim* injunction restraining the defendants from inciting the plaintiffs employees to continue the strike. The case was eventually withdrawn but the proceedings suggested that in the absence of legislation, even legitimate trade union activity was attended by considerable peril. As a result of a resolution moved by Mr N M Joshi and accepted by the Legislative Assembly in March 1921, Government were committed to take steps as soon as practicable to introduce such legislation as might be necessary for the registration & protection of Trade Unions. The Government of India, accordingly formulated certain tentative proposals and circulated them for eliciting public opinion. The opinions expressed were no means unanimous, some considered the proposed legislation premature, while some others realised that legislation was necessary but at the same time considered Trade Unions as a pernicious and dangerous growth which should be rigidly controlled, and others again urged that sufficient protection should be granted to them. In August 1924, the Government of India circularised a draft Bill for opinion. The Bill conferred certain privileges only on registered Trade Unions and left the question of registration at the option of Trade Unions themselves. Provision was also made to ensure that the funds of a registered Trade Union are not expended on causes in which the bulk of the members have little interest. A regular audit of the funds was proposed to be made compulsory and the manner in which the executive should be composed was also provided for.

A number of amendments were made by the Select Committee and in the Legislative Assembly. A clause permitting registered Trade Unions to maintain funds for political purposes was added. The provision was on the model of the British Law on the subject and those members who contracted out of the liability to subscribe should not be compelled to contribute to the Political Fund nor would failure to contribute involve any disability or disadvantage except in so far as the control and management of the Political Fund was concerned. The Bill was passed on the 8th February and received the assent of the Governor General on the 25th March 1926. It came into effect from the 1st June 1927.

Mr N M Joshi introduced in the Legislative Assembly on the 9th February 1928, a Bill to amend Section 43 of the Indian Penal Code in order to extend to the officers and members of unregistered Trade Unions the protection afforded by Section 17 of the Indian Trade Unions Act, 1926, which lays down that "no officer or member of a registered Trade Union shall be liable to punishment under sub section (2) of section 120B of the Indian Penal Code, in respect of any agreement made between the members for the purposes of furthering any such object of the Trade Union as is specified in Section 15, unless the agreement is an agreement to commit an offence. The Assembly, however, threw out the Bill.

A Bill was introduced in the Legislative Assembly on the 4th September 1928 with a view to amending Section 11 of the Indian Trade Unions Act, 1926. It was pointed out in the Statement of Objects and Reasons that the existing section 11 of the Act admitted of doubt in two respects namely (1) It did not indicate clearly whether the first appeal lay to the judge appointed for the area within which the Registrar's office is situated or to the judge appointed for the area within which the head office of the trade union is situated. The amendment is intended to make it clear that the latter is the competent court, (2) It did not indicate clearly what judge might be appointed to hear appeals in the Presidency towns and in Rangoon. The amendment is designed to make it clear that in such areas the appeal lies to the High Court and there is no second appeal. The opportunity has also been taken to define clearly the powers of the High Court in second appeals.

The Bill was passed and received the assent of the Governor-General on 25th September 1928.

Working of the Act—The Act has now been in operation for more than 3½ years. Full information regarding the total number of Unions registered in all Provinces in India is not available. The following table, however, shows the number of Unions registered and the character of the membership as at 1st April 1930 for those provinces for which information is available.

| | Total
No of
Unions
registered | Membership
of registered
Trade Unions |
|-----------------------------|--|---|
| | | Total |
| Bombay * | 40 | 75,173 |
| Bengal | 19 | 55,268 |
| Burma | 1 | 100 |
| Central Provinces and Berar | 7 | 3,49 |
| Madras | 12 | 45,346 |
| N W F Provinces | Nil | Nil |
| Punjab | 16 | 26,318 |
| United Provinces | 5† | 12,738 |

* The figures are for 1st September 1931 † Two Unions did not furnish figures for membership

No association of employers has yet applied for registration. No Trade Union was registered in the provinces of Assam, Ajmer-Merwara, Baluchistan, Coorg and Delhi, up to the end of March 1929. The great inducement to register has been the predisposition of employers generally to recognise Unions that are registered in the case of Associations of Government Servants one of the conditions of their recognition by Government was that they should get themselves registered when the Trade Unions Act was

brought into force. In view of the fact, however, that certain difficulties have arisen in connexion with the application of the Act to Government servants, the question is under the consideration of the Government of India who have not yet formulated any definite conclusions. Pending the consideration of this question, Government have relaxed the provision contained in the existing rules for the recognition of Associations of Government servants which requires them to register under the Act.

INDUSTRIAL DISPUTES.

The weapon of the "strike" in industry first came into prominence in India during the period immediately following the close of the War when the majority of the strikes as shown in the Introductory Section were designed to secure increases in wages commensurate with the rise in the cost of living. The epidemic of industrial strikes which characterised the period 1919-20 reached a climax in the winter of 1921. During this period strikes took place purely from economic causes and most of them ended successfully from the view point of the workers, after a short struggle. After this period, however,

they tended to be more prolonged and less successful and, partly owing to political causes, there were a number of fairly serious disputes in public utility services. In more recent years the machinations of the Communists have been increasingly responsible for the calling of general strikes and their undue prolongation.

Extent of Disputes—All-India statistics of industrial disputes for each quarter and for each year have been compiled and published since 1920 by the Government of India in the Department of Industries and Labour.

The following tables show the number of disputes which occurred during the six years 1925-30 in each province and in each class of industry respectively —

| Provinces | No of disputes in | | | | | |
|---------------------------|-------------------|------|------|------|------|------|
| | 1925 | 1926 | 1927 | 1928 | 1929 | 1930 |
| Bengal | 43 | 57 | 34* | 60 | 35 | 34 |
| Bombay | 69 | 57 | 54 | 111 | 70 | 75 |
| Madras | 4 | 2 | 19* | 7 | 12 | 11 |
| Central Provinces & Berar | 6 | 4 | 2 | 1 | 2 | 1 |

* One strike extended to three provinces

† Includes 3 disputes in Delhi

- (2) that the results of the working of the mill industry as a whole for the year 1923 were such as to justify the contention of the millowners that the profits did not admit of the payment of a bonus

Bombay Strike Enquiry Committee—The third *ad hoc* Committee to be appointed in the Bombay Presidency was the Bombay Enquiry Committee under the Chairmanship of Sir Charles Fawcett, Judge of the Bombay High Court, in connection with the general strike of the cotton mill workers in Bombay city of the year 1923 in pursuance of the agreement arrived at between the Bombay Millowners' Association and the Joint Strike Committee at a conference held under the Chairmanship of the Hon Sir Ghulam Hussain Hidayatullah, General Member of the Government of Bombay on the 4th October 1923

This Committee sat for a continuous period of five and a half months and its Report was published on the 26th March 1929

Some of the conclusions and recommendations of the Bombay Strike Enquiry Committee were as follows —

- (1) The proposals of the Millowners' Association (a) for standardization of wages, duties and numbers of operatives in a mill, and (b) for Standing Orders for the operatives about the conditions of their employment were in the main fair and reasonable
- (2) While there was justification for the Association's proposal to make a cut of $7\frac{1}{2}$ per cent in weavers' wages, there were reasonable objections to be urged against its adoption in the present circumstances, and it was recommended that it should be dropped by the Association provided the Labour leaders undertook to co-operate in working the scheme for the standardization of wages
- (3) That part of the standardization scheme which is called the "Rational" or "Efficiency" system and which aims at reducing the number of operatives employed in mills while raising their wages and providing conditions favourable for the extra efficiency expected from the operatives was fair and reasonable
- (4) With regard to the Seventeen Demands submitted by the Joint Strike Committee the some of demands which were considered to be fair and reasonable were—
 - (a) That the Millowners shall not vary any of the present conditions to the disadvantage of the workers before securing the approval of the workers through their organisations
 - (b) That the Millowners' Association shall not permit its individual members to vary the conditions of service to the disadvantage of the workers without the sanction of the Association
 - (c) The rates of new varieties shall be fixed by the Millowners' Association

in consultation with the representatives of the Workers' organisations

- (d) Notices in vernacular showing the rates of piece work in detail should be posted in the Departments for the information of the workers.
- (e) That there should be no victimisation of men who had taken part in the strike or any Union activities. Most of these were eventually conceded by the Millowners' Association
- (5) The following demands were held to be unfair and unreasonable—
 - (a) The wages of those workers whose average monthly wage is less than Rs 30 should be raised substantially
 - (b) The newly introduced system of compelling the workmen (1) to take out and present tickets of attendance and (2) to clean the machinery daily should be discontinued
- (6) The recommendations of the Committee for alleviating unemployment consequent on the introduction of efficiency methods of work were as follows —
 - (a) The millowners should set up some machinery for taking note of all cases where workers are discharged on account of reduction of staff, and help them as far as possible to get suitable employment either in some other mill or in some other industry
 - (b) The Millowners' Association should consider the advisability of a scheme for the payment of a gratuity to a worker, which may amount to say, four weeks or six weeks wages according to his length of service payable in suitable cases to charged employees who may need help during the waiting period while they are seeking employment. The formation of an Out-of-Work Donation Fund on a voluntary basis to be created by a system of setting aside a contribution by the Millowners of one anna per operative per month to which fund the operatives through their representatives should be invited to contribute one anna or at least half an anna per head per month was suggested
- (7) The Trade Unions should combine to arrange for the assistance of an expert technical adviser in dealing with disputes arising under the Standardisation Scheme
- (8) In view of the fact that several matters required adjustment in connexion with the scheme for wage standardisation after it had been brought into operation and with a view to avoiding strikes and lockouts, machinery was provided by "Mediation Rules" agreed to by both sides for setting up joint Committees to enquire into disputes arising under the scheme and to endeavour to arrange for their settlement

MEDIATION RULES

The first Committee to be appointed in the Bombay Presidency was a Court of Enquiry appointed under the Trade Disputes Act in connection with the general strike of cotton mill operatives in Bombay City of 1929. This will be dealt with below under the heading 'Trade Disputes Act'.

Bengal—Several special Committees were appointed by the Government of Bengal during the period of intense industrial unrest during the years 1920-21.

(1) As the result of a strike of taxi drivers and professional drivers of private cars in Calcutta which was caused by objections to certain rules, particularly (a) a new rule requiring medical examination of applicants for professional driver's license, and (b) another rule forbidding the carrying of attendants in taxis, Government appointed a Committee of Enquiry into the exist-

ing regulations and the control of taxi cabs generally. The strike lasted from the 12th to the 30th January 1921 and ceased as a result of the institution of the Enquiry. The Committee made a number of proposals for amendments in the existing regulations. These proposals were ultimately accepted and brought into effect on the 12th October 1921.

(2) As the result of a strike of drivers and conductors of Calcutta and Howrah tramways, which lasted from the 27th January to the 24th February 1921 Government appointed a Committee of Enquiry after the resumption of work by the strikers on the 8th March 1921. The men resumed work towards the end of February on conditions (a) that the Calcutta Tramways Company would investigate their grievances and announce their decision within a week, and (b) that if the men were dissatisfied with the Company's decision, Government would appoint a Committee of Enquiry. There was general agreement between the Company and the men's representatives in regard to the majority of the Committee's recommendations. Some, however, of the Directors of the Company did not accept the terms. Another strike of the tramway employees of a much more protracted character broke out in 1922. It lasted from 20th December 1922 to 27th January 1923. No Committee of Enquiry was appointed, although the representatives of the men raised several points which arose from the previous Enquiry. Work was resumed unconditionally.

(3) During a strike on the light railway of Messrs. Martin and Company in the 24 Parganas and Howrah which lasted from the 15th June to the 2nd July 1921, a special Conciliation Board was constituted by Government by a special resolution at the joint request of the employers and the employees concerned. The result of the Board's efforts was a compromise on most of the points raised by the workers, and as a result of the Board's recommendations it was agreed that joint works committees should be set up on the Howrah Amta and Howrah-Sheikhali lines. Works Committees were established soon after the Board's report was published, but they failed to function owing to the men's indifference.

(4) The Bengal Legislative Council passed a resolution on the 4th March 1921 to the effect that Government should appoint a Committee to enquire into the general causes of the prevailing unrest and to suggest remedial measures. The report of the Committee was published on the 18th June 1921. The main recommendations of the Committee were—

- (a) the establishment of joint works committees in industrial concerns,
- (b) non intervention of Government in private industrial disputes, which it was considered, should be settled by voluntary conciliation,

(1) As the result of a strike of taxi drivers and professional drivers of private cars in Calcutta which was caused by objections to certain rules, particularly (a) a new rule requiring medical examination of applicants for professional driver's license, and (b) another rule forbidding the carrying of attendants in taxis, Government appointed a Committee of Enquiry into the exist-

- (c) the constitution by Government of a conciliation panel to deal with disputes in public utility services, and
- (d) the appointment by Government of special conciliation bodies in the case of private industrial disputes, if both parties desired outside intervention

As the result of the recommendations of this Committee, a conciliation panel was constituted under Government resolution dated the 20th August 1921. The panel contained thirty names, and was composed on a representative basis, leading public bodies being asked to recommend persons to serve on it. The panel was reconstituted every year till 1920, when it was superseded by the Trade Disputes Act. Several applications for Government intervention were received during the period of the panel's existence but in no case did Government consider that intervention was justified.

The Government of Bengal agreed with the Committee's view that there was no reason why voluntary conciliation boards, wisely constituted, should not achieve a large measure of success in labour disputes affecting public utility services, where the parties had come to a dead-lock, and a solution of the disputes could only be found in the intervention of outsiders. The panel was intended to deal only with disputes affecting public utility services in Calcutta and its neighbourhood. In the settlement of ordinary labour disputes not directly affecting the public, the Committee held that it was not ordinarily the duty of Government to intervene in such disputes either directly or indirectly, but if both parties express a desire that their differences should be investigated by an impartial authority, the Governor in Council should be prepared to establish a conciliation board to deal with the matter, or to take such other action as might be suitable in the circumstances of the case.

TRADE DISPUTES LEGISLATION.

The history of the various proposals for legislation providing machinery for the prevention and settlement of industrial disputes in India covers a period of about ten years. The findings of the Industrial Disputes Committee appointed by the Government of Bombay in the year 1921 in pursuance of a Resolution moved in the Bombay Legislative Council for the appointment of a Committee "to consider and report on the practicability or otherwise of creating machinery for the prevention and early settlement of industrial disputes" has already been dealt with above. Mention has also been made of the action taken by the Government of Bombay under circumstances which led to its abandonment owing to the Government of India circularising a draft Bill as an All-India measure. The Bill circulated by the Government of India in August 1924 was very wide and comprehensive in scope and extent.

Nothing further was heard about this Bill until the end of 1925 when His Excellency the Viceroy in a speech at the Annual Meeting of the Associated Chambers of Commerce of India and Ceylon, at Calcutta, said "The question of providing means of conciliation of trade disputes has been thoroughly explored but it would be premature to legislate on this question until the Trade Union Bill has become law." The Trade Unions Act was passed in the Legislative Assembly in March 1926 and was brought into operation with effect from the 1st June 1927.

In August 1928 the Government of India published their second Bill making provision for the investigation and settlement of trade disputes and for certain other purposes. This Bill was introduced in the Legislative Assembly for a motion for circulation on the 21st September 1928. The Bill differed in several important respects in comparison with the Government of India's original Bill of 1924. The main part of the Bill falls into three parts. Clauses 3 to 14 of the 1928 Bill related to the

establishment of tribunals for the investigation and settlement of trade disputes. Thus part of the Bill was based generally on the British Industrial Courts Act of 1910 and its detailed provisions were adopted for the most part from clauses in that Act. The main difference was that, whereas the British Act sets a Standing Industrial Court, the Conciliation Boards which the Bill proposes to establish were intended to be appointed *ad hoc* like the Courts of Inquiry, in order to deal with particular disputes. The object of Courts of Inquiry which would ordinarily be composed of persons having no direct interest in the disputes would be to investigate and report on such questions connected with the dispute as might be referred to them. The objects of Boards of Conciliation which would ordinarily include representatives of the parties to a dispute would be to secure a settlement of the dispute. Provisions were made so as to enable both Courts of Inquiry and Boards of Conciliation to enforce the attendance of witnesses and the production of documents. Neither party would be under any obligation to accept the finding of the Court or the advice of the Board, and in cases where the dispute is not brought to an end during the deliberations of the tribunal that had been appointed, reliance was to be placed on the force of public opinion which would be enabled by the publication of the report of the tribunal to arrive at just conclusions on the merits of the dispute.

The second part of the Bill consisted of clause 15 which related to public utility services. In accordance with the definition of "Public Utility Services" in clause 2 of the Bill, Clause 15 would be applicable to such railway services as would be notified by the Governor-General in Council. The clause made it a penal offence for workers employed on monthly wages in public utility services to strike without previous notice and also provided heavy penalties for persons abetting such an offence. The clause was based on the principle that

persons whose work was vital to the welfare of the community generally should not be entitled to enter into a strike before sufficient time had been given to examine the merits of their grievances and to explore the possibilities of arriving at a possible settlement. Provisions of a somewhat similar type already exist in the Indian Post Offices Act, in a number of Municipal Acts in India, and the principle is one which is widely accepted in other countries.

Clauses 16 to 20 of the Bill contained certain special provisions relating to illegal strikes and lock-outs. These clauses followed closely the provisions of sections 1, 2 and 7 of the British Trade Disputes and Trade Unions Act, 1927. They were to be applicable only in the case of the strikes and lock-outs which satisfied both of two conditions: in the first place, the strike or lock-out must have other objects than the mere furtherance of a trade dispute within the industry to which the strikers or employers belonged, and, in the second place, the strike or lock-out must be designed to coerce Government either directly or by inflicting hardship on the community. If these conditions were satisfied, the strike or lock-out would become illegal. Persons furthering the strike or lock-out were liable to punishment and would be deprived of the protection granted to them by the Indian Trade Unions Act, while persons refusing to take part in it would be protected from Trade Union disabilities to which they might otherwise be subjected.

The motion for circulation was adopted in the Legislative Assembly and the Bill was circulated to all Local Governments for opinion. Some Provincial Governments recommended that questions connected with picketing and intimidation of the type which were entirely responsible for the undue prolongation of the general strikes in the cotton mills of Bombay (city) of the years 1928 and 1929 and the rioting in Bombay in the year 1929, should also be covered. The Bill was referred to a Select Committee of the Legislative Assembly in February 1929.

The Select Committee decided to limit the duration of the Act to five years. In connection with the definition of the term "Public Utility Services" they were of the opinion that the wide power enabling the Government to declare any industry, business or undertaking to be a public utility service was undesirable as well as unnecessary and the provision made for this in the draft Bill was omitted. Various proposals designed to lay upon the Government a definite obligation to convene a Court of Inquiry or a Board of Conciliation in cases where one of the parties so required were considered. But the Committee thought that unless both parties were agreed in desiring a reference it would be useless to fetter the discretion of the Government as to the time at which the matter was reported for action under clause 3. At the same time they held that no option should be left to the Government to refuse to appoint a Court or Board where the Government was assured that both parties were agreed as to the necessity as well as to the form which it should take. They therefore considered it necessary to provide that in every case a Court of Inquiry, where it consisted of one or more persons, should not

include persons having an interest in the dispute or in any industry affected by it, and in this connection the Committee proposed a further definition of the term "An independent person". The clause relating to the publication of the findings of Courts and Boards was maintained on the lines of the English Act so as to make it quite clear that every report of a Court or Board, whether final or *interim*, must be published and that only the publication of such information or evidence as the appointing authority thought fit should be left to its discretion. It was considered inadvisable to forbid the representation of parties before Courts and Boards by legal practitioners subject only to exceptions and they redrafted the clause in such a manner as to permit that such representation would ordinarily be permissible subject, however, to such conditions and restrictions as might be provided by the rules.

The Select Committee accepted the principle underlying the clause in connection with strikes in public utility services but they held that the clause as originally drafted was open to certain criticisms. For example, it was pointed out that many persons are actually employed upon a daily wage which is in practice paid monthly, also that the clause as provided would appear to penalise abstention from work on the part of a particular individual and further that the clause was one-sided and inflicted no penalty upon an employer who locks out his workmen. The latter point was considered as one which should certainly be met as by the nature of his employment a casual or day-to-day labourer must be entitled to cease work at any moment and be similarly liable to dismissal and it was agreed that he should therefore be excluded altogether from the operation of this clause. The Committee adopted a suggestion made by the Government of Bombay which made it clear that the cessation of work must be in the nature of a strike as defined in the Bill and it was provided that in order to render it a penal offence the strike must be in breach of a definite contract between the employer and the workmen. The Committee added a collateral provision penalising an employer for locking out his workmen in breach of any contract. The Committee adopted the clause in connection with illegal strikes but with some amendments which in their opinion, would restrict its scope without materially impairing its effectiveness. In sub-clause 2 of this section they made it clear that for the application of money to be illegal it must not merely tend to further or support the strike but have the direct effect of so doing. This was intended to exclude a case in which money is spent upon the relief of the dependants of strikers. A further sub-clause borrowed from a similar provision from the English Act of 1927 explaining the circumstances in which a group of workmen should be deemed to be within the same trade or industry was added. The penalties provided for the instigation of an illegal strike were modified. With regard to clause 20 of the draft Bill the Committee held that there was no sufficient reason for giving an option to the Government to impose for injunctive restrictions on the expenditure of funds of a Trade Union in an illegal strike. It was

illegal and the persons properly interested in seeing that the funds were not mispent are the members of the Trade Union concerned. The Committee were of the opinion that the Bill had not been so altered as to require republication and they recommended that it should be passed as duly amended by them.

The Select Committee as such did not deal with the question of making provision for picketing and intimidation in their report but in a minute of dissent Sir Victor Sassoon, Bart, stated that the alteration of the law relating to picketing was one for which, in his opinion, the time was ripe. Picketing of any kind should be rendered illegal while a Court or Board is sitting and the law on picketing at any time should be altered to render it illegal at or near a workmen's house as under the English Law. There appeared to be some doubt as to whether legislation of this kind should take place in this Bill or by an Amending Bill to section 503 of the Indian

Penal Code. It had been stated that if an amendment of this kind were passed in the Select Committee it would delay the Bill. As he did not desire to delay the acceptance of the provisions of this Bill he did not press the point which was raised by other members of the Select Committee. Sir Victor Sassoon, however, thought that suitable action should be taken by Government either when the Bill came up before the House or by bringing out an amending Bill to the Indian Penal Code to deal with this most important and necessary point. The action taken by the Government of Bombay in connection with the passing of an Intimidation Act has been dealt with in the chapter on Industrial Disputes.

The Bill as amended by the Select Committee was passed by the Legislative Assembly on the 8th April 1929 without any change and received the assent of the Governor General on the 12th April 1929.

INDIA AND INTERNATIONAL LABOUR CONVENTIONS.

The Preamble to Part XIII of the Treaty of Versailles refers to the fact that the failure of any nation to adopt humane conditions is an obstacle in the way of other nations which desire to improve the conditions in their own countries. In order to establish universal peace based on social justice, the Peace Treaty not only laid down general principles in regard to questions affecting labour which were recognised by the High Contracting Parties to be of "special and urgent importance," but also brought into being the **International Labour Organisation** which was entrusted with the task of securing, as far as practicable, the observance of these principles. The International Labour Conference has been discussing various questions connected with industrial, agricultural and maritime labour since 1919 and has recorded its findings in conventions and recommendations. The Conventions and Recommendations adopted by the Conference are not automatically binding

on the State Members, but they have to be submitted to the Legislature of each country, and this secures the regular examination both by the Executive Governments and the Legislatures of schemes which international opinion considers necessary and desirable for the amelioration of labour conditions. During the fifteen Conferences that have been held, 33 Conventions have been adopted. Out of these eleven have been ratified by India.

In addition to the Conventions dealt with above, the International Labour Conference has also adopted numerous Recommendations.

The fifteenth Conference held in June 1931 adopted a Convention for the limitation of hours of work in Coal Mines and passed a number of resolutions dealing with amongst other matters, labour conditions in the East and conditions of labour in unorganised industries and non-industrial occupations.

GOVERNMENT ADMINISTRATION.

During pre-Reform days Labour was not a question to which the Central or provincial Governments in India gave the same attention as they did to such subjects as education, health or justice. After the amendment of the Indian Factories Act of 1891 in 1911, the appointment of the **Indian Industrial Commission** in May, 1916, may be considered to be the first milestone in the progressive interest taken by Government in questions connected with labour. The active participation of India in the Great War led to the 'creation of an unprecedented opportunity' and 'the emergence of an unprecedented need' for a definite industrial policy for India as a whole. The examination of various industrial questions by the Industrial Commission included,

to a certain extent, the examination of questions connected with labour as well. Previous to this date no provincial or All India inquiries of a general character were held into conditions of labour with the exception of some quinquennial censuses into agricultural wages. No information was available in 1919 as to the rates of wages which were paid in industry, and, for that matter, very little information in this direction is available even to-day. Indian labour secured its first opportunity with her participation in the signing of the treaty of peace and her becoming a live member of the international comity of nations. The participation by India, in the first International Labour Conference held at Washington in the year 1919 made it necessary

The Bombay Labour Office

The real pioneer work in the field of labour legislation and statistics in India during the last few years has been done by the Labour Office of the Government of Bombay which was established in April 1921. In the Government Gazette announcing the establishment of this office the following were declared to be its functions:

(1) *Labour Statistics and Intelligence*—To collect and compile conditions under which labour work and collect information relating to the cost of living, wages, hours of labour, family life, strikes and lockouts, and similar matters.

(2) *Industrial Disputes*—As experience and knowledge are gained and the activities of the Labour Office develop it will promote the settlement of industrial disputes when these arise, and

(3) *Legislation and other matters relating to labour*—The Labour Office will advise Government from time to time as regards necessary legislation or the amendment of existing laws.

When the Labour Office was first started it was placed in charge of Director of Labour. The post of the Director of Labour was, however, abolished in 1926 and at present the Officer in Charge of the Labour Office is styled the Director of Information and Labour Intelligence. He is also the Registrar of Trade Unions and the Commissioner for Workmen's Compensation. In addition to the Director there are three other gazetted Officers who are styled Investigators, one of whom is in charge of the branch office at Ahmedabad. There are also three whole time lady investigators in Bombay. All investigators receive conveyance allowances. The office staff contains two Statistical Assistants, three senior clerks, eight junior clerks, two stenographers, one typist, one cashier, one despatcher, one dastar and five peons in Bombay and one peon in Ahmedabad. The activities of the office comprise (1) prices and cost of living, (2) wages and hours of labour, (3) rents, (4) economic and social conditions of various communities, (5) unemployment, (6) industrial disputes, (7) trade unions, (8) other industrial and labour intelligence, (9) international labour intelligence, (10) labour legislation, (11) the *Labour Gazette*, (12) library, and (13) office organisation.

The *Labour Gazette* has been published monthly from September 1921. It is intended to supply complete and up-to-date information on Indian labour conditions and especially the conditions existing in the Bombay Presidency, and to supply to local readers the greatest possible amount of information regarding labour conditions in the outside world. The *Labour Gazette* circulates to many different countries and is perhaps the only publication of its kind in India from which foreigners interested in labour and economic conditions in India can obtain accurate and up-to-date information. It has also hitherto been practically the only medium through which the work and publications of the International Labour Office have been made regularly available to people in India. A substantial grant is

Bengal

The Government of Bengal appointed a Labour Commission in the same year (1921) to watch and study at all times the conditions of labour particularly industrial labour. Their task is to collect and to keep Government informed by periodical reports of its movements and tendencies and of the existence of any disputes between employers and employed. The settlement of labour disputes and prevention of strikes are features of his work but his interference in such disputes is limited to tendering his office to settle them. In the case of disputes affecting the internal administration of a railway he may interfere only if both sides agree to his intervention but he must obtain the previous sanction of Government in each case. He is also the Protector of Depressed Classes in which work most of his time is occupied. On a par with the Labour Intelligence Officer, Bengal, the Labour Commissioner in Madras has also no special statistical office to deal with labour statistics and no reports have been published of any special inquiries into question connected with industrial labour in the Presidency. Since the creation of the Office the conduct of periodic censuses into agricultural wages is, however, placed in his hands.

Madras

The Government of Madras appointed a Labour Commission in the same year (1921) to watch and study at all times the conditions of labour particularly industrial labour. Their task is to collect and to keep Government informed by periodical reports of its movements and tendencies and of the existence of any disputes between employers and employed. The settlement of labour disputes and prevention of strikes are features of his work but his interference in such disputes is limited to tendering his office to settle them. In the case of disputes affecting the internal administration of a railway he may interfere only if both sides agree to his intervention but he must obtain the previous sanction of Government in each case. He is also the Protector of Depressed Classes in which work most of his time is occupied. On a par with the Labour Intelligence Officer, Bengal, the Labour Commissioner in Madras has also no special statistical office to deal with labour statistics and no reports have been published of any special inquiries into question connected with industrial labour in the Presidency. Since the creation of the Office the conduct of periodic censuses into agricultural wages is, however, placed in his hands.

allowed by the Local Government to the Labour Office for the purchase of books and the Labour Office has accumulated a very useful and fully catalogued library on labour, industrial and economic matters. The Labour Office library is open to research workers in Bombay. In addition to books, the library contains bound copies of all the more important periodicals received from Labour Ministries. International organisations and research organisations in various parts of the world

The Labour Office had conducted several special inquiries, the results of which have either been published in the form of special reports or as special articles in the *Labour Gazette*. Among the inquiries the results of which have been published in the form of reports are three inquiries into wages and hours of labour in the Cotton Mill Industry in the Bombay Presidency for the years 1921, 1923 and 1926, four reports of inquiries into family budgets three of which related to working class family budgets in Bombay, Ahmedabad and Sholapur and the fourth to middle class family budgets in Bombay City. The remaining reports dealt with inquiries into agricultural wages in the Bombay Presidency, an inquiry into deductions from wages or payments in respect of fines and an inquiry into middle class unemployment in the Bombay Presidency. Other special inquiries related to wages of peons and municipal workers, welfare works, rentals in Bombay and Ahmedabad, maternity cases among women operatives, methods of wage payments, creches, clerical wages in Bombay Presidency, incidence of sickness among cotton mill operatives, infant mortality, etc. In the *Labour Gazette* statistics are regularly published for a working class cost of living index number for Bombay, wholesale prices index numbers for Bombay and Karachi, retail food prices for five important centres in the Bombay Presidency, for industrial disputes in the Bombay Presidency and for Workmen's Compensation, prosecutions under the Indian Factories Act, accidents in factories, production of cotton yarn and cloth and the employment situation. A new working class index number has been compiled for Ahmedabad and statistics with regard to this have been published in the issues of the *Labour Gazette* since January 1930. A working class cost of living index number for Sholapur has also been published. Quarterly information is also collected with regard to all known Trade Unions in the Bombay Presidency and full information is published in the *Labour Gazette* every three months. The present staff of the Labour Office is as follows —

Director of Information and Labour Intelligence, Commissioner of Workmen's Compensation and Registrar of Trade Unions—Mr J F Gennings, Bar at-Law, J P

Senior Investigator—Mr S R Deshpande, B Litt (Oxon)

Junior Investigator and Assistant to the Registrar of Trade Unions—Mr N A Mehrban, B A

Labour Investigator at Ahmedabad—Mr A S Iyengar, B A, LL B

Senior Lady Investigator—Mrs K Wagh

Lady Investigators—Misses G Pimpalkhare and S Dabholkar

The Director of Information and Labour Intelligence has four offices under his charge: (1) The Labour Office, (2) the Information Office, (3) the Office of the Commissioner for Workmen's Compensation, and (4) the Office of the Registrar of Trade Unions. In the case of the Office of the Registrar of Trade Unions one Investigator of the Labour Office has been appointed as Assistant to the Registrar of Trade Unions and the office work is being done by a Statistical Assistant and a junior clerk from the staff of the Labour Office. The Information Office is under the administration of the Home Department. The Labour Office was under the administration of the Home Department till the year 1925, but it was transferred to the General Department and is now under the control of the Political Department. The Factories Office is under the immediate control of the Collector of Bombay and for administrative purposes under the Political Department.

Central Provinces

The Department of Commerce and Industry is the administrative authority which deals with all labour questions. The Revenue Department deals with mines. The Department of Industries under the Director of Industries is in immediate charge of all matters relating to labour. He is also Registrar of Co-operative Credit and Registrar of Trade Unions. The Factory Office is under the general supervision of the Director of Industries. There is no special Labour Office or Labour Officer in the Central Provinces but the factory staff is utilised for collecting such information on labour questions as may be required from time to time. A Board of Industries consisting of representatives of the employers and the employed has been in existence since the year 1914 and all matters affecting the interests of labour are considered by this Board. But the Board acts purely in an advisory capacity.

Other Provinces

In Burma a Labour Statistics Bureau with a Special Officer in charge was set up in 1926. This Bureau has conducted an extensive investigation into the standard and cost of living of the working classes in Rangoon. The Report of which was published in 1928. In the Punjab the Director of Industries is the administrative officer for all acts concerned with labour. In the United Provinces almost all departments of the Local Government deal with labour questions. Labour as such is with the Home Member, electricity is with the Finance Member, the factory staff is under the immediate control of the Director of Industries who is under the Minister of Education and Industries and Boiler Inspection is under the Public Works Department. The Registrar of Co-operative Societies of the United Provinces has been appointed Ex-officio Registrar of Trade Unions in the Province. In Assam the main question connected with labour is that concerning the recruitment of labour for the tea plantations from other provinces. As inter-provincial migration is a

INDIAN TRAIN SERVICE.

The distances and railway fares from Bombay to the principal centres of other parts of India are as follow —

| | Miles | 1st Class | 2nd Class. |

CIVIL AVIATION.

Civil Aviation in India is under the control of the Director of Civil Aviation, whose newly instituted Department, like the Department of Posts and Telegraphs, comes within the portfolio of the Member of the Executive Council of the Governor-General for Industries and Labour. The present holder of the appointment is Lt-Col F C Sheldermine, O B E. Eight Indians are now under training in England with a view to their future employment in the Civil Aviation Department as Aerodrome Officers, Inspectors of Aircraft and Engines, etc. These men are not being trained primarily as commercial pilots, but it is possible that some of them, if they show special aptitude and desire to adopt a pilot's career, may receive further training with this object in view. All of them receive a certain amount of training as pilots and they also go through a post graduate course at the Imperial College of Science and Technology and periods of attachment to selected aircraft works and to the London Terminal Aerodrome at Croydon. The course lasts for two years and three months, during which time the men receive scholarships amounting to £ 240 per annum. A condition of eligibility for these scholarships is that applicants must possess a B Sc degree in Engineering or Physics.

An Indian State Air Service between Karachi and Delhi was inaugurated as a weekly service in each direction on 30th December 1929. It was until 31st December 1931 operated by aircraft chartered by Imperial Airways, Ltd., under an agreement which is operative for two years. It runs in connection with the air mail between Karachi and England. Since 17th

May 1932 the Delhi Flying Club has conveyed the Karachi-Delhi Air Mails. It was hoped to extend this service to Calcutta and to Rangoon in the near future. The need for retrenchment has hung up this development. Messrs Tata Sons & Co., Bombay, are contracting with Government to run a Karachi-Bombay-Madras air mail line with a possible extension to Colombo.

Instruction in aviation is given in India only through Clubs founded for the purpose. There are nine of these above them is the Aero Club of India and Burma, which exercises control and general co-ordination of activities under the Director of Civil Aviation with the Government of India.

The movement dates from March, 1927, when as a result of the interest taken in the subject by Sir Victor Sassoon, Bt, M L A, it was discussed by the Indian Legislative Assembly. An encouraging atmosphere was thus created and in the same month the Aero Club of India was formed, composed of about 40 members of the Assembly. Its first meeting was held in Simla in September of the same year and during the next three months 100 more members of the Assembly and 197 other members joined. Strong committees were then formed in Delhi, Calcutta, Bombay and Allahabad, with the object of developing interest in the movement and in order to utilize the Government grants which were at this time proposed and the formation of local clubs followed. The Aero Club entered into an agreement with the Royal Aero Club of Great Britain and thereby became its official representative in India and Burma.

THE SUZ CANAL

At the 10th Annual Meeting of the Suez Canal Company, held in Paris in 1924, the Chairman of the Board declared the first effects of shipping on the traffic of the Canal they referred to the loss of a considerable and even an entire cargo of wheat in 1920. At the same time, a heavy percentage of the loss was the boycott of wheat by India and the depreciation of value in China had a depressive effect upon the traffic between Europe and certain parts of the Far East. Under the influence of these various economic happenings, activity through the Suez Canal fell off considerably. To this there was added the effect of the reduction in dues of 2 per cent which came into force on September 1, and the result was that there was a reduction of about 50,000,000 in the transit receipts compared with the previous year. It was in such circumstances that one could appreciate the advisability of the prudent financial policy which was traditional in the company. Thanks to the steps taken in the years of prosperity, the position of the amortization funds and various other provisions was such that the directors were able to propose that the amounts to be set aside should be substantially reduced enabling the gross dividend per capital share to be fixed at 600 francs.

Shipowners' Appeal for Reduction in Dues.—The directors had received from shipowners—and especially from British shipowners—repeated requests for a further and substantial

reduction in the company's transit tariff. The argument which were submitted in support of the request had received most careful attention. If indeed they could have believed that as contended in certain quarters, the Suez Canal transit dues were an appreciable factor in the economic depression a *fortiori* if they had reason to hope that a reduction in these dues might result in a substantial increase in the traffic of the Canal they would not hesitate to meet the wishes of shipowners, at least in part. But the investigations such were made had led the directors to the opposite conclusion. A reduction in tariffs made under present conditions would impose upon the company a further and important sacrifice which would certainly find no appreciable compensation in a corresponding development in traffic. A time would come they hoped when, circumstances having changed, a reduction in dues would appear opportune, and then they would not fail to put it into effect spontaneously, as they had done many times in the past, but they refused to do it to day under the pressure of an opinion which they considered to be ill informed.

Traffic Returns.—The traffic through the Canal in 1910 showed a substantial falling off as compared with 1920, and was even below the level of 1928 amounting to only 31,668,759 tons net. The number of transits was 5,761 against 6,274 in 1929.

The following tables shows the dues, the traffic through the Canal, and the dividends paid by the company over the last ten years —

| | Dues | | Year | Dividends | Traffic
Thous |
|---------------|-------|---------------|------|---------------|--------------------|
| | Laden | In
Ballast | | | |
| March 1, 1920 | 8 50 | 6 00 | 1920 | 1 00
2,173 | net tons
17,575 |
| Oct 1, 1920 | 8 25 | 5 75 | 1921 | 2,201 | 18,119 |
| Oct 1, 1921 | 8 00 | 5 50 | 1922 | 2,076 | 20,743 |
| March 1, 1923 | 7 75 | 5 25 | 1923 | 2,338 | 22,730 |
| Jan 1, 1924 | 7 50 | 5 00 | 1924 | 2,605 | 25,110 |
| April 1, 1925 | 7 25 | 4 75 | 1925 | 2,150 | 26,761 |
| April 1, 1928 | 7 00 | 4 50 | 1926 | 3,501 | 26,060 |
| Jan 1, 1929 | 6 90 | 4 40 | 1927 | 3,712 | 28,362 |
| Sept 1, 1930 | 6 65 | 3 32½ | 1928 | 4,148 | 31,906 |
| | | | 1929 | 4 301 | 33,466 |
| | | | 1930 | | 31,669 |

The dues were fallen gradually but the reduction over the whole period amounts to only 20 6 per cent whereas since 1922 the dividends have grown rapidly, with only one interruption. The traffic also grew steadily, apart from the setback in 1926, until 1929.

Improvement Schemes—It was announced in 1914 that from and after January 1st, 1915, the maximum draught of water allowed to ships going through the Suez Canal would be increased by 1 ft, making it 30 ft English.

The maximum permissible draught of ships using the Canal was 24 4 feet in 1870, in 1890 ships drawing 25 4 feet could make the passage, and during the following 24 years the increase has been at the average rate of about 1 foot every six years, thus bringing the maximum draught authorized to 29 feet.

The scheme of improvement adopted by the Company on the recommendation of the International Consultative Committee of Works, the British representatives on which are Sir William Matthews and Mr Anthony Lister, is a comprehensive one, and the details suggest that it will meet the needs of the big ship.

A 40 Feet Channel—The declared policy of the Canal Company in regard to the deepening of the Canal is to offer a slightly greater depth of water than that available in ports east of Suez. It is claimed that, with the exception of Sydney, there is no eastern port which at low tide has a greater depth of water than that now provided in the Canal throughout the full length of nearly 105 miles. In any case the work in hand should meet the needs of any ship likely to be built for the eastern trade during the next few years.

When the Canal was opened in 1869, the width was 72 feet and the depth about 26 feet 2 inches. In June, 1913, the width at a depth of 32 feet 8 inches had been increased to a minimum of

147 feet 6 inches over a length of about 85 miles, and to a width of 328 feet over a distance of about 20 miles. The latest scheme makes provision for a depth of 40 feet throughout and for a widening up to 196 feet 8 inches in the south section, and the cutting of an appropriate number of sidings in the north and central sections, where a minimum width of 147 feet 6 inches is believed to be sufficient for the requirements of the immediate future.

The work of enlarging the capacity of the Canal presents no special difficulty on the engineering side. A good deal of sand is occasionally driven into the channel at Port Said during storms, but a remedy for this will be found in extension of the west breakwater by about 2,700 yards at a cost of over £6,000,000. The construction of this extension, which has been in hand for the past two years, is making satisfactory progress. The Suez Roads are being adequately dredged in accordance with an agreement between the Egyptian Government and the Company.

Almost up to the end of 1915 the works for extending the jetty to the west of Port Said, works of capital importance for the protection of the entry to the Canal, were pushed on uninterruptedly. In November, however, for want of hydraulic lime, the manufacture of artificial rocks for this jetty was interrupted. The submarine foundations in stone and rubble of the new jetty were, as a matter of fact, completed to a length of 2,500 metres, the protective blocks were laid for 1,040 metres, and cemented for over 800 metres. The protection of the Channel is thus secured, and there is no need of any apprehension as to its future.

Travel in India.

Thirty years ago, a tour in India was possible only to the wealthy, the leisured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow, and the facilities for travel were so indifferent that he was a bold man who consigned himself to the mercies of the country without a sheet of letters of introduction. Now the mail which is posted in London on Thursday night, reaches Bombay in 14 days, and the passenger can travel by the same route and with the same speed as the mail. It is also possible to reach Bombay in 11 days from Genoa or Venice by means of the Lloyd-Triestino line. A dozen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular services while Imperial Airways have a weekly service from Croydon to Karachi and from there the Indian State Air Service takes you to Delhi and before long it is hoped to Calcutta. The Indian Railways provide facilities on the trunk lines equal to many of the best services in Europe and the Indian hotel has grown into a really comfortable caravanseri.

The traveller to India has a choice of many ports by which he may enter. To the majority of visitors from Europe and the West, Bombay provides their first glimpse of India, while others enter by Calcutta, Madras and Karachi and *via* Colombo.

Owing to its geographical position Bombay is known as the Gateway of India through which for more than a century, the import and export trade of India has largely passed. Ash-purple against the dawn, the spurs of the Western Ghats, thrones of mystery, stand sentinel about the inner sanctuary of Bombay Harbour. Among and above these mountain heights Wellington fought the battles which earned for him his early military greatness. Every schoolboy knows the story of the Mahratta campaigns, they are but one—the Mahrattas—of the races within races that populate this vast country where two hundred and twenty-two different vernaculars are spoken. There is never an end to the land of India. You will find life in its most up-to-date form and next to it the customs and habits of a nation which have not changed for hundreds of years. Life will surge past you in a picturesque procession. You will hear a medley of strange sounds—the tinkle of the temple bells, the throb of the drum, the chant of the ‘muezzin’ announcing that God is Almighty and Mohammed is his Prophet, the song of the Sharma the cry of the wild beast in the jungle. The tropical sun blazing like a ball of molten gold in a turquoise sky, the silver moon sailing across the purple vault of heaven will awaken in you feelings which you have never known before. If the visitor seeks variety and picturesqueness there is no region in all the world so full of vivid colour, of populous cities, of buildings designed by master architects of bygone days, of diverse races, of absorbing subjects for study and

observation such as the customs, religions, philosophy and art of one of the oldest civilisations.

To the true lover of nature, the botanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain, and wild waste.

To the sportsman, it can furnish sport such as few countries can give, the tiger in the forest, the great mahseer in many rivers, the wild snipe on the fheels, the strong winged duck, the jinking pig and many another kind.

To the mountaineer, the Himalayas offer the highest mountains in the world and some of the few famous peaks which are still und climbed.

To the statesman, businessman or politician who seeks rest and change without idleness, India presents a sense of busy administration, a nation in the making and an experiment such as has never before been tried.

Bombay itself is cosmopolitan like many of the world's great ports and in it you will find jostling each other in the streets representatives of half the races of mankind. The Towers of Silence and the Caves of Elephanta are among the sights to be seen. Elephanta is one of those delightful islands which are freely scattered upon the waters over which Bombay reigns as Queen.

But Bombay is a gateway and through it many interesting trips await the visitor and northwards to Delhi he has the choice of two routes either by the G. I. P. Railway *via* the Ellora and Ajanta Caves, Sanchi, Gwalior, Agra and Muttra or by the B. B. & C. I. Railway *via* Baroda and through Rajputana with its famous cities of Mount Abu, Udaipur, Ajmer and Jaipur to Agra and Muttra. If you decide to go by the G. I. P. Railway route, you will find at Ajanta frescoes which rival many of the old frescoes found in Europe while at Ellora are the most wonderful caves in the world, mountains cut into colossal sanctuaries. You will be able to compare the work of the Buddhists, the Jains and the Brahmins and learn more of Indian mythology than many hours of study will give you. At Sanchi are Buddhist buildings dating back to 150 B. C. The stone carvings are remarkable and are well worth a visit. As you proceed further north, Gwalior is reached. The great Fort of Gwalior has been described by Fergusson as “the most remarkable and interesting example of a Hindu palace of an early age in India. Seventy miles further on lies Agra and of all the romantic cities of India, Agra must surely come first for it contains that crowning glory in marble, the Taj Mahal. Generations have come and gone since that far day when that most splendid of emperors Shahjehan bowed his head before his wife's coffin in the vault of the Taj. The building is better known in the world. Visit it by”

daylight if you must. By moonlight its seduction is irresistible. Sit on the steps by the entrance gate and watch the moon drift above the trees and the ring of silver light stealing round the base of the dome and creeping gently upwards to the pinnacle. See it also in the fading evening light when amber and rose and gold, the sun sinks in the west behind the crenelated ramparts of Agra Fort. If you must visit it in the broad light of noonday then forget the first view from the gateway and wander awhile about the gardens where you will find exquisite glimpses of snowy structures so light and graceful that they seem to rest on air, of buoyant cupola and climbing campanile. Here is grandeur as well as beauty.

The Taj Mahal, however, is only one of the many interesting sights of Agra and its Fort, Itmad-ud-Daulah's Tomb, Akbar's Tomb, 5 miles from Agra and Fatehpur Sikri, the deserted city of Akbar about 23 miles distant are all well worth a visit. No other fortress in the world presents so great an appearance of knightly splendour, of proud and noble dignity or, with a more sovereign grace, crowns its red bastions with so wonderful a collection of palaces, mosques, halls of state, bath-houses, balconies and terraces as Agra Fort, a mile and a half in circumference with walls 70 feet high faced with red sandstone. The vigorous style of decorative architecture that Akbar introduced into his red sandstone palaces was embellished by his grandson Shah Jahan who was largely responsible for the delicate inlay work and the low reliefs in white marble. There are no buildings to equal these except those found in the Palace in Delhi Fort which Shah Jahan built when he transferred his headquarters to Delhi. Akbar's vigorous but supremely attractive style appears at its best in Fatehpur Sikri which he built in his joy at the realisation of his fondest hopes when his son Jahangir was born.

There in the year 1569 A.D. on a lonely eminence, Akbar founded his city and there began to rise as if by magic those great battlemented walls, the magnificent palaces and courtyards, the great mosque and the other superb specimens of the skill of the Moghul stone-masons which stand to this day a source of endless wonder and admiration to visitors.

The traveller moves northward past Muttra and Brindaban, famous places of Hindu pilgrimage due to their association with the birth and early life of Lord Krishna, until Delhi is reached. Delhi, the capital of India, in days gone by and now the Imperial Capital of India has no rival in greatness, as all men know that he who holds Delhi holds India. Here the visitor will find much that will interest and enthral him. Here he can trace the growth and fall of dynasty after dynasty, here he will find some of the best examples of the work of the Moghul Period at its zenith as he wanders with muffled feet in the great courtyard of the largest mosque in India, the Juma Masjid, or in Shahjahanabad, the Fort and Palace of Shahjahan whose halls rival those of the palace in Agra Fort with their delicate inlay work in marble and their gardens. Here are crumbling memorials of the Mutiny, Hindu Rao's house the Kashmir Gate beneath which some still

salute dead Home and Salkhed as they pass, the tree-cumbered sites of redoubt and battery, Nicholson's grave, Asoka's pillar, the site of the great Darbar.

Kutab, the first of the so-called seven cities of Delhi with its Kutab Minar, 238 feet in height erected in the 12th century A.D. of red and cream sandstone overlooks the plain where many of the pages of history were written. The Kutab Minar tapering from the base to the summit is divided by five corbelled balconies while on the fluting is carved an intricate design in which are introduced verses from the Koran. In the main courtyard stands the famous pillar of solid wrought iron devoid of rust and dating back to about 400 A.D. Visitors to Delhi should not miss seeing the Kutab for it is unique in India.

New Delhi the eighth city of Delhi, is worthy to rank with its seven predecessors Kutab, Siri, Fuzhlakabad, Jahanabad, Iirozabad, Puarana Qila and Shahjahanabad, the present day Delhi. Here you find an example of town planning carried out by some of the leading architects and engineers in the world on a site where they could start with a free hand.

If you decide to take the route northwards from Bombay via Rajputana then you will see another but equally interesting side of India. Rajputana, the land of chivalry, attracts the visitor as few places do. Alone at Udaipur is there in its perfection, the fairy palace of one's childhood, just such a long cataract of marble terraces and halls falling into the waters of a mountain encircled lake, as the illustrator of an Andrew Lang fairy book delights to draw.

Mount Abu, the Rajput Olympus, combines the delights of a hill station with one of the historic homes of the gods. The Dilwara Temples, the masterpiece of Jain architecture, contain some of the finest carvings in India. Forests of marble columns, carved and polished till they resemble Chinese ivories, are linked by flying arches that twist and twine from pillar to pillar like exquisite creepers softening outlines and producing the effect of a symphony of graceful movement.

Northwards from Delhi is the Punjab and the North-West Frontier Province whence most of the recruits for the Indian Army come. Here you will find Amritsar, the home of the Sikhs, Lahore one of the most ancient and famous cities of India, the Khyber Pass, the historic gateway into India from the North the flourishing cities of the Canal Colonies which have risen up since British Engineers have harnessed the waters of the Punjab "the Land of the Five Rivers" which formerly ran to waste and many another city. Through the Punjab also you will travel to reach Kashmir, famous since the days of the Moghul Emperors.

The glory of Amritsar is the Darbar Sahib (the Golden Temple). The pavements of the sacred tank are all of marble from Jaipur and the tank itself contains a sheet of water 510 feet square. In the midst approached by a marble causeway, rises the Golden Temple, nearly cubical in form and decorated with wonderful richness.

Lahore grew in importance with the dawn of Moghul supremacy when Babar, the founder

of that dynasty made it a place of Royal Residence, reminiscences of which are to be found to-day in the pleasure gardens, tombs, mosques and pavilions of Moghul architectural beauty which have won undying fame for that dynasty here and elsewhere in India.

Khyber Pass, the great natural highway into India through the almost impregnable mountain barrier of the North-West Frontier, is rich in historical association and has from time immemorial been the route by which conquering hosts have passed into India to disturb the peace of her people and continually alter their destiny. It is still the great trading route between India and the Central Asian States. On Tuesdays and Fridays when the continual string of caravans of great shaggy camels laden with merchandise, accompanied by stern, strong and picturesquely dressed men with their women and children from Central Asia are moving to and from Afghanistan, the pass presents a most interesting and unique sight.

Kashmir described by poets as 'an emerald set in pearls' is a land of rich forests and upland pastures, of slow flowing rivers and glittering mountain torrents, ringed with an almost unbroken girdle of mountain snow capped all the year. If you can imagine Venice set in the heart of Switzerland that is Srinagar, the capital of Kashmir. Life is good as you glide along the face of the lakes in a houseboat when the lotus flower is out and the banks are one mass of colour with the snow-capped mountains in the background. When days are warm on the lakes, a trip can be made up the valleys and you can live in Arcady and see the bear in his native haunts and the mountain deer on the hill tops.

For those who have arrived at Delhi via Bombay, an interesting return trip can be made via Benares and Calcutta. Many visitors, however, enter India via Calcutta and from here also many interesting tours can be made.

Calcutta, one of the first trading ports of the British East India Company in India, was founded by Job Charnock, it is now the second largest city in the Empire. Its public buildings, the Indian museum, the Fort the Jain Temple, the Hindu bathing ghats along the river front, the Hindu shrines, are all worthy of attention.

Before winding your way towards Delhi trips should be made to Darjeeling to see the roof of the world and Mount Everest the highest mountain and to Puri, the home of the famous temple of Jagannath. The ambition of every visitor to Darjeeling is to see Mount Everest, the world's highest peak, and, in order to do so they must travel some 7 miles away, past Ghoom station to Tiger's Hill (8,514 ft.) as from Darjeeling the mountain is not visible. The best time to see sunrise on Mount Everest is in the early Spring or late Autumn. Then at the end you will find a view unequalled in any other part of the world. Twelve peaks over 20,000 feet with the awe inspiring Kanchenjunga in the centre are spread out before you.

Puri also is an easy run from Calcutta. There in front of the gate of the temple is the famous black marble pillar, one of the most beautifully worked things in India with a tiny figure of the

Dawn on its capitol. Incongruous as it may seem, in Puri all caste vanishes. The significance of this can be understood only by those who know India. Once a year the image of Vishnu is carried in procession upon the famous Jagannath cars to the Garden Temple. These cars, 45 feet high, standing on solid wooden wheels, seven feet in diameter, are dragged along by the devotees.

Twenty miles north of Puri, along the sea coast, or 54 miles by motor road stands the Black Pagoda at Konarak, the temple of the Sun God Surya.

On the road to Delhi, the visitor will travel through the Gangetic plain, one of the most fruitful areas of India. Here he will find cities sacred to the Hindus such as Budh Gaya and Benares, cities intimately connected with the mutiny like Lucknow and Cawnpore and other flourishing cities.

Budh Gaya is one of the most famous and most interesting of all the sacred sites of the Buddhists for it is the scene of the 'Great Renunciation' and the Enlightenment of Gautama afterward named Buddha. It marks the site of his long penance and his final victory over worldly desire.

Benares is reputed to be the oldest city in India, but there is no authentic record how old it is except that it is mentioned in those two great Hindu epics, the Mahabharata and the Ramayana, which deal with events long before the Christian era. Benares is, however, one of the most holy cities in India for the Hindu, and its spiritual significance is shown in the quotation "Happy is the Hindu who dies in Benares, for he is transported at once to Shiva's Himalayan Paradise on Mount Kailash, north of Lake Manasa, where the great three-eyed ascetic seeing the past, the present and the future, sits in profound meditation."

Benares rests on the banks of the Ganges and floating down the river in a boat the sight of Aurangzeb's Mosque and the many picturesque temples and ghats recalls to one's imagination through the dim vistas of time the endless processions of devout people wending their way down the narrow lanes to the temples with fragrant garlands to hang round the necks of the gods or to wreath in solemn devotion the emblem of Shiva's divinity.

About 4 to 5 miles away from Benares lies Sarnath where Buddha preached his first sermon after obtaining divine wisdom at Gaya and in the adjoining Deer Park is a Museum of Archaeology of vivid interest.

Lucknow is a city hallowed by memories of a grim struggle, of heroic deeds and noble sacrifice, its appeal to the Westerner is influenced by its historical connections. Its beautiful buildings and the mysterious glamour so closely associated with the East. Legend connects the founding of the city with Lakshmana, son of King Dasaratha of Ayodhya and brother of Rama, the mythical hero of the Ramayana, the epic poem of the Hindus, but Lakshmanpur or Lucknow as it is now called was at its greatest under the five Kings of Oudh (1732-1856).

All visitors wend their way to the Presidency and pay homage to the gallant band who held it during the Mutiny against terrific odds.

until relieved by Sir Colin Campbell. The deeds of Lawrence who was in command until he was killed and of Havelock who made his historic but unsuccessful attempt to rescue the garrison and was himself besieged are well-known.

Cawnpore is one of the most important industrial cities of India and here you will find up-to-date factories, a symbol of the West with the teeming bazaars where business is still carried on as it has been done for generations.

Northern and Central India is, however, not the only interesting part of India and the South can show you sights unlike those in any other part of the World. South India is a land of temples, full of the most wonderful carving while Mysore, one of the most progressive Indian States, can show you fine buildings, falls higher than Niagara and wonderful scenery.

Madras is the capital of the Madras Presidency and the third largest town in India, and the Presidency includes that part of India which was one of the first in which English and other foreign nations settled. The visitor will still find in the large houses belonging to the merchant Princes with their far spreading compounds, in the conveyances still used by the local inhabitants and in the scenery, which is the India of the old picture books, traces of what India used to be when first the English settled there.

Mysore commemorates in its name the destruction of Mahashasura, a minotaur or buffalo headed monster by Chamundi, the form under which the consort of Shiva is worshipped as the tutelary goddess of the ruling family. Mysore State is a picturesque land of mountain and forest presenting the most diversified and beautiful scenery. The Capital which bears the same name as the state is a city with many fine buildings and a visitor to India who wishes to see the working of an up-to-date Indian States situated among wonderful scenery cannot do better than visit Mysore. Elephants range throughout the southern forests and from time to time keddah operations are undertaken when wild elephants are captured in stockades. Tigers, leopards and bears are numerous and bison are found in certain forests. The famous Gersoppa Falls present one of the most beautiful sights of wild untarnished nature to be found in India. Many of the temples contain examples of the finest carving, and Seringapatam famous as the capital of Tippu Sultan and about nine miles from Mysore is well worth a visit. For those who are travelling from Bombay to Colombo an interesting trip can be arranged via Mysore.

At **Madura** and Trichinopoly will be found examples of some of the best and most interesting work in South India.

Madura has been aptly described by European scholars as the "Athens of South India" and from time immemorial has been the abode of South Indian culture in all its aspects.

It contains one of the finest and largest temples in South India and unlike many other temples the tourist is allowed to wander without restrictions over most of it. Near Shiva's shrine and in

the hall of Mantapam of a Thousand Pillars can be seen some of the finest carving in stone in all the world. The workmanship is so fine, the chiselling so delicate that one is lost in silent admiration as one looks at the representations of the Hindu Pantheon and at the graceful figures of men, women and animals.

Trichinopoly is noted for its rock temple and about three miles away is Srirangam with its famous temple which is claimed as the earthly abode of Vishnu the Lord of Creation.

No one visiting India should miss the opportunity of seeing **Burma** for it is a country of extraordinary charm, a country of contrasts. Whatever be your hobby, whatever be your interest, be it sport, history, ethnology or botany, or should you be merely fond of beautiful scenery you will find a greater variety in Burma than in probably any other country. You can see huge snowy ranges and alps sprangled with rhododendrons and flowers unknown to science. You can find magnificent jungles almost impenetrable to man, bordering rushing torrents, or yet against you can see emerald green paddy fields and great winding rivers in the plains. Should you be adventurous and seek the wilder regions, you will find great gaps in the frontier unvisited by civilised men and peopled by head hunters, Chins, Nagas and the fierce Black Lisu. Yet you will also find civilisation in the big cities like Rangoon and Maymyo. Rangoon, the capital, is of special interest in that it possesses the famous Shwe Dagon Pagoda, the Sacred Golden Pagoda visited by more pilgrims than any other Buddhist Temple in Indo China.

This short account of India is not intended to be comprehensive and does not even mention many of the interesting places to be visited, but it is hoped that it will give some indication of the wonderful pageantry, the magnificent buildings of an older age, the sport, and the many things of interest which India and India alone can offer.

December, January and February are the most pleasant months for a visit to India. The days are pleasantly cool and except on the seaboard the nights are cold. India speaking broadly has no winter except in the far north. It is a land of sunshine and colour. But the traveller arriving before November or staying in the country beyond the month of March must expect to find the tropical sun asserting its sway unless he wends his way to fair Kashmir or to one of the hill stations of India, Simla, the summer capital of India, Darjeeling the delightful or one of the many others situated among the hills of India.

Standard Tours.

The planning of an itinerary for an Indian or Burman tour will depend upon the port of arrival, the port of departure, personal desires of the party and the time available. Any of the leading tourist agencies such as Thos Cook & Sons, the American Express Co., Cox's & King's (Agents) Ltd, Army & Navy Stores, Grindlay & Co, etc., and the Publicity Officers of all the more important Railways as well as the Manager, Indian Railways Publicity Bureau, 57, Haymarket, London, and the Resident

Manager Indian Railways Publicity Bureau, 'Delhi House' 38 East 57th Street New York will work out tours to suit the convenience of individual parties. Many of the leading tourist companies will also arrange for inclusive and conducted tours. There are certain places, which are very well known such as Delhi, Agra, Benares, Darjeeling, Jaipur, the Khayber Pess, Kashmir and Mysore, but there are innumerable other places almost as well known containing sights which cannot be equalled in other parts

of the world. Puri, Lucknow, Amritsar, Udaipur, Mount Abu, Gwalior, Ellora and Ajanta Caves and Madura are a few of them while in Burma, Mandalay and, the famous old cities of Ava and Amarapura nearby are well worth a visit.

A selection of itineraries for long and short tours in India and Burma is given below. These show what can be seen in certain periods of time, but they can be varied to suit individual parties or taken in the reverse direction.

Tour No 1—4 weeks—Bombay, Udaipur, Jaipur, Peshawar, Lahore, Amritsar, Delhi, Agra, Cawnpore, Lucknow, Benares, Darjeeling and Calcutta.

Alternatives (a) Puri and Konarak in place of Darjeeling

(b) Gwalior, Sanchi, Ellora and Ajanta Caves in place of Jaipur and Udaipur

NOTE—Many interesting trips off the beaten track can be made in Burma, but special arrangements are necessary

For any visitor landing in Calcutta it is possible to visit Benares, Agra, Delhi, Jaipur, Bombay, Mysore, Madras, Trichinopoly and Madura and still reach Colombo on the 14th day, but this entails sightseeing by day and travelling most nights and is not recommended for the ordinary visitor. A very attractive tour can, however, be worked out for a similar trip over a period of four weeks either allowing more time at the more important places or including other of the places mentioned in Tours 1 and 4 such as Darjeeling, Puri, the Khyber Pass, Lahore and Amritsar, Udaipur, etc

Travelling in India is not expensive when

the long distances travelled are taken into consideration. The first second and Indian servants' fares are shown at the end of each tour. Hotel expenses average about Rs 15 (22/6 or 5½ dollars) per person a day except when special rates are charged during certain special periods, while a motor car for the day can be hired for Rs 25 to Rs 30 (38/6 to 45/0 or 9 to 11 dollars) a day in most places, except where long distances have to be covered. Where the distances are short, tongas and two-horsed landaus can be used and the daily charges vary from Rs 3 8 to Rs 9 (5/10 to 13/6 or 1½ to 3½ dollars). Guides with a good knowledge of English can be obtained from Rs 5 to Rs 10 (7/6 to 15/0 or 2 to 4 dollars) a day.

Hill Stations

In India especially during the months of April and May and at Christmas time, everybody tries as much as possible to take a holiday in the hills. Being anything from 2,000 to 8,000 feet above the level of the sea and difficult of access for motor traffic the hill stations are delightfully cool and peaceful. Here one can usually ride, walk, play tennis and golf, or simply bask in beautiful surroundings and forget all about the trials of work and prickly heat. These are the principal hill stations in alphabetical order—

Darjeeling (7,000 ft)—From Darjeeling the highest mountain peaks in the world can be seen. The temperature averages 2° above that of London all the year round, that is it neither exceeds 80° in summer nor falls below 70° in winter. Darjeeling is the summer seat of the Government of Bengal. To reach it, the traveller must start from Calcutta by taking train to Siliguri a journey of 10 hours. From Siliguri the journey is completed either by motor or hill railway in about 6 hours. The principal hotels in Darjeeling are the Mount Everest, the Grand (Rockville) and the Park.

Kangra Valley—The Kangra Valley is situated about 100 miles east-north-east of Lahore at the foot of the Dhaul Dhar Range of the Himalayas. There are magnificent landscapes and many historic temples and buildings. The visitor must take train from Lahore to Pathankot where he changes over the newly opened narrow-gauge railway running between Pathankot and Jogludarnagar in Mandi State. Places to stay at are Dalhousie, Dharmasala and Kangra. The best hotels at Dalhousie are Still's Grand View and the Arramoor, and at Dharmasala the Switzer's.

Kashmir—Perhaps the most famous beauty spot in the world can be reached by taking train (either G. I. P. or B. P. & C. I.) from Bombay to Rawalpindi (about 48 hours) whence the remainder of the journey is accomplished by motor. The average height of the valley is about 6,000 feet, and it is entirely surrounded by the lofty, snowy outer ranges of the Karakoram and Himalaya. Visitors usually stay either at Srinagar or Gulmarg. At Srinagar one can live at Nedou's Hotel or in boarding houses, or one can hire a houseboat and live on the River Jhelum. At Gulmarg Nedou's is the only hotel. As at Srinagar visitors usually take up their quarters in wooden huts rented through the Srinagar agencies or in tents.

Kodaikanal (7,000 ft)—Regarded by many as the most beautiful of South India's hill stations, is situated on the precipitous southern side of the Palni Hills overlooking the plains. Reached by metre-gauge from Madras to Kodaikanal Road and thence by a 4 hours' motor run. The Carlton is the principal hotel. There are also boarding houses.

Matheran (2,500 ft)—The nearest hill station to Bombay, ideal for walkers and anybody wanting rest and quiet. Reached by taking train from Victoria Terminus, Bombay, to Neral (about 1½ hours) whence Matheran may be reached by hill railway (2 hours) or by pony, rickshaw, or on foot by a good walker. Stay at the Rugby Hotel.

Mahabaleshwar (4,500 ft)—Until recently, when expenditure had to be cut down, the summer seat of the Government of Bombay. Those who do not motor the whole way from Bombay, a distance of about 180 miles, usually take train to Poona and then hire a car from Poona to Mahabaleshwar. Mahabaleshwar is noted for its delightful vegetation, orchids and lilies bloom in April and May. Hotels—Race View and Frederick.

Mount Abu (4,500 ft)—An ideal place for combining the pleasures of a mountaineering holiday with the interests of an archaeological excursion. Reached by B. B. & C. I. trains to Ahmedabad, thence by metre gauge to Abu Road, whence the journey is completed by car. The Rajputana Hotel is recommended. There is also a Park Bungalow containing four furnished rooms, permission to use which must be obtained from the Assistant Engineer, P. W. D., Mount Abu.

Murree (7,000 ft)—The summer headquarters of the Northern Command. Magnificent views and walks. Visitors take train to Rawalpindi whence they complete the remaining 37 miles by car. The principal hotels are the Cecil and the Viewforth.

Mussoorie (7,500 ft)—Much frequented on account of its exceptionally fine climate. Reached from Bombay by G. I. P. or B. B. & C. I. trains to Dehra Dun, a journey of 35 hours, where it is necessary to change over to motor which reaches Mussoorie about two hours later. The leading hotels are the Cecil, Charleville, Hickman's Grand, and the Savoy.

Naini Tal (6,500 ft)—Is the summer residence of the Governor of the United Provinces. From Bombay there are two ways of getting there. The first is to take either G. I. P. or B. B. & C. I. train to Muttra, thence by metre-gauge to Kathgodam, and thence by motor (2 hours). The second route which takes about 5 hours longer is to take G. I. P. train to Lucknow and then change over to the metre-gauge railway. The Grand, Metropole and Royal are the best hotels.

Ootacamund—Familiarly known as Ooty is situated on the famous Nilgiri Hills at an altitude of 7,500 feet. The mean average of temperature for the year from sunrise to sunset is 57-33 degrees. Ootacamund is the administrative centre of the District and the seat of the Madras Government for six months of the year.

from April to September Reached either by taking train to Mysore (40 hours from Bombay) and then changing to motor-car for five hours, or by taking train to Mettupalayam via Madras and thence by hill railway to Ootacamund The principal hotels are the Snow and Cecil

Pachmar (3,500 ft)—Situating on a plateau in the Mahadeo Hills, is the summer quarters of the Government of the Central Provinces A delightful hot-weather health resort Reached by G I P railway to Pipariya via Jabulpore and a two hours motor journey The best hotel is the Hill

Simla (7,000 ft)—The summer headquarters of the Government of India, is situated on several small spurs of the lower Himalayas Towards the end of September, and in October and November Simla enjoys the best climate in the world Reached from Bombay by taking G I P or B B & C I train to Kalka and thence either by hill railway or motor There are many good hotels and boarding houses The leading hotels are the Cecil, Clarks Corstorphans Grand Gables (at Mashobra) and Wildflower Hall (Mahasu)

CLIMBING IN THE HIMALAYAS.

The Asiatic mountains have as yet been little climbed, though those that lie within the British Empire have been surveyed Of the many challenging mountains in the Himalayas, the three highest peaks are Everest, Kangchenjunga, and K2, and though there is a difference of opinion about their heights, Everest is generally taken to be less than a thousand feet higher than K2 Mount Kamet, on the contrary, is over three thousand seven hundred feet lower than Everest, being about 25,431 feet Though considered by some to belong to the Everest group, it is really in the Garhwal, over 500 miles west of Everest In 1892 Sir Martin Conway explored the Karakoram Himalayas and climbed a peak of 23,000 feet In 1895 A F Mummery was lost while exploring Nanga Parbat, in 1899 D W Freshfield journeyed to the snowy region of Sikkim, and in 1899, 1903, 1906 and 1908 Dr and Mrs Workman made numerous ascents in the Himalayas including one of the Nun Kun peaks (23,300 ft) A number of Gurkhas trained in mountaineering by Brig-Gen C G Bruce have done good service to many explorers

In 1907 C G Bruce, T G Longstaff, and A L Mumm explored the mountains of Garhwal and Kumaon, and Longstaff with two companions ascended Trisul (23,406 ft) Useful work was accomplished by the Workmans during 1911 and 1912 in the Karakoram, by C F Meade in the Garhwal Himalaya, by Mr and Mrs Visser, by Kellas, (who reached a height of 22,700 feet on Kangchenjunga), and Major H D Minchinton, who lost his life in the Himalaya in 1927, did good work in 1926 while on a survey expedition to the Shaksgam district

The fourth attempt to reach the summit of **Kangchenjunga** was made in 1930, an expedition remarkable in that it included mountaineers from four nations, Germany, Austria, Switzerland and Great Britain being represented under the leadership of Professor G Dhrenfurth Though that expedition was beaten by Kangchenjunga's impregnable defences and terrible ice-avalanches, Herr Schneider and Mr Smythe were successful in gaining the virgin summit of the Ramthang Peak, (23,000 feet) after crawling along knife-life edges of ice More thrilling perhaps was the conquest of the Jonsong Peak (24,344 feet), which was only once before attacked but without success

In the summer of 1931 a party of young British climbers led by Mr I S Smythe succeeded in reaching the summit of **Mount Kamet** (25,413 ft) the highest mountain peak though not the highest altitude ever reached by man

A description of the attempts to climb **Mount Everest**, the highest mountain in the world, may be divided under three headings the reconnaissance expedition of 1921, the first attempt in 1922, and the second in 1924

The preliminary expedition carried out its work in the most complete manner under the leadership of Lt Col C K Howard-Bury The approaches to Mt Everest on all its northern faces were thoroughly examined, and relations were established with all the local authorities On the information and experience of the reconnaissance expedition the second expedition to Everest was organised and set off the following year under the leadership of Brig-Gen the Hon C G Bruce Capt G I Finch and Capt J G Bruce succeeded with the help of oxygen in reaching the height of 27,300 ft During this expedition seven men were killed when an avalanche swept them over an ice cliff some 60 feet high

The 1924 expedition was again commanded by Brig-Gen Bruce Lt-Col E F Norton and Dr T H Somervell reached a height of 28,200 feet Then a final attempt was made by G L Mallory and A C Irvine They were assisted by a supporting party consisting of N E Odell and J de V Hazard On June 8th they left the 25,000 feet camp with three porters who carried loads for them up to 27,000 ft On June 8th they left camp for their attempt and were never seen again On June 10th for the third time Odell climbed up to the 27,000 feet camp but could find no sign of Mallory and Irvine, and communicating with Norton evacuated the mountain

The Himalayan Club—Was founded on 17th February 1923, at New Delhi with the object of encouraging and assisting Himalayan travel and exploration, and extending knowledge of the Himalayas through science, art, literature and sport The initiation of this Club was due to the Honble Sir Geoffrey Corbett, Secretary, Commerce Department of the Government of India, and to Major Kenneth Mason, M.C., R.E., Assistant Surveyor-General,

The New Capital.

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential. Its disadvantages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change. Various places had been discussed as possible capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour, and, as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital was laid by the King Emperor on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhi of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manured. It is not cumbered with monuments and tombs needing reverent treatment, and the site is near the present centre of the town of Delhi. A Committee consisting of Surg-General Sir C P Lukis, Mr H T Keeling, C.A.I., a M.I.C.E., and Major J C Robertson, I.M.S., was appointed to consider the comparative healthiness of the site and of an alternative one to the North of the existing city. Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various points discussed in the above note is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

The Town Plan and Architecture—A report by a Town-Planning Committee, with a plan of the lay-out, was dated 20th March, 1913. Work was begun in accordance with it and its main lines have been followed throughout. The central point of interest in the lay-out, which gives the motif of the whole, is Government House, and two large blocks of Secretariat. This Government centre has been given a position at Raisina hill near the centre of the new city. Sir Edwin Lutyens is the architect for Government House and Sir Edward Baker for the Secretariat. The former building is estimated to cost approximately Rs 140 lakhs and the latter groups were originally estimated

to some Rs 124 lakhs. The provision made in the design of the Secretariats for extensions in case if used has already partly been utilised. The Secretariat personnel has largely increased in the past few years and numerous additional rooms had to be provided to make room for Army Headquarters, which moved into the new capital at the end of the Simla season, 1929. To the east of the forum, and below it, is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indrapat. Across this main axis runs an avenue to the shopping centre. Other roads run in different directions from the entrance to the forum. The axis running north-east towards the Juma Masjid forms the principal approach to the new Legislature Chambers. They are officially described as the Council House and the road is named Parliament-street. The railway station for the new city finds its place about half way between the old and new cities off the road through Paharganj, which lies to the west of Old Delhi in the direction of The Ridge. The main roads or avenues range from 70 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

For a temporary capital, for the use of the Government of India during the period of the building of the new capital an area was selected along the Allpur Road, between the existing civil station of Delhi and the Ridge. The architecture and method of construction were similar to those adopted in the exhibition buildings at Allahabad in 1910, but the buildings have outlasted the transitional period for which they are intended. Army Headquarters were still housed in them in the winter until the season 1929-30 and others are occupied for various purposes including the temporary accommodation of Delhi University.

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 398,269 and of the new area 14,552, or a total of 412,821. The population of the Municipal town of Delhi was 2,29,144. The plans of the New Capital allow for a population within it of 70,000. Its present population is approximately 40,000. Sites have been allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the new city, and several of these habitations have been erected.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been the aim "to express within the limit of the medium and of the powers of its use, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the design is manifestly Western, as is that of British, but they combine with it features without abandoning

aim to avoid doing violence to the principles of structural fitness and artistic unity

Cost of the Scheme—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors have since then increased the amount, the chief of these being the immense rise in prices since the war, and the Legislative Assembly were informed by Government on 23rd March 1921, that the revised estimates then amounted to 1,307 lakhs of rupees. This amount includes allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates. The New Capital Enquiry Committee, in its report published in January 1923 estimated the total expenditure at Rs 1,202 lakhs including Rs 42 lakhs for loss by exchange. Actual expenditure upto approximately the end of 1920 was Rs 14 crores. This may be taken as the figure for the completion of the main project.

The Project Estimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay, whilst there are other items on which some return on account of the sale of leases, general taxes and indirect receipts is secured.

Progress of the work.—The construction of New Delhi was made at satisfactory speed, having regard to the curtailment of the Budget allotment in consequence of the war and the absence of officers and other establishments at the war. The Secretariats were so far advanced that there were transferred to them from Calcutta in October, 1924, the offices of the Accountant-General, Central Revenues, and the headquarters of the Royal Air Force in India were also housed in them in the winters of 1924-25 and 1925-26. The residential buildings for Government officers and staff of various grades were then nearly completed. The whole of the civil side of Government moved from old Delhi into their quarters in the new Secretariats on coming down from Simla in November, 1926. All Government Departments including the Army Departments and Army Headquarters and R. A. F. Headquarters, have their offices in the new City buildings, of which the builders have already had to carry out the first section of the extension provided for in the architects' plans. The Members of H. E. the Viceroy's Executive Council, including H. E. the Commander-in-Chief, live in their new official residences in the new capital. H. E. the Viceroy took up his residence in the new Government House there on 23rd December 1929. His Excellency until then resided in the Delhi season at Viceregal Lodge in Old Delhi. The Government of India in 1927 devoted special consideration to the question whether their ordinary annual 5 months residence in Delhi should be extended each year to 7 months and early in 1928 decided in consultation with the India Office to endeavour to stay in Delhi for half of each year, the new order being introduced for trial in 1928 by keeping the Secretariat in New Delhi till mid-April and bringing it down

Simla from again in mid-October. The experiment was not very successful and has not been repeated. The moves to and from Simla each year cause no practical inconvenience and costs less than keeping officials and staff in the plain during the hot weather would involve.

Art Decorations—The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in by the beginning of March 1928 small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and, if finally approved by the Committee, fixed according to the marouflage process *in situ*. Other techniques, such as fresco or tempera, were optional. Artists or schools of art, who sent in small scale drawings, had to bear the initial expense of preparing them. When these were approved by the Committee, the out-of-pocket expenses paid in addition to a suitable honorarium Government undertook to pay for the finished pictures done from approved sketches but give no guarantee that the finished paintings will permanently be preserved. Government intimated that historical or allegorical subjects would be given preference over religious ones, and English artists living in India were barred from competition, the work being strictly reserved to Indian artists. Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that the specially appointed expert Committee approved of nearly all. A great deal of painting has now been completed and the work is continually progressing. Government meanwhile, instituted a scheme for sending selected artists to Europe for finishing studies to enable them the better to join in the work.

Opinion of the Legislature—Considerable discussion regarding the new works took place in the Assembly in 1921. The following unofficial resolution was carried—“This Assembly recommends to the Governor-General in Council that in the interests of economy and of general convenience alike the execution of the programme of New Delhi works may be expedited and the necessary funds provided or raised so that the Secretariat and Legislative buildings and connected works including residences may be completed as early as practicable.”

A non-official Member in the Legislative Assembly on 28th September, 1921, at Simla, moved a recommendation to Government “to appoint a Committee to inquire into the possibility of establishing a permanent Capital of India in a place possessing salubrious and temperate climate throughout the year.” This proposal was ridiculed by several of his non-official colleagues and was eventually rejected without a division.

H. R. H. the Duke of Connaught, on 12th February, 1921, laid the foundation stone of a large group of parliamentary buildings on a

site close to the south east of the Secretariats. The building is an imposing pile circular in shape, consisting in the main of three horse shoe shaped Chambers for the Chamber of Princes, Council of State and Legislative Assembly respectively and surmounted by a large dome over a Central Library connecting all three Chambers.

H E the Viceroy (Baron Irwin) proceeded in state to the new Legislative buildings henceforward to be known as the Council Buildings and formally declared them open on 18th February 1927. The India legislature began its sessions in them next day.

During 1928, official and public attention became focussed on the need to effect drastic improvements in some of the crowded areas of the old city and to provide for its expansion and for suburban developments. This led to the examination of the possibilities of the area lying between the old and new cities and of the desirability of driving connecting roads through the City walls in order to give access outwards in this direction. The old city is now rapidly expanding in a westerly direction, i.e., towards and up the Ridge which runs behind both cities and the spaces between the two cities are being developed and utilised. So far the plan for a direct thoroughfare from the midst of the new city through the old city wall to the middle of the old city has not been proceeded with and consequently the magnificent thoroughfare, name Parliament Street which was constructed for the purpose in New Delhi remains in a truncated condition.

All India War Memorial—H R H the Duke of Connaught on 10th February, 1921, laid the foundation stone of an All-India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's sake proceeded with slowly. It is now practically complete.

The Memorial takes the form of a triumphant arch spanning Kingsway, the avenue running down the centre of the Vista. It is generally similar to the Arc de Triomphe in Paris but is simpler. The monument reaches a height of 160 feet and the inner height of the arch is 87 feet 6 inches and its breadth 70 feet. Over the arch on both fronts appears in capital letters the single word INDIA and this is flanked on each side by the initials MCM (i.e. 1900) whilst immediately below them on the left hand are the initials XIV (i.e. 14) and on the opposite side the figures XIX (i.e. 19). Above the Arch is a circular stone bowl 11½ feet in diameter. A column of 'nolfensive chemical smoke ascends from this on ceremonial occasions and anniversaries and is illuminated by electric light reflections after dark. The memorial is solely Indian in purpose and bears the names of British and Indian officers and NCOs men of the Indian regiments who fought on the Indian Frontier in the Great War (those fought on other fronts being commemorated by memorials erected in those countries).

Public Institutions—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connexion a conference of Chiefs and Political Officers was held at Delhi at which the Viceroy

presided. The proposal is still under consideration. To implement it would require an estimated capital outlay of Rs 12½ lakhs.

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential **University of Delhi**, the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university must be a matter of time and it was, therefore, decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. The initial work of organisation was quickly effected by the Executive Council. Unfortunately the inability of the Government of India to allot considerable funds was a severe handicap. It was hoped that H E the Viceroy would be able to lay the foundation-stone of the university buildings in November, 1922, but this proved impracticable. The general question of the finances of the University was in 1927 the subject of inquiry by a special Committee appointed by Government. For the time being the University was housed in the temporary buildings in old Delhi occupied by the Civil Secretariat until 1929 and in 1931 Old Viceregal Lodge was allocated to it for its future home.

H E the Viceroy on 10th January 1930 laid the foundation stone of a large European and Indian General Hospital to be built in the course of the next few years at a cost of Rs 75 lakhs for the service of both old and new cities. A portion of the scheme will at a cost of Rs 40 lakhs be executed as a first stage during the ensuing two years. This will provide 254 beds and the necessary laboratories and administrative and residential quarters. The second stage will provide another 110 beds. The hospital is situated between the old and new cities. No progress has yet been made with the building.

The new city was the scene of notable inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones erected in various parts of the land by Aesha and were presented by Canada, Australia, New Zealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the ceremony of unveiling. New Zealand nominated a Member of the Government of India to act in her behalf for the same purpose. The second great ceremony was the inauguration of the War Memorial. This was performed in State by His Excellency the Viceroy in the presence of representatives of every unit of the army in India of the Royal Air Force and of a large concourse of official and other spectators. There was a large popular fete on the ground lying below the old Fort and between it and the river Jumna. Their Excellencies the Viceroy and Lady Irwin arranged a programme of festivities at the Viceroy's House.

Freemasonry in India.

In 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfrett, Esq., authorising him to "open a new Lodge in Bengal". Of this personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, a Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No 72 at Bengal in the East Indies". The next Provincial Grand Masters were James Dawson and Zech Gee, who held office in 1740, after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Clive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17th, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Mr. Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767, but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762-64 to John Bluvitt, Commander of the "A. Admiral Watson," Indianman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol or Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

Madras—The earliest Lodge in Southern India (No. 222) was established in Madras in 1752. Three others were also established about 1766

In the same year Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1782 established a Provincial Grand Lodge and both these Provincial Grand Lodges continued working peaceably side by side until the Union. Indeed, though not generally known, these two Grand Lodges made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1774 at Trichinopoly of the eldest son of the Nawab of Arcot, Umduat-ul-Umara, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

Bombay—Two Lodges were established in this Presidency during the 17th century, Nos. 234 at Bombay in 1758 and 569 in Surat in 1798, both of which were carried on the lists until the Union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Moria was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Decan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which however left no trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members who obtained a warrant, on the recommendation of the parent Lodge from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge. Const of Comandant. It was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Comandant had exceeded his powers. Ultimately a new warrant No. 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 519 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded but in 1836 Dr. James Burnes was appointed by the Grand Lodge of Scotland, P. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1878. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweeddale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836, in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels, furniture, and belongings, and the charge was accepted by Scotland. This Lodge still exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St George No. 807 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burns established a Lodge "Rising Star" at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul Umra has borne fruit, resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East, a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1861.

The Grand Lodge of England—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of

Ireland and the Grand Lodge of Scotland hold jurisdiction in India. By far the largest is the first the next largest is the third and the number of Lodges under Ireland is as yet small. The Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed.

The Grand Lodge of Scotland exercises its rule through a Grand Master of all Scottish Freemasonry in India, who is elected by the Brethren subject to confirmation by the Grand Master Mason of Scotland. Sir John Ernest Hotson, KCSI, OBE, ICS, is the present incumbent of the office, and controls 78 Lodges. Under him the several districts are in charge of the following Grand Superintendents—

- Lt-Col R W Castle, G Supdt, Northern India
G Lindesay " " Central "
The Hon'ble Lt-Col " " " "
T H Keyes, CSI, " " "
C M G, CIE " " Southern "
W Murdoch, OBE " " Eastern "

The Grand Secretary is Rt W Bro J C M Stree, J P, 17, Murzban Road, Fort, Bombay

The Grand Lodge of Ireland granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Province, there being two already, viz, English and Scottish, the Grand Lodge of Ireland declined to grant the warrant. In 1911, however, a warrant was sanctioned for the establishment of Lodge "St Patrick" and since that year two other Lodges have sprung into being one of which is now defunct.

The Grand Lodge of Ireland has no District Grand Master in India at present, the Lodges corresponding direct Grand Lodge is Dublin. There are 6 in 3 in Ceylon and 2

Royal Arch Masonry—Under England, the District Grand Master in any District is nearly always created also Grand Superintendent, his Deputy as Second and another Companion as Third Principal.

Under Ireland there is no local jurisdiction and under Scotland the office is elective subject to confirmation.

The five English Districts are constituted as under,—

Bengal.

Royal Arch Masonry under Scotland has a separate constitution to Craft Freemasonry. The District Grand Chapter of India is at present ruled by M E Camp A M Kajji under whom there are about 30 Chapters in India. The Grand Secretary of all Scottish Freemasonry in India is also District Grand Scribe E. of Scottish R A Masonry.

There is one Irish Chapter in Calcutta.

Mark Masonry—Under England, Mark Masonry is worked under the Grand Mark Lodge of England and Wales, and divided into separate Districts, but in most cases the District Grand Master is also District Grand Mark Master.

Parakh, M D, District Grand Master.

The Mark degree is incorporated with the Royal arch degree in Irish Chapters. Mark degree is worked in some S O Lodges, but mostly in R A Chapters, in which the Excellent R A M and other degrees can be obtained. S O Chapters insist upon candidates being Mark Master Masons before exaltation. Mark degree in Craft Lodges is conferred by the Rt. Wor. Master in S O Craft does not recognise the ceremony of Rt. W. Mark Master. This is confined strictly to Chapters. Each Chapter has a Lodge of M. M M working under its charter. Separate charters for Mark Lodges are only issued by the G. Chapter of Scotland.

Other Degrees—There are many side degrees worked in India, of the Ancient and Accepted Rite, no degree higher than the 18° is worked in India under England, but under Scotland the 30° is worked. The Knight Templar Degree is also worked in several places under both English and Scottish jurisdiction. There are fourteen 18th Degree Chapters working in India.

Scottish Constitution—For information regarding the Benevolent Funds application should be made to Jehangir C Mistree, J.P., 17, Murzban Road, Bombay

Scientific Surveys.

Zoological Survey of India.—The zoological survey of India was instituted in 1884, and has since that time been steadily increasing in scope and importance. The first survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing. The first survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing.

The first survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing. The first survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing.

Mammal Survey.—The first mammal survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing. The first survey was made in 1884, and since that time the number of species of mammals discovered has been steadily increasing.

The survey of new species have rendered the first particularly obsolete.

To remedy this defect, at the instigation of the authorities of the British Museum, the Bombay Natural History Society decided to institute what is now known as the Mammal Survey. Mr. W. S. Millard, then Hon. Secretary of the Society, issued in an appeal to its members to enable the Society to engage the services of a few of European collectors so as to make a systematic collection of the mammals of India, Burma and Ceylon. The response to the appeal was so great that over a lakh of rupees being raised between 1911 and 1920, partly by subscriptions from the Society's members, contributions from Indian princes, and grants from the Indian Government, the Government of Burma, Ceylon, Malay States and the Provincial Governments. Subscriptions were also received from a few learned societies and institutions in England and America. By the outbreak of the war the Survey had been carried on over large areas of the country, the districts covered being—In Western India a portion of Sind, the whole of Gujarat, Kutch and Kathiawar; the Southern Mahratta country and Kanara. In Southern India, in Coorg and Mysore, in the central large tracts of the Central Provinces and some districts of Bengal and Behar, in Northern India the Society's collectors had worked over Kumaon, Darjeeling and Sikkim and the Bhutan Duars. In Burma, collections were made along the Chindwin river, in Central Burma and in the Shan States. Pegu and a portion of Tenasserim. The whole of Ceylon was also systematically surveyed.

The material, which up to the outbreak of War comprised some 17,000 specimens, was forwarded to the British Museum where the collections were scientifically worked out by the late Mr. R. C. Wroughton, formerly Inspector General of Forests, Mr. Oldfield Thomas, F.R.S., Curator of Mammals at the British Museum, Mr. Martin C. Hinton and others. The results of their researches were published in a series of scientific papers in the Journal of the Bombay Natural History Society. The enormous mass of material then collected resulted in the discovery of large numbers of new forms and species and by increasing our knowledge of the distribution of Indian Mammalia has enabled the revision of Blanford's Mammalia to be undertaken and early in 1921 the Secretary of State for India commissioned Mr. R. C. Wroughton, since deceased, and Mr. M. C. Hinton to undertake the work.

When demobilization rendered it possible the work of the Survey which had been in abeyance during the war was resumed and a collector, Mr. C. Primrose, was sent to Assam and the Mergul Archipelago and Mr. Oldfield Thomas has written very appreciatively of his work among those islands. Mr. Primrose then began

inland but owing to

lity of continuing his work in Burma during the monsoon, he was transferred to Gwalior where H. H. the Maharaja kindly accorded permission to work in his territories.

After working a portion of the Eastern Ghats the next move was to the Kangra District in the North West Himalayas and then on to the Punjab Salt Range. Two other collectors worked in Southern India. Permission was once more obtained from the Nepal Government for a collector to resume the Survey work in that country. The work in Nepal was brought to a successful close early in 1928 with a representative collection of interesting mammals and birds.

The Survey now has only one collector who is collecting in the foot hills of Himalayas and the Pindari Valley.

Botanical Survey—The Botanical Survey Department of the Government of India is under the control of a Director who is also Superintendent of the Royal Botanic Garden, Calcutta. There is a staff at headquarters of two officers for systematic work and at the Indian Museum a curator who is engaged in the development and maintenance of the Industrial Section. The Director holds administrative charge of the Government of India's cinchona operations in Burma, of quinine manufacture in Bengal and of the distribution of cinchona products to the Government of India's area of distribution in Upper India. The question of the extension of cinchona cultivation in the Indian Empire has of late years formed a subject of interest to several bodies including the League of Nations' Health Section. The Royal Commission on Agriculture recommended that India should be made self-sufficient in the matter of quinine production. Attempts are now being made to overcome the financial and other difficulties hindering the ready use of quinine through India. The cinchona operations directly under the Government of India are for the present confined to the Tenasserim district in Lower Burma, where a large tract of country is held in reserve. Considerable success has already been achieved with the crop and it has been established that cinchona will grow in this area and that it can be grown at some profit but indications here, as elsewhere in India, point to the inadvisability of leaving production subject to the vagaries of the climate in one area and, generally, of localising effort. Other areas in Burma and in Assam seem suitable for this cultivation and await experimental proof, when the present financial and other obstacles to cinchona development have been overcome.

The existence of the Botanical Survey, like that of the Geological Survey, has both a cultural and an economic justification. On general grounds it is obvious that a progressive Government should acquaint itself with the physical facts of the area it administers, and although apart from the Cinchona operations, the activities of the Survey cannot be said to have much immediate economic applicability—consisting as they do of investigations and researches into the systematics, physiology, ecology, and histology of plant life—the work accomplished in pure botany at the Royal Botanic Garden during the last century and a half has exercised a profound and far-reaching influence upon the

development of Agricultural Science and Forestry in India.

Survey of India—The work of the Survey of India falls under various heads, namely, trigonometrical, topographical and forest surveys, special surveys and explorations, and map reproduction. Cadastral surveys are now chiefly carried out by the Provincial Land Records and Settlement Department, but are in some cases supervised by Survey of India officers.

The land survey and mapping of British India have advanced with the acquisition of territory, they commenced when the first battles were fought, and the first province gained James Rennell, who distinguished himself as a midshipman at the siege of Pondicherry and afterwards rose to the rank of Major in the army, may be said to be the father of Indian geography, and he was made 'Surveyor of the East India Company's Dominions in Bengal' by Lord Clive on the 1st January 1767. The Great Trigonometrical Branch, now termed the Geodetic Branch was originated by Col. W. Lambton, who was first Superintendent—from 1800 to 1823. He was followed in that capacity by one of the best known Surveyor Generals of India, viz., Sir George Everest, who was head of the Department from 1830 to 1843.

In 1904 a Committee was appointed to examine the methods and working of the Survey of India with special reference to the preparation or revision and reproduction of the topographical maps of the country, to overtake the errors of revisional survey and to secure that the map of India should be brought up to date and revised at proper intervals. A considerable increase of establishment was recommended and a programme for 25 years work was drawn up. Certain scales were determined, which however were from time to time modified, but the scale of 1" to 1 mile as the general standard for the whole of India was accepted. The work of the department has in recent years greatly been hampered by the general need for retrenchment and expenditure, and owing to the fact that a very large proportion of the members served throughout the Great War in various capacities on various fronts little more than half of the programme which it was hoped would be completed by 1930, has been done and this in spite of the reduction of the scale of Survey for less important areas. Thus, although new surveys covering an area about equal to that of England are carried out every year, the maps of one-third the country are still very old and only roughly kept up-to-date by means of rather perfunctory information supplied by local officials: the old maps are also about 2 miles out of position, being based on a longitude of Madras determined in 1815. On the other hand, the department's organisation has recently been improved by the creation of a new North-West Frontier Circle under a separate Directorate, the special functions of which are to deal with the requirements of the Army for operations in that area. This is in addition to the four already existing Circles for all India and Burma.

The Department is responsible for all topographical survey, for explorations and the maintenance of geographical maps of the greater part of Southern Asia, for geodetic work, including the main trigonometrical framework which extends in some cases far beyond the frontiers of India, and control networks of precise level-

line based on tidal observations. Tidal predictions are published in Tide Tables for nearly 40 ports between Sumatra and Singapore. The Magnetic Survey, astronomical observations with chronograph and meteorological records at Delhi, Dhanu and other investigations of an international character. In regard to which India enjoys a unique position between the greatest latitudes of the world and a deep ocean extending to the Antarctic. Indian geodesy has thus distinguished by far the largest known anomalies of gravitational attraction in the earth's crust which have led to some of the most important developments of modern geodesy to research.

While expenditure on topographical and geodetic work all funds allotted by Imperial Revenue the Department is steadily developing the policy of scientific surveys in various ways, on payment by those concerned. These miscellaneous operations include all forest and cantonment surveys and work for Boundary Commissions, many riverain irrigation railway and city surveys and surveys of tea gardens, mining areas, &c. with a great deal of control levelling for these miscellaneous administrative assistance and officers are given to the revenue surveys of various Provinces and States. The Printing Office does much work for other Government departments, such as printing special maps illustrative for Archaeological Reports, all diagrams for Patents, &c. The Mathematical Instrument Office gives valuable aid to all Government departments by ensuring a high standard of instrumental equipment, especially in connection with optical work and by the manufacture and repair of high-class instruments which would otherwise have to be imported from abroad.

The Department is also responsible for all survey operation required by the Army and has rapidly been developing measures to meet the greatly increased complexity of modern military requirements especially in connection with air survey. The development of air surveys for various civil purposes is also receiving all possible encouragement and assistance, while the latest methods of stereo photograph are being studied experimentally.

Administration is by the Surveyor General under the Education, Health and Lands Department of the Government of India. Head quarter offices are at Calcutta under the Assistant Surveyor General.

There are seven Directors, including the Director Map Publication who is in administrative charge also of the Photo Litho Office and the Mathematical Instrument Offices, at Calcutta, and the Director, Geodetic Branch, at Dehra Dun. For topographical purposes India is divided into five Circles, each under a Director as follows—Frontier Circle which deals chiefly with the Army, has Headquarters at Simla, Central Circle Headquarters Mussoorie, Eastern Circle, Headquarters Shillong, Southern Circle Headquarters Bangalore and Burma Circle Headquarters Maymyo. Any inquiries regarding surveys may be addressed either to the Headquarters office or any of the Directors concerned, from whom also maps and publications of the Survey of India can be obtained, as well as from the Map Sales Office, situated at 13, Wood Street, Calcutta.

Indian Science Congress—The Indian Science Congress was founded largely owing to the efforts of Prof P. S. MacMahon and Dr J. L. Simonsen. These two gentlemen worked jointly as Honorary General Secretaries of the Congress till 1921. The Asiatic Society of Bengal undertakes the management of the Congress finances and publishes annually the proceedings of the Congress. The objects are (1) to encourage research and to make the results generally known among science workers in India, (2) to give opportunities for personal intercourse and scientific companionship and thus to overcome to some extent one of the chief drawbacks in the life of workers in science in India, (3) to promote public interest in science, for this end the Congress is held at different centres annually, and evening lectures open to the public form an important part of the proceedings of each Congress.

The Congress which is progressive and vigorous, meets in January each year, the proceedings last for six days. The Head of the Local Government is Patron of the Congress, the Congress session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different sections being represented in turn. The sections are (1) Agriculture, (2) Physics and Mathematics, (3) Chemistry and Applied Botany, (4) Zoology and Ethnography, (5) Botany, (6) Geology, (7) Medical Research, when the sections meet separately each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers, the afternoons to social functions and visits to places of interests, in the evenings public lectures are delivered.

The Indian Research Fund Association—

This Association, which is a much older body than the National Research Council in England, was constituted in 1911 with a sum of rupees five lakhs (£33,000) set aside as an endowment for the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the eradication, mode of spread and prevention of communicable diseases. It can claim to be amongst the pioneers in organised medical research on a large scale and has been referred to by other countries in very complimentary language. Still better, it has been copied by several other nations.

During 1920 the constitution of the Governing Body was altered by the Government of India. It was considered that, in view of the largely increased activities of this Association, the Governing Body, which had hitherto most expeditiously and economically conducted the business of the Association should be now made more representative in character. It was accordingly enlarged by including two non-official members from the Legislative Assembly, one from the Council of State, two from the Medical Faculties of the Universities and one non-medical scientist. The creation of a Recruitment Board in India for selecting the personnel employed by the Association and of a Consultative Recruitment Board in England also came under the consideration of Government. It was further decided that the Governing Body of the Indian Research Fund Association should be the

co-ordinating agency for the research activities of the All-India Institute of Public Health which is being built at Calcutta and of the proposed Central Medical Research Institute.

The Conference of **Medical Research Workers** is drawn from all parts of India and consists of experts in their particular lines of research, discussed yearly the general policy of research work in India as well as the detailed schemes which are proposed to be undertaken by the Indian Research Fund Association in the following year. The results of these discussions are available to guide the members of the Scientific Advisory Board of the Indian Research Fund Association in making their recommendations for the programme of the following year. The Advisory Board also met in December and examined all the proposals for research work and recommended a scheme of research for the guidance of the Governing Body of the Indian Research Fund Association.

The official organ of the Association is the "Indian Journal of Medical Research," which has a wide international circulation. The Association also publishes "Indian Medical Research Memoirs," which are supplementary to the "Journal."

Since its inception a great number of inquiries have been carried out under the auspices of the Association and great expansion of its activities has taken place from small beginnings. The Association in 1929-30 financed 48 enquiries in the field of medical research, at an estimated cost of Rs 10,50,824. These included investigations into various aspects of malaria, plague, cholera, anti-rabic vaccines, kala azar, leprosy, helminthological and nutritional diseases, tuberculosis, bacteriophage and its uses for the treatment and prevention of dysentery and cholera, maternal mortality, morbidity in child-birth, anæmia of pregnancy in India, determination of hemoglobin in health and in anæmias, causation of foetal and maternal dystocia in India, sprue, indigenous drugs, drug addiction, skin diseases, diabetes, the blood changes occurring in certain tropical diseases, spirochaetosis transmission, study of the histology of the spleen and the bone marrow, filariasis, guinea-worm disease, relapsing fever, osteomalacia, secretion and composition of gastric juice in Indians, anthropological inquiry regarding determination of age for medico-legal purposes and several minor inquiries on other diseases.

The principal inquiries are the **Malaria Survey of India**, which is a Central organisation, located at Kasauli and Karnal, plague research at the Haffkine Institute, Bombay, kala azar by a commission in Assam, bacteriophage by Dr Asheshov at Patna, nutritional research by Colonel McCarrison at the Pasteur Institute, Coonoor, and indigenous drugs and drug addiction by Lt-Col Chopra at Calcutta.

The Malaria Survey of India, which now enjoys international recognition, is constantly called upon to advise as to the best methods for malaria prevention in India. As part of the activities of this organisation and in commemoration of Sir Ronald Ross' intimate association with India, an experimental malaria station was opened in Karnal in January 1927 and is known as The Ross Field Experimental Station for Malaria. Besides carrying out experiments in connection with the prevention of malaria, annual classes are held at which candidates from

all over India are shown the latest methods for dealing with the malaria scourge and are instructed how these methods should be applied. In connection with the Malaria Survey of India and in order to assemble all facts relating to malaria, a new publication has been started known as the "Records of the Malaria Survey of India," of which up to date four numbers have been issued.

The programme for 1930-31 consisted of 44 enquiries chiefly on the diseases above enumerated. It is proposed that the work of the Kala-azar Commission in Assam should be carried on as an enquiry into the cause, method of transmission, cure and prevention of kala azar conducted by Dr Napier of the School of Tropical Medicine and Hygiene, Calcutta. It is also proposed to institute a Cholera Commission which will investigate the various aspects of the disease.

Geological Survey—The ultimate aim of the Geological Survey of India is the preparation of a geological map of India upon the accuracy of which the solution of most geological problems ultimately depends. Maps accompany the reports on the various areas in the publications of the Department and a large amount of information is made available to the public. Such maps represent pioneer work which enables prospectors and mining engineers to cut short their preliminary investigations and to start where the Geological Survey has left off. During the preparation of the geological map and the general survey of the country, mineral deposits of importance are sometimes discovered. Such discoveries are published without delay and every endeavour is made to induce private firms to take up the exploitation of the mineral discovered. Collections of minerals, rocks and fossils are accumulated and exhibited in the public galleries of the Indian Museum, situated in Calcutta. Some of the most interesting and scientifically valuable additions to the collections in recent years have been the remains of anthropoid apes of great age discovered at different places in the Siwalik Hills, a range which for hundreds of miles runs parallel to the Himalayas, at a short distance below the foot hills of the latter, and is largely composed of Himalayan detritus. The Geological Survey helps in the spread of geological education in India by the presentation of mineral, rock and fossil specimens to educational institutions. The knowledge gained concerning the geological structure of India and the composition of the rocks that compose the strata enables the department to help in the solution of engineering problems connected with the selection of sites for dams for reservoirs, the safety of hill slopes and the suitability of particular building stones for particular purposes. The Department is also often able to advise on problems concerned with the supply of water. As a result of the knowledge gained concerning the structure and disposition of the mineral deposits of India, the Department is also in a position to give advice concerning the conservation of the mineral resources of the country. The Geological Survey also undertakes the examination and identification, without fee, of any minerals, rocks and fossils sent in by private observers. The publications of the Survey include the Memoirs, Records and Palæontologia Indica. The Survey headquarters are in Calcutta.

Posts and Telegraphs.

POST OFFICE

The control of the Posts and Telegraphs of India is vested in an officer designated Director-General of Posts and Telegraphs who works in subordination to the Government of India in the Department of Industries and Labour. For the efficient working of the Department a representative of the Finance Dept.—the Financial Adviser to Posts and Telegraphs—has been attached to this office of the D. G. P. & T. The Financial Adviser not only controls the Finance of the Dept but also assists the D. G. P. & T. in all matters containing financial implications. The superior staff of the Director-General in addition to the Director-General himself consists on the postal side of one Senior Deputy Director-General, one Deputy Director-General (postal services) and seven (including one temporary) Assistant Directors who status is similar to that of Deputy Postmaster-General.

There is also a Publicity Office attached to the D. G. P. & T. The headquarters of this office is at Bombay.

For postal purposes the Indian Empire is divided into nine circles as shown below, Bengal and Assam, Bihar and Orissa, Bombay, Burma, Central Madras, Punjab and North-West Frontier, United Provinces and Sind and Baluchistan. Each of the first eight is in charge of a Postmaster-General and the Sind and Baluchistan Circle is controlled by a Director, Posts & Telegraphs. The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies.

The Postmaster-General is responsible to the Director-General for the whole of the postal arrangements in their respective circles, including those connected with the conveyance of mails by railways and inland steamers. All the Postmasters-General are provided with Deputy and Assistant Postmaster-Generals. The nine Postal Circles are divided into Divisions each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors.

Generally there is a head post office at the headquarters of each revenue district and other post offices in the same district are usually subordinate to the head office for purposes

of accounts. The Postmasters of the Calcutta, Bombay, and Madras General Post Offices and of the larger of the other head post offices are directly under the Postmaster-General. The Presidency Postmasters, indeed, have one or more Superintendents subordinate to them. When the duties of the Postmaster or head office become so onerous that he is unable to perform them fully himself a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed. The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries. The officer in charge of such an office works it either single handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents such as school-masters, shopkeepers, landholders or cultivators who perform their postal duties in return for a small remuneration.

The audit work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Finance Department of the Government of India and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountants-General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub post offices and a few head offices perform telegraph work in addition to their postal work and are known by the name of combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph offices working under the control of the Post Office.

The Inland Tariff (which is applicable to Ceylon and Portuguese India except as indicated below) is as follows:—

| | When the postage is prepaid | When the postage is wholly unpaid | When the postage is insufficiently prepaid |
|--|-----------------------------|--|--|
| Letters | Anna Pies | | |
| Not exceeding two and a half tolas | 1 3 | Double the prepaid rate (chargeable on delivery) | Double the deficiency (chargeable on delivery) |
| Every additional two and a half tolas or part of that weight . . . | 1 3 | | |
| Book and pattern packets | | | |
| Every 5 tolas or part of that weight . . | 0 6 | | |

Postcards.

Single 0 ples

Reply 1 anna 6 ples

(The postage on cards of private manufacture must be prepaid in full)

Parcels (prepayment compulsory).

(a) Parcels not exceeding 440 tolas in weight,—

Rs a.

Not exceeding 20 tolas . . . 0 2

Exceeding 20 tolas but not exceeding 40 tolas . . . 0 4

For every additional 40 tolas or part of that weight .. . 4 annas

(b) Parcels exceeding 440 tolas in weight —

Exceeding 440 tolas but not exceeding 480 tolas . Rs 3 0

4 annas for every additional 40 tolas or fraction thereof up to 800 tolas

Registration is compulsory in the case of parcels weighing over 440 tolas

These rates are not applicable to parcels for Portuguese India

In the case of parcels for Ceylon a registration fee of 3 annas is chargeable on each parcel in addition to the rates shown above

Registration fee Rs a.

For each letter, postcard, book or pattern packet, or parcel to be registered 0 3

Ordinary Money Order fees.

On any sum not exceeding Rs 10 . 0 2

On any sum exceeding Rs 10 but not exceeding Rs 25 . 0 4

On any sum exceeding Rs 25 up to Rs 600 . 0 4

For each complete sum of Rs 25, and 4 annas for the remainder, provided that, if the remainder does not exceed Rs 10, the charge for it shall be only 2 annas

Telegraphic money order fees—The same as the fees for ordinary money orders *plus* a telegraph charge calculated at the rates for inland telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message. In addition to the above a supplementary fee of two annas is levied on each inland telegraphic money order

In the case of Ceylon the telegraph charge is calculated at the rates shown below —

Express—Rs 2 for the first 12 words and 3 annas for each additional word**Ordinary**—Re 1 for the first 12 words and 2 annas for each additional word. Telegraphic money orders cannot be sent to Portuguese India

Value-payable fees—These are calculated on the amount specified for remittance to the sender and are the same as the fees for ordinary money orders

Insurance fees

Acknowledgment fee—For each registered article 1 anna.

The Foreign Tariff (which is not applicable to Ceylon or to Portuguese India except in respect of insurance fees for parcels and parcel postage) is as follows—

Letters.

To Great Britain and Northern Ireland other British Possessions and Egypt, including the Sudan { 2½ annas for the first ounce and 2 annas for each additional ounce or part of that weight.

To other countries, colonies or places { 3½ annas for the first ounce and 2 annas for every additional ounce or part of that weight

Postcards, Single 2 annas.

" Reply 4 annas.

Printed Papers—½ anna for every 2 ounce or part of that weight.**Business Papers**—For a packet not exceeding 8 ounces in weight . 3 annas

For every additional 2 ounces or part of that weight . . . ½ anna

Samples—1½ annas for first 4 ounces and ½ anna per 2 ounces thereafter.**Parcels**

(a) Parcels not exceeding 20 lbs in weight and addressed to Great Britain and Northern Ireland are forwarded as mails to the British Post Office, the rates of postage applicable to such parcels being as follows —

Via Over-
Gibraltar land

For a parcel—

Rs.a p Rs.a p

Not over 3 lbs 1 8 0 | 1 14 6

Over 3 lbs, but not over 7 lbs 2 12 0 | 3 4 6

" 7 " " 11 " 3 15 0 | 4 7 6

" 11 " " 20 " 6 3 0 | 7 3 0

These parcels are delivered by the post office and the postage paid carries them to destination.

Money Orders — To countries on which money

TELEGRAPH DEPARTMENT.

Telegraphs—Up to 1912 the telegraph system in India was administered as a separate department by an officer designated Director-General of Telegraphs who worked in subordination to the Government of India in the Department of Commerce and Industry. In that year it was decided to vest the control of Posts and Telegraphs in a single officer as an experimental measure with a view to the eventual amalgamation of the two Departments.

In pursuance of this policy an experimental amalgamation of the two services was introduced in the Bombay and Central Circles from the 1st July 1912. The fundamental principles of this scheme which followed closely the system in force in the United Kingdom and several other European countries were that the traffic and engineering work of the Telegraph Department should be separated, the former branch of work in each Circle being transferred to the Postmaster-General assisted by a Deputy Postmaster-General and a suitable number of attached officers and the engineering branch being controlled by a Director of Telegraphs in charge of the two Circles. Subordinate to this officer there were several Divisional Superintendents who were assisted by a number of attached officers.

In 1914 the complete amalgamation of the two Departments was sanctioned by the Secretary of State and introduced from 1st April. The superior staff of the Direction, in addition to the Director-General himself, consists on the engineering side of a Chief Engineer Telegraphs, with one Personal Assistant. For traffic work there is a Deputy Director-General, with an Assistant and an Assistant Director-General. On the 27th March 1920 a Controller of Telegraph Traffic was appointed to assist the Deputy Director-General in the inspection of offices and in controlling telegraph traffic. In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes India was divided up into five Circles, each in charge of a Director. For Burma special arrangements were considered necessary and the engineering work is in charge of the Postmaster-General who is a Telegraph officer specially selected for the purpose. These six Circles were divided into twenty-one Divisions, each of which is in charge of a Divisional Engineer. On the 1st July 1922 Sind and Baluchistan circle was formed with its headquarters at Karachi. This circle is in charge of a Director of Posts and Telegraphs. On the 31st March 1924 there were 7 Circles and 20 Divisions. With a view to complete fusion of the three branches of work on the lines of the Burma Circle, the engineering work of the Bombay and Central Circles was brought under the control of the respective Postmaster-General in 1925 and this unification proved an unqualified success and was gradually extended to other circles. The fusion was completed in March 1930.

There is also a Wireless Branch attached to the Director-General's office, which is in administrative control of all wireless work in the Department. The Director of Wireless is in charge of this branch and is assisted by two officers.

The telegraph traffic work is under the control of the Postmasters-General, each of whom is assisted by a Deputy Postmaster-General and a suitable staff of attached officers.

The audit work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant-General, Posts and Telegraphs, assisted by a staff of Deputy and Assistant Accountants General.

Inland Telegrams and Tariff—Telegrams sent to or received from places in India or Ceylon are classed as Inland telegrams. The tariff for inland telegrams is as follows—

Week-end Letter Telegrams accepted on Saturday or any previous day of the week for delivery on the following Monday—3½ annas per word for Great Britain and Northern Ireland

Daily and Week-end Letter Telegrams—Minimum charge for 20 words

Ordinary rate telegrams may be written in Code

Telegrams are accepted at all Government Telegraph Offices

Usual rules apply regarding Registration Reply Paid, etc

Full lists published in Posts and Telegraphs Guide

Growth of Telegraphs—At the end of 1897-98 there were 50,305 miles of line and 155,088 miles of wire and cable, as compared with 106,547 miles of line including cable and 573,461 miles of wire including conductors respectively, on the 31st March 1931. The numbers of departmental telegraph offices were 237 and 121 (including 17 Radio offices), respectively, while the number of telegraph offices worked by the Post Office rose from 1,631 to 4,297

The outturn of the workshops during 1930-31 represented a total value of Rs 24,02,163

Wireless—The total number of departmental wireless stations open at the end of 1930-31 was twenty-seven, viz., Allahabad, Bombay, Calcutta, Delhi, Diamond Island, Gaya, Jodhpur, Jutogh, Karachi, (two stations) Lahore, Madras (3 stations), Mhow, Nagpur, Peshawar, Poona, Port Blair, Quetta, Rangoon (3 stations), Sand heads (two pilot-vessels), Secunderabad, and Victoria Point of which only Port Blair and Victoria Point booked telegrams direct from the public

The Duplex high speed service between Rangoon and Madras continued to work satisfactorily, the wheat stone system being employed generally for this circuit. Communication with the Imperial Air Mail Aeroplanes is maintained during flight by Karachi Radio between Karachi and Jask

The aeroplane conveying passengers and mails between Karachi and Delhi were in continuous wireless communication with the wireless stations at Karachi, Jodhpur and Delhi during flight

Telephones—On the 31st March 1931 the number of telephone exchanges established by the Department was 296 with 18,834 straight line connections and 3,141 extension telephones. Of these exchanges, 160 were worked departmentally. The number of telephone exchanges established by Telephone Companies was 21 with 31,919 connections

The total staff employed on telegraphs telephones and wireless on the 31st March 1931 was 14,680

Posts and Telegraphs—The capital outlay of the Indian Posts and Telegraphs Department during and to the end of the year ended 31st March 1931 was Rs 67,56,697 and Rs 15,22,36,121 respectively. The receipts for the year ended 31st March 1931 amounted to Rs 10,77,86,054 and charges (including interest on capital outlay) to Rs 12,11,35,362, the result being a net loss of Rs 1,33,49,308

Sanitation.

The history of the sanitary departments in India goes back for about fifty years. During that period great improvements have been effected in the sanitary condition of the towns, though much remains to be done, but the progress of rural sanitation which involves the health of the great bulk of the population has been slow and inconspicuous with the thought and labour bestowed on the subject. The reason lies in the apathy of the people and the laxity with which they cling to domestic customs injurious to health. While the inhabitants of the plains of India are on the whole distinguished for personal cleanliness, the sense of public cleanliness has ever been wanting. Great improvements have been effected in many places, but the village house is still often ill-ventilated and overpopulated, the village site dirty, crowded with cattle, choked with rank vegetation and poisoned by stagnant pools, and the village tanks polluted, and used indiscriminately for bathing, cooking and drinking. That the way to improvement lies through the education of the people has always been recognised.

Of recent years the pace has been speeded up as education progressed, education developed, and funds were available. In a resolution issued in May 23rd, 1914 the Government of India summarised the position at that time, and laid down the general lines of advance. This resolution (*Gazette of India*, May 25th, 1914) should be studied by all who wish to understand the attitude of the Government of India towards sanitation prior to the passing of the Reform Act of 1919. It will be found summarised in the Indian Year Book of 1922 (page 475 *et seq*) and earlier editions. One of the greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsible to local control through Ministers. It is yet too early to attempt to indicate the effects of this change.

The Public Health Commissioner with the Government of India in a general review of health organisation in British India which he laid in January, 1923, before the Interchange Study Tour organised for Medical Officers of Health from the Far Eastern Countries by the Health Organisation of the League of Nations, concluded that the State effort in regard to Health Organisation in British India is one of no mean importance, that it has evolved over a couple of centuries during which many mistakes in policy must be admitted that it has provided the Officers and the stimulus necessary for laying the foundations of medical education, that it has tried to uphold the ethical standards of western medicine and that in whichever way it is regarded it is an effort of which no Government need be ashamed. He quoted the remark of the Government of India in their Resolution of 1914, that "In the land of the ox cart one must not expect the pace of the motor car."

The Public Health Commissioner in his annual report for the year 1925 noted the introduction of the political element into health matters as a result of the Reforms and said that the improvements being introduced before the Reforms were in some provinces now in a fair way to maturing, but that in other provinces "with less appreciation of the actual needs so far from adding to the organisation as they have found it have shown a desire to scrap even some of what they originally possessed." But, he says, though the picture is neither bright nor the future rosy, it is becoming increasingly evident that a considerable section of the Indian community is thinking seriously on these public health problems amid much futile and destructive criticisms of State and municipal efforts here and there valuable and suggestive criticism can be met with which goes to prove my contention.

India's birth rate in 1925 was nearly twice that of England and Wales, her death rate was twice that of England and Wales and nearly three times that of New Zealand and her infantile mortality rate was nearly 2½ times that of England and Wales and nearly 4½ times that of New Zealand. The information furnished for the great group of infectious diseases of world importance—plague, cholera, small-pox, yellow fever, typhus, malaria and dysentery shows (says the Public Health Report already cited) that if we except typhus and yellow fever, India is one of the world's reservoirs of infection for the others and the main reservoir of infection for plague and cholera. The significance of these facts must add the Commissioner be obvious to all who think. Briefly their implication is that India's house, from the public health point of view is sadly out of order and that this disorder requires to be attended to. It is not for India to say that so far as she is concerned prevention is impossible. If we think of the effect of sunlight on tubercle ridden children, of the effect of feeding on rickets, scurvy and beri-beri of the way in which malaria, cholera, yellow fever, dengue, ankylosomiasis and filariasis can be and have been overcome we need have no fear in regard to India provided the necessary measures are put into operation.

The Public Health Commissioner in an address before the annual congress of the Far Eastern Association of Tropical Medicine, held in Calcutta in December, 1927, urged the importance of instituting a Central Ministry of Health which should be charged with the functions of co-ordinating the policies and activities of the departments concerned in the several provinces and with keeping them abreast of scientific progress. There is at present no public Health Act for the whole of India, nor under existing administrative arrangements is one immediately possible, but the desirability of the Central Ministry of Health and of such an Act is likely to be urged in the course of the revision of the Constitutional Reforms now in progress.

The Commissioner in his annual report to Government for 1927 gives at the outset the following text for thought 'Whether the institution of a Ministry of Health, which many of us think is long overdue for the Indian Empire, would accelerate progress is a matter of opinion, but there can be little doubt that such progress must depend not on a haphazard programme or on the fulfilment of an annual routine of measures sanctified by tradition but rather on the acceptance of such cardinal principles as have been laid down by the Chief Medical Officer of the British Ministry of Health in his 1927 report and by a genuine attempt to work to these. Sir George Newman points out that 'Nothing is more certain than the fact that the physical advancement and health of mankind is dependant not upon a doctor's stunt here or a sanitary institution there but upon the whole social evolution of the people. Now, these desired ends are not reached merely by announcing them, still less by leaving things to chance, drift or fate. They can in any case only be partly reached at all without foresight, organisation and expenditure.' He proceeds to inculcate four basic principles which it is necessary for

any modern State to work to and which are as follow —

- (a) ascertainment and accurate registration of the data obtainable,
- (b) the establishing of a definite standard to work to, which should be based on health and physiology and not on disease or pestilence,
- (c) the study of the character and incidence of disease, its causes and predisposing conditions, its mode of spread, its social factors which increase or reduce it and the means of its treatment and prevention,
- (d) the establishment of a national organisation by the assent of public opinion, such organisation being an index of the aspirations and enlightenment of the people

It is for consideration how far we in India are now working to these basic principles or are likely to in the future and whether our existing public health organisation is best suited to enable us to do this "

The following table of vital statistics is taken from the Public Health Commissioner's latest annual report —

| Province | Birth Rates (per mille) | | Death Rates (per mille) | |
|-----------------------------|-------------------------|------------------|-------------------------|------------------|
| | 1929 | Previous 5 years | 1929 | Previous 5 years |

Statistical health reports for all India are always in vithy submitted the number of provinces from which returns have to be collected.

The Public Health Commissioner in his most recently published annual review shows that the outstanding data concerning public health in the year 1929 are briefly as follows —

(1) The birth-rate fell from 36.78 per mille in 1928 to 35.47 in 1929.

(2) The death-rate rose from 25.50 p.m in 1928 to 25.95 in 1929.

(3) The infantile death-rate (per 1,000 live-births) rose from 173 in 1928 to 178 in 1929. The death-rates of some other countries during 1929 were—England and Wales 74, Canada 92, United States of America 68, New Zealand 34, Australia 51, Union of South Africa (White) 64. Live-births in British India numbered 8,565,341 or 317,222 less than the figure for 1928, the birth-rate being 35.47 against 36.78 in 1928, 35.27 in 1927, and 34.98 the quinquennial mean. The proportion of males to every 100 females born was 108, the same as the quinquennial average. The highest birth rate was recorded in Delhi Province (47.89) and the lowest in Coorg (22.12). The most noticeable decreases occurred in United Provinces (—3.91), Bihar and Orissa (—2.7), Central Provinces (—2.55). Except in Bihar and Orissa, United Provinces and Central Provinces the quinquennial average was exceeded in all the provinces. In Bombay Presidency the birth-rate recorded was the highest on record since 1901. In the Punjab the birth-rate varied between Hissa (53.8 p.m the highest) and Karmal district (34.6 p.m the lowest). Birth ratios exceeded death ratios in all the provinces except Coorg, where the death-rate was in excess by 1.62. The following provinces showed the largest increased ratios of births over deaths—Punjab (15.75), Madras (12.63), Assam (11.86), Delhi (11.10) and United Provinces (10.07).

Deaths numbered 6,267,391, males being 3,255,402 and females 3,011,989, as compared with 6,180,114 in 1928 an increase of 87,277. Registered births exceeded deaths by 2,297,950. Coorg excepted, all the provinces contributed to the increase. The death-rate was 25.95 per mille as against 25.50 in 1928 and a quinquennial mean of 26.09.

A total of 1,528,026 deaths or 24 per cent of the total mortality occurred during the first year of life, against 1,536,186 or 25 per cent in 1928. (In England and Wales the corresponding figures for 1928 and 1929 were 9.3 and 9.0 respectively.) The death-rate per 1,000 live-births was 178.39 (172.94 in 1928). It varied between 240 (the highest) in Central Provinces and Berar and 135 (the lowest) in Bihar and Orissa.

Throughout British India 53 out of every 1,000 infants born alive failed to survive the first week of life and about one half of the infantile mortality (under one year) occurred during the first month and the other half occurring during the rest of the year.

The Public Health Commissioner writes — "India's death-rate in 1928 was nearly double that of England and Wales and three times that of New Zealand, her infantile mortality rate was nearly 24 times that of England and Wales and about five times that of New Zealand. One is often tempted to pause and ask oneself whether our efforts to reduce the infantile mortality are leading us, and whether the efforts on behalf of the child up till one year of age are

not in the long run useless unless the work of supervision is continued to school age. There is to my mind little doubt that adequate nutrition must be ensured during this pre-school age otherwise the child saved during the dangerous first year will be certain to lapse into the class of the physically defective and be liable to preventable disease. Unsuitable and insufficient food leads to malnutrition and disease and so we must return to education as the bedrock of progress—education in this case on the basic foods necessary for healthy development. This represents perhaps the most useful aspect of our child welfare work, though much requires to be done to improve the standard of nutrition amongst India's masses.

"How far away India still is from being able to furnish a reasonably accurate statement regarding her maternal mortality it is difficult to say, but present figures are of little value. What India's true figures would be it is difficult to imagine, but, since the revised classification of 1911, we know the extent of this vast and largely unexplored field for female medical activity and this presupposes the need for trained workers—such workers as are now being turned out by the various activities under the Lady Dufferin Fund. To meet this, money is essential, Government cannot do everything in this respect, and the crying needs are for interest in the work and money to carry it on and expand it. If England can, in 1928-29, organised 891 ante-natal clinics (301 being voluntary), 2,480 maternity beds in 152 institutions, 2,522 infant welfare centres (899 being voluntary), 24 babies' hospitals with 604 beds, 15 observation wards with 131 beds, and 4,131 health visitors, it is easy to realise the extent. There is no royal road here, for it is the people only who can save themselves by showing their commonsense, their intelligence, and their acceptance of hygienic standards and laws.

"A word is necessary re tuberculosis in India. This is one of our biggest problems and will, I hope, be tackled in the near future by a suitable organisation. The keynote is not 'sanatoria,' but education. This will have to be done largely by Indians as it is for Indians—but, that it will bear fruit in season there cannot be much doubt. The women's movement—now so effectually launched in most provinces—would seem to be able to exert a great and beneficial action on this disease within a very short period, if it succeeds as many believe it will, in mitigating the hygienic disadvantages of purdah.

"Meat and food control and nutritional investigation on an organised basis are in their infancy, but they must come more and more to the front in connection with public health work in India. The influence of the teaching and research on this in the new Public Health Institute in Calcutta, once it is opened, will, it is expected, be both beneficial and great.

"India's International health relations and commitments remain much as before and have been fully dealt with. If, however, India's trade is not to be penalised and her fair name to be besmirched, it will be imperative to realise that grading up of ports is an essential item of port policy, a sound and necessary investment and one of the cost of which must be met generously and with an eye to the future."

THE HEALTH OF THE ARMY

*General Health statistics of the British Army in India
during the year 1929*

| 1929 | Average Strength | Admissions | | Deaths | | Invalids sent Home | | Invalids discharged in India | | Invalids finally discharged in United Kingdom | | Average Constantly sick | |
|--|------------------|------------|-----------------|--------|-----------------|--------------------|-----------------|------------------------------|-----------------|---|-----------------|-------------------------|-----------------|
| | | No | Ratio per 1,000 | No | Ratio per 1,000 | No | Ratio per 1,000 | No | Ratio per 1,000 | No | Ratio per 1,000 | No | Ratio per 1,000 |
| Officers | 2,395 | 9,96 | 415.9 | 17 | 7.10 | 34 | 14.20 | | | | | 36 | 64.15.20 |
| British Other Ranks | 55,628 | 33,908 | 609.5 | 158 | 2.84 | 544 | 9.78 | | | | | 1,693 | 47.30.44 |
| British Other Ranks' wives | 3,921 | 1,259 | 321.1 | 9 | 2.30 | 58 | 14.79 | | | | | 43 | 34.11.05 |
| British Other Ranks' wives — parturition | | 826 | | | | | | | | | | 33 | 84 |
| British Other Ranks' children | 6,162 | 1,690 | 274.3 | 87 | 14.12 | 14 | 2.27 | | | | | 62 | 00.10.06 |
| Others | | 2,005 | | 40 | | 23 | | | | | | 73 | 93 |

There were 158 deaths or 2.84 per 1,000 of the strength compared with 2.95 per 1,000 in 1928 and 3.34 in 1913

| | | | | | |
|---|----|--|--|----------------------|---|
| The most important causes of mortality were — | | | | Drowning | 8 |
| Local injuries | 22 | | | Tuberculosis of lung | 7 |
| Enteric group of fevers | 19 | | | Malaria | 7 |
| Pneumonia | 16 | | | Effects of heat | 6 |
| Appendicitis | 9 | | | Suicides | 6 |

544 or 9.78 per 1,000 of the strength were sent home as invalids compared with 9.57 in 1928 and 7.49 in 1913

| | | | | | |
|---|----|---|----|---|--|
| The principal causes of invaliding to the United Kingdom were — | | | | The invaliding rate shows no significant change, the slight fall that has occurred was due to a decrease in the number of invalids for middle ear disease and deformities of the feet | |
| Tuberculosis— | | | | The average number constantly sick in hospital was 1,693.47 or 30.44 per 1,000 of the strength, compared with 23.04 per 1,000 in 1928, 29.18 in 1927 and 29.65 in 1913 | |
| Pulmonary | 40 | } | 57 | 81,437 men, or 1,464.0 per 1,000 of the strength were treated as out patients, with an average daily number under treatment of 1,103.27 or 19.88 per 1,000 | |
| Other forms | 17 | | | The combined ratio constantly sick in hospital and under treatment as out patients was 50.32 per 1,000 of the strength compared with 46.97 in 1928 | |
| Diseases of middle ear | | | 52 | The actual loss to the army in India in working days was 615,116 due to sick in hospital and 403,642 due to sick in barracks making a total of 1,021,758 days compared with 970,000 in 1928 | |
| Mental diseases | | | 52 | | |

| Rheumatic fever | | | 9 | | |

BLINDNESS IN INDIA

All over the East, and in fact in most tropical and sub-tropical countries, blindness is very prevalent, and only of recent years have people begun to realise that much of this blindness can be relieved, and still more of it, if not most of it, could, with proper measures taken, be prevented. In Egypt, renowned for its sufferings from blindness, it was a gift of some £43,000 made by Sir Ernest Cassel at the beginning of this century that was the initiation of that fine ophthalmic service, which began under the guidance of Mr MacCallen, has now spread all over the country and gives medical treatment to three or four hundred thousand patients a year. Northern Africa, Turkey, Persia, India and China are all countries where there is a very high incidence of blindness and suffering from eye disease, and where western medicine has not yet penetrated sufficiently deeply to make much impression on the mainly rural and illiterate populations. There is a great "trachoma belt" extending from China into Eastern Europe, stopped only from spreading all over the West by the higher standard of living, sanitation and cleanliness which the European nations have attained.

India is in this great **Blindness Belt**. According to the last census returns there are 480,000 totally blind persons in this population of more than 300 millions. That is an incidence of $1\frac{1}{2}$ totally blind to every thousand of the population. But the census figures are notoriously defective, and in several districts a special count has been made of the totally blind, and wherever this has been done, the census figures have been found to be much too low. Thus in the Nasik district an incidence of at least 4.38 per thousand was found as against the census figure of 1.74. In Ratnagiri an incidence of 1.5 was found as against the census figure of 0.7, in Bijapur 2.6 as against 0.7, in the United Provinces a Deputy Commissioner had a count made and found no less than 9 per thousand. In Palanpur 7 per thousand was found. If, as is not unlikely, this sort of error of under-estimation in the census report is general, then it is not unreasonable to suppose that the real number of totally blind persons in India is more like $1\frac{1}{2}$ millions than the half million shown in the census returns.

These are the figures for total blindness and they by no means give the full picture, for they include only totally blind of both eyes and say nothing of the much greater number who, from neglected eye diseases, are partially or even nearly blind, and whose happiness and efficiency are thus greatly impaired. The term "blindness" has a different interpretation in every country. In a report on the Prevention of Blindness, published by the League of Red Cross Societies these different interpretations are shown. In the United States blindness is defined as "inability to see well enough to read even with the aid of glasses, or for illiterates, inability to distinguish forms and objects with sufficient distinctness" and in Egypt a

person is accounted blind who cannot see fingers at a distance of one metre. If such persons were counted in our statistics of total blindness in India, there is little doubt that the figure would be very much larger than those indicated above. Recently the **All-India Blind Relief Association** has made an analysis of a very large number of patients attending its camps and dispensaries, and has found that among these patients for every totally blind person there are three with more or less damaged vision, the result of eye disease. It appears not unlikely that the true ophthalmic condition of India would be represented by figures showing one and a half million totally blind persons, and in addition to these four and a half million with more or less impaired eyesight.

"No one," says Col R. H. Elliot, late of the Madras Ophthalmic Hospital, writing in the British Journal of Ophthalmology of May 1919, "who has not worked in India can form any conception of the enormous amount of preventable and curable blindness which is laying its shadow over the health, happiness and usefulness of this great portion of our Empire", and the same writer in another place has said — "It is difficult for anyone who has not had first hand experience of medical practice in the East to realise the state of things out there. Granular ophthalmia claims its victims by the ten thousand, whereas it is really a disease which, when properly treated at an early stage, should not cause the loss of a single eye. The neglect of patients suffering from small-pox and other febrile conditions leads to a vast amount of blindness, while the treatment of mild ocular affections by irritant drugs is probably one of the most evil factors that spread blindness broadcast throughout the land. Large numbers of men and women suffering from glaucoma, from cataract and from other curable diseases, are allowed to hide in their villages like wounded animals, waiting only their release by death. This is not an overdrawn picture. It is a statement of cold, hard, cruel facts, well known to everyone who has practised or is practising medicine in the East."

In an editorial on the Ophthalmic work in Egypt and the possibilities of similar work in India, the *Indian Medical Gazette* (March 1923) remarks — "It would seem worth while for the Government of India to examine the working of this splendid organisation, for, in spite of the fact that workers in India have always been in the front in advances in ophthalmology, there has been little organised work in ophthalmic research except in Madras, even there the work has been done by men who have already a large amount of routine work to perform. India as a whole owes its position in the ophthalmic world entirely to the energies of individual enthusiasts, whose names are so well known that it is not necessary to mention them. What has been possible in Egypt should also be possible in India and it would appear that the first step should be the establishment of **Schools of**

Ophthalmology, in places like Madras and Calcutta, where ample facilities exist. At these schools advanced teaching and research in ophthalmology would be carried out, and the next step would be to organise a system of ophthalmic relief at selected centres all over India" (There are now schools of ophthalmology at Madras, Bombay, Calcutta, and Lahore)

Again in an editorial from the same journal (Sept 1920) the following statements are made—

'What is wanted is some large organisation covering the whole of this sub-continent and aiming chiefly at **Prevention rather than treatment**

In brief what the position now calls for is an all-India movement. Obviously the main question is one of general public health. Public health is a transferred department, but if the Health Department of the Government of India interests itself in the matter in co-operation with missionary and voluntary movements, we do not despair of seeing an all-India organisation created and built up."

Associations known as "**Blind Relief**" Associations have been working for several years in Western India in conjunction with Government hospitals, to alleviate this affliction of blindness. The number of eye doctors in India is notoriously small and those there are staying mostly in the large towns. The Associations work by means of travelling hospitals, which bring relief to the villages in the rural areas. They also work by means of trained village workers, whose duty it is to find out the 'hidden blind' and get them to the medical centre for relief, to find out cases of small-pox (a constant source of blindness in children), to inspect new born children for the detection of ophthalmic neonatorum, to keep registers of all blind and partly blind persons and persons suffering from eye disease, and to treat in the villages simple cases of conjunctivitis or sore eyes. Since their inception the Associations have been the means of restoring sight to thousands of blind people and of preventing blindness in many thousands more. The work is capable of indefinite extension and the need for some such organisation has been shown. In 1917 Colonel Elliot wrote as follows, 'To me it seems that the duty and privilege of undertaking this work lie with the State and that no sum spent on such a task could be too large. Unfortunately this is not the view that has been taken by those

in authority and consequently we see the spectacle of private enterprise endeavouring to undertake this colossal task.

It is at least permissible to voice an admiration for the stand taken by Mr Henderson [Founder of the Blind Relief Association movement, who began the work in 1913]. The best that one can hope for his endeavour is that he will succeed in arousing the conscience of educated Indians to the needs of their less fortunate countrymen, and that this little cloud, no bigger than a man's hand, will end in a monsoon of active effort". As the above was written in 1917, it is not altogether applicable to the criticism of Government of to-day, as it has already been shown that there are now several schools of ophthalmology in India, and the Government eye hospitals are doing tremendous work, but these hospitals are situated in the large towns and cannot possibly by any stretch of imagination, give relief to the millions living in the rural areas.

The All-India Blind Relief Association.—(The Green Star Society) exists to co-ordinate and centralise the various Associations in the mofussil and to extend their work. It is under the patronage of the Governor of Bombay, and has for its life President, Mr C G Henderson (late I C S) who founded and managed for many years all the branch Associations working in Western India. It is affiliated to the International Association for the Prevention of Blindness, which has its headquarters in Paris and was formed on September 14th, 1920, under the auspices of the League of Red Cross Societies and the American Society for the Prevention of Blindness. The organising Secretary is R Crawford Hutchinson, The Town Hall, Bombay.

A beginning has been made, but it is only a beginning, and it is but the fringe of this vast problem that has been touched. The schools of ophthalmology in India, are turning out ophthalmic surgeons who are crowding their profession in the cities and large towns. A scheme for taking these men and placing them in selected centres has been worked out, all that is required is monetary help. The cost is *minimal* and here is an opportunity for the generous and public spirited to emulate Sir Ernest Cassel, and give to India an eye service of which India and the whole world could be proud, and to the peoples of India that which to them is probably their most precious possession—their sight.

THE MATERNITY AND CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling maternal and infant mortality. The figures for maternal mortality are not accurately known but they are certainly not less than 10 per th usand live births, often more. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy. A noteworthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford and also to the Indian Red Cross Society, which aims at gradually establishing a network of child welfare centres in most of the larger towns in India. The amalgamation of these two bodies which has taken place, forming the Maternity and Child Welfare Bureau, will undoubtedly increase and develop the work. In all the great centres of population, work is now being done for the training of midwives, for the instruction of mothers and for the care of babies. Training centres for Indian and Anglo-Indian women have been opened in order to spread the elements of infant hygiene to other parts of India. Most hopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers. But such is the magnitude of the field, that a consistent widespread effort on a scale hitherto impossible must be undertaken, if any appreciable reduction is to be made in the appalling mortality of young children.

Centres of Activity—These may be most conveniently grouped under provinces though the various provinces differ considerably in the nature of the work undertaken and the amount of organisation displayed. It is noteworthy that the work is most co-ordinated and most energetically carried on where there are persons appointed under the Directors of Public Health whose special duty it is to foster Child Welfare activities.

Bombay Presidency—In Bombay City two organisations are at work, namely, that under the Corporation and a voluntary society. Both employ medical women and health visitors who conduct clinics and do home visiting. The Corporation also staffs and runs a number of small maternity homes which are much appreciated by the people. Indeed an outstanding feature of maternity work in Bombay is the number of confinements which take place in hospitals. The wretched housing conditions and poverty of the people, however, carry off a very large proportion of the infants which are safely ushered into the world by the care of the hospitals. Organised child welfare work is unfortunately largely limited to the Presidency capital. In other places the development has rather been in the direction of the establishment of small maternity homes, which are mostly very flourishing and do excellent work.

Propaganda work has been very energetically carried on by the Bombay Presidency Health and Baby Week. This organisation supplies literature, posters, magic lantern slides and even cinema films for health teaching and arranges for local baby weeks throughout the Presidency. The work of the Seva Sadan Society at Poona is remarkable for the encouragement it has given to education for the profession, medicine, nursing and public health. Without such trained personnel, progress would be repeatedly held up. The Karachi Branch of the Indian Red Cross Society has appointed a trained woman organizer for touring the districts of Sind, a region where the infant mortality is appallingly high. The Dair Improvement has done a remarkable work in training indigenous midwives in and around Hyderabad, Sind. The welfare work of the B B & C I Railway is making progress, a good many centres have been established and their efficiency is increasing.

Bengal—Here again the major portion of the child welfare work is carried on at the capital. Efforts are being made to spread the work into the districts, but progress is very slow. In Calcutta the Corporation carries on an extensive work, supplying trained midwives in the homes of the poor. The infants thus brought under the care of the scheme are followed up by a system of house visiting. The Indian Red Cross Society has several child welfare clinics, a feature of which is the supply of milk for children, free or at low cost. Besides this the Society is largely responsible for the Health visitors training school, to which the local government has as yet given no aid. In three of the big jute mills, centres are now established and it is hoped that further progress will soon be made in this direction. The work in Dacca progresses well and nearly half of the infants born are under the care of the scheme.

Madras—The child welfare scheme of the Corporation continues to develop. There is a danger that the desire of the people for medical aid will interfere with the truly preventive nature of the work, and the supply of medicines should be cut down. A large amount of milk is supplied free, or at less than cost price, to the poorer citizens. The Corporation midwives attend a very large number of confinements yearly. The Maternity and Child Welfare Association runs a number of centres which do good work. This Association has now become part of the Red Cross Society and it has restarted its Health visitors training school under new auspices. It is hoped that the Government will soon recognise the value of the work sufficiently to give the school financial aid.

In the Madras mofussil a good many centres are at work, some under municipalities or district boards and some under voluntary societies. This work is not of as high quality as one could wish and needs the directing hand of an expert. This has been provided by the appointment of an Assistant to the Director of Public Health whose special work is to inspect, control and encourage child welfare schemes.

Central Provinces—In these provinces the Child Welfare Division of the Red Cross Society receives a considerable grant from Government for the support of child welfare schemes in the various towns and districts. There is a great demand for these, and fortunately the demand can be met since the presence of a Health School provides the necessary number of Health visitors. The work is excellently organised and it appears probable that the health workers in the province may be formed into a proper cadre in the not distant future. The Health School is entirely maintained by Government.

The high degree of organisation shown in a province usually regarded as backward is remarkable and is due mainly to the enthusiasm of the Secretary who though not a paid worker, devotes a great deal of time to the work.

United Provinces—In these provinces the work is organised by a medical woman, a member of the W. M. S. who is assistant to both the Inspector General of Civil Hospitals and the Director of Public Health. As a result the work has made rapid progress and many centres are at work. The training school at Lucknow supplies the workers. Government gives extensive grants to the committee of management which is a sub-committee of the Indian Red Cross Society. There is also a midwives training school which trains large numbers who go to work in the districts subsequently. Baby and Health Weeks are also celebrated with aid from headquarters.

A course of training in Health work for women Sub Assistant Surgeons was commenced in 1931 a diploma is granted by the State Medical Faculty, U. P. This course supplies a long felt want for training medical women to do maternity and child welfare work.

The Punjab—The work here is perhaps more directly 'official' than in any other province. An Inspector of health centres works under the Director of Public Health who constantly tours and inspects the centres giving much advice and encouragement. The local management of centres is usually in the hands of voluntary committees which receive grants in aid both from the provincial Government and local bodies. Though the province is passing through a time of financial stress the principle of grants in aid is recognised and will be adhered to. The training school for health visitors is wholly undertaken by the provincial government. The high quality of the work done in the various centres is mainly due to the excellent training received at the school.

Assam—There is no organised work on the part of the provincial government, though in a few places an effort is being made to start it. The poverty of the province, the poor education of the women and the nature of the country make progress very difficult.

Bihar and Orissa—This is also a poor and backward province but a beginning has been made at Patna and Cuttack with the appointment of Maternity supervisors to control the work of indigenous *daïs*. In the coal mine areas, after many years of hesitancy, a start has been made which should lead to great activity and

corresponding benefit to the people. Health visitors are also at work in one of the most important of the Orissa Feudatory States.

Delhi—The work in Delhi was started early in the history of the movement, and it has been carried on in a manner worthy of the seat of Government. The Municipality employs a medical woman who superintends the work under the Medical Officer of Health. Centres are placed strategically throughout the city, the indigenous midwives are taught and controlled and medical inspection of school children is carried on. New Delhi and the district are under the Medical Officer of Health. New Delhi is also the seat of the oldest Health School in India which is mainly supported by the Maternity and Child Welfare bureau and which turns out well qualified health visitors every year as well as running two welfare centres.

North West Frontier Province—Practically the only civil work is carried on at Dehra Ismail Khan. This was started some years ago and has continued to flourish. A provincial *daï* training school is found here which provides for the training of *daïs* from various districts of the province.

Baluchistan—At Quetta the maternity work of the city has resulted in very complete control of the indigenous practising midwives to the great advantage of the people.

Rajputana—The Maternity Home, Ajmer, trains midwives for many of the States, and a certain amount of child welfare work is also carried on. Child welfare work is in existence at Jaipur and Nasirabad and there are possibilities latent in the various states which good organisation could develop.

Child Welfare in the Army—The care needed by the wives and children of sepoy is being increasingly realised and nowhere more than in the units themselves. The result has been, in the last few years, the opening of much work in this direction. Much of it is purely medical work which in the absence of families hospitals for the Indian soldiers, is a necessity. But genuine child welfare activities are also present in some centres many of them assisted by the M. & C. W. Bureau Indian Red Cross Society which has undertaken the organising work in place of the Lady Birdwood Army Child Welfare Committee. A remarkable feature of this movement is the keenness of the men themselves to aid it realising as they do the benefit to their own women and children. There are now very few cantonments where some work of this kind is not going on.

So far all the schemes have devoted their attention to educating women in the elements of mothercraft and attempting to preserve infant lives and improve child health. In a land of so many languages and superstitions progress will necessarily be slow and India has yet to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perish at a later stage from the many ills that childhood is heir to in a land of great poverty, under nourishment, epidemics and famine. In Western

lands the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in India also develop innumerable fresh roots, medical supervision, dental clinics, better housing, open air

playgrounds, etc., etc. But these are not yet its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high damage rate of sickly, under developed, incompetent citizens

INDIAN RED CROSS SOCIETY.

When the war first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St John of Jerusalem and the British Red Cross Society. The final report of that Committee shows that up to June 1920 its total receipts amounted to Rs 1,77,85,716 of which some 17 lakhs had been contributed by the British Red Cross Society. It had spent about 67 lakhs in Mesopotamia, nine lakhs on the Afghan War and Waziristan Expedition. In Mesopotamia and India combined it had spent on Red Cross objects in all about 117 lakhs.

It closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world-wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the Joint War Committee to the new Society, and authorised it not only to direct the utilization for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. As contemplated in the Act of Constitution of the Society, its activities are completely decentralized, and are being carried on through twenty-two Provincial and State Branches under which there are numerous sub-branches.

The objects on which the funds of the Society may be spent are—

1. The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised.

2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.

3. Child welfare.

4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.

5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.

6. Home Service Ambulance Work.

7. Provision of comforts and assistance to members of His Majesty's Forces, whether on the active list or demobilised.

The Society has five grades of subscribing Members, namely, Honorary Vice-Presidents, Patrons, Vice-Patrons, Members and Associate Members. Their respective subscriptions are Rs 10,000, Rs 5,000, Rs 1,000, Rs 12 annually or a consolidated payment of Rs 150, and anything between Re 1 and Rs 5 annually or consolidated payment of Rs 50. At the end of 1930 there were 19,593 adult members of these various grades.

To stimulate interest in the aims and objects of the Society amongst the future generations a Junior Red Cross movement has been instituted which embraces the student population. The Punjab Provincial branch has taken the lead in furthering this movement. Other provinces are now following suit and at the end of 1930 the Society had a total Junior membership of 84,000.

Constitution—His Excellency the Viceroy is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society of whom 12 are the Vice-Presidents nominated by Provincial or State Branches, 8 elected by the Society at the Annual General Meeting from among the members of the Society and 5 nominated by the President.

The present Chairman of the Managing Body is the Hon'ble Sir Henry Moncreiff Smith, Kt, CIE, ICS, and the Organising Secretary, Miss Norah Hill, A R R O.

Finances—The operations of the Joint War Committee were brought to a close in June 1920 with a capital investment of the face value of Rs 58,33,000 and Rs 8,01,500 8 6 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances at the end of December 1930, stood at a capital investment of the face value of Rs 67,53,000-0 0. The income derived from the capital of the Society, (which is 3½ lakhs at present) after providing for certain liabilities of the Central Society, is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" Fund. A sum of Rs 2,70,000-0 0 was so distributed to the Provincial Branches under this arrangement during the year 1930.

ST JOHN AMBULANCE ASSOCIATION

(Indian Council)

The St John Ambulance Association was founded in 1877, by the Order of the Hospital of St John of Jerusalem in England, and has for its objects —

(a) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured,

(b) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room,

(c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories, and other centres of industry and traffic,

(d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps,

(e) And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class nationality, or denomination

An Indian Council of the Association was constituted on a regular basis in 1910. It has since issued 1,90,703 certificates of proficiency in First Aid, Home Nursing, Home Hygiene and

Sanitation and 9,602 tokens such as Vouchers, Medallions, Labels and Pendants for special proficiency in those subjects. The object of the Association is not to rival, but to aid, the medical man, and the subject matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits

In 1930 the Indian Council spent Rs 70,094 in furthering its objects and closed the year with Govt securities of the face value of Rs 70,000. The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs 1,000, Rs 500, Rs 100, Rs 5, and Rs 2

Their Excellencies the Viceroy and the Countess of Willingdon and His Excellency the Commander-in-Chief as President, Lady President and Chairman, respectively, with 17 members form the Indian Council. The general business of the Indian Council is conducted by an Executive Committee of which the Hon'ble Sir Henry Moncreff Smith, Kt, CIE, ICS, is the Chairman, Miss Norah Hill, ARPS, is the General Secretary, and Sir Ernest Burdon, Kt, CSI, CIE, ICS, the Honorary Treasurer

INSANITY AND MENTAL HOSPITALS IN INDIA

The accommodation for the treatment in British India of persons who suffer from mental disorders is still very inadequate. In the Indian States, the condition of affairs is even worse, for, with the sole exception of Mysore State which has a small and highly archaic "mental hospital" at Bangalore, there are no mental hospitals in existence so that persons suffering from all forms of mental disease are confined in the Jails where, of course, no provision exists for any kind of treatment. According to the last Census (1921) out of a total popula-

tion of 318,942,480 (India and Burma) there are 88,305 persons insane, making a proportion of insane to sane of 3 per every 10,000. In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while in New Zealand it is as much as 45 per 10,000. In reviewing these figures it must be borne in mind that those of the United Kingdom and New Zealand include the "feeble-minded" an item that is not included in the figures for British India

INDIA

| Provinces, States and Agencies. | General population | | | Insane population | | |
|--|--------------------|-------------|-------------|-------------------|--------|--------|
| | Male | Female | Total | Male. | Female | Total |
| Provinces under British Administration | 139,213,123 | 131,707,310 | 270,950,433 | 44,673 | 28,234 | 72,907 |
| States and Agencies | 24,752,431 | 23,239,616 | 47,992,047 | 9,478 | 5,920 | 15,398 |
| Total for all India | 163,995,554 | 154,946,926 | 318,942,480 | 54,151 | 34,154 | 88,305 |

For the care of the 88,305 insanes of India and Burma there exists accommodation in mental hospitals for 6,750 hence only one person in ten out of the total insane population can obtain accommodation in institutions which exist

especially for their care and treatment

The following table gives the number of mental hospitals in each province during 1927, the total population of each institution and the number discharged cured and died —

| Province. | No of Mental Hospitals | Admitted and readmitted during the year | Total Population of Mental Hospitals | | | Discharged cured | Died | Daily average | | Criminal Lunatics |
|---------------------|------------------------|---|--------------------------------------|--------|--------|------------------|------|---------------|--------|-------------------|
| | | | Males | Female | Total | | | Strength | Sick | |
| Assam . . . | 1 | 66 | 410 | 95 | 505 | 21 | 47 | 438 47 | 59 35 | 246 |
| Bihar and Orissa | 2 | 364 | 1,535 | 398 | 1,933 | 206 | 53 | 1,604 49 | 74 68 | 614 |
| United Provinces | 3 | 779 | 1,561 | 412 | 1,973 | 174 | 106 | 1,274 83 | 155 03 | 425 |
| Punjab . . . | 1 | 397 | 982 | 262 | 1,244 | 132 | 102 | 889 88 | 73 63 | 207 |
| Central Provinces . | 1 | 87 | 389 | 95 | 484 | 33 | 19 | 410 96 | 20 37 | 135 |
| Bombay | 5 | 608 | | | 2,109 | 237 | 171 | 1 534 20 | 93 7 | 226 |
| Madras . . . | 3 | 469 | 1,155 | 357 | 1,512 | 143 | 80 | 1,105 29 | 135 89 | 194 |
| Burma | 2 | 276 | 1,111 | 169 | 1,280 | 88 | 53 | 1,0 2 55 | 44 06 | 564 |
| Total . . . | 18 | 3,016 | . | . | 11,040 | . | 636 | 8,305 67 | 656 71 | 2,601 |

It will be observed that there is now no mental hospital in Bengal. Insanes from this province are treated in one or other of the two mental hospitals at Ranchi. All Mental hospitals are under the direct control of the Provincial administrative medical officers except the European Mental Hospital at Ranchi which is controlled by a Board of Trustees presided over by the Commissioner of Chota-Nagpur. The so-called "Central" Mental Hospitals, that is to say, the Mental Hospital at Madras, North Yeravda (Bombay), Lahore (Punjab), Agra (United Provinces of Agra and Oudh) and Rangoon (Burma), as well as the two Mental Hospitals at Ranchi (one for Europeans and Americans and one for Asiatics and Africans) are administered by whole-time medical officers who are usually trained alienists. The Administration of the remaining Mental Hospitals in British India and Burma, lies with the Civil

Surgeon of the locality in which they happen to be situated. It is probably true to state that only one Mental Hospital in the whole of India can claim any pretension to be up to date as regards organisation, staffing and equipment and that is the Mental Hospital for Europeans at Ranchi. All the others are for the most part over-crowded and under-staffed, thus rendering anything approaching treatment on modern lines out of the question. The only province in India which has so far displayed some appreciation of the importance of bringing the prevention and treatment of mental disorders into line with conditions in civilised countries is Madras. The local Government of this province has achieved a notable advance in its attitude towards mental disorders by providing, in the construction of the new General Hospital at Madras, accommodation for the treatment of early cases of mental diseases.

As regards the incidence of insanity among the various races of India as well as the incidence of insanity in relation to occupation, no reliable information is available in view of the comparative paucity of cases in proportion to the general

population that come under observation. On the other hand the incidence by age is shown fairly well in the Census Report of 1921 which is as follows —

INDIA,

| AGE | Insane | | Distribution of the insane by age per 10,000 of each sex | |
|---------------------|--------|--------|--|--------|
| | Male | Female | Male | Female |
| YEARS | | | | |
| 0-5 | 651 | 484 | 121 | 142 |
| 5-10 | 2,905 | 1,882 | 539 | 553 |
| 10-15 | 4,098 | 2,733 | 761 | 803 |
| 15-20 | 4,360 | 3,076 | 816 | 904 |
| 20-25 | 5,518 | 3,379 | 1,024 | 993 |
| 25-30 | 8,861 | 3,582 | 1,273 | 1,053 |
| 30-35 | 7,231 | 3,849 | 1,342 | 1,181 |
| 35-40 | 5,651 | 2,949 | 1,049 | 867 |
| 40-45 | 5,316 | 3,486 | 987 | 1,025 |
| 45-50 | 3,332 | 2,157 | 618 | 634 |
| 50-55 | 3,132 | 2,492 | 581 | 733 |
| 55-60 | 1,465 | 1,036 | 272 | 305 |
| 60-65 | 1,683 | 1,471 | | |
| 65-70 | 602 | 439 | | |
| 70 and over | 1,070 | 1,006 | | |
| Unspecified | 270 | 133 | | |
| Total for all India | 54,151 | 34,154 | 623 | 857 |

A further result of the widespread ignorance and apathy both official and non official, towards psychiatry and its cognate interests, is the lack of any provision for the care and treatment of mentally defective children. In 1925, the Hon'ble Haroon Jaffer moved the Council of State to recommend to the Governor-General in Council that the Provincial Governments be asked to investigate the best means of dealing quickly and adequately with cases of mental defectives. A discussion followed which was remarkable only for the ignorance of the subject displayed by all who took part in it. The motion was eventually withdrawn.

Finally there is still a lamentable failure everywhere to appreciate the intimate associa-

tion of crime with mental disorder and the extreme paucity of medical men throughout the whole of India with any real knowledge of mental diseases leave the decision of questions involving what the law terms 'responsibility in crime in the hands of medical men who are in no sort of sense "experts"'. In other words the current ideas both as regards the theory and practice of dealing with insanity and crime in India can only be described as archaic.

(See also "Insanity in India" by Colonel G. F. W. Twiss, I.M.S., and 'Lunacy in India' by Colonel A. W. Overbeck-Wright, M.D. D.P.E. I.M.S. and Colonel H. P. Jago Shaw's book.)

National Association for Supplying Medical Aid by Women to the Women of India.

The National Association for Supplying Medical Aid by Women to the women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals, to train women doctors, nurses and midwives in India, and to bring these out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition Branches were formed in each Province each Branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in aid to several Provincial Branches, it gives scholarships to a number of women students at the Medical schools of Bombay, Calcutta, Madras and Delhi. It has in the past brought from England a certain number of European medical women.

It has assisted by grants-in aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 13 Provincial Branches and a number of Local Committees.

The Government of India subsidize the Countess of Dufferin's Fund to the extent of Rs 3,44,306 per annum to maintain a Women's Medical Service for India—this service consists of 41 officers, with a training reserve of 8 doctors and a Junior service of 6 assistant surgeons. Medical women (either British or Indian holding registrable British qualifications are eligible for the senior service.

The President is H. E. The Countess of Willingdon, C.I., G.B. The Hon. Secretary is the Surgeon to H. E. The Viceroy, and the Secretary Dr. M. V. Webb, C.M.O., W.M.S., Red Cross Building, New Delhi and Viceregal Estates, Simla.

THE WOMEN'S MEDICAL SERVICE FOR INDIA

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as the Countess of Dufferin's Fund and is administered by the Executive Committee and Council of that Fund. The Government of India has so far allotted the sum of £25,000 per annum towards its maintenance. The present sanctioned cadre is forty-four first class medical women, with a training reserve of 8 women graduates in medicine of Indian Universities. Recruitment of the service is made (a) in India by a medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Secretary to the Council and the Chief Medical Officer, Women's Medical Service, (b) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportions of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who are in the service of, or who have rendered approved service to, the Countess of Dufferin's Fund, are to have the first claim to appointment, and thereafter special consideration is to be paid to the claims of candidates who have qualified in local institutions and of those who are natives of India.

Qualifications—The qualifications are that the candidate must be (a) a British subject resident in the United Kingdom or in a British Colony or in British India, or a person resident in any territory of any Native Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (b) Must be between the ages of

twenty-four and thirty at entry. (c) She must be a first-class medical woman, i.e., she must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act, but this condition does not apply at the original constitution of the Service to medical women in charge of hospitals who, in the opinion of the Council, are of proved experience and ability. (d) The candidate must produce a certificate of health and character. But the Council reserves the power to promote to the service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After one year of probation has been satisfactorily passed their appointments are confirmed. The services of officers may be lent to Local or Municipal bodies, or to special institutions, which may be responsible for whole or part of the pay.

Pay—The rates of pay are as follows—

| 1st to 4th | 3rd year | Rs | 450 per month |
|----------------|----------|----|---------------|
| 4th to 6th | " | " | 500 " |
| 6th to 9th | " | " | 550 " |
| 9th to 12th | " | " | 600 " |
| 12th to 15th | " | " | 650 " |
| 15th to 18th | " | " | 700 " |
| 18th to 21st | " | " | 750 " |
| 21st to 24th | " | " | 800 " |
| 24th and after | " | " | 850 " |

also an overseas allowance of Rs 100 per month to those below 12 years' service and Rs 150 per month to those of 12 years' service and over. Every officer of the Service shall pass an examination in such vernacular as the Executive Committee shall appoint within the first three years of her service, and shall receive no increment after that period until such examination has been passed. In addition

furnished quarters are provided free of rent or a house rent allowance to be determined by the Provincial Committee may be granted in lieu of it

Officers of the Service are permitted to engage in private practice provided it does not interfere with their official duties, and the Provincial Committee has the power to determine whether such duties are thus interfered with. Except in very special cases retirement is compulsory at the age of fifty-five. An officer recruited in England, whose appointment is not confirmed or who is dismissed, is granted an allowance sufficient to pay her passage to England.

Leave Rules—(a) Casual Leave, which is occasional leave on full pay for a few days, and is not supposed to interrupt duty. (b) Leave on average pay is granted up to 2-11 of an officer's period on duty, according to Fundamental Rules. More than eight months' leave on average pay is not granted at one time. (c) Study leave may also be granted up to twelve months during the whole service. An allowance of 12 sh per day is granted in addition to average pay during study leave. (d) Extraordinary leave at any time at the discretion of the Executive Committee. (e) Leave not due may be granted subject to the following conditions—(i) on medical certificate, without limit of amount, and (ii) otherwise than on medical certificate, for not more than three months at any one time and six months in all, reckoned in terms of leave on average pay. (f) The maximum period of continuous absence from duty on leave granted otherwise than on medical certificate is 18 months. (g) When an officer returns from leave which was not due and which was debited against her leave account, no leave will become due to her until the expiration of a fresh period spent on duty, sufficient to earn a credit of leave equal to the period of leave which she took before it was due. There are no allowances during extraordinary leave. A doctor appointed in England receives a sum of £100 to cover her passage and incidental expenses. There are also allowances to cover the cost of journeys by rail and road.

There is also a Provident Fund, each member contributing monthly thereto ten per cent of her salary, the Association contributing an equal amount, and each subscriber's account being granted interest on the amount standing to credit at the rate of 4 per cent per annum, "or at such rate as the Council can invest without risk to the funds of the Association."

An officer loses the contributions made to her account by the Association with the interest thereon if she resigns (except on account of ill-health) before completing five years' service or in the event of dismissal. On retirement after approved service the sum which has accumulated to the credit of the subscriber is handed over to her.

Free Passages—Officers of the Women's Medical Service are granted free return passages corresponding to those granted under the Lee Concessions to officers of all India services. The maximum number of return passages granted during an officer's entire term of service must not exceed four, the first falling due after 4 years service.

The Training Reserve of the Women's Medical Service—This Service has a sanctioned cadre of eight, and is open to women graduates in medicine of the Indian Universities. Salaries range from Rs 200 to Rs 300 per month, with furnished quarters or the equivalent in money, to those employed in India. Two of the eight members of the reserve, but not more at any one time, may be deputed to Europe by the Executive Committee for post graduate training, and shall receive a stipend at the rate of £200 a year each paid quarterly and return passage. Any member not so deputed shall be employed in India.

Ordinarily four years shall be spent in the reserve before a member is considered for appointment to the Women's Medical Service, but the Executive Committee shall have power to shorten this period in special cases. Service in the reserve shall be considered by the Executive Committee when appointments are being made to the Women's Medical Service, but shall not of itself constitute a claim to appointment.

VICTORIA MEMORIAL SCHOLARSHIPS.

The Victoria Memorial Scholarships Fund was organised by Lady Curzon in 1903, in order to secure a certain amount of improvement in the practising dais of India. A sum of about 6½ lakhs was obtained by public subscription, and centres were organised in each Province to carry out the objects of the Fund. Over 2,000 midwives have been trained in addition to large numbers who

have been partially trained. Of late years the Fund has done much to pave the way for the registration and supervision of indigenous dais. It has also done much propaganda work. The fund is now administered by the Maternity and Child Welfare Bureau of the Indian Red Cross Society.

LADY HARDINGE MEDICAL COLLEGE AND HOSPITAL

The Lady Hardinge Medical College was opened by Lord Hardinge on the 17th February 1916. It is a residential Medical College staffed entirely by women, and was founded to commemorate the visit to Delhi, in 1911, of the Queen Empress. Lady Hardinge took the initiative in raising funds by public subscription to meet the cost of buildings and equipment.

Thirty lakhs of rupees, in all, have been given for these purposes, mostly by the Ruling Princes and Chiefs of India. After Lady Hardinge's death in 1914, it was suggested by Her Imperial Majesty Queen Mary that the institution should serve as a memorial to its founder, and be called by her name.

The Governing Body includes the Director-General, Indian Medical Service, the Chief Commissioner of Delhi, the Chief Engineer, Delhi Province, the Educational Commissioner with the Government of India, the Chief Medical Officer, Women's Medical Service, a representative elected by the All-India Association of Medical Women, the Surgeon to H. L. the Viceroy, an Indian member of the Council of State, 2 Indian members of the Legislative Assembly, a private Indian citizen of Delhi, a private lady resident of Delhi, the Civil Surgeon of New Delhi and the Agent, Imperial Bank of India, Delhi. The Honorary Secretary, who is also a member of the Governing Body, is the Deputy Director General, Indian Medical Service. The Deputy Accountant-General, Central Revenues, acts as Honorary Treasurer.

The College and Hospital, together with separate hostels for 100 Medical students and 70 nurses and residences for the medical and teaching staff, occupy a site of 55 acres in New Delhi (Raisina) within easy reach of the old city. The grounds are enclosed and adequate provision is made for the seclusion of both students and patients from outside observation. Strict observance of purdah cannot, however, be guaranteed in the case of students. As the hospital patients are all women or children, it is for example, necessary that students should, in their final year, attend a brief course of instruction on men patients at the Civil Hospital, Delhi. The College buildings contain a Library, Museum, Lecture Rooms, Laboratories and offices. Hostels are provided for Hindu, Moslem, Sikh and Christian students. The hospital is a fine modern building with accommodation for 200 in-patients and a commodious out-patients' department. The College and Hospital are supported by a grant of Rs 3,11,000 from the Government of India, supplemented by grants from Provincial Governments and Indian States. Students are prepared for the Intermediate Science Examination, and the M.B., B.S. degree of the Punjab University, with which the College is affiliated.

SENIOR STAFF

Principal and Professor of Midwifery and Gynaecology—Dr O'Brien Breardon M.B.B.S. (Lond) L.S.A., M.D., Ch.B. (Glas.), Women's Medical Service

Vice Principal and Professor of Surgery—Miss Hamilton Browne, M.B. Ch.M. (Syd.), D.T.M. (Calcutta), W.M.S.

Professor of Medicine—Miss N. L. Trouton, M.B.B.S. (Lond), M.R.C.S., L.I.C.P. D.T.M. (Calcutta)

Professor of Ophthalmology—Miss R. Roulston M.B., Ch.B. (Glas.), D.O. (Oxon), B.I.C.E. (Edin.), W.M.S.

Professor of Pathology—Mrs L. S. Ghosh M.B., Ch.B. (Aberdeen), D.P.H. (Cambridge), W.M.S.

Professor of Anatomy—Miss K. J. McDermott, M.B., B.S. (Punjab), W.M.S.

Professor of Physiology—Miss L. Surle, M.Sc.

Professor of Radiology—Dr Rekhim D.B.S. (Ph), D.M.R. & T., (Cantab)

Lecturer in Physics and Mathematics, and Superintendent of the Science Department—Miss J. H. Ross, M.A., B.Sc. (Glas.)

Lecturer in Chemistry—Miss Soshella Ram, M.A. (Cantab)

Lecturer in Biology—Miss C. C. Burt, B.Sc. (Edin.)

Lecturer in English—Miss Ebbutt, M.A. (Dublin), Modern Language Tripos (Cantab)

Bursar and Warden—Miss M. W. Jesson, M.A. (Cantab)

Attached to the Hospital there are (1) a Training School for Nurses, and (2) a Training School for Dispensers. All particulars as to admission and training may be obtained in the case of (1) from the Nursing Superintendents, Lady Hardinge Medical College Hospital, Delhi, and in the case of (2) from the Lecturer on Pharmacy, at the same address.

NURSING.

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in England, there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras, and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These hospitals also act as training institutions, and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions and private agencies. In this way the supply of trained nurses, English, Anglo-Indian and Indian, is being steadily increased. In Bombay the organisation has gone a step farther, through the establishment of the Bombay Presidency Nursing Association, c/o St George's Hospital, Bombay. This is composed of representa-

tives of the various Nursing Associations in charge of individual hospitals, and works under the Government. The principle on which the relations of this Association with the Local Associations is governed is that there shall be central examination and control combined with complete individual autonomy in administration.

State Registration of Nurses for all India is much required. A meeting was held in Bombay in 1923 when Nurses from the Presidency met to discuss the question. It is desired that India should have its own State Register as in the United Kingdom, South Africa, New Zealand, Australia, Canada and Burma, and that the curricula and examinations should be brought into line with these countries. Government has proposed to establish a Provincial Register preparatory to an All-India Register.

Nursing Bodies—The Secretary of the Calcutta Hospital Nurses' Institution is Mr A R Nicholson, Allahabad Bank Buildings, Calcutta. The names and addresses of the other Nursing bodies in Calcutta are Lady Minto's Indian Nursing Association (Bengal Branch), 4, Hungerford Street, Lady Rogers' Hostel for Indian Nurses, 144, Russa Road South, Nurses' Academy, 6, Suburban Hospital Road, and Nurses' Bureau, 37, McLeod Street. In Madras there is the General Hospital, with a staff of 62 nurses the Government Maternity Hospital, the Caste and Gosha Hospital at Kilpauk, the Royapetta Hospital and the Ophthalmic Hospital, also the Lady Amphill Nurses' Institute and the South Indian Nursing Association (now amalgamated). President, Her Excellency Lady Goschen. The Association has under its management—*The Lady Amphill Nurses Institute*, Western Castle, Mount Road, Madras. Fully trained and experienced nurses for all cases of illness both among Europeans and Indians, always available. *The Lady Widdowson Nursing Home*, Western Castle Mount Road Madras, and *Nigiri Nursing and Convalescent Home* Ooracumund for Medical Surgical and Maternity cases. The Nigiri Nursing Home affords admirable facilities for convalescents.

Bombay Presidency—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first steps were taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately the Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1860. By degrees substantial endowments have been built up, although the Associations are still largely dependent upon annual subscriptions towards the maintenance of their works. This Association was incorporated under the Societies' Registration Act of 1860, in the year 1911, with the primary object of establishing a nursing service from which the Nursing staff at Government aided hospitals under management of Nursing Association might be recruited. This function however, was never carried out by the Bombay Presidency Nursing Association, and under the present circumstances it appeared to the Committee improbable that it could be carried out, but up to now the auxiliary function of the examining and granting certificates to nurses and midwives, and maintaining a register of qualified nurses and midwives and also maintaining a Provident fund for the employees of the affiliated associations have been successfully carried out from 1911 to 1928. Memorandum, Rules and By-laws of the Association were however revised or brought into line with the

actual working of the Association. Towards the end of 1927, the Committee decided that some steps must be taken to do so and accordingly appointed a sub-committee to consider the revision and amendment of the Memorandum, Rules and By-laws. The Sub Committee reported that it appeared to be impossible to amend and revise the present rules piecemeal and that the only way to put things in order would be to draft an entirely fresh constitution and rules.

After fully considering the Sub Committee's report the Committee agreed that the Association be incorporated by an Act on the line of the Registration Act in the United Kingdom. Pending the passing of the Act the new Memorandum of Association having received the approval of Government was brought into operation from 1st April 1929.

The following are affiliated associations as well as Training Institutions—

St. George's Hospital Nursing Association Bombay, (for nurses only), Hon Secretary F. B. Thorneley, Esq.

Jamshetji Jijibhoy Hospital Nursing Association Bombay, (for nurses and Midwives), Hon Secretary Dr. Mehta, O.B.E., F.R.C.P.

Goculdas Tejpal Hospital Nursing Association, Bombay (for nurses only), Hon Secretary W. Dillon Esq. I.C.S.

Cama & Allheiss Hospitals Nursing Association, Bombay, (for Nurses and Midwives), Hon Secretary H. C. B. Mitchell, Esq.

Sassoon Hospital Nursing Association, Poona, (for Nurses and Midwives), Hon Secretary N. J. Wadia Esq., B.A., Bar at law.

Karachi Civil Hospital Nursing Association (for Nurses only), Hon Secretary H. H. Hood, Esq.

Civil Hospital Nursing Association, Nasik (for Nurses and Midwives), Hon Secretary Civil Surgeon, Nasik.

Civil Hospital Nursing Association, Ahmedabad (for Nurses and Midwives), Hon Secretary Civil Surgeon, Ahmedabad.

Victoria Nursing Association, Sholapur, (for Nurses and Midwives), Hon Secretary Civil Surgeon, Sholapur.

The following are only affiliated Associations but not Training Institutions—

Ahmednagar Civil Hospital Nursing Association, Hon Secretary Civil Surgeon, Ahmednagar.

Bijapur Civil Hospital Nursing Association, Hon Secretary Civil Surgeon, Bijapur.

Bvramji Jijibhoy Nursing Association, Matheran, Hon Secretary Lt.-Col. M. S. Irani, I.M.S.

Dharwar Civil Hospital Nursing Association, Hon Secretary Civil Surgeon, Dharwar.

Kanara Nursing Association, Karwar, Hon Secretary Civil Surgeon, Karwar.

Panch-Mahals Nursing Association, Godhra, Hon Secretary Civil Surgeon, Godhra.

Prince of Wales Nursing Association, Aden, Hon Secretary G. Richmond, Esq.

The following are recognised Training Institutions—
V. J. Hospital, Ahmedabad (for Nurses and Midwives).
State General Hospital, Baroda (for Nurses and Midwives).

Civil Hospital, Belgaum (for Nurses and Midwives)
 King Edward VII Memorial Hospital, Parel Bombay (for Nurses only)
 Bai Yamunabai L. Nair Charitable Hospital Lamington Road, Bombay (for Nurses only)
 Bomanji Dinshaw Petitji Parsi General Hospital, Cumballa Hill, Bombay (for Nurses only)
 Civil Hospital, Jalgaon (for Nurses only)

 Acharatral Girdharlal Maternity Home, Ahmedabad (for Midwives only)
 Civil Hospital, Surat (for Midwives only)
 Zenana Mission Hospital, Broach (for Midwives only)
 Lady Dufferin Hospital, Sholapur

Provision for retiring allowances is made for all members on the basis of a Provident Fund, and a Nursing Reserve has been established for employment in emergencies such as war, pestilence or public danger or calamity.

Address—The Registrar, Bombay Presidency Nursing Association, Old Custom House, Fort, Bombay

Lady Minto's Indian Nursing Association—In 1906 this Association was inaugurated, replacing the Punjab and Up-country Nursing Association for Europeans in India, which Society, established in 1892, had accomplished much useful work in this country. Owing, however, to lack of funds it was found impossible to continue its administration and to carry out the expansion of the work so urgently called for. The name of the helpers identified with the premier Association to whom the public must ever be indebted are the Hon Lady Lytton, Lady Helen Munro Ferguson and Mrs Cottrell, while Mrs Shepherd, by her indefatigable efforts, is truly entitled to be regarded as the pioneer of a trained nursing system throughout the greater part of India. The late Lady Curzon worked energetically to provide an enlarged Nursing organisation, but mainly owing to financial reasons, she was unable before she left India to bring the scheme to fruition. The Home Committee of the existing Association, recognising the need for expansion consented to take over the present Association and approached Lady Minto before she left England in 1905 for co-operation towards this project, and after much consideration and discussion with the Government of India, Lieut-Governors and Commissioners of Provinces, the present Association was established. An appeal by Lady Minto, addressed to the public both in England and

India, was responded to most generously, and sufficient funds were collected to form an endowment fund, which has in spite of fluctuations increased a little with time. The assistance of a Government grant is much valued, as it enables Homes for the Sisters to be kept up in six Provinces in India and in Burma. At the request of the Home Committee the enlarged Association was renamed the "Lady Minto Indian Nursing Association."

The duties of the Home Committee are, as before, largely concerned in dispatching—as required—suitably trained and carefully selected Nurses for service on the staff of the Association in India. Thus, Europeans who are members of this Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient. The boon of obtaining good nursing at moderate terms is much appreciated, the rates of subscriptions being really an insurance against illness.

Her Majesty the Queen is a Patron of the Association. Her Excellency The Countess of Willingdon is President of the Central Committee in India.

Hon Secretary Major F. M. Collins, R.A.M.C.
 Hon Treasurer W. R. Tennant, Esq., I.C.S.

Chief Lady Superintendent Miss G. Beckett. Address—Central Committee, L.M.I.N.A., Viceregal Lodge, Simla, and Red Cross Building, New Delhi.

Hon Secretary, Home Committee—Vacant

Secretary, Home Committee Miss M. E. Ray, R.R.C., 10, Witherly Mansions, Earls Court Sq.

Nurses' Organizations—The Association of Nursing Superintendents of India is now amalgamated with the Trained Nurses' Association of India, and has the one set of officers. The Trained Nurses' Association of India and the Association of Nursing Superintendents of India are not Associations to employ or to supply nurses, but are organizations with a membership wholly of nurses with the avowed objects of improving and unifying nursing education, promoting *esprit de corps* among nurses, and upholding the dignity and honour of the nursing profession. The Associations have a membership of 472 including nurses trained in ten or more different countries, Europeans, Americans, New Zealanders, Australians and Indians. The Association of Superintendents was started in 1905 as the Association of Nursing Superintendents of the United Provinces and the Punjab, but by the next year its membership had spread over the country to such an extent that the name was changed to include the whole of India. The Trained Nurses' Association was started in 1908, and a monthly *Journal of Nursing* began to be published by the two Associations in February, 1910. The Associations are affiliated with the International Council of Nurses.

President Mrs G. D. Franklin, 33, Rajpur Road, Delhi

Hon Secretary and Treasurer Miss Gadsden, General Hospital, Madras

THE WOMAN SUFFRAGE MOVEMENT

Within the abnormally short period of eleven years the Woman Suffrage movement has risen in India, swept through the country sympathetically and achieved the political enfranchisement of women in all the nine British Provinces and in four Indian States.

Three fundamental causes have led to this remarkable success: first the deep veneration that is given by the Hindu and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses by the necessity for the presence of the wife at all ceremonies performed by a Brahman by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly the time was psychological for a new era was beginning for the Indian people by the introduction of a Scheme of Reforms in Indian government which was planned to give a basis of representative government on a much extended scale. The door was being opened to complete Self-government but only men were being invited to enter through it, although women compose half the people of the country and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too just to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire.

Though the Municipal franchise had been granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make a large impact on women's consciousness and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election, and similarly in other Municipalities in that Presidency women have exercised their vote responsibly and intelligently. Since 1922 over 100 women have become Municipal Councillors and members of Local Government Boards. Their appointment has chiefly been by nomination but there have been notable seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seat in Bombay Corporation, also the instance in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have

been secured by this large band of women Councillors, and every year sees a greater number of women serving on these local Councils and Boards.

It was owing to the rise of the political agitation for Home Rule between 1914 and 1917 that women began to wake up to their position of exclusion by British law from any share in representative government. The intervention of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for the ripe public expression of their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first hand in 1917.

During the Hon. E. S. Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out.

The first claim for women suffrage for Indian women was made in the address presented to Mr. Montagu at this historic All-India Women's Deputation which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation.

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that 'a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which since its inception women have voted and been delegates and speakers, and which this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens, and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India was published no mention of women was made though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of the inclusion of women in the new franchise.

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs Annie Besant, Mrs Sarojini Naidu and Mrs and Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election as Legislative Councillors.

Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar. In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolution in the Madras Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise. During the month that must legally intervene between the tabling of a Woman Suffrage motion and its introduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council. The Debate took place on April 1st and after a short discussion, in which it was evident that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future. When the division was taken, it resulted in the resolution being carried by a majority of 34. Madras has thus the honour of being the first Province in British India to enfranchise its women, and it has done this ungrudgingly and

unhesitatingly in the broad spirit of the equality of the sexes, as it grants the vote to women on the same terms as it has been granted to men.

Mr Trivedi brought forward a Woman Suffrage Resolution in the Bombay Legislative Council during the same session, but some irregularity in its wording caused it to be pronounced out of order. In June that subject was tabled again and championed by Rao Sahib Harilal Desai of Ahmedabad, Deputy President of the Council. As in Madras, the intervening month was filled with suffrage activity by the women of the Presidency and was remarkable for a large joint meeting of Bombay city women at which 19 Women's Societies took part, and for a suffrage meeting of Marathi and Gujarati women in Poona when over 800 women showed the greatest enthusiasm for the movement.

The Bombay Council Debate on Woman Suffrage took three days and the subject was very fully discussed by over 40 members. The result was satisfactory to the suffragists, the voting being 52 in favour, 25 against and 12 neutral. Thus Madras and Bombay Presidencies gave the lead to the other Provinces. In September, 1922, Mr S M Bose, in the Bengal Council, moved a Woman Suffrage Resolution, which was debated for three days but finally defeated by 56 to 37 votes, a bloc of 40 Muhammadan members voting solidly against it. In September 1923 the Bengal Council passed the Suffrage Resolution by a vote of 54 to 38.

Mr Devaki Prasad Sinha's similar Resolution in the Behar and Orissa Legislative Council was defeated by only a 10 votes' majority.

These Debates proved so educational to their respective Provinces that the Bengal and Behar Provinces have since granted qualified women the Municipal Vote.

In February, 1923, a world suffrage record was made by the unanimous vote of the United Provinces Legislative Council in favour of Woman Suffrage.

In 1920 the Punjab granted woman suffrage without a division, and in 1926 the Central Provinces.

The new Reform Bill for Burma has included the grant of woman suffrage to the qualified Burmese women, and further made provision for their election as Councillors if the Council passes a Resolution desiring their admission and if that Resolution is approved of by the Governor.

In April, 1922, the Mysore Legislative Council unanimously passed the Woman Suffrage Resolution. The vote for the Representative Assembly of Mysore was granted to women in October, 1922. The vote for Mysore Legislative Franchise was granted to the Mysore women by H H The Maharaja and His Privy Council in June 1923. In October, 1924, Assam Provincial Council granted Woman Suffrage for its Province by 26 to 8. It also has been the first Province to pass a Resolution in favour of allowing women to enter the Council as members.

In 1925 soon after the All India Women's Educational Reform was held in Patna, the Legislative Council of Behar and Orissa gave women the right of voting election and nomination to the Council on the same terms as men. Thus the whole of British India has now given to women equal political rights with men. The result has already demonstrated itself in the remarkable advancement of all the interests of women along the lines of education, health, living, morality and social customs.

The Indian Native States of Travancore Cochin and Rajkot are the only places in India where the franchise disqualification has been completely removed from the statute book. These have allowed women the right to stand for election for the Legislative Council as well as the right to vote for it and two women have been elected to the newly formed Representative Council of Rajkot. The year 1925 has been noteworthy for the appointment of the first woman Minister to Government. Mrs. Poonam Jadhav became a member of the Travancore Legislative Council on taking the position of State Darbar Physician. She acted as Minister for Health to the State for three years. Cochin State nominated Mrs. Madhavamma as a member of its Legislative Council.

In British India by the terms of the Reform Bill the Councils had no power to alter the disqualification of ex which remains against the right to stand as candidates for election to the Councils. This could only be changed by the vote of the British Parliament and the gaining of this right remained as a further objective of the women suffragists. Many large, influential meetings were held claiming the right of women to entry of the Legislatures. A deputation of women about this subject waited on the Madras Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State had been accorded the power to grant women the franchise for their assemblies also by resolution, but only for those provinces which had already granted women the Legislative franchise. The Legislative Assembly has passed by a large majority a Resolution granting the Assembly franchise to the women of such Provinces. Accordingly in November 1923 women in India voted for the first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly. The number of women who voted in the large cities was surprisingly large in Bombay and Madras Presidencies and comprised women of all castes and communities.

In April, 1926 as a result of a favourable recommendation of the Muddiman Committee on Franchise Reforms, the Rule was changed in the Reform Bill which disqualified women from entering the Legislatures. Power was granted to the Councils and the Assembly to pass Resolutions allowing qualified women to be elected or nominated as members of these bodies. Again Madras Council on the 17th July, was the first to pass a Resolution admitting women to its membership. Bombay and the Punjab followed its lead in August and October respec-

tively. This enabled women to become members of the Councils which have been functioning since then. But the permission came too late for women to stand for election with any great chance of success, so the Women's Indian Association asked that women be nominated by Government for the new Councils in those Provinces which had voted to admit them and that women also be nominated to the Assembly and the Council of State. Thus the year 1926 marked another milestone passed on the road to the complete political emancipation of Indian womanhood.

In 1926 the Central Provinces, the Punjab and Bengal all granted the Franchise to women. The year 1927 was notable for the nomination of the first woman member to a Legislative Council in British India, the recipient of the honour being Dr. MUTHULAKSHMI ANNAI, and she was further honoured by being elected unanimously by her colleagues in the Madras Legislative Council, to the Office of DEPUTY-PRESIDENT OF THE COUNCIL. Since then Mrs. Kale has been nominated to the Legislative Council of the Central Provinces, and Mrs. Ahmed Shaw to that of the United Provinces. A Deputation from the All-India Women's Conference in Delhi in 1925 waited on the Viceroy requesting him to nominate two women to the Legislative Assembly. That has still remained ungranted.

The number of women enfranchised by the grant of the vote throughout India will not be more than a million under the present qualifications. Property and not literacy is the basis of the franchise, though the grant of the vote to every graduate of seven years' standing ensures that the best educated women of the country as well as those who have to shoulder the largest property responsibilities will be those who rightly will be the legislating influence on behalf of womanhood. As regards the custom of purdah prevailing in parts of India special provisions have been made in Municipal voting for purdah recording stations for purdah women in which a woman is returning officer and this has been found quite satisfactory and has been adopted also where desired in connection with Legislative Council elections.

Though the Women's Indian Association was the only Indian women's society which had woman suffrage as one of its specific objects, almost all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement: Lady D. Tata, Lady A. Bose, Lady T. Sadashivier, the Begum of Cambay, Mrs. Ramabai Ranade, Mrs. Sarojini Naidu, Mrs. Tajl Jehangir Petit, Mrs. Tara, Mrs. Wadia, Mrs. Jinarajadasa, Dr. A. Besant, Mrs. M. E. Cousins, Mrs. Srirangamma, Mrs. Chandrasekhara Iyer, Miss S. Sorabji, Mrs. Khedkar, Dr. Mistry, Dr. Muthulakshmi Ammai, Mrs. Palmer, Mrs. Saraladevi Choudhuri, Mrs. Kumudini Basu, Mrs. K. N. Roy, Lady Shah, Mrs. Hassan Imam, Miss S. B. Das, Mrs. P. K. Sen, Mrs. Rustumji Faridoonji, Mrs. B. Rama Rao, Mrs. Deep Narain Singh, Mrs. Raschid, Mrs. van Gildemeester, etc.

Warrant of Precedence.

The following new Warrant of Precedence for India was approved by His Majesty the King-Emperor of India, and received His Royal Sign Manual, on 9th April 1930 —

- 1 Governor-General and Viceroy of India.
- 2 Governors of Presidencies and Provinces within their respective charges
- 3 Governors of Madras, Bombay and Bengal
- 4 Commander-in-Chief in India
- 5 Governors of the United Provinces, Punjab, Bihar and Orissa and Burma
- 6 Governors of the Central Provinces and Assam
- 7 Chief Justice of Bengal
- 8 Members of the Governor General's Executive Council
- 9 Commander in Chief of His Majesty's Naval Forces in the East Indies
- 10 President of the Council of State
- 11 President of the Legislative Assembly
- 12 Chief Justice of a High Court other than that of Bengal
- 13 Agents to the Governor-General, Rajputana, Central India, Baluchistan, Punjab States and States of Western India, Chief Commissioner of the North-West Frontier Province, Commissioner in Sind, Members of Executive Councils and Ministers of Governors and Lieutenant-Governors*, Political Resident in the Persian Gulf, Resident and Commander-in-Chief at Aden, and, Residents at Hyderabad and in Mysore within their respective charges
- 14 Chief Commissioner of Railways, General Officers Commanding, Northern, Southern, Eastern and Western Commands, and Officers of the rank of General
- 15 Members of the Executive Councils and Ministers in Madras, Bombay and Bengal *
- 16 Members of the Executive Councils and Ministers, United Provinces, Punjab, Burma and Bihar and Orissa *
17. Agents to the Governor-General, Rajputana, Central India, Baluchistan, Punjab States and States of Western India, Chief Commissioner of the North-West Frontier Province, Political Resident in the Persian Gulf, and Residents at Hyderabad and in Mysore
- 18 Members of the Executive Councils and Ministers, Central Provinces and Assam *
- 19 Presidents of Legislative Councils, within their respective Provinces
- 20 Chief Judges of Chief Courts, and Puisne Judges of High Courts
- 21 Lieutenant-Generals
- 22 Auditor-General, Chairman of the Public Service Commission, and Chief Commissioner of Delhi, when within his charge
- 23 Air Officer Commanding, Royal Air Force in India, Flag Officer Commanding and

Director, Royal Indian Marine, Members of the Railway Board, Railway Financial Commissioner, Secretaries to the Government of India, and Vice Chairman, Imperial Council of Agricultural Research

24 Additional Secretaries and Joint Secretaries to the Government of India, Commissioner in Sind, Controller of Civil Accounts, Financial Adviser, Military Finance, Judges of Chief Courts, Members of the Central Board of Revenue, and Resident and Commander-in-Chief at Aden

25 Chief Commissioner of the Andaman and Nicobar Islands, when within his charge, and Chief Secretaries to the Governments of Madras, Bombay and Bengal

26 Commissioners of Revenue and Commissioner of Excise, Bombay, Consulting Engineer to the Government of India, Development Commissioner, Burma, Director of Development, Bombay, Director-General, Indian Medical Service, Director General of Posts and Telegraphs, Financial Commissioners, Judicial Commissioners of the Central Provinces, Sind and North-West Frontier Provinces Major-Generals, Members of a Board of Revenue, Members of the Public Service Commission, and Surgeons-General

27 Vice Chancellors of the Indian Universities

28 Agents of State Railways, Controller of the Currency, Additional Judicial Commissioners, Judicial Commissioner, Western India States Agency, Commissioners of Division, and Residents of the 2nd Class.

29 Members of the Indian Civil Service of 30 years' standing, whose position but for this Article would not be lower than Article 34

30 Advocate-General, Calcutta.

31 Advocates General, Madras and Bombay

32 Chief Secretaries to Governments other than those of Madras, Bombay, Bengal and Assam

33 Accountants-General, Class I, Air Force Officer Commanding, Aden, Brigadiers, Census Commissioner for India, Chief Controller of Stores, Indian Stores Department, Commissioner Northern India Salt Revenue, Director-General of Archaeology in India, Director of the Geological Survey, Director, Intelligence Bureau, Director of Ordnance Factories and Manufacture, Director of Railway Audit, Educational Commissioner with the Government of India, His Majesty's Senior Trade Commissioner, Calcutta, Inspector General of Forest, Military Accountant-General, Public Health Commissioner with the Government of India, and Surveyor-General of India

34 Additional Judicial Commissioners, Chief Commissioner of the Andaman and Nicobar Islands, Chief Commissioner of Delhi, Chief Secretary to the Government of Assam, Commissioners of Division, Judicial Commissioner, Western India States Agency, and Residents of the 2nd Class

* The Vice-President of the Council appointed under section 48 of the Government of India Act ranks in the same article of the Warrant but senior to his colleagues on the Council

Calcutta, Commissioner of Ajmer Merwara Deputy Commissioners of Districts Deputy Commissioner, Port Blair Divisional and District and Sessions Judges (including the Judicial Commissioner of Chota Nagpur) Political Agents and Superintendents, and Residents (other than those of the 1st and 2nd Class), Commissioners of Income Tax Opium Agent, Ghazipur, and Remembrancers of Legal Affairs and Government Advocates under Local Governments.

42 Deputy Financial Adviser, Military Finance; Deputy Secretaries to the Government of India; Director General of Commercial Intelligence; Director of Inspection, Indian Stores Department; Director of Public Information, Government of India; Director of Purchases and Intelligence, Indian Stores Department; Establishment Officer in the Army Department; Secretary to the Imperial Council of Agricultural Research; Secretary, Public Service Commission; Secretary to the Railway Board and Secretaries to Residents of the First Class, within their respective charges.

43 Director, Central Research Institute,
Kasauli Director of the Imperial Institut of
Veterinary Research, Muktesar Director of the
Indian Institute of Science, and Principal of
the Thomason Civil Engineering College,
Roorkee

44 Assistant to the Inspector General of Forests, Budget Officer, Finance Department Government of India, Chief Electrical Engineer-Civilian Superintendents of Clothing Factories Civilian Superintendents of Ordnance Factories Colliery Superintendent, East Indian Railway Commandant, Frontier Constabulary, North West Frontier Province, Comptroller, Assam Conservators of Forests, Controller of Arms Factory Accounts Controller of Marine Accounts, Controller, Royal Air Force Accounts, Deputy Agents, Deputy Traffic Managers and Officers of similar status of State Railways, Deputy Chief Engineer, Telegraphs, Joint Director General, Indian Medical Services, Deputy Director General of the Post Office, Deputy Director General Telegraph Traffic, Deputy Director Intelligence Bureau, Deputy Director Ordnance Factories and Manufactures (Civilian), Deputy Inspector General of Police, Deputy Military Accountant General, Director Medical Personnel, Directors of the Public Health Section and of the Port Sanitation Section of the European Telegraph Department, Deputy Director Telegraph Engineering, Director of Mines, District Controllers of Military Affairs, Divisional Superintendents, Naval Engineers, Lieutenant Colonels, Members of the Indian Civil Service and of the Indian Police, Indian ISAs and other officers who are mentioned in this Article will be deemed to be included in the expression "Government Servants" for the purpose of this Act.

Indian Orders.

The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861 and enlarged in 1886, 1887, 1876, 1897, 1902, 1911, 1915 and 1920 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India or upon British subjects for important and loyal service rendered to the Indian Empire, the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign and Grand Master (the Viceroy of India), the first class of forty-four Knights Grand Commanders (22 British and 22 Indian), the second class of one hundred Knights Commanders, and the third class of two hundred and twenty-five Companions, exclusive of Extra and Honorary Members as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown, all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds. That of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cord of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander, but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery, or if the recipient was resident in India, to the Secretary of the Order at Calcutta.

Sovereign of the Order—His Most Gracious Majesty The King-Emperor of India

Grand Master of the Order—His Excellency the Viceroy and Governor-General of India, the Right Honourable Viscount Willingdon, K C I E, G M S I, G M I E, G B E

This Order, instituted by H. M. Queen Victoria, Empress of India, December 1877, and extended and enlarged in 1886, 1887, 1892, 1897, 1902, 1911, 1915 and 1920 is conferred for services rendered to the Indian Empire, and consists of the Sovereign a Grand Master, forty Knights Grand Commanders (of whom the Grand Master is first and principal), one hundred and forty Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 20 nominations in any one year), also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statute Jan 1st, 1909, commemorative of the 50th Anniversary of the assumption of Crown Gost in India.

The **Insignia** are (i) The **COLLAR** of gold formed of elephants, lotus flowers, peacocks in their pride and Indian roses, in the centre the Imperial Crown, the whole linked together with chains, (ii) The **STAR** of the Knight Grand Commander comprised of five rays of silver, having a small ray of gold between each of them the whole alternately plain and scaled, issuing from a gold centre, having thereon Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold inscribed *Imperatrix Auspicio*, and surmounted by an Imperial Crown gold, (iii) The **BADGE** consisting of a rose, enamelled gules, barbed vert, and having in the centre Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Auspicio*, surmounted by an Imperial Crown, also gold, (iv) The **MANTLE** is of Imperial purple satin, lined with and fastened by a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order

A Knight Commander wears (a) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size (b) on his left breast a star, similar to that of the first class but the rays of which are all of silver

The above mentioned Insignia are returned at death to the Central Chancery, or if the knight was resident in India to the Secretary of the Order at Calcutta

A Companion wears around his neck a sash (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches

Sovereign of the Order —His Most Gracious Majesty The King-Emperor of India

Grand Master of the Order —H. L. the Viceroy (Viscount Willingdon)

Officers of the Order —The same as for the Order of the Star of India

The Imperial Order of the Crown of India.

This Order was instituted Jan 1, 1878, and for a like purpose with the simultaneously created Order of the Indian Empire. It consists of the Queen and Queen Mother with some Royal Princesses, and the female relatives of Indian Princes or of persons who have held conspicuous offices in connection with India. Badge, the Royal Cypher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. Designation, the letters C I.

Sovereign of the Order

THE KING-EMPEROR OF INDIA.

Ladies of the Order (C I)

Her Majesty The Queen
 H M the Queen of Norway
 H R H the Princess Victoria
 H M The Queen of Roumania
 H R H Princess Beatrice

H R H the Princess Louise (Duchess of Argyll)
 H I and H H Grand Duchess Cyril
 Lady Patricia Ramsey
 H H the Princess Marie-Louise
 Baroness Kinloss
 Lady Jane Emma Crichton
 Dowager Countess of Lytton
 Dowager Marchioness of Dufferin and Ava
 H H Maharani of Cooh-Behar
 Marchioness of Lansdowne
 Constance Mary Baroness Wenlock
 H H Maharani Sahib Chhanna Bai Gackwar
 H H Rani Sahib of Gondal
 H H the Dowager Maharani of Mysore
 Lady George Hamilton
 H H the Maharani Sahiba of Udaipur
 Alice, Baroness Northcote
 Amelia Maria, Lady White
 Baroness Ampthill
 Countess of Minto
 Marchioness of Crewe
 Frances Charlotte, Lady Chelmsford
 The Lady Willingdon
 H H Maharani Chinkoo Raja Sahiba Scindia
 Alijah Bahadur of Gwalior
 H L The Lady Irwin
 Countess of Lytton
 H H The Maharani Regent of Travancore State
 Viscountess Goschen
 Lady Birdwood

Distinctive Badges—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', 'Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states—The Government of India have recently had under consideration the question of the position in which **miniatures** of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kaiser-i Hind Medal.

Indian Distinguished Service Medal—This medal was instituted on June 28th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII and on the reverse a laurel wreath enclosing the words *For Distinguished Service*. The medal, $1\frac{1}{2}$ inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon $1\frac{1}{4}$ in wide, with blue edges $\frac{1}{4}$ in wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit—This reward of valour was instituted by the H. E. I. Co. in 1837, to reward personal bravery without any reference to length of service or good conduct. It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration. The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class consists of a star of eight points, $1\frac{1}{2}$ in in diameter, having in the centre a ground of dark blue enamel bearing crossed swords in gold, within a gold circle, and the inscription *Reward of Valour*, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold, and the Third Class entirely of silver. The decoration is suspended from a simple loop and bar from a dark-blue ribbon $1\frac{1}{4}$ in in width with red edges, bearing a gold or silver buckle according to class.

Order of British India—This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army.

Since 1878, however, any person European or native, holding a commission in a native regiment, became eligible for admission to the Order without reference to creed or colour. The First Class consists of a gold eight-pointed radiated star $1\frac{1}{2}$ in in diameter. The centre is occupied by a lion statant guardant upon a ground of light-blue enamel, within a dark-blue band inscribed *Order of British India*, and encircled by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band $\frac{1}{2}$ in in diameter, through which the ribbon, once blue, now red, is passed for suspension from the neck. The Second Class is $1\frac{1}{4}$ in in diameter with dark-blue enamelled centre; there is no crown on this class, and the suspender is formed of an ornamental gold loop. The reverse is plain in both classes. The First Class carries with it the title *Sirdar Bahadur*, and an additional allowance of two rupees a day, and the Second the title of *Bahadur*, and an extra allowance of one rupee per day.

Indian Meritorious Service Medal—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal" but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend *Victoria Kaisar-i-Hind*. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base, having a star beneath, between the two wreaths is the inscription *for meritorious service*. Within the palm wreath is the word *India*. The medal, $1\frac{1}{2}$ in in diameter, is suspended from a scroll by means of a red ribbon $1\frac{1}{4}$ in wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to *EDWARDS* or *GEORGE*.

THE KAISAR-I-HIND MEDAL.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901 and 1912—being as follows:—"Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour. Now for the purpose of attaining an end so desirable as that of thus distinguishing such services

aforesaid, We have instituted and created, and by these presents for Us, Our Heir, and Successors, do institute and create a new Decoration." The decoration is styled "The Kaisar-i-Hind Medal for Public Service in India" and consists of two classes. The Medal is an oval-shaped Badge or Decoration—in gold for the First Class and in silver for the Second Class—with the Royal Cypher on one side and on the reverse the words "Kaisar-i-Hind for Public Service in India"; it is suspended from the left breast by a dark blue ribbon.

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following. —

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis. — On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 1-39th Garhwal Rifles. — For great gallantry on the night of the 23rd-24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches, and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles. — For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 23rd Gurkha Rifles. — For most conspicuous bravery during operations against the German trenches south of Maugisart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety, returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance-Naick) Lala, 41st Dogras. — Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naik Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once. When

this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark, when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry. — For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan, 80th Punjabis. — For most conspicuous bravery. He was in charge of a machine gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy's entrenched position. He beat off three counter attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance-Naick Govind Singh, 28th Cavalry. — For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 1½ miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana, 23rd Gurkha Rifles. — For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bombers

and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Lancers attached 29th Lancers—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh. es Samariyeh Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single-handed, but all the machine guns and infantry had surrendered

to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy Ishaw Singh, 23th Punjabis—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the bayonets had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun, restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded him with his body, and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

PASSPORT REGULATIONS.

A—British Subjects

1 British Indian passports are issued only to—(1) British subjects by birth, (2) wives and widows of such persons, (3) British subjects by naturalization and (4) British protected persons.

2 The Indian Passport Regulations do not require persons to be in possession of passports for leaving India, but as practically every other country requires travellers to be in possession of passports before they are allowed to land at the port of such country, travellers are advised to obtain passports before embarkation. Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service travelling on duty and members of the families of such persons when travelling to the United Kingdom on military entitled passages need not have passports.

3 Passports are not required for journeys by sea from Bombay to ports in India or to Burma, nor are passports required for permanent residents of Ceylon or India being British subjects to travel between India and Ceylon. Natives of India travelling to the Federated Malay States or the Straits Settlements do not require passports unless they propose to continue their journey onward.

4 In order to obtain a passport an application form (showing, among other things, the reasons for the proposed journey) should be filled in by the applicant and the applicant's declaration certified by a Political Officer, Magistrate, Justice of the Peace, Police Officer not

below the rank of Superintendent or Notary Public resident in India. Copies of the form can be obtained from any District Magistrate from the Commissioner of Police, Bombay, by post from the Passport Officer to the Government of Bombay, by personal application at the Passport Office or from any of the leading Banking and Shipping Agents in Bombay. Small duplicate unmounted copies of the photograph of the applicant and a fee of Rs. 6 in cash should be forwarded with the application form. Fees are not accepted in stamps or by cheque.

5 The application form when filled in should either be posted with the photographs and fee to the Passport Officer to the Government of Bombay, or should be presented at the Passport Office, Bombay.

6 The Passport Office in Bombay is situated in the Civil Secretariat. The office is open from 11 a.m. to 4 p.m. daily, except on Saturdays when it closes at 1 p.m. and on Sundays and public holidays.

7 As a passport is valid for five years, there is no objection to anyone applying for a passport weeks or even months in advance of the date of sailing and much inconvenience is avoided by early application. A fee of Rs. 1 for four days should be given for the preparation of a new passport and at least ten days for an endorsement for water visa. The Passport Office cannot issue a passport after five o'clock hours and as the preparation of a passport takes time applicants who apply late are liable to the inconvenience of being unable to travel.

Iraq

8 Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service in uniform and *bona fide* Muhammadan pilgrims (Haj or Zair) holding individual pilgrim passes do not require passports for their journey to Iraq. If such pilgrims desire to continue their journey to Persia for the purpose of pilgrimage they must obtain a Persian Consular visa in India. All other travellers must be in possession of national passports and visas for Iraq. In the absence of Iraq Consular Officers in India, visas for Iraq are granted by Passport Issuing Authorities in India on behalf of the Iraq Government subject to the conditions stated below. The Iraq visas are of two kinds—Ordinary, valid for all entries into Iraq during a period of twelve months, and Transit, valid for a single journey only, allowing for stay of not more than fifteen days in Iraq. The fee for these visas is the same as for British visas—*vide* paragraph 17 below. Iraq national passports are valid for return to that country without any further visa or endorsement.

Except in the case of *bona fide* tourists, business representatives and employees of well established firms and persons with definite guarantee of employment in Iraq, visas for Iraq will not be granted without the previous permission of the Iraq Government. The Passport Offices will on request, ask for this permission by post or, if the applicant is prepared to defray the cost by cable. Applicants must state clearly the nature of their business and give one or more references in Iraq to enable the local authorities to make inquiries regarding the purpose of their journey.

With the exception of tourists who may remain for three months in Iraq without registration, all persons are required to obtain a "permis de sejour" from the police within fifteen days of their arrival in Iraq. Travellers are also warned that before departure from Iraq even on a transit visa they must obtain a passport endorsement of departure.

Egypt

9 In the absence of Egyptian Consular officers in India visas for Egypt are granted by Passport Issuing Authorities in India on behalf of the Egyptian Government. The fee for these visas is the same as for British visas—*vide* paragraph 17 below.

The Egyptian Government have prescribed rules which regulate the admission of foreigners into Egypt. Generally, except in the case of British Government officials, *bona fide* tourists of ample and independent means and representatives of commercial houses of good standing, visas for Egypt cannot be granted whether for permanent residence or for a limited period without a reference to the Egyptian Government. In applying for visas for Egypt, a form of questionnaire laid down by the Egyptian Government which can be obtained from the Passport Office at Bombay, should be filled in. In addition, an applicant, for a visa should supply in writing, full particulars as regards the nature of his business in Egypt, the reasons for the journey, the proposed duration of stay in Egypt and what means he possesses.

No transit visa for Egypt can be given unless Egypt is necessarily on the route which the traveller must follow to reach his country of destination, and provided there exists no direct route by which he can reach that country without the necessity of passing through Egyptian territory.

Holders of the new form Egyptian passport do not require visas to return to Egypt.

10 Restrictions also exist on travel to various parts of the British Empire, and to certain foreign countries. Among these may be mentioned Australia, Canada, Mexico, Mahommurah and Abadan, New Zealand, Palestine, Southern Rhodesia, Union of South Africa, South West Africa and the United States of America. The restrictions apply particularly to Indians. Detailed particulars with respect to each country will be supplied on application.

Foreign Countries

11 Passports for journeys to or through foreign countries require, after issue, the visa of the Consul concerned. The addresses of the foreign consulates in Bombay will be found in the appendix below. Visas are, however, not necessary for Austria, Belgium, Denmark, France, Germany, Holland, Iceland, Italy, Liechtenstein, Luxemburg, Norway, Portugal, Sarro, Spain, Sweden, Switzerland and Czechoslovakia provided the names of these countries are entered on the passport by a British Passport issuing authority.

Renewal

12 A passport is valid for five years from the date of issue and is renewable for a further period of from one to five years from the date of expiry of its validity, at the option of the holder, but in no case can a passport be extended beyond ten years from the original date of issue. On expiration of this period, or, if at any time the space provided for visas is covered and the holder wishes to travel to countries for which fresh visas are required, a new passport must be obtained. Application for renewal must be made in the prescribed form, copies of which may be had from any of the officers mentioned in paragraph 4 above. The fee for renewals is Rs 2 for each year, or portion of a year, for which the passport is renewed.

Endorsements

13 A passport is valid only for the country or countries endorsed on it and fresh endorsements from a British Passport authority are not needed during the validity of the passport for subsequent journeys to these countries. Fresh endorsements may, however, be obtained on the passport for additional countries. Passports endorsed as valid for the British Empire are also available for travelling to territories under British protection or mandate, not however including Palestine and Iraq, for which countries the passport must be specifically endorsed. No fees are payable for endorsements made on British passports, but a fee of Rs 1-8-1 is payable for an additional endorsement for Palestine.

Marriage

14 A lady on marriage or re-marriage requires a fresh passport.

The School of Oriental Studies.

This School was established by Royal Charter in June 1916. The purposes of the School (as set out in the Charter) are to be a School of Oriental Studies in the University of London to give instruction in the Languages of Eastern and African peoples, Ancient and Modern, and in the Literature, History, Religion, and Customs of those peoples, especially with a view to the needs of persons about to proceed to the East or to Africa for the pursuit of study and research, commerce or a profession, and to do all or any of such other things as the Governing Body of the School consider conducive or incidental thereto, having regard to the provision for those purposes which already exists elsewhere and in particular to the co-ordination of the work of the School with that of similar institutions both in Great Britain and in its Eastern and African Dominions and with the work of the University of London and its other Schools.

The School possesses noble and interesting buildings, in Finsbury Circus, provided by the British Government under the London Institution (Transfer) Act of 1912. The sum of £25,000 required for the alteration and extension of the buildings of the London Institution for the purposes of the School was voted by Parlia-

ment. The School buildings are quiet although they are in the heart of the City. The School provides teaching in more than seventy subjects. In a considerable proportion of the spoken languages instruction is given by teachers belonging to the countries where the languages are spoken, as it is the aim of the School to provide as far as possible both European and Oriental Lecturers in the principal languages included in the curriculum.

Courses on the History, Religions, and Customs of Oriental and African countries form a special feature in the teaching of the School. There is now a whole time Reader in Phonetics, the classes for which are numerically larger than in any other subject. It is intended to record fully in phonetic symbols all the languages taught at the School.

Courses are also provided in Indian Law and the History of India, and arrangements are made from time to time for special courses of lecturer to be given by distinguished orientalists not on the staff. Various Scholarships are given.

The Fisheries of India

The fisheries of India, potentially rich, as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing population of the great cities within reach of the seaboard. The caste system, however, exerts a blighting influence on progress. Fishing and fish trade are universally relegated to low caste men who alike from their want of education the isolation caused by their work and caste and their extreme conservatism, are among the most ignorant, suspicious and prejudiced of the population extremely averse to amending the methods of their forefathers and almost universally without the financial resources requisite to the adoption of new methods, even when convinced of their value. Higher caste capitalists have hitherto fought shy of associating with the low caste fishermen, and except in large operations on new lines, these capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it

appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the uplift and education of the fishing community and in the introduction and testing of new and improved apparatus and methods.

The first local Government to lead the way was that of Madras which in 1905 initiated an investigation of the industry both marine and fresh water appointing Sir P. A. Nicholson to supervise operations. Bengal followed suit in 1906, and from these beginnings have sprung the local Fisheries Departments of Madras, Bengal, and Bihar and Orissa. Bombay, the remaining seaboard province, has comparatively small fresh-water interests compared with Madras and Bengal and as it happens that her marine fisheries are favoured with good harbours and the most enterprising race of fishermen in India there was less urgent need for State help in the industry. Fisheries there were a subject of Government solicitude for five years after the war but they finally ceased to receive any attention after the abolition in 1924 of the short lived Department of Industries to which this subject was allotted.

Madras.

The Madras coast line of 1,750 miles is margined by a shallow-water area within the 100 fathom line of 40,000 square miles outside of the mere fringe inshore, this vast expanse of fishable water lies idle and unproductive. The surf-swept East coast is singularly deficient in harbours whereon fishing fleets can be based, and so from Ganjam to Negapatam, the unsinkable catamaran, composed of logs tied side by side is the only possible easy-going fishing craft. Its limitations circumscribe the fishing power of its owners and consequently these men are poor and the produce of their best efforts meagre compared with what it would be if better and larger boats were available and possible. The West coast is more favoured. From September till April weather conditions are good enough to permit even dugout canoes to fish daily. No difficulty is found in beaching canoes and boats throughout this season. The fishing population is a large one. In the census taken by the Department of Fisheries in 1927-28 the fisher-population on the West coast totalled 114,502. The esteemed table fish of the coast consist of the Seer (*Cybitum* or *Scomberomorus*) Pomfret (*Apolectus* and *Stromateus*) several large species of Horse Mackerel (*Caranx*) Jew fish (*Sciaenidae*), Whiting (*Sillago*) Thread-fins (*Polynemus*) Sardines (*Clupea*) and Mackerel (*Scomber*). In economic importance, however, shoaling fish and fish of

inferior quality such as Sardine (*Clupea*) Mackerel (*Scomber*) Cat fish (*Arius*), Ribbon fish (*Trichiurus*) Goggles (*Caranx crumenophthalmus*) and Silver bellies (*Equula* and *Cazza*) take precedence of the former. Sardine and Mackerel over shadow all others. So greatly in excess of food requirements are the catches of sardines, that every year large quantities are turned into oil and manure. Fishing outside the 5 fathom line is little in evidence save by Bombay boats (Ratnagiri) which are engaged in drift netting for bonito, seer and other medium-sized fishes. These strangers are enterprising fishers and bring large catches into Malpe and Mangalore and other convenient centres. The material is largely cured for export.

The Madras Department of Fisheries — As Government attention has been given in Madras over a longer period to the improvement of fisheries, and a larger staff concentrated upon the problems involved than elsewhere this Presidency has now the proud position of knowing that her fisheries and collateral industries are better organised and more progressive than those in other provinces. The credit for the wonderful success which has been achieved and the still greater promise of the future, is due in large measure to the wise and cautious plans of Sir F. A. Nicholson, who from 1905 to 1918 had the guidance of affairs entrusted to

salt to Government. At present about 115 of such yards are scattered along the coast and over 55,000 tons of wet fish are annually cured therein. The total receipts on the administration of these yards for the year 1930-31 was Rs 1,97,777-0-4 and expenditure Rs 2,85,913 12 4.

Pearl and Chank Fisheries—In the absence of the pearl fishery during the year, the chank fisheries prospered. An unprecedented number of 467,628 chanks were fished yielding a gross revenue of Rs 17,560 8 8.

The Inland Fisheries—The inland fisheries of Madras compare unfavourably with those of Bengal. Many of the rivers dry up in the hot season and few of the many thousands of irrigation tanks throughout the province hold water for more than 6 to 9 months. As a consequence, inland fisheries are badly organised and few men devote themselves to fishing as their sole or even main occupation. The custom is to neglect or ignore the fishery value of these streams and tanks so long as they are full of water. Only when the streams shrink to pools and the tanks to puddles do the owners or lessees of the fishing rights turn out to catch fish. The result is a dearth of fish throughout the greater part of the year, a glut for a few days, and often much waste in consequence. The chief fresh water fishes of economic importance are the Murrel, notable for its virtue of living for a considerable period out of water, and various carps including Labeo Catla and the well-known favourite of sportsman in India the 'Mahseer,' Cat-fishes and Hilsa. In the Nilgiris the Rainbow Trout has been acclimatised and thrives well. The Government working in conjunction with the Nilgiri Game Association maintain a hatchery at Avalanche, where quantities of fry are hatched and reared for the replenishment of the streams of the plateau. Fishing rights in the large irrigation tanks were transferred from Government to local authorities many years ago; these tanks are now being reacquired by Government in order that they may be stocked periodically by the Department, the results so far have shown a profit on the operations. To breed the necessary fry, 7 fish farms are in operation. In these the chief fish bred are the Gourami, obtained from Java, and *Etroplus suratensis* which has the excellent attribute of thriving and breeding as well in brackish as in fresh water, both protect their eggs while developing, a useful habit. Both the Gourami and *Etroplus* are largely vegetarian in diet. A further activity is represented by the breeding of small fishes especially addicted to feed upon the aquatic larvae of mosquitoes. These are supplied in thousands to municipalities and other local authorities at a nominal price, for introduction into mosquito-haunted sheets of water, these antimalarial operations have proved successful in the places where the local authorities have given proper attention to the direction given.

Marine Aquarium—Perhaps a word is necessary about this institution at Madras. The building was constructed under the auspices of the Superintendent, Government Museum, Madras, and was thrown open to the public on

21st October 1909. The Superintendent, Government Museum, had charge of the Aquarium for ten years till 1919 when it was transferred to the Department of Fisheries. Ever since its opening, being the first institution of its kind in Asia, it has been immensely popular with the Public.

A turtle tank of rough semi circular shape with 21 feet as diameter was added during the course of the year.

Deep Sea Fishing and Research—The fisherman has a fairly exhaustive knowledge of the fisheries along the coast up to 7 fathoms. If the catches of fish are to be improved it is necessary to ascertain—

- (1) what kinds and quantities of fish are available beyond 7 fathoms, and,
- (2) how to exploit these deep sea fisheries economically.

The department's trawler "Lady Goschen" has been exploring the off shore belt of the sea up to 100 fathoms from Point Calimere to Madras on the East Coast and Calicut to Pigeon Islands on the West Coast, with a view to ascertain the kinds and quantities of fish available there. The Assistant Biologist and staff worked on board the trawler. One remarkable discovery made by this systematic survey is that fish of better quality and in larger quantity are available in deeper waters on the East coast from Point Calimere to Madras than on the West coast from Calicut to Pigeon Islands, during the months of the survey. Whether it is the case throughout the year is yet to be ascertained. However it has helped to revise the general belief that fish are much more abundant on the West coast than on the East coast, and opens up possibilities for large fishery developments on the East Coast which will ultimately increase the supply of fish food and fish manure.

Rural Pisciculture—As a result of the recommendation of the Royal Commission on Agriculture that all practical measures should be adopted to add fish to the diet of the cultivator thereby improving his nutrition a scheme of rural propaganda was inaugurated in 1930. An Assistant Director with necessary staff was appointed to advise ryots in the stocking of village ponds which number over 106,050 in the Presidency. The work though begun in July 1930 has already completed a survey of ponds in 98 villages, 2,172 wells and 264 ponds in these villages were examined and out of this number 175 wells and 85 ponds were selected as suitable for piscicultural operations and 45 wells and 1 pond were stocked.

Welfare Work—A remarkable feature in the work of the Madras Fisheries Department is the energy which it devotes to the improvement of the condition of the fisherfolk. On Sir Frederick Nicholson's initiative, the Department has always recognised the duty of spreading among them education and the habits of thrift, temperance and co-operation. The work has been specially successful on the West Coast. The number of fishermen's co-operative societies in 1930-31 was 73.

Bengal & Bihar & Orissa

Bengal was undertaken the trawler *Golder* being employed for the purpose. The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish. Much attention was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum. For various reasons the chief perhaps being the lack of vested interests the lack of cold storage facilities and the loss of time involved by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped. With ever increasing demand for fish in Calcutta and the concurrent rise in prices the prospects of remunerative steam trawling are now much more, steam trawling companies being floated in the immediate future. The trade is a difficult one to organize and without a rare combination of technical fishery knowledge and far-sighted and comprehensive organization the danger run by the investing public will be considerable. Originally one Fisheries Department served the needs of the two provinces of Bengal and Bihar and Orissa. Separation was effected in after which fisheries in Bengal were administered by the Director of Agriculture. The Bengal Fisheries Department was abolished under retrenchment in 1923. There is no immediate prospect of reconstitution of the Department in Bihar and Orissa Fisheries form a section of the Department of Industries.

Bengal Fisheries Department has of necessity a more limited scope for its activities than in the case of Madras. Practically no coastal minor industries exist, neither do the natural conditions lead us to suppose that any can be created without extreme difficulty. In the absence of a great trawl industry which alone might be able to call into existence factories devoted to the uplift of the general utilization of fish by products. A from this, much can be done by officers for the uplift of the population with a view to.

Following the inquiry begun in 1906 by Sir K. G. Gupta an investigation of the steam trawl potentialities of the head of the Bay of

tyranny of the mahajans (fish contractors and middle men) and enable them to put more capital into their business and to conduct it co-operatively. This is necessarily extremely slow work, but a beginning has been made and a number of fishermen's co-operative Societies have been formed. Their example is calculated to effectively serve the purpose of propaganda. The fishery wealth of Bengal is enormous and nothing but good can come out of intensive investigation and propaganda.

Fresh water mussels are used extensively at Dacca in the manufacture of cheap pearl buttons and in many cases pearls also are found in the mussels which the pearl dealers gather and sell in the various parts of India. The Dacca bangle factories carry on an important local industry of very ancient standing, their material is almost entirely obtained from the South Indian and Ceylon chank fisheries already alluded to.

Bombay.

Whereas Bengal's fisheries are at present confined principally to inland waters, those of Bombay are concerned, save in Sind, almost entirely with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding with excellent harbours for fishing craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister Presidencies. Bombay sea-fisheries are of very great importance financially as well as economically and, though there is less necessity for a special department to develop marine industries, there is ample scope for most useful work in improving curing methods, in introducing canning and in the development of minor marine industries particularly those connected with the utilization of bye-products. With this end in view the Director of Industries administered the subject of "Fisheries" from 1918 and had for a time two officers in the Department engaged upon fishery investigation and development. A steam trawler was bought for work in Bombay waters in 1920 and began work in May 1921 off Bombay. The experiment continued until February 1922, and the trawler was subsequently sold to the Government of Burma. At the outset the results seemed promising, but the experiment as a whole showed that the cost of maintaining a trawler of the type used could not be met by sales of fish at current market rates. Cold storage has since been installed at the principal fish market in Bombay, but for a trawler special facilities are needed also for rapid coaling, supplying ice and stores, and for unloading catches. More than this a change is needed in the mediæval conditions under which the local fish market is conducted and there is much to be done in popularising little known species of edible fish, such as karel, palu, tambusa, and particularly the ray or skate which formed on the average 25 per cent of the total catch but which is so little esteemed locally that it sold on the average at the rate of 100 lbs for a rupee.

Owing to retrenchment the appointments of Fisheries officers have been abolished.

The more important sea-fish are pomfrets, sole and sea-perches among which are included the valuable Jew-fishes (*Scæna* spp.) often attaining a very large size and notable as the chief source of "fish maws" or "sounds."

largely exported from Bombay for eventual manufacture into fishglass. The finest of Bombay fishing boats hail from the coast between Bassien and Surat. These boats are beautifully constructed, attain a considerable size, and are capable of keeping the sea for weeks together. In the season they fish principally off the Kutch and Kathiawar coasts and in the mouth of the Gulf of Cambay. Their main method of fishing is by means of huge anchored stow nets, which are left down for several hours and hauled at the turn of the tide. The chief catches are bombil (Bombay ducks), pomfrets and Jew fishes. The first named are dried in the sun after being strung through the mouth upon lines stretched between upright posts. South of Bombay the fishermen of Ratnagiri and Rajapur make use of another and lighter class of fishing boat, specially designed for use in drift-net fishing. Fine hauls of bonito seer (a large form of mackerel) and allied fishes are often made during the season from September to January and later of shark and ray fish. For the latter specially large and powerful nets are employed. For part of the fair season, when fishing is not usually remunerative, many of the larger Bombay fishing boats are employed as small coasters, a fact which shows how large they run in size.

In Sind considerable sea-fishing is carried on in the neighbourhood of Karachi chiefly for large and coarse fish, as shark, rays and Jew fishes. The edible oyster trade of Karachi was once extensive, the creeks of the Indus producing a species of oyster superior to that found in Bombay and Madras backwaters and estuaries. Unrestricted exploitation of beds of limited extent inflicted great harm, and now, when various salutary restrictions are imposed, the beds are slow to respond. Occasionally large deposits of the window pane oyster (*Placuna placenta*) are found in the Indus creeks and as these produce seed pearls in abundance, Government leased the beds to the highest bidder. The pearls are largely exported to China for use in medicine. Considerable fisheries exist in the River Indus, chiefly for the fish known as palla, which are annually leased out by Government for about Rs 20,000.

In the Gulf of Kutch two pearl fisheries exist, one for the true pearl oyster, the other for the window pane oyster. The former is carried on by His Highness the Maharaja of Jamnagar, the other partly by this Prince

staff. With a view to ameliorate uneconomic conditions by rendering the provisions of security easier, as well as to facilitate collection Government introduced what is known as the group system whereby the value of the fisheries is fixed at a reasonable rental, and instead of an individual system of furnishing security, the groups hold themselves severally responsible. It was thought that in order to enable the poorest of the actual workers to reap the benefit of their labours nothing short of a co-operative system would be of any avail, this co-operative system was tried in the Tharrawaddy District. In spite of large sacrifices of revenue in allotment of group fisheries on unjustifiably low rents, they have not been popular with fishermen have not prevented defaults, and have tended to collapse by dispute among the group member and civil suits over their liability for each others defaults.

Another system known as Fair Rent and

Tender System was introduced in Maubin as an experimental measure. Under this system, the lease is fixed at a fair rent and tenders of premium invited and the lease is given on a consideration of the premium offered plus the character of the person tendering and his previous connection with the fishing industry. The system, it is reported, is unpopular with lessees in spite of the favourable rents and the long term leases. The Government has now topped this system altogether. The Fishery Settlement Enquiry, which was set on foot in 1928 terminated in November 1930. Two reports which were submitted by the Fishery Settlement and Development Officer are now under consideration.

The principal articles of manufacture are ngapi (fish-paste) and salt fish, the manufacturing methods are primitive and with more industrial education and capital, these could be considerably improved.

The Punjab.

During the period 1930-31 there was no further expansion of the Fisheries Department, and no new districts were brought under the regulations. The catches of fishermen on the whole were average to good, except in the small streams of the Kangra District, and the Ravee River in Gurdaspur, where catches were below the average. Owing to a late and somewhat erratic monsoon no spawning was reported either in the Farm at Chhanawan or in natural haunts. In spite of special men deputed to watch the natural spawning haunts where fish ascend annually to drop their ova, no activity was reported. That fish spawned somewhere was evident from a report received from boatmen on the Beas River, who stated that they had seen large masses of eggs floating down the river at various times, but where the spawning actually took place was not discovered.

A new fish-tank was opened at Gill in the Ferozepur District for carrying out experiments with Bachwa (*Pseudotropheus Garra*) and Carp, but as the work was not completed till the end of June it was too late to make much use of it as Bachwa spawn during May and June.

The Madhopur Fish Farm was closed down temporarily owing to the financial stringency.

In Trout Culture yet another success was reported in the Simla Hills. One single plant of 10,000 ova was made in the Jasra River in 1927. This year a few big fish and a large number of fry were reported and subsequently half a dozen of the latter were sent in for identification, and proved to be yearling trout. As no plant was made after 1927 the presence of yearlings proves conclusively that not only was the original plant successful but the fish from it are now spawning naturally.

The reports from Kulu continue to be satisfactory, but the Uhl River in Mandi, and two streams in Kangra have been somewhat disappointing. The two latter have probably been heavily poached in the winter when the water is low.

Mahsir fishing in the Beas River in the Kangra and Hoshiarpur Districts continues to provide excellent sport. The last appreciation from an angler shows that he caught lbs 341 of fish, six of them being between lbs 45 and lbs 21.

Licenses rose from 5504 in the previous year to 7463 during 1930-31. This figure is still 892 below the record year 1928-29.

Travancore.

This State has affiliated fisheries to the Department of Agriculture and with the help of two officers trained in Madras and another officer trained in Japan, the Department has already accomplished a notable amount of development work. Special attention has been given to the regulation of fisheries in backwaters, to the establishment of co-operative societies

among the fishing community and to the introduction of improved methods of sardine oil and guano production. Useful work has been done by one of the officers in elucidating the life-histories of the more valuable food fishes and prawns. Improved methods of curing fish are being introduced. Special Schools have been opened for the education of fisher lads.

Forest Policy—The general policy of the Government of India in relation to forests was definitely laid down in 1894 by the classification of the areas under the control of the Department into four broad classes, namely—

(a) Forests the preservation of which is essential on climatic or physical grounds. These are usually situated in hilly country where the retention of forest growth is of vital importance on account of its influence on the storage of the rainfall and on the prevention of erosions and sudden floods

(b) Forests which afford a supply of valuable timbers for commercial purposes, such, for example, as the teak forests of Burma, the sal forests of Northern, Central, and North-Eastern India, and the deodar and pine forests of the North-Western Himalaya

(c) Minor forests, containing somewhat inferior kinds of timber, and managed for the production of wood, fodder, grazing and other produce for local consumption, these forests are of great importance in agricultural districts

(d) Pasture lands—These are not "forests" in the generally understood sense of the term but grazing grounds managed by the Forest Department merely as a matter of convenience. These four classes of forest are not always sharply divided from each other, and one and the same tract may to a certain extent be managed with more than one object

Administration—The forest business of the Government of India is carried out in the Department of Education, Health and Lands. The Inspector-General of Forests is also President of the Forest Research Institute at Dehra Dun and is the technical adviser to the Government of India in forest matters. Under the Constitution of 1919 Forests were made a transferred subject in Bombay and Burma, where they had long been administered by the Provincial Governments, and in 1924 the Reforms Inquiry Committee presided over by the late Sir Alexander Muddiman, Home Member of the Government of India, recommended that they be transferred in other provinces now unless any local Government on examination of the position can make out a convincing case against the transfer in its own province

Territorial charges—The various provinces are divided into one or more Forest Circles, each in charge of a Conservator of Forests, provinces containing three or more circles also have a Chief Conservator who is the head of the Department for his province. Circles are divided into a number of Forest Divisions, in charge of members of the Imperial or Provincial Forest Service, these Divisions in most cases correspond to civil districts. Each Division contains a number of Ranges in charge of junior members of the Provincial Service or of Forest Rangers or Deputy Rangers. Heavy Divisions are also sometimes divided into Subdivisions. The Ranges are further subdivided into a number of beats or protective charges held by Forest Guards or in some cases by Foresters

Non-territorial charges—Apart from territorial charges there are various important posts of a non-territorial nature connected with Forest Research and Education, the preparation of Forest Working Plans, and other special duties

The Forest Service—The Forest Service comprises three branches—

(1) **The Indian (Imperial) Forest Service** with a sanctioned total personnel of 330 officers consisting of the Inspector-General of Forests, Chief Conservators, Conservators, Deputy and Assistant Conservators. Of these 320 are to be recruited direct to the service and the balance obtained by promotion from the Provincial Forest Service. The officers of this service are recruited as probationers subject to the following methods prescribed in the Indian Forest Service (Recruitment) Rules, 1923—

(a) by nomination in England in accordance with these rules and such supplementary regulations as may be prescribed by the Secretary of State in Council

(b) by competitive examination in India in accordance with these rules and such supplementary regulations as may be prescribed by the Governor-General in Council

(c) by direct appointment in accordance with these rules of persons selected in India otherwise than by competitive examination,

(d) by the promotion in accordance with these rules on the recommendation of local Governments of members of the Provincial Forest Services,

(e) by the transfer of promotion in accordance with these rules of an officer belonging to a branch of Government Service in India other than a Provincial Forest Service

The Rules provide that all appointments to the Indian Forests Service shall be made by the Secretary of State for India in Council, that no appointment shall be made to the Indian Forest Service by any method other than the five just quoted and that, subject to this last mentioned condition, the method or methods of recruitment to be employed for the purpose of filling any particular vacancies in the Indian Forest Service or such vacancies therein as may be required to be filled during any particular period and the number of candidates to be recruited by each method, shall be determined by the Secretary of State in Council

(2) **The Indian Forest Engineering Service**—This service was created in 1919 and at present consists of 12 Forest Engineers

(3) **The Provincial Service**—Formerly it consisted of Extra Deputy and Extra Assistant Conservators of Forests. All Extra Deputy Conservators who were considered to be fully qualified to hold a major charge were transferred to the Imperial Forest Service in 1920. The class of Extra Deputy Conservators has been abolished and the service now consists of Extra Assistant Conservators only. The fixation of the strength of the personnel of the service rests with the local Governments

Officers of this service are eligible for promotion upto 25 per cent of the posts in the Indian Forest Service in provinces other than Bombay and Burma, such promotion being made by the Secretary of State for India. These officers are recruited and trained in India, their

recruitment being a matter for the local Governments. A certain number of posts in the service are filled by the promotion of specially promising Rangers. Owing to the establishment of a course for the training of probationers for the Indian Forests Service at Dehra Dun since 1926, the Provincial Service course ceased to exist from 1928.

(4) The Subordinate Service consists of Forest Rangers (about 840), Deputy Rangers (about 900), Foresters (about 2,000) and Forest Guards (about 11,500). The Rangers are at present trained at three different centres—the Forest College at Dehra Dun (for provinces other than Burma, the Central Provinces, Bihar and Orissa, Bombay and Madras), the Burma Forest School at Paimana (for Burma) and the Madras Forest College at Coimbatore (for Madras, Bihar and Orissa, Bombay and the Central Provinces). These three institutions were established in 1878, 1898 and 1912 respectively. The training of subordinates below the rank of Ranger is carried out in various local forest schools and training classes.

Research—For the first fifty years of the existence of the Forest Department in India no attempt was made to organize the conduct of forest research, and thus to co-ordinate and elaborate the scientific knowledge so necessary to successful economic working. A commencement in organized forest research was at last made in 1906 by the establishment, at the instance of Sir Sainthill Eardley-Wilmot, then Inspector-General of Forests, of a Forest Research Institute at Dehra Dun. The Forest Research Institute, is under the administrative control of the Inspector General of Forests who is also the President. There are five main branches of research, namely Silviculture, Forest Botany, Forest Economic Products, Entomology and Chemistry, each branch being in charge of a research officer. The Timber Testing, and the Wood Preservation experts are engaged temporarily on short term contracts. Indian Assistants have been appointed under them to receive the necessary technical training and experience in these subjects, with the object of eventually taking the place of experts if and when properly qualified. The Wood Technology, Paper Pulp and seasoning section, are in charge of Indian experts who have received special training in their various subjects in Europe and America.

Since 1906 research work has been prosecuted energetically so much so that in 1920 a new scheme was sanctioned for the expansion of the staff and site of the Institute. Since then new land has been acquired, on which new buildings have been built for accommodating the various expanded branches and the new machinery obtained from the United Kingdom. As a result of this steady progress is being made in the investigations which should ultimately lead to the fuller and better utilization of the raw products produced by Indian forests.

Forest Products—Forest produce is divided into two main heads—(1) Major produce, that is timber and firewood, and (2) Minor produce, comprising all other products such as bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc.

The average annual outturn of timber and fuel from all sources during the quinquennium ended 31st March 1930, the latest date for which statistics are available, was 347,800,000 cubic feet against an average of 340,000,000 cubic feet per annum attained in the preceding quinquennium. The highest figure ever attained under this head occurred in 1921-22, when a total of 361,883,000 c ft was reached, the year 1923-24 coming next with 353,890,000 c ft. The annual outturn of timber and fuel from all sources during the quinquennium 1928-29 averaged 3,78,00,000 cubic feet against an average of 3,40,000,000 c ft during the preceding quinquennium. The trade in bamboos was almost stationary, with expectations of great development under commercial exploitation in the near future. The five years witnessed the initiation and development of certain large exploitation schemes, especially in Madras, which had indifferent success. It was hoped in Madras by utilising modern American methods to extract and utilise very large quantities of valuable timbers, but the final result proved that this extensive exploitation was justified neither by the stand of timber in the forests nor by the possibilities of satisfying markets. The Provincial Government after this experience adopted a more cautious policy.

An important measure for the development of forests in the Andamans was sanctioned by the Government of India. Hitherto, elephants had been employed for extraction of timber, the result that only the fringe of the forests could be touched. The new plan is for the employment of American methods. American logging machinery was purchased and an American expert engaged to take charge of the work. Elsewhere in India a great part of the trade in timber lies in the hands of contractors who are regarded as on the whole trustworthy if sufficient control over their operations is maintained.

Forest Industries—The important rôle which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognized. Fifteen years ago it was estimated that in Germany work in the forests provided employment for 1,000,000 persons while 3,000,000 persons, earning £30,000,000 a year, were employed in working up the raw material yielded by the forests. If accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftsmen and others working in and near them, employment on an excessive scale is provided to persons engaged in working up the raw products. Among these latter may be mentioned carpenters, wheelwrights, coopers, boat-builders, tanners, rope-makers, lac-manufacturers, basket-makers, and many other classes of skilled labourers. The Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Native States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture. With the opening up of the he extension of systematic working, of kn

products, and the possible discovery of new products, a steady and extensive development of industries dependent on the forests of India may be confidently anticipated in the future.

Financial Results—The steady growth of forest revenue, expenditure and surplus during the past 65 years is shown in the following statement, which gives annual averages for quinquennial periods—

Financial Results of Forest Administration in British India from 1864-65 to 1928-29 (in lakhs of rupees)

| Quinquennial period. | (Gross revenue average per annum) | (Expenditure average per annum) | Surplus (average per annum) | Percentage of surplus to gross revenue |
|--------------------------------|-----------------------------------|---------------------------------|-----------------------------|--|
| | Lakhs. | Lakhs. | Lakhs. | Lakhs. |
| 1864-65 to 1868-69 | 27 4 | 23 8 | 13 6 | 36 4 |
| 1869-70 to 1873-74 | 50 3 | 30 3 | 17 0 | 30 2 |
| 1874-75 to 1878-79 | 66 6 | 45 8 | 20 8 | 31 2 |
| 1879-80 to 1883-84 | 88 1 | 56 1 | 32 1 | 36 4 |
| 1884-85 to 1888-89 | 116 7 | 74 3 | 42 4 | 36 2 |
| 1889-90 to 1893-94 | 159 5 | 86 0 | 73 5 | 46 1 |
| 1894-95 to 1898-99 | 177 2 | 98 0 | 79 2 | 44 7 |
| 1899-1900 to 1903-04 | 196 6 | 112 7 | 83 9 | 42 7 |
| 1904-05 to 1908-09 | 257 0 | 141 0 | 116 0 | 45 1 |
| 1909-10 to 1913-14 | 296 0 | 163 7 | 132 3 | 44 7 |
| 1914-15 to 1918-19 | 371 3 | 211 1 | 160 2 | 43 1 |
| 1919-20 to 1923-24 | 551 7 | 367 1 | 184 6 | 33 5 |
| 1924-25 to 1928-29 | 595 4 | 351 1 | 244 2 | 40 0 |

Most of the provinces show a steady increase of surplus. The slump in trade of the last few years is now evident in the surplus for the year 1928-29 which has fallen to 227 lakhs, having been 256 lakhs in 1927-28 and 264 lakhs in 1926-27. The figure, however, is still a most favourable one and indicates that the forests of India are being properly worked for the benefit of the country.

Research—Under no heading was greater progress made during the five years ended March 1929 than under forest research. The Director General of Forests in his report for that period says, "In almost all provinces research has come into its own and in all the major provinces special officers have been appointed for research in utilization and silviculture. Special officers have also been appointed in some provinces to deal with research in botany and entomology. The general scope and organisation of the work of these officers is based on the principles observed at the Forest Research Institute at Dehra Dun, where the Research Institute has developed on a very large scale during the 5-year period." Following a decision by Government in 1900, an estate of 1,200 acres for a new research institute at Dehra Dun was purchased and very large buildings erected there, the opening ceremony for its inauguration being performed by H. E. the Viceroy on 7th November 1920.

A large and representative number of forest officers in March, 1929, met for a silvicultural conference at Dehra Dun. It was the most important conference of the kind ever held in India and its discussions were highly important. In no branch of forestry has such an awakening taken place among forest officers as in the branch of silvicultural research, the subject has engaged the attention of a large number of

experts and as a result of their inquiries forestry methods in the provinces have very greatly developed in recent years.

As a result of Mr R. R. Pearson's long and able administration of the Forest Economic Branch, the Government of India now have at Dehra Dun a series of forest workshops and experimental laboratories without parallel anywhere else in the world and official reports show that the value of the experimental work done in them is daily exemplified by the unending stream of inquiries received from persons doing business in timber and other forest products, not only in India but elsewhere in the world. The officers in charge of this branch received their training mostly in Europe and America and their efficiency is of a very high order.

Agencies—An agency has been established in India by the Government of India for the sale of Government timber and it is at present held by Messrs Martin & Co., Calcutta. The agency held in England by Messrs W. W. Howard Brothers terminated in December 1926 and the work of marketing Indian timbers in England (especially Andaman timbers) is now done under the direction of a Timber Adviser who is attached to the Office of the High Commissioner for India. This trade has not yet been raised to a satisfactory level, because, according to the official explanation, "the intense conservatism in English timber trade and the difficulty of obtaining a footing for little known timbers have combined to make satisfactory sales very difficult."

Bibliography—A large number of bulletins and other publications has been issued by the Forest Research Institute, and of these a list can be obtained from the Superintendent, Government Printing, India, Calcutta.

AREA OF FOREST LANDS, OUTPUT OF PRODUCE, AND REVENUE AND EXPENDITURE OF FOREST DEPARTMENT.

| AREA OF FOREST LANDS, OUTPUT OF PRODUCE, and REVENUE AND EXPENDITURE OF FOREST DEPARTMENT. | | | | | | | | | | | |

entirely unoccupied waste, often entirely barren and Karrenli.

* Excludes Delhi Province and the British Pargana of Manpur (Central India).
 † Unclassified State forests or 'public forest lands', as they are often called, include in many provinces all unoccupied waste, often entirely devoid of trees. So the statistics do not necessarily represent the wooded area.

(a) Including Rs 1,03,800 on account of receipts under the head Imperial Forest College.
 (b) Excluding figures for Shan States and Karrenn.

(c) Including Rs 1,03,800 on account of receipts under the head Imperial Forest College.
 (d) Including expenditure under the following heads of the sums stated against them—Imperial (Rs. —01,088), Imperial Forest College (Rs. 9,31,831) Excludes expenditure under 52 A Capital outlay not charged to Revenue (Rs 5,01,000)

(e) After taking into account deficits under the following heads of the sums stated against them—Imperial (Rs. —01,088), Imperial Forest College (Rs. —9,27,008)

WIRELESS TELEGRAPHY AND TELEPHONY

Beam Stations—The year 1927 saw the commencement of Beam wireless services on the Marconi system between India and the United Kingdom. Powerful transmitting and receiving stations erected at Poona and Dhond respectively by the Indian Radio Telegraph Company are connected by land lines with the Central Telegraph Office in Bombay, whilst stations at Shegness and Grimsby are similarly connected with the General Post Office in London, and the circuits are so arranged that messages are exchanged between Bombay and London without intermediate handling at the Beam stations at either end. The huge aerial systems at Poona and Dhond, each supported on five steel towers 287 feet in height, are landmarks over a distance of many miles. The service was inaugurated by His Excellency the Viceroy, on 23rd July 1927 at the Central Telegraph Office, Bombay, when His Excellency transmitted a message to the King and His Majesty's reply was received a few minutes later.

It is noteworthy that the opening of the Beam wireless service coincided with a reduction in rates by the cable companies. The Eastern Telegraph Co., which operates the cable from Europe to India, has become merged in the New Imperial and International Communications Ltd.

For reasons of economy, most of the inland wireless stations in India were practically closed down and placed in charge of "Care and Maintenance" parties which carry out tests twice a month, the exceptions being Peshawar Radio, which always maintained official communication with Kabul in Afghanistan and Kashgar in China, and Jotogh Radio, which receives British Official Wireless sent out from Oxford and Rugby and passes the messages to Reuter's Agency for distribution to subscribing newspapers. The stations at Delhi and Allahabad have now been equipped with apparatus to enable them to function as aeronautical wireless stations and they are used as such. New wireless stations for aeronautical purposes have been erected at Jodhpur in Bikaner, and Gaya. The wireless installations at Karachi and Calcutta have been modified so as to meet all the Wireless requirements of aircraft passing over India. New stations equipped for aeronautical communication purposes are under construction at Chitagon, Akyab, Sandoway and Bassein.

The coast stations, however, have been maintained in a state of high efficiency and many improvements effected. The application of the Baudot system to the high-speed continuous wave wireless stations at Madras Fort and Mingaladon (Rangoon) has proved extremely satisfactory, and a large portion of the traffic between Southern India and Burma is regularly worked by this direct route instead of the circuitous route via Calcutta. The traffic is interrupted occasionally by atmospheric interference, particularly during the hot weather but the difficulties have been largely overcome by handspeed working during the worst periods.

For many years the Bombay stations known as Bombay Radio was located on Butcher Island in the Harbour, but during 1927 a fine new station equipped with modern apparatus was erected and taken into service at Santa Cruz, just outside the limits of Bombay Municipality.

Radio telegrams exchanged with ships at sea by coast stations in India and Burma continue to increase in number, and now total about 30,000 per annum. Official telegrams are exchanged with the British Naval station at Matara (Ceylon) via Bombay Radio. Regular services are also maintained between Burma and the Malay Peninsula via Rangoon and Penang and between Burma and Sumatra, whilst radio traffic is passed between Madras and Colombo when the normal route is interrupted.

Wireless telephonic communication between pilot vessels, lighthouses and shore stations are maintained by the Port Trusts at Bombay and Rangoon. In the early hours of March 19 telephonic communication between Bombay and London was established for the first time. The conversations were initiated from the s.s. *Belgenland* a tourist ship lying in Bombay Harbour and were made possible through the courtesy of Standard Telephones and Cables Limited in conjunction with the International Marine Radio Company.

Safety at Sea—A noticeable feature of wireless development during the past two years has been the provision of direction-finding apparatus at Bombay and Karachi and facilities at other coast stations whereby ships at sea equipped with direction finding apparatus can obtain bearings on coast stations and thus determine their position with a remarkable degree of accuracy. The latest style of Marconi beacon was erected on Kennery Island during 1931 to guide shipping approaching Bombay harbour. All Ships equipped with wireless direction finders will now be able to obtain exact knowledge of their whereabouts at a distance of 150 miles from the coast. The beacon is an experiment and is likely to be the first of many others along the coast of India. Improved arrangements for broadcasting time signals, weather reports and navigational warnings from coast stations have also proved of value to ships at sea.

Broadcasting—For several years, limited broadcasting services were maintained by Radio Clubs in Calcutta, Bombay, Madras, Karachi and Rangoon and although the transmitting sets employed by them were of very low power, the broadcasts were tuned-in over practically the whole of India. The clubs were assisted financially by a Government contribution based upon the revenue from license fees but this did not nearly suffice to cover the cost of the transmissions, and the greatest credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes. Credit is also due to the Indian States and Eastern Agency for the loan of transmitting apparatus, without which the broadcasts would have been impossible.

After negotiations extending over several years, an Indian Broadcasting Company was granted a license to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected in Bombay and Calcutta, the services at the former being inaugurated by His Excellency the Viceroy in July 1927 and the latter by the Governor of Bengal a month later. These stations had each an aerial input of three kilowatts the same as that of the 2LO stations in London of which they are practically duplicates. The programmes were so arranged that both Indian and European music are broadcast daily and the news bulletins and market and weather reports are read in two languages.

Bombay broadcasts normally on a wavelength of 357 metres and Calcutta on 370 metres. Reception in either of these cities, and for a distance of twenty or thirty miles around, is possible on crystal sets, of which a very large number have been sold. Valve sets are necessary for those living further afield, but although there has been a considerable demand for these, the sales have not reached expectation. One of the greatest difficulties in India is the maintenance of batteries which is no inconsiderable item when sets containing five or six valves are employed. Partly with a view to overcoming this problem and to render broadcasting available on two-valve sets in any part of India the Broadcasting Company investigated the possibility of transmitting simultaneously on long and short waves. It took no action on the results of such investigations.

The Indian Broadcasting Company was wound up in 1930 and its operations have since been conducted by the Government of India, in the Industries and Labour Department. Government for this purpose formed an Indian State Broadcasting Service and instituted a Central Broadcasting Advisory Committee, representative of the non-official public in association with the Departmental officials, to keep them in touch with public opinion. The Committee has as its chairman the Member of the Viceroy's Executive Council in charge of the Subject (now the Hon. Sir Joseph Bhoré) and upon it sit at the present time Messrs N. B. Macbeth and N. M. Dumasia, M.L.A. Bombay, H. H. Revlands and K. C. Neogi, M.L.A. Calcutta, M. R. Coburn, Financial Adviser to Government in the Posts and Telegraphs Department and B. Rama Rao, Joint

Secretary to Government in the Industries and Labour Dept. It is now proposed to establish a series of additional broadcasting stations in different parts of India so as to spread broadcasting receivable on low-powered sets throughout the land. Important proposals with this purpose in view were discussed by the Advisory Committee in Calcutta in December, 1930.

Licenses—Broadcast receiving licenses are issued at Head Post Offices at a fee of ten rupees per year and cover the use of receiving sets throughout British India except Baluchistan and the North-West Frontier Province. Licenses for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applicants more than 300 have been issued. The number of traders in wireless apparatus who are required to take out special import licenses has increased considerably during the past year. This improvement must be ascribed primarily to the commencement of broadcasting.

Prospects—The Government of India have always encouraged the development of wireless in India by private enterprise and to this source that India may look in the future for considerably increased internal radio communication. There are two most promising lines of development, viz.—

(a) Erection of small sets either for speech or morse in districts where no land lines exist and to link such districts with the existing landlines. In this connection it may be remarked that modern small radio sets are capable of using either morse or speech at will and if used for speech can be operated by the ordinary desk telephone instrument in daily use all over India.

(b) The use of radio as a substitute for land line to form the trunk telephone route between two cities which already have telephone facilities.

These would if it is thought open up a new industry which if properly fostered would very soon extend its sales outside the limits of India. It is believed that the majority of parts for small radio sets could be more cheaply manufactured in this country than they can be imported and such an industry would find the right kind of skilled labour already in India.

The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785, but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much later than was the case in Calcutta. In Calcutta the English were on sufferance before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy his bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkaru*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stoeckeler in 1836.

From its commencement the press was jealously watched by the authorities, who put serious restraints upon its independence and pursued a policy of discouragement and

rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Sir Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette*, founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Durpan* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During

the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interest. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in

influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussilite*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussilite*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

INDIAN PRESS LAW

Before 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

The Act deals, not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to reduce soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants or private individuals.

The different sections of the Act have in view (i) Control over presses and means of publication, (ii) control over publishers of newspapers, (iii) control over the importation into British India and the transmission by the post of objectionable matter, (iv) the suppression of seditious or objectionable newspapers, books, or other documents wherever found.

Repeal of Press Legislation—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Government, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

- (1) The Press Act should be repealed.
- (2) The Newspapers Incitements to Offences Act should be repealed.
- (3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below:—
 - (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as regards criminal and civil responsibilities,
 - (b) any person registering under the Press and Registration of Books Act should be a major as defined by the Indian Majority Act,
 - (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained.
 - Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I.P.C. subject to review on the part of the local Government and challenge by any persons interested in the courts,
 - (e) any person challenging the orders of Government should do so in the local High Court,
 - (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months,
 - (g) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

Press Association of India—At the end of 1915 this Association was formed in Bombay According to the articles of constitution "Its objects shall be to protect the press of the country by all lawful means from arbitrary laws and their administration, from all attempts of the Legislature to encroach on its liberty or of the executive authorities to interfere with the free exercise of their calling by journalists and press proprietors, and for all other purposes of mutual help and protection which may be deemed advisable from time to time" Members pay a minimum subscription of Rs 10 annually The affairs of the Association are managed by a Council

Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr James Wilson, when Finance Member, in 1859. Again, in 1867 Mr Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

The Presidency Banks—The history of the Presidency Banks in their relationship with Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. Put very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited.

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

The Imperial Bank—Under the Imperial Bank of India Act (XLVII of 1920), the control of the Bank is entrusted to a Central Board of Governors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board, with the previous sanction of the Governor-General in Council may determine. The Central Board of Governors consists of—

- (a) Managing Governors not exceeding two in number, appointed by the Governor-General in Council on recommendation by the Central Board,
- (b) the Presidents, Vice-Presidents and Secretaries of the Local Boards,
- (c) the Controller of the Currency, or other officer nominated by the Governor-General in Council, and
- (d) not more than four non-officials, nominated by the Governor-General in Council.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Controller of the Currency and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not to vote under the agreement with Government. The Governor-General in Council is entitled to issue instructions to the Bank in respect of any matter which in his opinion vitally affects his financial policy or the safety of the Government balances, and if the Controller of the Currency or such other officer of Government as may be nominated by the Governor-General in Council to be a Governor of the Central Board shall give notice in writing to the Managing Governors that he considers that any action proposed to be taken by the Bank will be detrimental to the Government as affecting the matters aforesaid, such action shall not be taken without the approval in writing of the Governor-General in Council. Under the Imperial Bank of India Act provision was made for the increase of the capital of the Bank. The capital of the three Presidency Banks consisted of 3½ crores of rupees in shares of Rs 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs 500 each, of which Rs 125 has been called up, making the present capital of the Bank Rs 11½ crores, of which Rs 5,62,50,000 has been paid up. The Reserve Fund of the Bank is Rs 5,42,50,000 and the Balance Sheet of 30th June 1931 showed the Government balance at Rs 15,96,88,876, other deposits at Rs 66,15,34,490 and Cash Rs 17,17,85,085, with a percentage of Cash to liabilities of 20.68.

Class of Business—The Imperial Bank of India Act follows the Presidency Banks Act of 1876 in defining absolutely the class of business

in which the Bank may engage, though the older limitations are modified in some minor points. It permits for the first time the constitution of a London Office and the borrowing of money in England for the purpose of the Bank's business upon the security of assets of the Bank, but not the opening of cash credits, keeping cash accounts or receiving deposits in London except from former customers of the Presidency Banks. The Act provides for an agreement between the Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period of ten years determinable thereafter by either party with one year's notice, provides, *inter alia*, for the following important matters —

- (1) All the general banking business of the Government of India is to be carried out by the Imperial Bank

- (2) The Bank will hold all the Treasury Balances at Headquarters and at its branches. This involves the abolition of the Reserve Treasury system.
- (3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four. The branches and agencies of the three Presidency Banks prior to the date of amalgamation numbered 69, including the Colombo branch of the Bank of Madras. The Bank of Bengal had no branches prior to the proposal to transfer Government business to the Bank in 1861-62 but no less than 18 branches were established before 1868.
- (4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration.

In Schedule 1, Part 1, of the Act, the various descriptions of business which the Bank may transact are laid down, and in Part 2 it is expressly provided that the Bank shall not transact any kind of banking business other than that sanctioned in Part 1

Briefly stated, the main classes of business sanctioned are —

(1) Advancing money upon the security of —

- (a) Stocks, &c, in which a trustee is authorised by Act to invest trust moneys
- (b) Securities issued by State aided Railways, notified by the Governor-General-in-Council
- (c) Debentures, or other securities issued under Act, by, or on behalf of, a District Board
- (d) Goods, or documents of title thereto, deposited with, or assigned to the Bank.
- (e) Accepted Bills of Exchange or Promises
- (f) Fully paid shares and debentures of Companies with limited liability or immoveable property or documents of title relating thereto, as collateral security where the original security is one of those specified in a, b, c, d and, if authorised by the Central Board, in e

(2) With the sanction of the Local Government, advancing money to Courts of Wards upon security of estates in their charge

(3) Drawing, accepting, discounting, buying and selling bills of exchange and other negotiable securities payable in India and Ceylon and, subject to the directions of the Governor-General-in-Council, the discounting, buying and selling of bills of exchange payable outside India for and from or to such Banks as may be approved

(4) Investing the Banks' funds in the securities referred to in (1) a, b, c

(5) Making Bank Post Bills and Letters of Credit payable in India and Ceylon

(6) Buying and selling gold and silver

(7) Receiving deposits

(8) Receiving securities for safe custody

(9) Selling such properties as may come into the Bank's possession in satisfaction of claims

(10) Transacting agency business on commission

(11) Acting as Administrator, for winding up estates

(12) Drawing bills of exchange and granting letters of credit payable out of India for the use of principles in connection with (11) and also for private constituents for *bona fide* personal needs

(13) Buying, for the purpose of meeting such bills, &c, bills of exchange payable out of India at any usance not exceeding six months

(14) Borrowing money in India

(15) Borrowing money in England upon security of assets of the Bank, but not otherwise

The principal restrictions placed on the business of the Bank in Part 2 are as follows —

(1) It shall not make any loan or advance —

- (a) For a longer period than six months,
- (b) upon the security of stock or shares of the Bank,
- (c) save in the case of estates specified in Part 1 (Courts of Ward) upon mortgage or security of immoveable property or documents of title thereof

(2) The amount which may be advanced to any individual or partnership is limited

(3) Discounts cannot be made or advances on personal security given, unless such discounts or advances carry with them the several responsibilities of at least two persons or firms unconnected with each other in general partnership

The Balance Sheet of the Bank as at 30th June 1931 was as follows —

| LIABILITIES | | | ASSETS | | |
|--|--------------|------|---|--------------|-------|
| | Rs | a p | | Rs | a p |
| Subscribed Capital | 11,25,00,000 | 0 0 | Government Securities | 28,18,53,192 | 2 1 |

THE EXCHANGE BANKS.

The Banks carrying on Exchange business in India are merely branch agencies of Banks having their head offices in London, on the continent, or in the Far East and the United States. Originally their business was confined almost exclusively to the financing of the external trade of India, but in recent years most of them, while continuing to finance this part of India's trade, have also taken an active part in the financing of the internal portion also at the places where their branches are situated.

At one time the Banks carried on their operations in India almost entirely with money borrowed elsewhere, principally in London—the home offices of the Banks attracting deposits for use in India by offering rates of interest much higher than the English Banks were able to quote. Within recent years however it has been discovered that it is possible to attract deposits in India on quite as favourable terms as can be done in London and a very large proportion of the financing done by the Exchange Banks is now carried through by means of money actually borrowed in India.

No information is available as to how far each Bank has secured deposits in India, but the following statement published by the Director-General of Statistics in India shows how rapidly such deposits have grown in the aggregate within recent years

**TOTAL DEPOSITS OF ALL EXCHANGE BANKS
SECURED IN INDIA

Exchange Banks' Investments

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned. The Exchange Banks have practically a monopoly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business. They are able however by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through. No definite information can be secured as to the extent to which rediscounting in London is carried on but the following figures appearing in the balance sheets dated 31st December 1930 of the under-noted Banks will give some idea of this

LIABILITY ON BILLS OF EXCHANGE RE-DISCOUNTED AND STILL CURRENT.

| | |
|---|------------|
| Chartered Bank of India, Australia and China, Ltd | 2,395,000 |
| Eastern Bank, Ltd | 526,000 |
| Hongkong and Shanghai Banking Corporation | 2,938,000 |
| Mercantile Bank of India, Ltd | 1,004,000 |
| National Bank of India, Ltd | 2,352,000 |
| P. & O. Banking Corporation, Ltd | 5,508,000 |
| | 14,923,000 |

The above figures do not of course relate to re-discounts of Indian bills alone, as the Banks operate in other parts of the world also, but it may safely be inferred that bills drawn in India form a very large proportion of the whole

The bills against exports are largely drawn at three months' sight and may either be "clean" or be accompanied by the documents relating to the goods in respect of which they are drawn. Most of them are drawn on well known firms at home or against credits opened by Banks or financial houses in England and bearing as they do an Exchange Bank endorsement they are readily taken up by the discount houses and Banks in London. Any bills purchased in India are sent home by the first possible Mail so that presuming they are rediscounted as soon as they reach London the Exchange Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills in anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until maturity

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of which the following are the principal —

- (1) Proceeds of import bills as they mature.
- (2) Sale of drafts and telegraphic transfers payable in London and elsewhere out of India
- (3) Purchase of Council Bills and Telegraphic Transfers payable in India from the Secretary of State
- (4) Imports of bar gold and silver bullion
- (5) Imports of sovereigns from London, Egypt or Australia.

The remaining business transacted by the Banks in India is of the usual nature and need not be given in detail

An interesting event in Indian Banking history is the recent entry in the Banking field here of one of the English "Big Five". This has been brought about by the acquisition of the business of Cox & Co., by Lloyds Bank

The following is a statement of the position of the various Exchange Banks carrying on business in India as at 31st December 1930—

In Thousands of £

| Name | Capital | Reserve | Deposits | Cash and Investments |

JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets—

In Lakhs of Rupees

| Name | Capital | Reserve. | Deposits | Cash and Investments |
|--|---------|----------|----------|----------------------|
| Allahabad Bank, Ltd, affiliated to P & O Banking Corporation Ltd | 35 | 44 | 1,102 | 681 |
| Bank of Baroda Ltd | 30 | 24 | 595 | 366 |
| Bank of India, Ltd | 100 | 92 | 1,311 | 767 |
| Bank of Mysore, Ltd | 20 | 16 | 222 | 99 |
| Central Bank of India, Ltd | 108 | 86 | 1,481 | 1,040 |
| Indian Bank, Ltd (Madras) | 12 | 13 | 180 | 38 |
| Punjab National Bank, Ltd | 31 | 21 | 509 | 232 |
| Union Bank of India, Ltd | 39 | 7 | 27 | 46 |

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events of ten years ago confidence has been largely restored. But in April 1923 the Alliance Bank of Simla suspended payment and is now in voluntary liquidation. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial Bank undertook to pay the depositors of the Alliance Bank 50 per cent of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

Growth of Joint Stock Banks

The following figures appearing in the Report of the Director-General of Statistics shew the growth of the Capital, Reserve and Deposits of the principal Joint Stock Banks registered in India —

| In Lakhs of rupees | | | | | | | | |
|--------------------|---------|---------|----------|------|-----|-----|------|--|
| | Capital | Reserve | Deposits | | | | | |
| 1870 | 9 | 1 | 13 | 1916 | 281 | 166 | 1787 | |

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct, and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this

point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawers. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, viz, (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent per mensem above the Bank's rate of discount, or $1\frac{1}{2}\%$, is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Mullanis having their Head Offices for the most part in Bikaner and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonimis" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only and advances on other securities or discounts are granted as

The following statement shows the average constituted—

| Year | 1st Half-year | 2nd Half-year | Yearly average |
|------|---------------|---------------|----------------|
| 1921 | 6 038 | 6 105 | 5 574 |
| 1922 | 7 132 | 4 510 | 5 821 |

| 1931 | 6 735 | 5 277 | 5 522 |

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members

and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below —

Total amount of Cheques Cleared Annually

In lakhs of Rupees

The Railways.

The history of Indian Railways very closely reflects the financial vicissitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Eastern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (120 miles), the East Indian Railway, Bombay to Kalyan (33 miles), Great Indian Peninsula Railway, and Madras to Arkonam (89 miles), Madras Railway. Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein, after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private capital in India available for railway construction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose. By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian, (2) the Great Indian Peninsula, (3) the Madras, (4) the Bombay, Baroda and Central India, (5) the Eastern Bengal, (6) the Indian Branch, later the Oudh and Rohilkund State Railway and now part of the East Indian Railway, (7) the Sind, Punjab and Delhi, now merged in the North Western State Railway, (8) the Great Southern of India, now the South Indian Railway. The scheme laid the foundations of the Indian Railway system as it exists to-day.

Early Disappointments

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was five per cent coupled with the free grant of all the land required, in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met; the interest charges were calculated at 22½ to the rupee, the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working. The early results were disappointing. Whilst the Railways greatly increased the efficiency of the administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions, the result was that by 1869 the deficit on the Railway budget was Rs 16½ lakhs. Seeking for some more economical

method of construction, the Government secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness. Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula, the Bengal-Nagpur (1883-87), the Southern Mahratta (1882), and the Assam Bengal (1891) were constructed under guarantees, but on easier terms than the first companies. Their total length was over 4,000 miles.

Famine and Frontiers

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted—the Nilgiri, the Delhi-Umballa-Kalka, the Bengal Central, and the Bengal North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth. A step of even greater importance was taken when Native States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Native State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge, during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the metre 1,865, and narrow 67). Then ensued a period of financial ease. It was broken by the fall in exchange and the costly lines built on the frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly, it is said that they might have been ballasted with rupees, the long tunnel under the Khofak Pass added largely to this necessary, but unprofitable, outlay.

Rebate Terms Established

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line, so that the dividend might rise to four per cent but the rebate was limited to 20 per cent of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantel, the South Behar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to. The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed to illustrate the carrying power of this gauge. The rebate terms being found unattractive in view of the competition of 4 per cent trustee stocks, they were revised in 1896 to provide for an

contribution payable to general revenues amounted to £4588,950 it was necessary to draw £1,561,650 from the Railway Reserve fund to meet this charge. The results of 1930-31 have shown no improvement and up to 14th February 1931 the gross earnings of Indian Railways were about £5,227,500 less than those of the similar period of 1929-30. The revised estimate for 1930-31 presented with the Railway Budget estimate for 1931-32 allows for total receipts of Rs 96.75 crores a reduction of Rs 12.75 crores as compared with the original estimate, while the total charges although Rs 1.5 crores below the original estimate were estimated to amount to nearly Rs 102 crores. Railways were therefore faced with a loss of Rs 5.12 crores in addition to which Rs 5.74 crores have to be found as a contribution to General Revenues. It will accordingly be necessary to draw Rs 10.86 crores from the Reserve fund. The budget estimate for 1931-32 allows for total receipts of Rs 10.25 crores and total charges of Rs 101.25 crores and as the contribution to General Revenues will be Rs 5.36 crores it will be necessary to draw a further Rs 4.15 crores from the Reserve Fund.

Contracts Revised

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent dividend guaranteed at 22½ per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railway thus became a State line but it was released to the Company which actually works it. Under these new conditions the East Indian Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. At the end of seventy-four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counter-balance the loss during the period when the revenue did not meet the interest charges.

According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

Improving Open Lines

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed but the poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories has for some time kept this scheme in the background. The possibilities however of this construction being undertaken have improved considerably recently and a detailed survey is being carried out. There does not exist any through rail connection between India and Burma although several routes have been surveyed, the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920 the three routes to be surveyed being the coast route the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India will also probably one day be connected and Karachi given direct broad-gauge connection with Delhi, a project that has been investigated more than once but cannot at present be financially justified. These works are, however, subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

Government Control and Re-organisation of Railway Board

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. A

This object was effected by the following new posts which in some cases supplemented the existing ones and in other cases replaced them: Directors of Civil Engineering, Mechanical Engineering, Traffic, Establishment and Finance and seven Deputy Directors working under them.

The necessity of some central organisation to co-ordinate the publicity work carried out on railways and to undertake on its own the many forms of railways publicity which can be best organised by one central body led to the inauguration of the Central Publicity Bureau under a Chief Publicity Officer in 1927. The success which has attended the work of this Bureau led to its being made permanent from January 1st, 1929. The work undertaken is described later.

The growing importance of Labour questions necessitated the organisation of a new branch in the Railway Board's office and to the appointment in 1929 of a third member whose main duties are connected with the satisfactory solution of labour problems and the improvements of the conditions of service of the staff generally and of the lower paid employees in particular.

Under the Railway Board's policy of progressive standardisation a Central Standardisation Office was established under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The Technical Officer under the Railway Board was transferred to this office as a Deputy Controller.

The present superior staff under the Railway Board, therefore consisted of 5 Directors, 5 Deputy Directors, 1 Assistant Director, a Secretary and a Deputy Secretary in addition to the Controller of Railway Accounts and his officers, to the Chief Publicity Officer and the Officers in the Central Publicity Bureau and to the Chief Controller and the officers in the Central Standardisation Office. The Assistant Director of Statistics having been transferred to the office of the Controller of Railway Accounts.

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board was under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start was made with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff was appointed reporting directly to the Auditor-General. As it was found that the separation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State-managed railways during 1929. The supervision of Accounts Officers was placed under a Controller of Railway Accounts reporting to the Financial Commissioner of Railways and that of Audit Officers under a Director of Railway Audit reporting to the Auditor-General. These two duties were previously combined under the Accountant-General Railways, reporting to the Auditor-General. The Chief Accounts Officers

on railways are now under the Agent but have certain powers of direct reference to the Financial Commissioner of Railways.

Management

The Railways managed by Companies have Boards of Directors in London and are represented in India by an Agent. Some of the Company-managed railways are still on a departmental basis with a Traffic Manager, Chief Engineer, Locomotive and Carriage and Wagon Superintendent, Controller of Stores and Chief Auditor, while others have separated the Transportation and Commercial duties of the Traffic Manager and combined the supervision of Locomotive running with Transportation. State-managed lines have generally adopted the divisional organisation.

Clearing Accounts Office

A Clearing Accounts Office, with a Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of traffic interchanged between State-managed Railways. The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, the Eastern Bengal Railway on the 1st January 1928, and the Great Indian Peninsula Railway later.

At the request of the Bombay, Baroda and Central India Railway an exhaustive experiment was conducted to check the accuracy of the results obtained by the revised procedure, and as the experiment was completely successful, the Board of Directors of the Bombay, Baroda & Central India Railway have also agreed to the transfer of the check and apportionment of their foreign traffic to the Clearing Accounts Office.

During 1927-28 demonstrations explaining the Clearing Accounts Office procedure were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure. An important demonstration was given to the representatives of the Southern Railways at Madras who were so impressed with the superiority of the new procedure that they unanimously recommended to their Home Boards the transfer of the work of check and apportionment of earnings from interchanged traffic to the Clearing Accounts Office, and it was hoped to open a branch Clearing Accounts Office at Madras at an early date to deal with such traffic but owing to certain later developments in connection with experiments now in operation of through rate registers and of decentralisation of Traffic Accounts Work, no definite decision has yet been arrived at.

The Railway Conference

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from amongst the members, and has done much useful work.

The Indian Gauges

The standard gauge for India is five feet six inches. When construction was started the broad gauge side was strong, and it was thought advisable to have a broad gauge in order to resist the influence of exelence. But in 1870 when the State system was adopted it was decided to find a more economical gauge, for the broad line had cost £17,000 a mile. After a consideration the metre-gauge of 3 feet 6 inches was adopted because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metre-gauge lines provisional, they were to be converted into broad gauge as soon as the traffic justified it, consequently they were built very light. But the traffic expanded with very rapidity, and it was found better to improve the carrying power of the metre-gauge lines than to convert them to the broad gauge. So except in the Indus Valley where the strategic situation demanded a broad gauge, the metre-gauge lines were improved and they became a permanent feature of the railway system. Now there is a great metre-gauge system north of the Ganges connected with the Rajputana lines and Kathiawar and another system in Southern India embracing the Southern Maratha and the South India Systems. These are not yet connected, but there is a link from Khandwa by way of the Nagpur-Hyderabad-Godavari Railway, carrying 10 tons delayed. All the Burma lines are on the metre-gauge. Certain feeder and hill railways have been constructed on the 2 feet 6 inches gauge, and since the opening of the 15.5-12.5 mt Railway which showed the inferiority of the 2 ft gauge, there has been a tendency to construct feeder lines on this rather than on the metre gauge.

State versus Company Management — The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the Acworth Railway Committee. That Committee was unfortunately unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperative. When the question was debated in the Legislative Assembly in February 1923, the

non-official Indian Members were almost unanimously in favour of State management and indeed were able to carry a resolution recommending the placing of the East Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contracts. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting the necessity for taking over the management of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company management in India to take these railways over eventually on a basis of real Company management. There have been certain definite advantages during a transition period in having a central authority with necessary powers to co-ordinate the work on railways and that the results have been satisfactory are borne out by the fact that Indian railways have contributed 47 million pounds to General Revenues during 1927-28 and nearly 4 million pounds during 1928-29 in addition to paying in 4 million and 12 million pounds respectively during these two years to the Railway Reserve Fund. The future organisation will, however, need careful organisation. Experience in other countries has shown that difficulties arise in a Government fully responsible to the Legislature or under any constitution which imposed on the Railway Department the necessary restrictions which must apply as between ordinary departments of the State. The solution found in other countries such as Germany, Canada, Belgium, Austria and elsewhere, where State ownership has thrown on the State the obligation to manage its own railways, has been to create by a statute an authority charged with the management of the State Railway property with statutory prescription of the objects to be aimed at in such management and statutory division of railway profits between the State and the Railway Authority. This authority may take the form of a company as in Canada and in Germany or follow the simpler lines of a statutory commission. On 1st January 1925 the East Indian Railway was amalgamated with the Oudh and Rohilkhand Railway and brought under direct State Management while on 1st July 1925 the Great Indian Peninsula Railway followed suit. The Naini Jubbulpore Section of the East Indian Railway was transferred to the Great Indian Peninsula Railway on 1st October 1925.

On January 1st 1929 the contract with the Burma Railways Company was terminated and the management taken over by the State. The purchase of this railway has entailed the payment to the Burma Railways Company of the sum of three millions sterling being the share capital originally contributed by the Company. The financial effort of taking over the line is estimated to be an increase of about half a crore of rupees in the net annual revenue to Government.

The purchase of the Southern Punjab Railway of an aggregate length of about 927 miles worked by the North Western Railway was effected on the 1st January 1930. It is estimated that the financial result of the purchase which cost approximately Rs 703 lakhs will be a gain to Government of about Rs 47 lakhs a year.

At the end of 1929-30 the Nizam's Guaranteed State Railways system which was the property of the company, was acquired and its management taken over by His Exalted Highness the Nizam's Government and is now known as His Exalted Highness the Nizam's State Railway

Separation of the Railway from the General Finances—The question of the separation of the railway from the general finances was under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor-General in Council — "that in order to relieve the general budget from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways —

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings

(2) The contribution shall be a sum equal to five-sixths of 1 per cent on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic Railways) at the end of the penultimate financial year plus one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available for the Railway administration to be utilised in

- (a) forming reserves for,
- (i) equalising dividends, that is to say, of securing the payment of the percentage contribution to the general revenues in lean years,
- (ii) depreciation,
- (iii) writing down and writing off capital,
- (b) the improvement of services rendered to the public,
- (c) the reduction of rates

(4) The railway administration shall be entitled, subject to such conditions as may be prescribed by the Government of India, to bor-

row temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, i.e., will not have the effect of increasing the fixed contribution for the year

(6) The Railway Department will place the estimate of railway expenditure before the Central Advisory Council on some date prior to the date for the discussion of the demand for grants for railways "

This resolution was examined by the Standing Finance Committee in September and was introduced with certain modifications. The final resolution agreed to by the Assembly on September 20th, 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent instead of 5/6th per cent on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only 1rd of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining 1rd was to accrue to General Revenues. At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State. These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Railway and existing State Managed Railways remain under State-management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangements in this resolution

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department.

It will have to wait for this separation to be made and decided but due to the complexity of the matter has been held over.

Re-organisation problems.—The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations. The general direction in which this re-organisation is being considered is that of consolidation in one department of the operating or transportation work of the railway, including the exercise of power. This system which is known as the divisional system was first adopted on the Great Indian Peninsula Railway during 1922-23.

Rates Advisory Committee

The following cases were referred to the committee for consideration and make room for the following cases on the following lines:

- (i) Complaint of undue charges.
- (ii) Complaint that rates are not reasonable.
- (iii) Complaint of dispute in respect of terminal charges.
- (iv) The regulations on the use of an engine for the packing of articles especially liable to damage in transit or liable to cause damage to other merchandise.
- (v) Complaint in respect of conditions as to goods and a reduction in rate.
- (vi) Complaints that Railways do not fulfil their obligations to provide reasonable facilities under Section 42 (1) of the Indian Railways Act.

The Committee reported on the following cases which had been referred to them during 1929-30—

- (i) Complaint from Messrs Chaturvedi Jamma Prasad & Co. Jaunpur in regard to the rates charged for biddy leaves over the Bengal Nagpur, Great Indian Peninsula and East Indian Railway from Bursingpur to Jaunpur.
- (ii) Complaint from Messrs Sheo Dyal Ramji Das, Jaunpur, against the East Indian Railway in connection with the rate for salt from via Cawnpore to certain stations which it was alleged, were on a higher basis than the corresponding rates on another line.
- (iii) Complaint from the Sri Ranga Vilas Ginning, Weaving and Spinning Mills, Coimbatore, regarding the rate charges for yarn from Coimbatore to Shalimar over the South Indian Madras and Southern Mahratta and Bengal Nagpur Railways which it was alleged, constituted preferential treatment owing to a lower rate being charged for similar traffic from Madras to Shalimar.
- (iv) Complaint from the proprietors of a rice mill at Chakulla regarding the alleged high rates charged over the Bengal Nagpur Railway for rice and paddy to and from Chakulla.

(v) Complaint from the Calcutta Chamber of Commerce against the Madras and Southern Mahratta Railway for not allowing for raw materials the same rates as were being allowed on the South Indian Railway.

- (vi) Complaint from the Kalyanpur Line Works, Calcutta regarding the alleged unreasonableness of rates over the East Indian Railway for lime from Dhiron Sone to Howrah and certain stations on the Bengal and North Western Railway as compared with the corresponding rates from certain competing centres on the Naini-Tubutpore section of the Great Indian Peninsula Railway.
- (vii) Complaint from certain sugar factory proprietors at Cawnpore regarding the rates for jagree over the Bengal and North Western Railway when consigned to stations on other railways at Cawnpore, the allegation being that the rates were unduly high.
- (viii) Complaint from certain fruit dealers in Calcutta regarding the minimum weight condition applicable for a rate quoted by the East Indian Railway for mangoes from via Mokamchi Ghat to Howrah, being too high to enable them to take advantage of the rate.

Of the eight cases, the last mentioned was compromised when it came up for hearing before the committee. The first five were reported on by the committee during the year under review and the recommendations made by them, which were all in favour of the railway administrations concerned were accepted by Government. The committee also reported on two other cases which had been referred to them during the previous year. These were—

- (i) Complaint from a dealer in marble regarding the high rates charged from Bombay to stations on the South Indian Railway over the Great Indian Peninsula Madras and Southern Mahratta and South Indian Railways.
- (ii) Complaint from the Burhanpur Tapti Mill regarding the rate for piecegoods from Burhanpur to Calcutta being higher than from Bombay to Calcutta, which it was alleged constituted preferential treatment.

The recommendations of the Committee in both these cases in the first in favour of the complainant and in the second in favour of the railways concerned were accepted by Government.

At the close of the year the committee had under investigation two out of the eight cases referred to them during the year and one, dealing with the question of the levy by the Assam Bengal Railway of terminal charges on loose jute, which had been referred to them in October 1929. The enquiry in the latter case has been prolonged owing to the necessity for compiling detailed statistics showing the earnings from terminal charges and the expenditure on terminal facilities.

Inauguration of the Main Line Electric Service, G. I. P. Railway.

The inauguration of the electrified main line section of the G. I. P. Railway from Kalyan to Poona took place on the 5th November 1929, and constituted the first entirely main line of track to be electrified in India. This scheme involved the elimination of the Bhoze Ghat Reversing Station. The problem of eliminating the Reversing Station had been seriously considered on several occasions in the past but it was not until 1923, when electrification had been definitely decided upon, that final survey operations became imperative.

Apart from the location of the realignment which called for the adoption of methods unusual in ordinary survey practice, the works involved in the construction of this double line broad-gauge section of railway were of considerable magnitude, chiefly in the form of heavy tunnel construction.

There are three tunnels in all aggregating 4,598 feet or 87 of a mile. The longest of these is 3,100 feet built throughout on a curve of the sharpest radius which occurs in these ghats. Allowing for curvature and the considerably increased spacing of tracks necessitated by the adoption of the latest standard dimensions, a tunnel section of 34 feet 6 inches wide and 24 feet 6 inches high was decided upon. This is considered to be the largest tunnel section in the world.

The steam trains to Poona took approximately 6 hours for the journey and it is anticipated that with electric traction this timing will be now reduced to approximately 3 hours.

With the opening of the electrified section between Kalyan and Igatpuri in October 1930, it is believed that the G. I. P. Railway has the greatest length of electrified main line in the British Empire and the entire scheme will be one of the most important main line electrifications in the world.

Publicity.

The year 1929-30 marked a very considerable advance in the Publicity activities of the Indian railways. The Central Publicity Bureau of the Railway Board was inaugurated on 1st April 1927, a Chief Publicity Officer was appointed and provided with an Assistant and a small clerical staff. The office was located in Victoria Terminus, Bombay, it being felt that, to commence with, Bombay's position as the main port of arrival in India, closer touch could be kept with travellers and further more, Bombay presented certain distinct advantages from the point of view of printing facilities, etc.

For 1928 however the office was moved to Delhi as being more central and in closer touch with the Railway Board. Among some of the principal lines upon which it was decided to concentrate attention were —

- Cinema film production and display,
- Poster production and display,
- Pamphlet production and display,
- Publication of an *Indian State Railways Magazine*,
- Demonstration Trains,
- Upper and Lower class special excursion trains,
- Press propaganda in India,

Press propaganda in Europe, America and other parts of the world,
Reciprocal publicity with the leading railways of the world.

One of the most important of these activities is undoubtedly the cinema film production and display as much of this is directed towards encouraging primary industries and the welfare of agriculturists and villagers. It must be remembered in this connection that owing to the very large proportion of illiterates in India, the cinema is the outstanding method of conveying information to the masses. Each State Railway is provided with a travelling cinema projection outfit which moves continuously from place to place over the different systems and by this means the propaganda films issued from the Central Publicity Bureau are widely circulated. That these displays, which are free, are fully appreciated is proved by the patronage accorded to them.

Shortly after the inauguration of the Central Publicity Bureau, the need was felt for a representative in England to give information and advice to potential travellers and to handle enquiries arising out of the advertising campaign which it was decided to carry out. A Publicity Officer was appointed and temporary offices secured in London in which an Indian State Railways Bureau was opened. It was soon found that separate permanent offices were required and these have now been obtained in 57, Haymarket, London, where sufficient accommodation is available to deal adequately with the many visitors who come there. With the opening of 'India House' a Branch Office has also been provided there, and this will deal more particularly with enquiries concerning Goods rates, but general enquiries can also be answered there. In order to obtain an adequate share of the American tourist traffic, an Office has also been opened in New York and a Resident Manager appointed there. This office was at first temporarily in accommodation kindly provided by the Canadian Pacific Railway in their General Offices at 342, Madison Avenue, New York, but now has its own commodious office in an excellent site at Delhi House, 38, East 57th Street, New York.

Owing to the financial stringency it was decided in 1931 to cut down the Bureau and bring directly under the Railway Bureau. The work carried out remains however unchanged except in scope and the film Department was definitely closed down.

Capital Expenditure — The outlay during the year 1928-29 was Rs 27.53 crores, of which Rs. 25.41 crores represented expenditure incurred on State-owned lines.

Considerable progress has been made with the programme of new construction. Close on 1,300 miles of new railway were opened for traffic during 1928-29, and at the close of the year there were some 2,100 miles under construction.

Trade review — The earnings of railways are dependent on the general prosperity of the country which in the case of India is most easily measured by the agricultural position and the returns of foreign trade.

Exports — The total value of exports recorded was Rs 311 crores, which meant a decline of 6 per cent on the corresponding figure for 1928-29. The outstanding feature was a decline

Open Mileage—The total route mileage on March 31st, 1931, was made up of—

| | |
|--------------|-----------------|
| Broad gauge | 20,801 73 miles |
| Metre-gauge | 17,440 09 „ |
| Narrow-gauge | 4,038 77 „ |

Under the classification adopted for statistical purposes, this mileage is divided between the three classes of railways as follows —

| | |
|-----------|-----------|
| Class I | 38,020 16 |
| Class II | 3,222 53 |
| Class III | 1,037 90 |

Class I includes all the 5'-6" gauge mileage, 14,869 miles or 87 per cent of the metre-gauge, and 2 158 or 53 per cent of the narrow-gauges

The State owned 31,489 miles or about 75 per cent and directly managed 18,897 miles or about 45 per cent of the total mileage open at the end of the year

During the year 1930-31, 573 miles of new lines were opened for public traffic. Of this mileage, 500 miles belong to Class I, and 54 miles to Class II Railways

Additions to Equipment—During 1930-31 a considerable number of old carriages were replaced during the year by new carriages of larger seating capacity with the result that

there was an increase in third class accommodation of 51,313 on the broad-gauge and 3,571 in the metre gauge making a total increase of 54,884. There was a decrease in goods wagons of 808 on the broad-gauge but an increase of 1,119 on the metre-gauge

The following table shows total figures of seating accommodation under the four classes —

| Class I
Railways | Number of seats in
passenger carriages | | | |
|---------------------|---|--------|--------|---------|
| | 1st | 2nd | Inter | Third |
| 5'-6" | 24,467 | 40,186 | 66,971 | 668,977 |
| 3'-3½" | 10,705 | 14,692 | 12,480 | 372,506 |

Financial Results of Working—The total gross earnings of all railways in India during the year 1930-31 amounted to Rs 106 62 crores as compared with 116 14 crores in 1929-30. These figures, however, include railways owned by Indian States and companies for which the Government of India has no direct financial responsibility. The figures of receipts and expenditure for railways with which the Government are directly concerned are as follows —

| | | (Figures in thousands) | |
|--|----|------------------------|-----|
| | | 1930-31 | Rs. |
| (a) Gross Traffic Receipts | . | 95,00,66 | |
| (b) Surplus profits from Subsidized Companies | .. | 20,56 | |
| (c) Interest on Depreciation and Reserve Funds | . | 1 32,21 | |
| d) Other Miscellaneous Railway Receipts | | 20,80 | |
| Total (Receipts) | | 66,83,12 | |
| | | Rs | |
| (a) Working expenses (excluding depreciation) | .. | 54,38,94 | |
| (b) Depreciation | . | 13,06,53 | |
| (c) Surplus profits paid to Companies | | 1,10,30 | |
| (d) Land and subsidy to Companies | . | 5,90 | |
| (e) Interest | . | 32,71,55 | |
| (f) Miscellaneous Railway Expenditure | . | 62,08 | |
| Total | | 1,02 01,90 | |
| Net Loss | .. | 5,18,78 | |
| Contribution from Railway to general revenues | . | 5,73,57 | |
| Amount transferred from Railway Reserve Fund | .. | 10,92,35 | |

Indianisation—The various Railway Companies managing State and other Railway lines have followed the lead given by Government and accepted the recommendation of the Lee Commission that the extension of existing training facilities should be pressed forward as expeditiously as possible in order that recruitment in India may be advanced as soon as practicable up to 75 per cent of the total number

of vacancies in the Superior Services of the Railway concerned

Fatalities and Injuries—During the year 1930-31 the number of persons killed decreased by 185 as compared with the previous year. The number of passengers killed decreased by 21 and of passengers injured by 89

The following table shows the numbers killed and injured separately under passengers, railway servants and others for 1930-31 as compared with 1929-30 —

| | Killed. | | Injured | |
|---|--------------|--------------|--------------|--------------|
| | 1929-30 | 1930-31 | 1929-30 | 1930 31 |
| A Passengers— | | | | |
| (1) Accidents to trains, rolling-stock, permanent-way, etc | 6 | 12 | 69 | 140 |
| (2) Accidents caused by the movement of vehicles used exclusively on railways | 349 | 325 | 1,040 | 881 |
| (3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles | 3 | | 17 | 16 |
| B Servants— | | | | |
| (1) Accidents to trains, rolling stock, permanent-way, etc | 33 | 25 | 174 | 32 |
| (2) Accidents caused by the movement of vehicles used exclusively on railways | 343 | 282 | 1,708 | 1,87 |
| (3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles | 62 | 44 | 4,014 | 4,650 |
| C Others— | | | | |
| (1) Accidents to trains, rolling-stock, permanent-way, etc | 67 | 71 | 171 | 96 |
| (2) Accidents caused by the movement of vehicles used exclusively on railways | 2,481 | 2,397 | 774 | 735 |
| (3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles | 21 | 24 | 87 | 61 |
| Total .. | 3,365 | 3,180 | 8,054 | 8,547 |

Of the total number of 3,180 persons killed 1,921 were trespassers on the line and 365 committed suicide

Local Advisory Committees—In the Annual Reports by the Railway Board on the working of Indian Railways, references are made each year to the work that is being done by Local Advisory Committees on railways in bringing to the notice of their respective railways administrations matters affecting the general public

in their capacity as users of the railway. These committees have been established and are functioning on all Class I Railways, except His Exalted Highness the Nizam's State Railways and the Jodhpur Railway. During 1929-30, the Barsi Light Railway constituted an Advisory Committee for that line.

These committees constitute a valuable link between railways and their clientele

THE CHIEF RAILWAYS IN INDIA

The Assam-Bengal Railway, which is constructed on the metre-gauge, starts from Chittagong and runs through Surma Valley across the North Cachar Hills into Assam. It is worked under a limited guarantee by a company.

| | | |
|-------------------|----|--------------|

Bengal and North-Western

The Bengal and North-Western Railway was constructed on the metre-gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre-gauge system at Cawnpore and with the Eastern Bengal State Railway at Khatihar and the East Indian Railway at Benares and Mokameh Ghat.

Bengal-Nagpur

The Bengal-Nagpur Railway was commenced as a metre-gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broad-gauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatam was transferred to it and in the same year sanction was given for an extension to the coal-fields and for a connection with the Branch of the East Indian Railway at Haridwar.

Bombay Baroda

The Bombay, Baroda and Central India Railway is one of the original guaranteed railways. It was commenced from Surat via Baroda to Ahmedabad, but was subsequently extended to Bombay. The original contract was terminable in 1880, but the period was extended to 1905, and then renewed under revised conditions. In 1885 the Rajputana-Malwa metre-gauge system of State railways was leased to the Company and has since been incorporated in it. On the opening of the Nagda-Muttra, giving broad-gauge connection through Eastern Rajputana with Delhi the working was entrusted to this Company. On the acquisition of the Company in April 1907 the purchase price was fixed at £11,685,581.

Burma Railways

The Burma Railway is an isolated line, and although various routes have been surveyed there is little prospect of its being connected

with the Railway system of India in the near future. In reply to a question in the Imperial Legislative Council in 1919, Sir Arthur Anderson said — "During 1914-15 extensive survey operations were carried out to ascertain the best alignment for a railway connection along the coast route between Chittagong and certain stations on the Burma Railways south of Mandalay. A rival route via the Hukong Valley between the northern section of the Assam-Bengal Railway and the section of the Burma Railways north of Mandalay was to have been surveyed during the following year but was postponed because of the war. It is now proposed to commence this survey during the coming cold weather, and on its completion, Government will have sufficient information to enable them to decide which route shall be adopted. Thus no arrangements for the construction of a line have yet been made nor has any concession been granted, but it is probable that the line selected will be built at the cost of Government and worked by one or other of the main lines which it will connect. It was commenced as a State Railway and transferred in 1896 to a Company under a guarantee. From January 1st, 1929, its working has been taken over by the State.

Eastern Bengal.

The Eastern Bengal State Railway was promoted under the original form of guarantee and was constructed on the broad-gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre-gauge of the Northern Bengal State Railway, which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

| Earnings per cent | . | 4 19 |

East Indian

The East Indian Railway is one of the three railways sanctioned for construction as experimental lines under the old form of guarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutiny ran as far as Raniganj. It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1880 the Government purchased the line, paying the shareholders by annuities, but leased it again to the company to work under a contract which was terminable in 1910.

The contract was not terminated till January 1st 1923, when the State took over the management. From July 1st, 1923, the Outhwaite Rohilkhand railway was amalgamated with it.

| Earnings per cent | . | 5 05 |

Great Indian Peninsula

The Great Indian Peninsula Railway is the earliest line undertaken in India. It was promoted by a Company under a guarantee of 5 per cent and the first section from Bombay to Thana was open for traffic in 1853. Sanction was given for the extension of this line via Poona to Raichur, where it connects with the Madras Railway, and to Jubbulpore where it meets the East Indian Railway. The feature of the line is the passage of the Western Ghats, these sections being 15½ miles on the Bhore Ghat and 9½ miles on the Thul Ghat which rise 1,131 and 972 feet. In 1900, the contract with the Government terminated and under an arrangement with the Indian Midland Railway that line was amalgamated and leased to a Company to work.

The contract was terminated on June 30th 1925, when the State took over the management.

| | |

| Capital at charge | Rs 1,19,02,82,000 |
| Net earnings | Rs 4,49,78,000 |
| Earnings per cent | 3.78 |

Madras and Southern Mahratta Railway

The Madras Railway was the third of the original railways constructed as experimental lines under the old form of guarantee. It was projected to run in a north-westerly direction in connection with the Great Indian Peninsula Railway and in a south-westerly direction to Calicut. On the expiry of the contract in 1907 the line was amalgamated with the Southern Mahratta Railway Company, a system on the metre gauge built to meet the famine conditions in the Southern Mahratta Country and released to a large Company called the Madras and Southern Mahratta Railway Company.

| | |
|-------------------|-----------------|
| Mileage open | Rs 3,230 |
| Capital at charge | Rs 61,19,43,000 |
| Net earnings | Rs. 4,42,60,000 |
| Earnings per cent | 7.23 |

The North-Western

The North-Western State Railway began its existence at the Sind-Punjab-Delhi Railway, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karachi to Kotri. The interval between Kotri and Multan was unbridged and the railway traffic was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railway from Lahore towards Peshawar was begun. In 1886 the Sind-Punjab-Delhi Railway was acquired by the State and amalgamated with these two railways under the name of the North-Western State Railway. It is the longest railway in India under one administration.

| | |
|-------------------|-------------------|
| Mileage open | Rs 6,954 |
| Capital at charge | Rs 1,50,16,77,000 |
| Net earnings | Rs 4,18,68,000 |
| Earnings per cent | 2.79 |

Oudh and Rohilkhand

Oudh and Rohilkhand Railway was another of the lines constructed under the original form of guarantee. It began from the north bank of the Ganges running through Rohilkhand as far as Saharanpur where it joins the North-Western State Railway. It was not until 1887 that the bridge over the Ganges was completed and connected with the East Indian Railway. To effect a connection between the metre-gauge systems to the North and those to the South of the Ganges a third rail was laid between Bhurwal and Cawnpore. The Company's contract expired in 1889 when the Railway was purchased by the State and has since been worked as a State Railway.

The working of this railway was amalgamated with that of the East Indian Railway from 1st July 1925.

The South Indian

The South Indian Railway was one of the original guaranteed railways. It was begun by the Great Southern India Railway Company as a broad-gauge line, but was converted after the seventies to the metre-gauge. This line has been extended and now serves the whole of the Southern India, south of the south-west line of the Madras Railway. Between Tuticorin and Ceylon a ferry service was formerly maintained, but a new and more direct route to Ceylon via Rameshwaram was opened at the beginning of 1914. As the original contract ended in 1907, a new contract was entered upon with the Company on the 1st of January 1908.

| | |
|-------------------|-----------------|
| Mileage open | Rs 2,459 |
| Capital at charge | Rs 40,41,62,000 |
| Net earnings | Rs 2,70,35,000 |
| Earnings per cent | 6.69 |

The Indian States

The principal Indian State Railways are the Nizam's, constructed by a company under a guarantee from the Hyderabad State, the Kathiawar system of railways, constructed by subscriptions, among the several Chiefs in Kathiawar, the Jodhpur and Bikaner Railways, constructed by the Jodhpur and Bikaner Chiefs, the system of railways in the Punjab, constructed by the Patiala, Jind, Maler Kotla, and Kashmir Chiefs, and the railways in Mysore, constructed by the Mysore State.

At the end of the financial year 1929-30 a total of 1257.57 miles of new lines was under construction, distributed as follows—

| | Miles |
|--------------|--------|
| 5' 6" gauge | 730.77 |
| 3'-3½" gauge | 457.51 |
| 2'-6" gauge | 69.29 |

During 1929-30 sanction was accorded to the construction of new lines totalling 227.77 miles.

| | Miles |
|--------------|--------|
| 5' 6" gauge | 93.00 |
| 3'-3½" gauge | 115.17 |
| 2' 6" gauge | 19.00 |

INDIA AND CEYLON.

The possibility of connecting India and Ceylon by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, and since 1895 various schemes having been suggested.

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the possibility of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points, is one of the schemes that has been investigated.

In 1913, a detailed survey was made by the South Indian Railway Company, and the project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talaimannar Point on the Ceylon side, a length of 20.05 miles of which 7.19 will be upon the dry land of the various lands, and 12.86 will be in water. The sections on dry land will consist of low banks of sand pitched with coral and present no difficulty. The section through the sea will be carried on a causeway which it is proposed to construct in the following way: A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand. These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete ties, struts and chains. Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram Island and Mannar Island.

Indo-Burma Connection

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma. Government accepted the position and appointed Mr. Richards, M. Inst. C.E., to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The

coast route appears to be the best one but at present would not be remunerative. This would start from Chittagong, which is the terminus and headquarters of the Assam-Bengal Railway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile rice fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 91 miles from the town of Chittagong. For about 160 miles further it chiefly runs through the fertile rice lands of Arrakan and crosses all the big tidal rivers of the Akyab delta. These include the Kaladan river which drains 4,700 miles of country and even at a distance of about 30 miles from its mouth is more than half a mile wide. About 260 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kaukkphu stretching out into the mangrove swamps like ribs from the backbone. Innumerable spurs of the Arrakan Yoma have to be crossed. Yoma is a mountain ridge which extends from Cape Negrais northwards until it loses itself in a mass of tangled hills east of Akyab and Chittagong. At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher. It is a formidable obstacle to railway communication between India and Burma. This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to.

The other routes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr. R. A. Way many years ago. The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet long. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong valley route is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route. One hundred and fifty miles of this route lie in open country capable of cultivation though at present it is only very thinly populated. Only one range of hills has to be crossed and this can be negotiated with a summit tunnel 5,000 feet long at a height of 2,500 feet. There are less than fifty miles of very heavy work and only about 4,500 feet aggregate rise and fall. The Hukong Valley route although cheaper than the Manipur route is not a practical financial proposition and both may be ruled out of consideration.

(b) Although shown under Indian State Lines this is a Company's Line guaranteed by an Indian State.

The feature which stands out most prominently in a survey of the mineral industries of India is the fact that until recent years little has been done to develop those minerals which are essential to modern metallurgical and chemical industries, while most striking progress has been made in opening out deposits from which products are obtained suitable for export, or for consumption in the country by what may conveniently be called direct processes. In this respect India of to-day stands in contrast to the India of a century ago. The European chemist armed with cheap supplies of sulphuric acid and alkali, and aided by low sea freights and increased facilities for internal distribution by the spreading network of railways has been enabled to stamp out, in all but remote localities, the once flourishing native manufactures of alum, the various alkaline compounds, blue vitriol, copperas, copper, lead, steel and iron, and seriously to curtail the export trade in nitre and borax. The reaction against that invasion is of recent date. The

high quality of the native-made iron, the early anticipation of the processes now employed in Europe for the manufacture of high-class steels, and the artistic products in copper and brass gave the country a prominent position in the ancient metallurgical world, while as a chief source of nitre India held a position of peculiar political importance until, less than forty years ago, the chemical manufacturer of Europe found among his by-products, cheaper and more effective compounds for the manufacture of explosives.

With the spread of railways, the development of manufactures connected with jute, cotton and paper, and the gradually extended use of electricity the demand for metallurgical and chemical products in India has steadily grown. Before long the stage must be reached at which the variety and quantity of products required, but now imported, will satisfy the conditions necessary for the local production of those which can be economically manufactured only for the supply of groups of industries.

COAL.

Most of the coal raised in India comes from the Bengal and Bihar and Orissa—Gondwana coal-fields. Outside Bengal and Bihar and Orissa the most important mines are those at Singareni in Hyderabad, and in Central Provinces but there are a number of smaller mines which have been worked at one time or another.

Provincial production of Coal during the years 1929 and 1930

| Province | 1929 | 1930 | Increase | Decrease |
|-------------------|------------|------------|----------|----------|

would regard as worth his serious consideration. Early attempts to introduce European processes for the manufacture of pig-iron and steel were recorded in 1830 in the South Arcot District. Since that date various other attempts have been made but none proved a success before that now in operation near Barakar in Benggi. The site of the Barakar Iron-Works was originally chosen on account of the proximity of both coal and ore supplies. The outcrop of iron stone shales between the coal-bearing Barakar and Raniganj stages stretches east and west from the works, and for many years the clay ironstone nodules obtainable from this formation formed the only supply of ore used in the blast furnaces. Recently magnetite and hematite have been obtained from the Manbhum and Singhbhum districts, and the production from the last named district has largely replaced the supplies of ore hitherto obtained near the iron-works. The Bengal Iron and Steel Company, Limited, have now given up the use of ores obtained from the neighbourhood of Barakar and Raniganj and are now obtaining most of their ores from the Kolhan Estate Singhbhum. Some years ago the Bengal Iron Steel Co., Ltd. secured two deposits of iron-ore in Saranda (Singhbhum) forming parts of two large hill masses known as Notu Buru and Buda Buru respectively. Recent prospecting in this part of Singhbhum has led to the discovery of numerous additional deposits of iron-ore, the extension of which has been traced into Keonjhar and Bonal States in Orissa, a total distance of some 40 miles in a S S W direction. At Pansira Buru, a portion of Notu Buru, the deposit has been opened up, and now feeds the Barakar ironwork. Pansira Buru rises to over 2,500 feet above sea level, the low ground on the west side being at about 1,100 feet above sea-level. The upper most 400 to 450 feet of this hill has now been opened up, and the workings indicate the existence of a deposit about a quarter of a mile long, perhaps 400 feet thick and proved on the dip for about 500 feet. The ore body appears to be interbedded with the Dharwar slates, from which it is separated by banded hematite-jaspers. The ore itself is high-grade micaceous hematite often lateritised at the outcrop. Cross-cuts

into the interior of the deposit show that the hematite becomes very friable not far below the outcrop. In fact the characteristics of this ore, including the surface lateritisation, are almost exactly reproduced in the iron-ore deposits of Goa and Ratnagiri. The Tata Iron and Steel Company at Sakchi possesses slightly richer and purer ore-bodies in the Raipur district, supplies of ore are at present drawn from the deposits in Mayurbhanj. The ore-deposits have all been found to take the form of roughly lenticular leads or bodies of hematite, with small proportions of magnetite, in close association with granite on the one hand and granitic rocks on the other.

The production of iron ore in India is still steadily on the increase, India is now, in fact, the second largest producer in the British Empire, and yields place only to the United Kingdom. Her output is of course still dwarfed by the production in the United States (over 60 million tons) and France (over 40 million tons). Her reserves of ore are, however, not much less than three-quarters of the estimated total in the United States, and there is every hope that India will in the early future take a much more important place among the world's producers of iron ore.

In 1930, however, the prevailing depression was reflected in a decrease in the Indian output over the previous year of 23.8 per cent amounting to 578,930 tons. The figures shown against the Keonjhar and Mayurbhanj States in the Table given herewith represent the production by the United Steel Corporation of Asia, Ltd., and the Tata Iron and Steel Co., Ltd., respectively. Of the total production of 1,099,435 tons shown against Singhbhum, 391,508 tons were produced by the Tata Iron and Steel Co., Ltd., from their Naomundi mine, 241,404 tons by the Bengal Iron Co., Ltd., from their Pansira, Ajita and Maclellan mines, and 447,786 tons by the Indian Iron & Steel Co., Ltd., from their mines at Gua, the remaining 18,737 tons were produced by another firm. The output of iron-ore in Burma is by the Burma Corporation Limited and is used as a flux in lead smelting.

Quantity and value of Iron-ore produced in India during the years 1929 and 1930

(a) Estimated

In contrast to the preceding year there was a slight fall in the total output of iron and steel by the Tata Iron & Steel Co., at Jamshedpur. The production of pig-iron fell from 722,950 tons in 1929 to 695,023 tons in 1930, but there were increases in the production of steel (including steel rails) from 410,923 tons in 1929 to 427,035 tons in 1930, and of ferro-manganese from 3,630 tons in 1929 to 4,570 tons in 1930. The production of pig-iron by the Bengal Iron Co. fell from 190,080 tons in 1929 to 103,929 tons in 1930. Their output of products made from their pig-iron in 1930 amounted to 3,153 tons of sleepers and chairs, and 34,833 tons of pipes and other castings, against 11,153 tons and 32,445 tons, respectively, in 1929. The Indian Iron & Steel Co. decreased their production of pig-iron from 451,050 tons in 1929

to 354,772 tons in 1930. The output of pig-iron by the Mysore Iron Works fell from 21,452 tons in 1929 to 20,668 tons in 1930. The total production of pig-iron in India fell from 1,391,541 tons in 1929 to 1,175,292 tons in 1930.

Exports of Pig-iron—With the decrease in the production of pig-iron in India recorded above, the quantity exported fell slightly from 548,881 tons in 1929 to 502,629 tons in 1930. Japan is still the principal consumer of Indian pig-iron, but the proportion fell from 70 per cent. of the total exports in 1929 to 40 per cent. in 1930. The United Kingdom and the United States of America both took substantially increased amounts. There was a fall in the export value per ton of pig-iron from Rs 45 7 (£3 41) in 1929 to Rs 41 2 (£2 05).

MANGANESE ORE.

This industry was started some thirty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. The most important deposits occur in the Central Provinces, Madras, Central India, and Mysore—the largest supply coming from the Central Provinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields. The ore is now used in the manufacture of ferro-manganese for use in steel manufacture. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing.

Record Output in 1927—Before the year 1926, the record production of manganese in India took place in the year 1907, when 902,291 tons were raised. In 1926, the output rose to 1,014,928 tons, valued at £2,690,357, f o b Indian ports, the rise in output was, however, accompanied by a decrease in value. In 1927 the production rose to the highest yet recorded figure of 1,129,353 tons, accompanied by a rise in value to the peak figure of £2,844,237, f o b Indian ports. During the year 1928, the upward tendency of manganese was not maintained, the output falling to 978,449 tons, valued at £2,321,201, f o b Indian ports. In 1928, the upward tendency was not maintained the output falling to 978,449 tons valued at £2,193,895 f o b Indian ports. In 1929, the output rose again slightly to 994,279 tons, but the value fell heavily to £1,671,030, and in 1930 the output fell substantially to 829,946 tons with a heavy fall in value to £1,200,236. The decrease, totalling 164,333 tons, was distributed over all producing districts and states, except Sandur State which showed an increase of some 5,000 tons. One new producer appeared on the scene, namely Bonai State

in Bihar and Orissa, with an initial production of 165 tons.

The continued fall in the price of manganese-ore from 1924 to 1930 is to be correlated with the fact that from 1924 to 1927 the rate of increase of the world's production of manganese-ore was much greater than the rate of increase in the world's production of pig-iron and steel. And although there was a fall in the world's output of manganese-ore in 1928, there was a very large increase in 1929, greater than was justified by the increased production of iron and steel in that year, and it is evident that the world's available supplies of manganese-ore are now much in excess of requirements. Russia, by non-economic methods of exploitation and finance, is able to place large quantities of ore on the market at a price well below both the critical figure of 13 0 pence referred to above and also below any revised figure allowing for the fall in index figures. The large deposits of high-grade manganese-ore discovered near Postmasburg in South Africa are also being developed, and it may be anticipated that eventually South Africa will secure a substantial portion of the world's market. It is not surprising, therefore, that in spite of the apparent prosperity of the Indian manganese industry in 1929 and 1930 as judged from figures of production and export, yet by 1930 the industry as a whole had arrived at a stage of relative depression, causing many operators to cease work.

The present chief sources of production of manganese-ore are now India, Russia, the Gold Coast, and Brazil, whilst substantial supplies of ore are forthcoming from Egypt and Czechoslovakia.

There is a steady consumption of manganese-ore at the works of the three principal Indian iron and steel companies, not only for use in the steel furnaces of the Tata Iron and Steel Company and for the manufacture of ferro-manganese, but also for addition to the blast-furnace charge in the manufacture of pig-iron. The consumption of manganese-ore by the Indian iron and steel industry in 1930 amounted to 46,099 tons, against 47,435 tons in 1929.

Exports, including the quantities exported from Mormugoa in Portuguese India, fell from 964,489 tons in 1929 to 773,026 tons in 1930.

GOLD.

The greater part of the total output of gold in India is derived from the Kolar gold field in Mysore. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,085 ounces in 1907. The figures for the latter years reveal a small improvement. The Nizam's mine at Hutti in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. This mine was opened in 1903. The only other mines from which gold was raised were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave an output of 2,993 ounces in 1911 but work there ceased in 1912. The Anantapur mines gave their first output of gold during the year 1910, the amount being 2,532 ounces, valued at Rs 1,51,800. Gold mining was carried on in the

North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904, the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell in subsequent years until in 1922 it was no more than 24 oz. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

PETROLEUM.

Petroleum is found in India in two distinct areas, one on the east, which includes Assam, Bihar, and the islands off the Arakan coast. This extends to the productive oil fields of Sumatra, Java and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important and the most successful oil fields are found in the Irrawaddy Valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over 100 years, and to 1886, prior to annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The Yenangyaung field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1891, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was 43 million gallons, and after a fall to 31½ million gallons in 1910 it rose to 56½ million gallons in 1912. Several of the islands off the Arakan coasts are known to contain oil deposits but their value is uncertain. About 20,000 gallons were obtained from the eastern Barongo Island near Akyab, and about 37,000 gallons from Ramri Island in the Kyaukpada district during 1911. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons

which increased to nearly 4 million gallons in 1912. The existence of oil in Assam has been known for many years and an oil spring was struck near Ukum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ and 4 million gallons. On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. In Baluchistan geological conditions are adverse, and though some small oil springs have been discovered attempts to develop them have not hitherto been successful.

The world's production of petroleum in 1920 amounted to nearly 150 million long tons, of which India contributed 0.72 per cent. In 1927, this figure jumped to some 172 million tons, of which the Indian proportion was a practically stationary production, fell to 0.64 per cent. In 1928, there was another substantial rise in the world's production, which reached the figure of over 181 million tons. In 1929 there was another jump to over 202 million tons, but in 1930 the world's production fell to about 193½ million tons. The United States alone showed a fall greater than the total fall. Decreases were also shown by Mexico, Peru, Columbia, Argentina, Poland, and Japan. But all other producers including India showed an increase in production, the most important increase being shown by Russia, Roumania, and Persia. The United States contributed

63 per cent. Of the world's supply in 1930, Venezuela 9.7 per cent and Russia 9.5 per cent. In 1928, India contributed 0.64 per cent, which fell to 0.60 per cent in 1929 and rose to 0.62 in 1930, her position on the list of petroleum producing countries fell from 11th in 1929 to 12th in 1930 her place being taken by Trinidad.

Although petroleum statistics indicate that it is becoming more and more difficult to maintain the output of India (including Burma) at the high levels reached in 1919 and 1921, when peak productions of well over 305½ million gallons were reached, the production thereafter falling to 281,113,909 gallons in 1927, yet the production during 1928 reached the figure of 305,943,711 gallons, in 1929 the figure of 306,148,093 gallons and in 1930 the figure of 311,030,108 gallons, the last totals being the highest ever recorded. The increase in 1930 represents the balance of a very large proportionate increase in the production of Assam to a figure not previously approached, and of a small recovery in the output of Burma, against a very serious fall in the output of the Punjab. This small total increase in output in 1930 was accompanied

by a large decrease in value amounting to Rs 1,18,28,197 (£911,721) or 19 per cent. The increase in output recorded in 1928, 1929 and 1930 to a higher peak, is a reflection of the marked increase in the output of Assam from 1.8 per cent, in 1916, to 6½ per cent of the total in 1924 and 15 per cent of the total output in 1930, which has roughly neutralised the fall in the output of Burma during the same period and this year also the heavy fall in the output of the Punjab.

The Yenangyaung field of Upper Burma, the most highly developed field in the Indian Empire, again shows a small decline in output. In 1924, it succeeded in showing an increase of nearly 6½ million gallons, but this temporary arrest in the inevitable decline was more than neutralised by a drop in 1925 of over 21½ million gallons. In 1926, the drop amounted to 14½ million gallons, in 1927 to 8½ million gallons, in 1928 to 1½ million gallons, 1929 to one million gallons and in 1930 to 2 million gallons. It is interesting to note that the production in Yenangyaung still includes oil derived from the old Burmese hand-dug wells.

Amber, Graphite and Mica—Amber is found in very small quantities in Burma, Graphite is found in small quantities in various places but little progress has been made in mining except in Travancore. The total output in 1929 was 39 tons. India has for many years been the leading producer of mica, turning out more than half of the world's supply. In 1914, owing to the war, the output was only 38,189 cwts compared with 43,650 cwts in 1913. Owing to necessary restrictions with regard to the export of mica, the output fell off considerably in the year 1915, but subsequent demand in the United Kingdom for the best grade of ruby mica led to a considerable increase in production during the following years.

There was a slight fall in the declared production of mica from 53,231 cwts, valued at Rs 26,59,759 (£198,489) in 1929 to 52,727 tons valued at Rs 26,68,986 (£197,703) in 1930. This is the highest production yet recorded, with the exception of that of 1918 (54,710 cwts) and 1929. The output figures are incomplete, and a more accurate idea of the size of the industry is to be obtained from the export figures. In the years 1928 and 1929 the quantity exported was more than double the reported production, whilst in both the years 1926 and 1927 also the export figure was approximately double the reported production figure. In 1930 the recorded exports were, however, only some 57 per cent in excess of the reported production.

The United States of America and the United Kingdom, which are the principal importers of Indian mica, absorbed 41.7 per cent and 34.6 per cent, respectively, during 1929, and 28.9 per cent and 46.4 per cent during 1930. Germany took 8.8 per cent and 9.4 per cent, respectively, of the total quantities exported during the years 1929 and 1930. The average value of the exported mica increased slightly from Rs 90.5 (£6.7) per cwt in 1929 to Rs 91.5 (£6.8) per cwt in 1930. The exports fell from 116,075 cwts in 1929 valued at £784,092 to 82,909 cwts valued at £562,054. This is the lowest total value recorded since 1923, when the value of the mica exports was £538,435.

The difference between exports and production is generally attributed to theft from the mines. If this be the only explanation we must assume that during the three years prior to 1930 there has been as much mica stolen as won by honest means. Early in 1928 a bill was introduced into the Legislative Council of Bihar and Orissa the purpose of which was an attempt to reduce the losses on this account by licensing miners and dealers, the bill was, however, rejected. In March, 1930, however, a similar bill to regulate the possession and transport of and trading in mica was passed and from the figures presented as analysed above it appears that this bill may already have produced a good effect.

Tin, Copper, Silver and Lead.—A considerable increase in the production of tin-ore in Burma has again to be reported for 1930, during which the output amounted to 4,270.9 tons valued at Rs 45,54,147 (£337,314) in the preceding year. The decrease in the value per ton is, of course, due to the fall in the price of the metal. This increase in output is mainly

the balance of a very large increase from Mawchi in the Southern Shan States, and a smaller decrease in the output of Mergui. Milling operations were suspended at Mawchi in August 1927 pending the installation of additional plant and further development. Milling was resumed in February 1930 and this explains the large increase. The figure for 1930 includes 1,250 tons from Mawchi, calculated to be the proportion of tin-ore in 2,193 tons of concentrates derived from mixed wolfram-scheelite-cassiterite-ore, these concentrates are assumed to contain 43 per cent of wolfram and 57 per cent of cassiterite. There is no reported output of block tin.

Imports of unwrought tin increased slightly from 55,358 cwts valued at Rs 80,95,974 (£604,177) in 1929 to 36,739 cwts valued at Rs 62,33,676 (£461,754) in 1930, over 90 per cent of these imports came from the Straits Settlements. Wrought tin, to the extent of 423 cwts valued at Rs 30,661 (£2,271) was also imported into India during 1930.

In contrast with the increases in the production of silver from the Bawdwin mines of Upper Burma, amounting to 1,400,291 ozs recorded during the previous four years, 1925 to 1928, 1929 and 1930 were marked by decreases amounting to 124,211 ozs and 226,277 ozs respectively. These relatively small decreases in quantity were accompanied by a small fall of value in 1929 and a very marked fall in 1930. The output of silver obtained as a by-product from the Kolar gold mines of Mysore showed a trivial increase.

The production of lead-ore at the Bawdwin mines of Burma increased from 463,972 tons in 1929 to 529,814 tons in 1930, but the total amount of metal extracted decreased from 80,233 tons of lead (including 1,200 tons of antimonial lead) valued at Rs 2,50,00,613 (£1,865,717) in 1929 to 79,730 tons (including 1,700 tons of antimonial lead) valued at Rs 1,85,04,636 (£1,370,712). The quantity of silver extracted from the Bawdwin ores fell from 7,280,517 ozs valued at Rs 1,07,31,482 (£800,857) in 1929 to 7,054,206 ozs valued at Rs 76,87,674 (£569,457) in 1930. The value of the lead per ton fell from Rs 311.6 (£23.2) in 1929 to Rs 232.1 (£17.2) in 1930, whilst the value of the silver fell from Rs 1-7-7 (26,40d) per oz, in 1929 to Rs 1-5-1 (19 37d) in 1930. The ore reserves in the Bawdwin mine, as calculated at the end of June, 1930, totalled 4,265,665 tons (against 4,140,969 tons at the end of June 1929) with an average composition of 25.5 per cent, of lead, 15.9 per cent, of zinc, 0.88 per cent of copper, and 20.4 ozs silver per ton of lead. Included in this reserve are 228,000 tons of copper-ore.

Zinc—A monograph on zinc ores issued by the Imperial Institute in 1917 says that during the past fifty years zinc ores have received but little attention in India, and no production was recorded until 1913. The production of zinc concentrates by the Burma Corporation, Limited, in the Northern Shan States, fell from 58,485 tons valued at Rs 54,80,031 (£403,958) in 1929 to 57,620 tons valued at Rs 25,73,309 (£190,516) in 1930. The heavy fall in value per ton reflects the world-wide depression. The exports during 1930 amounted

to 64,800 tons valued at Rs 64,80,075 (£480,005) against 67,408 tons valued at Rs 68,00,930 (£507,532) in the preceding year

Gem Stones—The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphire, spinel, tourmaline, garnet, rock-crystal, agate, cornelian, jadeite and amber. The production of diamonds in Central India fell from 1,627.5 carats valued at Rs 1,27,101 (£9,485) in 1929 to 1,321.2 carats valued at Rs 72,533 (£5,373). Of this latter production 1,197.8 carats were produced in Panna State and the remainder in Charkhari, Ajlgarh and Biljwar.

A severe decline in the output from the Mogok ruby mines of Upper Burma in 1924, followed in 1925 by a marked drop in value, bore witness to a serious decline in the industry. The Burma Ruby Mines Limited, ultimately decided to go into liquidation and the mines were offered for sale in September, 1926. The skeleton organisation left in charge of the mines, however, made good use of its opportunities with the result that the value of the output in 1926 exceeded that of the previous year by over a lakh of rupees. This encouraging result was effected by a rigorous economy and an extension

of a system of co-operation with local miners, and was assisted by some good finds of sapphires in the Kvaungdwin mine—the only one still worked by European methods.

During 1927, however, production fell in value by over 1½ lakhs of rupees, due mainly to a decrease in the value of the sapphires and spinels produced, there having been a slight increase in the value of the rubies. During 1928, there was another very large decline in value, amounting to over a lakh of rupees, due to a severe drop in the value of the sapphires produced as before, there was a slight increase in the value of the rubies. The value of the 1929 production was slightly above that of 1928, due to a considerable increase in the value of the rubies found, largely balanced by another large fall in the value of sapphires produced. In 1930 there was a further substantial fall in production and in total value, though the value per carat of the sapphires produced is the highest recorded for many years. Judging from reports in the *Rangoon Times* this is due to the opening up by the Burma Ruby Mines, Ltd., of the new Pagoda mine at Kathé leading to the find of a fine sapphire of 630 carats and a star sapphire of 293 carats. The find of a ruby of 100 carats was also reported.

SALT

There was a slight increase in 1930 in the total output of salt amounting to some 2,000 tons, a very substantial increase of 128,202 tons from Aden, with a small increase from Bombay and Sind, being largely neutralised by substantial falls in the output of Madras (79,452 tons) and Northern India (50,395) and a slight fall in Burma. Imports of salt into India increased substantially by 81,000 tons, the major portion of the increase being due to Italian East Africa, with smaller increases from Germany, Egypt and Spain. Decreases were shown by the United Kingdom and Aden.

Quantity and value of Salt produced in India during the years 1929 and 1930

| | 1929 | | | 1930 | | |
|-----------------|-----------|--------------------|---------|-----------|--------------------|---------|
| | Quantity | Value (£1=Rs 13 4) | | Quantity | Value (£1=Rs 13 5) | |
| | Tons | Rs | £ | Tons | Rs | £ |

Bibliography—Report of the Chief Inspector of Mines in India, under the Indian Mines Act (VIII of 1901) for 1930, by the Chief Inspector of Mines Report on the Mineral Production of India during 1929 by L Leigh Fermor, Officiating Director, Geological Survey of India Note on the Mineral Production of Burma in 1922 Monographs on Mineral Resources published by the Imperial Institute Quinquennial Review of the Mineral Production of India for the years 1924-1928 (Records of the Geological Survey of India, Vol LXIV)

Stock Exchanges.

There are about 446 Share and Stock Brokers in Bombay. They carry on business on the Brokers' Hall, bought in 1899 from the funds of the Share and Stock Brokers' Association formed to facilitate the negotiations and the sale and purchase of Joint Stock securities promoted throughout the Presidency of Bombay. Their powers are defined by rules and regulations framed by the Board of Directors and approved by the general body of Brokers. The Board has the power to fix the rates in times of emergencies. The official address of the Secretary is Dalal Street, Fort, Bombay.

At first the admittance fee for a broker was Rs 5 which was gradually raised to Rs 7,000

The fee for the Broker's card has increased and it was recently sold by public auction for Rs 21,800. In 1921 a number of cards were sold at Rs 40,000 each and the proceeds were employed to purchase an adjoining building for the extension of the business. This building was pulled down and the extension was completed last year. The present value of the card is about Rs 7,000. The rules of the Association were revised in October 1916 and from the New Year the purchaser of shares has to pay the stamp and transfer fee instead of the seller. There are two classes of Exchange Brokers, Europeans and Indians, the latter being certified for recognition by the native Stock Ex-

Capital of Rs. 3 lakhs divided into 700 fully paid up shares of 1,000 each. Accounts are kept up annually up to 30th September. At the present moment the number of shares held is 250 each firm owning, and being all in town, only one share.

The total number of members, including all those and no instance of member firms is 11. The Committee has restricted the further sale of new shares until it deems fit to do so in the case of a partner disassociating himself from a member. Anyone intending to become a member is required to purchase a share from the Association at Rs. 5,000. The market customs and usages being fully controlled by the Association. The market customs differ from those of other stock exchanges since there are no settlement days, delivery is due the day after the contract is passed, and all transactions are effected for most part under the Stock Exchange. It has not got jobs like the London Stock Exchange. The principle of the function of dealers is connected with the shares in India. Coal Companies, Tea Companies, cement, (such as paper, flour, etc.) Railway Companies and Debentures, the latter representing the industrial concerns and Trustees. Investment Securities, namely, Municipal, Port Trust and Improvement Trust Debentures.

A general meeting of the shareholders annually elects a Committee which elects several Sub-Committees and Honorary Office Bearers—the President, two Joint Honorary Treasurers and the Honorary Secretary. The Committee is empowered to do all work on behalf of the Association, which in its turn delegates powers to the Sub-Committee and the Honorary Office Bearers. The Committee also adjudicates in disputes between members thus enabling the members to avoid Law Courts in most cases.

The Stock Exchange has its own building at 7, Lyons Range. This building—one of the finest specimen of its kind—was opened on 6th July, 1928, by Sir Stanley Jackson, the Governor of Bengal. The ground floor is utilised for the Association Hall where members meet between 12 noon and 5 p.m. This floor also contains the offices of the Association, a well equipped library and several retiring places for the benefit of the members. The upper three floors are tenanted by members' offices.

The Madras Stock Exchange situated at No. 9 Broadway consists of about 100 Members of which 25 are working Members. It was opened on 6th April 1920 and deals principally in Mill shares. Business is regulated by rules drawn up by the Directors. There is a Board of arbitration. There is an admittance membership card of Rs. 1,000 and an annual subscription of Rs. 100. The original 100 members were elected by the first Directors and each of the working members have deposited a security of Rs. 3,000.

The Calcutta Share Market met in the open air in business quarters and was unregulated except that of market custom. In 1913 the Calcutta Stock Exchange Association was formed, a Representative Committee was formed, and the existing customs were brought into rule—drawn up for the conduct of business. Public confidence grew rapidly as the rules regarding membership and business underwent drastic changes to suit advancing conditions. The Great War, having given an impetus to Indian Industries, was responsible for an astoundingly large volume of business in the market which culminated in a boom. In June, 1919, the Association was incorporated into a limited company under the Indian Companies' Act 1913 1920 with an authorised

Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very active in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian, but alongside these have sprung up in recent years certain Associations, such as the Bombay Indian Merchants' Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another and constantly work in association:

The London Chamber of Commerce in 1921 realizing the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organization. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters.

A new movement was started in 1913 by the Hon. Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aims at effecting great improvement in strengthening Indian commercial organization. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season, in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. Mr (now the Hon. Sir) D. E. Wacha, President of the Bombay Indian Merchants' Chamber, presided as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Congress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to

take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The following are the principal paragraphs of a Memorandum of Association and Statement of Objects of the new Associated Chamber as approved by the Congress —

I The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE"

II The Registered Office of the Chamber will be in Bombay

III The objects for which the Chamber is established are —

- (1) To discuss and consider questions concerning and affecting trade, commerce, manufactures and the shipping interests, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and shipping interests of the country
- (2) To attain those advantages by united action which each Chamber or Association or body may not be able to accomplish in its separate capacity
- (3) To organize Chambers of Commerce, Commercial Associations or Bodies in different trade centres of the Country
- (4) To convene when necessary the Indian Commercial Congress at such places and at such times as may be determined by a Resolution of the Chamber

The Articles of Association provided "There shall be an annual meeting of the Associated Indian Chamber held at Bombay on a date to be fixed by the Executive Council in the month of February," or at some other time, and "semi-annual or special meetings may be convened by the Executive Council or on the requisition of one-third of the total number of members addressed to the Secretary"

The organization languished for lack of support for some years until a number of merchants specially interested in Currency and Exchange questions revived it in 1926 at Delhi and 1927 at Calcutta, the initiative in the new activities hailing, like the first movement, from Bombay. The Commercial Congress held in Calcutta on 31st December 1926 and 1st and 2nd January 1927, decided upon the formation of a "Federation of Indian Chambers of Commerce" and agreed to the registered office of this body being "at the place where the President for the year has his headquarters or where he directs it to be located". Among the objects for which the Federation is established are the following —

- (a) To promote Indian businesses in matters of inland and foreign trade, transport, industry and manufactures, finance and all other economic subjects

BI NGAI

The Chamber of Commerce was founded in 1891, and its headquarters is in Calcutta. It is a body of men connected with trade and commerce, and is the only body of the kind in the Port of Calcutta. It is a body of men who are interested in the welfare of the Port of Calcutta, and who are connected with the Chamber of Commerce, the Board of Trade, the Board of Customs, and the Board of Revenue. The Chamber of Commerce is a body of men who are interested in the welfare of the Port of Calcutta, and who are connected with the Chamber of Commerce, the Board of Trade, the Board of Customs, and the Board of Revenue. The Chamber of Commerce is a body of men who are interested in the welfare of the Port of Calcutta, and who are connected with the Chamber of Commerce, the Board of Trade, the Board of Customs, and the Board of Revenue.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining, or manufacture, and joint stock companies or other corporations formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature, may be elected as permanent members of the Chamber

The following are the office bearers of the Chamber for the year 1929-30 —

President—Hon Mr P H Browne (Messrs. Macdonald, Macenzie & Co)

Vice President—Mr L. C. Benthall (Messrs Bird & Co)

(Committee.—Mr Duncan Campbell (Chartered Bank of India, Australia & China), Mr G H. Colvin, C.M.G., D.S.O. (The East Indian Railway), Mr T W Dowling (Messrs. Turner Morrison & Co., Ltd.), Mr L V Heathcote (The Burmah Shell Oil Storage and Distributing Co. of India Ltd.), Mr J Reid Kay (Messrs. James Finlay & Co., Ltd.), Mr J Melin Austin (Messrs. Jardine Skinner & Co.), Mr R A Towlor (Messrs. Limerod & Co.)

The Secretary of the Chamber is Mr. D. K. Cumison Assistant Secretary, Mr. A. C. Daniel

The following are the public bodies (among others) to which the Chamber has the right of

returning representatives, and the representatives returned for the current year are —

Council of State—The Hon'ble Mr P H Browne, C.B.E

Bengal Legislative Council—Mr G R Dain, (The Calcutta Tramways Co, Ltd), Mr H. Birkmyre (Messrs Birkmyre Brothers), Mr C C Miller (Messrs Hoare Miller & Co, Ltd), Mr C R Sumner (Messrs Kilburn & Co) Mr J Mein Austin (Messrs Jardine Sklmer & Co), Mr W C Wordsworth (The Statesman Ltd).

Calcutta Port Commission—The Hon'ble Mr P H Brown, C.B.E (Messrs Mackinnon Mackenzie & Co), Mr T W Dowding (Messrs Turner, Morrison & Co, Ltd.), Mr C de M. Kellock (Messrs Gillanders, Arbuthnot & Co), Mr J Reid Kay (Messrs James Finlay & Co, Ltd), Mr A McD Eddis (Messrs Gladstone, Wyllie & Co), Mr G W Leeson (Messrs Macneill & Co)

Calcutta Municipal Corporation—Mr J Campbell Forrester, M.L.O (Messrs Smith Forrester & Co) Mr Geo Morgan, C.I.E (Messrs Morgan, Walker & Co), Mr H A Luke (Messrs W Haworth & Co), F Rooney (The Bengal Telephone Co, Ltd.), Mr N R Lake (Messrs James Luke & Son), Mr J B Ross (Messrs Shaw Wallace Co)

Bengal Boiler Commission—Messrs John Williamson (Union Jute Mills, South), H H. Reynolds (Andrew Yule & Co) and B Hornton (Burn & Co, Ltd)

Board of Trustees of the Indian Museum—Mr T W Dowding (Turner, Morrison & Co, Ltd)

Bengal Smoke Nuisances Commission—Messrs W B Utley, A.M., J.L.E., (Martin & Co) and G Y Robertson (Union Jute Coy's S Mill)

Calcutta Improvement Trust—Mr Geo Morgan, C.I.E., M.L.A. (Morgan, Walker & Co)

The Chamber elects representatives to various other bodies of less importance, such as the committee of the Calcutta Sailors' Home, and to numerous subsidiary associations. The following are the recognised associations of the Bengal Chamber of Commerce —

Calcutta Wheat and Seed Trade Association, Indian Jute Mills Association, Indian Tea Association, Calcutta Tea Traders' Associa-

tion, Calcutta Fire Insurance Association, Calcutta Import Trade Association, Calcutta Marine Insurance Association, The Wine, Spirit and Beer Association of India, Indian Mining Association, Calcutta Baled Jute Association, Indian Paper Makers' Association, Indian Engineering Association, Calcutta Jute Fabrics Shippers' Association, Calcutta Hydraulic Press Association, Jute Fabric Brokers' Association, Baled Jute Shippers' Association, Calcutta Jute Dealers' Association, Calcutta Hides and Skins Shippers' Association, Calcutta Sugar Importers' Association, and Calcutta Accident Insurance Association

The Chamber maintains a Tribunal of Arbitration for the determination, settlement and adjustment of disputes and differences relating to trade, business, manufactures, and to customs of trade, between parties, all or any of whom reside or carry on business personally or by agent or otherwise in Calcutta, or elsewhere in India or Burmah, by whomsoever of such parties the said disputes and differences be submitted. The Secretary of the Chamber acts as the Registrar of the Tribunal, which consists of such members or assistants to members as may, from time to time, annually or otherwise be selected by the Registrar and willing to serve on the Tribunal. The Registrar from time to time makes a list of such members and assistants

The Chamber also maintains a Licensed Measurers Department controlled by a special committee. It includes a Superintendent (Mr R Ellis), Head Office Manager (Mr. C G Smith) and six Assistant Superintendents (Messrs J. G. Smyth), A H Mathews, G O G Smyth and C C H. Bowden, J B F. Henfrey and B Perry, and the staff at the time of the last official returns consisted of 100 officers. The usual system of work for the benefit of the trade of the port is followed. The Department has its own provident fund and compassionate funds and Measurers' Club. The Chamber does not assist in the preparation of official statistical returns. It publishes weekly the *Calcutta Prices Current*, and also publishes a large number of statistical circulars of various descriptions in addition to a monthly abstract of proceedings and many other circulars on matters under discussion

INDIAN CHAMBER OF COMMERCE, CALCUTTA.

The Indian Chamber of Commerce was established in November 1925 to promote and protect the trade, commerce and industries of India and in particular the trade, commerce and industries in or with which Indians are engaged or concerned, to aid and stimulate the development of trade, commerce and industries in India with capital principally provided by or under the management of Indians, to watch over and protect the general commercial interests of India or any part thereof, and the interests of persons, in particular the Indians, engaged in trade, commerce or industries in India, to adjust controversies between members of this Chamber, to arbitrate in the settlement of disputes arising out of commercial transactions between parties willing or agreeing to

abide by the judgment and decision of the Tribunal of the Chamber, to promote and advance commercial and technical education and such study of different branches of Art and Science as may tend to develop trade, commerce and industries in India, to provide, regulate and maintain a suitable building or room or suitable buildings or rooms for a Commercial Exchange in Calcutta, and to do all such other things as may be conducive to the development of trade, commerce and industries, or incidental to attainment of the above objects or any of them

There are two classes of Members, local and mofussil. The local Members pay an annual subscription of Rs 100 and the Mofussil Mem-

bers Rs 50 Merchants, Bankers, Ship-owners, representatives of commercial, transport or insurance companies, brokers and persons engaged in commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature who are Indians shall be eligible for election as members of the Chamber

Office Address — "The Recluse", 81, Murzban Road, Fort, Bombay 1.

BOMBAY.

The object and duties of the Bombay Chamber, as set forth in their Memorandum and Articles of Association, are to encourage a friendly feeling and unanimity among commercial men on all subjects involving their common good, to promote and protect the general mercantile interests of this Presidency, to collect and classify information on all matters of general commercial interest, to obtain the removal, as far as such a Society can, of all acknowledged grievances affecting merchants as a body, or mercantile interests in general to receive and decide references on matters of usage and custom in dispute, recording such decisions for future guidance, and by this and such other means, as the Committee for the time being may think fit, assisting to form a code of practice for simplifying and facilitating business, to communicate with the public authorities, with similar Associations in other places and with individuals, on all subjects of general mercantile interests, and to arbitrate between parties willing to refer to, and abide by, the judgment of the Chamber

The Bombay Chamber was established in 1836, under the auspices of Sir Robert Grant, who was then Governor of the Presidency, and the programme described above was embodied in their first set of rules. According to the latest returns, the number of Chamber members is 166 and the number of Associated members is 11. Of these numbers 19 represent banking institutions, 7 shipping agencies and companies, 8 firms of solicitors, 3 railway companies, 11 insurance companies, 14 engineers and contractors, 120 firms engaged in general mercantile business.

All persons engaged or interested in mercantile pursuits desirous of joining the Chamber and disposed to aid in carrying its objects into effect are eligible for election to membership by ballot. The Chamber member's subscription is Rs 360 and the Associate member's subscription is Rs 300 per annum. Gentlemen distinguished for public services, or "eminent in commerce and manufactures," may be elected honorary members and as such are exempt from paying subscriptions. Any stranger engaged or interested in mercantile pursuits and visiting the Presidency may be introduced as a visitor by any Member of the Chamber inserting his name in a book to be kept for the purpose, but a residence of two months shall subject him to the rule for the admission of members.

Officers of the Year

The affairs and funds of the Chamber are managed by a committee of nine ordinary members, consisting of the President and Vice-President and seven members. The committee must, as a rule, meet at least once a week and the minutes of its proceedings are open to inspection by all members of the Chamber, subject to such regulations as the committee may make in regard to the matter. A general meeting of the Chamber must be

held once a year and ten or more members may requisition, through the officers of the Chamber, a special meeting at any time, for specific purpose.

The Chamber elects representatives as follows to various public bodies —

The Council of State, one representative
Legislative Council of the Governor of Bombay, two representatives

Bombay Municipal Corporation, one member, elected for three years

Bombay Improvements Committee, one member, elected for two years

Board of Trustees of the Port of Bombay five members, elected for two years.

The following are the officers of the Chamber for the year 1932-33 and their representatives on the various public bodies —

 The Hon ble Mr E Miller

Special Work

One of the most important functions performed by the Chamber is that of arbitration in commercial disputes. Rules for this have been in existence for many years and have worked most satisfactorily. The decisions are in all cases given by competent arbitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts.

A special department of the Bombay Chamber is its Statistical Department, which prepares a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce. The department consists of fourteen Indian clerks who, by the authority of Government, work in the Customs House and have every facility placed at their disposal by the Customs authorities. They compile all the statistical information in connection with the trade of the port, in both export and import divisions, which it is desirable to record. No other Chamber in India does similar work to the same extent.

The Bombay Chamber publishes a Daily Arrival Return which shows the receipts into Bombay of cotton, wheat and seeds, and a Daily Trade Return, which deals with trade by sea and shows in great detail imports of various kinds of merchandise and of treasure while the same return contains particulars of the movements of merchant vessels.

The Chamber publishes twice a week detailed reports known as Import and Export manifests, which give particulars of the cargo carried by each steamer to and from Bombay.

Three statements are issued once a month. One shows the quantity of exports of cotton seeds and wheat from the principal ports of the whole of India. The second gives in detail imports from Europe, more particularly in regard to grey cloths, bleached cloths, Turkey red and scarlet cloths, printed and dyed goods, fancy cloth of various descriptions, woollens, yarns, metals, kerosene oil, coal, aniline dyes, sugar, matches, wines and other sundry goods. The third shows, classified, the number of packages of piece-goods and yarns imported by individual merchants.

The "Weekly Return" issued by the Chamber shows clearances of a large number of important designations of merchandise.

A return of "Current Quotations" is issued once a week, on the day of the departure of the English mail, and shows the rates of exchange for Bank and Mercantile Bills on England and Paris, and a large quantity of general banking and trade information.

The annual reports of the Chamber are substantial tomes in which the whole of the affairs of the Chamber and the trade of the port during the past year are reviewed.

The Chamber has also a Measurement Department with a staff of 10, whose business is that of actual measurement of exports in the docks before loading in steamers. Certificates are issued by these officers with the authority of the Chamber to shippers and ship agents as to the measurement of cotton and other goods in bales or packages. The measurers are in attendance on the quays whenever there are goods to be measured and during the busy season are on duty early and late. The certificates granted show the following details—

- The date, hour and place of measurement,
- the name of the shipper,
- the name of the vessel,
- the port of destination;
- the number and description of packages,
- the marks,
- the measurement, and in the case of goods shipped by boats,
- the registered number of the boat,
- the name of the tinsal.

Certificates of weight and of origin are also issued by the Chamber.

Associated Chamber of Commerce of India and Ceylon

HEAD OFFICE LOCATED IN CALCUTTA FOR 1931

Millowners' Association, Bombay.

The Millowners' Association, Bombay, was established in 1875 and its objects are as follows—

- To encourage friendly feeling and unanimity amongst Millowners and users of steam water and/or electric power on all subjects connected with their common good.
- To secure good relations between members of the Association.
- To promote and protect the trade, commerce and manufactures of India in general and of the cotton trade in particular.
- To consider questions connected with the trade, commerce and manufactures of its members.
- To collect and circulate statistics and to collect, classify and circulate information relating to the trade, commerce and manufactures of its members.

Any individual partnership or company owning one or more mill or mills or one or more press or presses or one or more ginning or other factory or factories actuated by steam, water, electric and/or power is eligible for membership. Every member elects by ballot. Every member is entitled to one vote for every complete year of membership paid by him as annual subscription.

bay

KARACHI.

The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred by the Committee upon "any gentlemen interested in the affairs and objects of the Chamber." All new members joining the Chamber pay Rs 750 entrance fee and the monthly subscription is Rs 18. The subscription to the Chamber's periodical returns is at present fixed at Rs 7-8-0 per month. The affairs of the Chamber are managed by a committee of ten members, consisting of a Chairman, Vice-Chairman and eight members, elected at the annual general meeting of the Chamber as early in the year as possible. The Chamber elects a representative on the Bombay Legislative Council, four representatives on the Karachi Port Trust, two on the Karachi Municipality and two on the North Western Railway Advisory Committee, Karachi. There were 70 members of the Chamber in September 1931. The following were the officers in 1931 —

Chairman Mr H. S. Bigg-Wither, O.B.E.,
Burma Shell Oil Storage and Distributing
Co of India Ltd

Vice-Chairman Mr J. R. N. Graham, V.O.,
Grahams Trading Co (India), Ltd

tranger, Volkart Brothers, C. C. Brereton,
The North Western Railway, H. Macfarlane,
Strauss & Co, Ltd, A. S. Micrulachi, Ralli
Brothers, Limited, G. H. Raschen, Forbe-
Forbes, Campbell & Co, Ltd, W. Statham,
Steiners, Ltd, A. N. Warrack, The Charter-
ed Bank of India, Australia & China,
W. D. Young, Couper & Young

*Representative on the Bombay Legislative
Council* Mr J. Humphrey, O.B.E.

Representatives on the Karachi Port Trust
Messrs H. S. Bigg-Wither, O.B.E., J. R.
N. Graham, V.O., G. H. Raschen, A. S. Micru-
lachi, O.B.E.

Representatives on the Karachi Municipality
Mr C. F. Laborde and Mr R. Sumner

*Representatives on the North Western Railway
Local Advisory Committee, Karachi* Messrs
G. M. Raschen and B. S. Backhouse

Secretary and Public Measurer. Mr. Alan
Duguid, A.F.O.

The following are the principal ways in which the Chamber gives special assistance to members — The Committee take into consideration and give an opinion upon questions submitted by members regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate arbitrators and surveyors for the settlements of disputes. When two members of the Chamber or when one member and a party who is not a member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are members of the Chamber. A public measurer is appointed under the authority of the Chamber to measure pressed bales of cotton, wool, hides and other merchandise arriving at or leaving the port.

MADRAS.

The Madras Chamber of Commerce was founded in 1836. All merchants and other persons engaged or interested in the general trade, commerce and manufactures of Madras are eligible for membership. Any assistant signing a firm or signing *per-pro* for a firm is eligible. Members who are absent from Madras but pay their subscriptions may be represented in the Chamber by their powers-of-attorney, as honorary members, subject to ballot. Honorary members thus elected are entitled to the full privilege of ordinary members. Election for membership is by ballot at a general meeting, a majority of two-thirds of the recorded votes being necessary to secure election. Every member pays an entrance fee of Rs 100, provided that banks, corporate bodies and mercantile firms may be represented on the Chamber by one or more members and are liable for an entrance fee of Rs 100 once in ten years each. The subscriptions shall not exceed Rs 300 per annum, payable quarterly in advance, subject to reduction from time to time in accordance with the state of the Chambers' finances. Absentees in Europe pay no subscription and members temporarily absent from Madras pay one rupee per month. Honorary members are admissible to the Chamber on the usual conditions. Members becoming insolvent cease to be members but are eligible for re-election without repayment of the entrance donation.

The Chamber undertakes arbitrations and surveys, the granting of certificates of origin and the registration of trade marks. One of the rules for the last named is "that no trade mark or ticket shall be registered on behalf of an Indian firm trading under a European name."

The following publications are issued by the Chamber — Madras Price Current and Market Report, Tonnage Schedule and Madras Landing Charges and Harbour Dues Schedule.

There are 58 members and 4 Honorary Members of the Chamber in the current year and the Officers and Committee for the year are as follows —

Chairman Mr F. Biley, M.L.C.

Vice-Chairman Mr W. O. Wrable

Committee — Mr C. G. Alexander, Mr W. M. Browning, Mr H. Ka, Mr C. D. Prasad, and Mr L. C. M. Stott.

The following are the ways in which the Chamber is entitled to act as representatives and the representatives elected for the year are —

Madras Legislative Council Mr E. L. L. L., M.L.C.

Madras Port Trust Messrs F. Biley, G. A. Bantidge, D. M. Holland, V. O. W.

Corporation of Madras Messrs D. V. L., A. J. Ponnappa, and F. D. James, M.L.C.

*Federation of Chambers of Commerce of the
British Empire* Mr G. Gordon Frazer

SOUTHERN INDIA.

The Southern India Chamber of Commerce established in 1909 has its Registered Office in Madras. The objects of the Chamber are those usual for such bodies, concerning the promotion of trade, especially in the Madras Presidency, and the interests of members. Special objects are stated to be —

“To maintain a Library of books and publications of commercial interest, so as to diffuse commercial information and knowledge amongst its members

“To establish Museums of commercial products or organise exhibitions, either on behalf of the Chamber or in co-operation with others”

There are two classes of members, permanent and honorary. The usual conditions as to eligibility for election prevail.

The Chamber is a member of the Federation of Indian Chambers of Commerce, the Indian Chamber of Commerce in Great Britain, and the Indian National Committee of the International Chamber of Commerce, Paris.

The Chamber registers trade marks, holds survey and arbitrations, and issues certificates of origin.

The right of electing two representatives to the Madras Port Trust was accorded to the Chamber by the Madras Port Trust Amendment Act, 1915. Members of the Chamber hold seats in the Madras Legislative Council and the Chamber has also been accorded the right of electing a representative to that body.

Under the Madras City Municipal Act, 1919, the Chamber has the right of electing two Councillors to the Madras Corporation. Under the State Aid to Industries Act, 1923, the Chamber has the right to elect one member to the Board of Industries.

The Chamber also sends its representatives to the Road Board, the Town Planning Trust, the Provincial Cotton Committee, Vizagapatam Harbour Works Committee, the Advisory Committees of the South Indian and Madras and Southern Mahratta Railways, the Madras University, the Government Institute of Commerce Advisory Council, Madras, the Social Hygiene Council (Madras Branch), the Annamalai University, State Technical Scholarship Board, Governing Body of the Training ship “Dufferin”, Advisory Committees of the Government, Rayapuram and Ophthalmic Hospital and Madras Electric Supply and Tramways Advisory Committee, Income-tax Board of Referees, and Indian Institute of Accountants.

The Chamber has 412 members on the roll and has its own building. Several Associations in the City of Madras and Chambers of Commerce Upcountry have been affiliated to this Chamber.

President — Mr Jamal Mahomed Saib, M I A

Vice-Presidents — Dewan Bahadur Govindas Chathoorbhujadas and Mr C Gopal Menon

Honorary Secretaries — Yusuff Saib and V C Rangaswamy

Assistant Secretary — P R Nair, B A, B com

COCANADA

The Chamber of Commerce was established on the 10th March 1868. The members of the Chamber have their headquarters at Cocanada, on the Commanded Coast.

Members—The Chamber's Co., Ltd., Ripley & Co., Ltd., & Co., Wilton & Co., Gordon Wood & Co. (Malaya), Ltd., Northern Commercial Co., Ltd., Channel Islands Ltd., Parnell, Son, Oil Storage and Distributing Co. of India Ltd., Agricultural Co., Ltd.,

MEMBERS OF THE COMMITTEE

Mr S. A. Chatterman (Chairman)
Mr D. T. Shoba
Mr J. C. S. S. S. S.
Mr G. S. S. S. S.

The rules of the Chamber provide that by the terms of admission to membership a merchant, firm or establishment or the permanent Agency of a mercantile firm or establishment, or a body of merchants carrying on business in Cocanada or other place in the Districts of British Ceylon, Madras, and Bombay, and duly elected according to the Rules of the Chamber, and that all such be eligible but only members resident in Coca-

nada can hold office. Members are elected by ballot. The Committee, when called upon by disputing members or non-members of the Chamber, give their decision upon all questions of mercantile usage and arbitrate upon any commercial matter referred to them for final judgment. In either case a minimum fee of Rs 16 must accompany the reference with Rs 5 from a non member and Rs 1 from a member as payment for the Chamber's Sealed Certificate.

The Committee consisting of 3 members, including the Chairman, is elected by ballot at the general meeting in January in each year for a term of 12 months. The entrance fee for each member, whose place of business is in Cocanada, is Rs 100 and for each member whose place of business is elsewhere is Rs 50. The subscription for each member whose place of business is in Cocanada is Rs 120 per annum, payable quarterly, and for each member whose place of business is elsewhere is Rs 60 per annum, payable in advance. The Committee usually meets once a month on the penultimate Thursday and the general body meets on the Last Thursday.

A fortnightly Circular of current rates of produce, freights, and exchange is drawn up by the Committee.

CEYLON.

The Ceylon Chamber of Commerce was established on the 25th March 1839 and was incorporated in 1890, with its headquarters at Colombo. All firms and persons engaged in the general trade of Ceylon are admissible as members and every person or firm desirous of joining the Chamber must after having furnished one month's notice of their intention to apply for membership be proposed by one member, seconded by another and balloted for by the whole Chamber. The affairs of the Chamber are conducted by a Board of Directors consisting of Chairman and Vice-Chairman and 10 members.

The following is the membership of the Board at the present time —

Mr M. J. Cary (Chairman), Mr J. A. Tarbat (Vice Chairman), Mr George R. Brown, Mr L. V. Coghill, Mr M. D. Crichton, Mr T. Hunt, Mr R. D. Kenyon, Mr H. Scoble Nicholson, Mr J. W. Oldfield, Mr G. A. Ponsford, Mr G. G. Smith, Mr G. L. Yule.

Secretary—Mr C. F. Whitaker.

Representative in the State Council—Mr M. J. Cary.

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS.

The Department of Statistics was reabsorbed into the Department of Commercial Intelligence with effect from the 1st December 1922. The joint department has its office at No 1, Council House Street, Calcutta, the headquarters of the Director-General. It embraces two distinct classes of work: (a) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms and (b) the compilation and publication of All India statistics. Among the important publications for which the Director-General is

responsible are the following annual volumes: Review of the Trade of India, Statement of the Foreign Sea-borne Trade and Navigation of British India, Statistical Abstract for British India, Agricultural Statistics, Estimates of Area and Yield of Principal Crops and Indian Customs Tariff. The department also publishes a weekly journal—"The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests (b) notices of tenders called for and contracts

placed by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communiques and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, prices and trade movements of the staple exports and imports, (g) trade enquiries for securing trade introductions, (h) summaries of the leading features of consular and other trade reports, and (i) abstracts of the proceedings of the various Chambers of Commerce in India.

The Department also administers the **COMMERCIAL LIBRARY AND READING ROOM** located at No 1, Council House Street, Calcutta. This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence, Statistics, and Patents and Designs, and the resultant Commercial Library

and Reading Room was placed under the administrative control of the Director-General. It has now been expanded into a first-class technical library containing over 12,505 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and over 400 technical and commercial journals and market reports. Ordinarily books are consulted in the Library, but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with Directors of Industries and other Government Departments in India, with the Indian Trade Commissioners in London and Hamburg with His Majesty's Trade Commissioners in India and the Dominions, and with Consular Officers in various parts of the world. And the yearly increase in its correspondence shows that it is steadily being used more and more both by firms in India and by overseas firms interested in Indian exports.

THE BRITISH TRADE COMMISSIONER SERVICE IN INDIA.

The British Trade Commissioners in India are part of the world-wide Commercial Intelligence Organisation of the Imperial Government. The Department of Overseas Trade, London, which is the headquarters of this organisation, is a joint department of the Board of Trade and the Foreign Office and was created in 1917 with the specific object of stimulating the overseas trade of the United Kingdom by securing commercial information from all parts of the world, by disseminating it to British manufacturers and exporters, by undertaking such special constructive activities as may be found possible, and by assisting traders in the removal of their difficulties. The Department has nothing to do with the regulation of trade. It passes no measures and makes no restrictive or regulative orders. Briefly, the policy on which it is based is the policy of assistance without interference.

The Department of Overseas Trade maintains a network of trained and experienced Commercial Intelligence Officers throughout the world, who forward a constant supply of commercial information to London and provide local assistance in the promotion of British economic interests. Those overseas officers who are stationed in the British Empire are members of the Trade Commissioner Service while Foreign countries are served by the Commercial Diplomatic Service forming part of the British Diplomatic Missions and by the Consular Service.

Mr T. M. Ainscough, OBE, was appointed His Majesty's Senior Trade Commissioner in India in January 1918 and opened an office in Calcutta in March of that year. For five years, owing to the pressing need for economy in the Public Service, he was singlehanded in covering this vast territory. In 1923, however, H.M.'s Government sanctioned the opening of an office in Bombay and the creation of an additional Trade Commissioner's post in Calcutta. Mr W. D. M. Clarke holds the appointment of H.M.'s Trade Commissioner at Bombay and in 1930

Mr R. B. Willmot was appointed as H.M.'s Trade Commissioner at Calcutta. The territory is now divided between the Calcutta and Bombay posts and this development allows the Senior Officer to travel almost continuously to any part of India which may call for his attention and to devote his time to some of the broader politico-economic problems which are becoming so important in view of the changing political conditions in India.

Function of Commissioner.—The primary duty of the British Trade Commissioner comprises the collection of information in regard to opportunities that may arise within his territory for securing and developing trade by British manufacturers and merchants, both in the United Kingdom and other parts of the British Empire. He is, therefore, enjoined carefully to watch and report from time to time to the Board of Trade and the Governments of the Dominions concerned on all matters affecting the trade, industry and commerce of his area. His general functions are to maintain cordial relations with the governing authorities of his area, to enter into personal relations with the Chambers of Commerce, Trade Associations, and similar bodies, and with the principal representative importers and local manufacturers, to visit the principal commercial centres, to report upon foreign competition, on financial and trade conditions, and new legislation affecting trade, to make an annual general report on the conditions and prospects of trade in his area, and to furnish special reports and monographs on particular questions which are likely to be of interest to British manufacturers and exporters. He is also expected to supply a regular flow of commercial information of all kinds to his department, to maintain an active correspondence with firms in the United Kingdom or the Dominions who wish to extend their trade with his area, and to give all possible assistance to the representatives of British firms who may visit his territory.

THE INDIAN CENTRAL COTTON COMMITTEE.

2. The Government of India, in 1917, appointed a committee to report upon the improvement of the cotton growing industry in India. The committee, in its report, recommended that the Government should establish a central cotton mill in India, which has proved to be a very successful one. The committee also recommended that the Government should establish a central cotton mill in India, which has proved to be a very successful one. The committee also recommended that the Government should establish a central cotton mill in India, which has proved to be a very successful one.

The Central Cotton Committee was approved by a resolution of the Government of India in April 1941, and worked as an advisory body until 1943. Another recommendation of the original Committee was that a cotton cess should be levied to provide funds for the work of the Central Cotton Committee and for agricultural and technological research on cotton.

The Cotton Cess Act was passed in 1923 and at the same time the Central Cotton Committee was incorporated and its membership enlarged in order to make it fully representative of all sections of the industry. Its constitution and present membership is as follows:—

President, Ex officio—Dewan Bahadur Sir T. Vijayaraghavacharya, K B E., Vice Chairman, Imperial Council of Agricultural Research, Simla or Delhi

B. C. Burt, Esq., OIR, MBE, BSc, IAS,
Agricultural Expert, Imperial Council of Agri-
cultural Research, Simla or Delhi *ex-officio*

Representing the Agricultural Department,
Madras—D G Munro, Esq., I.A.S., Deputy
Director of Agriculture, VIII Circle, Coimbatore

Representing
Bombay Pres
IAS, Di
dency, P

THE EAST INDIA COTTON ASSOCIATION, LIMITED.

Bombay—The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917 the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Muccadums' Association Ltd., and The Japanese Cotton Shippers' Association. None of these bodies were representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in futures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June 1918 as a temporary measure under the Chairmanship of Mr G. Wiles, I.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May 1922, when the Act, under which the Board worked, was repealed, and its functions were carried on by the newly constituted East India Cotton Association under Bombay Act No. XIV of 1922. Since then the Association, subject to its By-laws being sanctioned by Government, has been regulating transactions in cotton.

The present constitution of the Board is as follows—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., President, Importers' Panel, Haridas Madhavdas Esq., Vice-President, Exporters' Panel, Lalji Naranji, Esq., H. F. Milne, Esq., Ahmed F. Currimbhoy, Esq., Millowners' Panel, C. P. Bramble, Esq., G. Boyagis, Esq., Exporters' Panel, K. H. McCormack, Esq., Bansidhar Chokhani, Esq., Importers' Panel, W. G. McKee, Esq., S. B. Dalal, Esq., Commission Agents' and Merchants' Panel, Purshotam Jivandas, Esq., Bhaidas Nanlal, Esq., Jethawallas' Panel.

Officers

D. Mehta, Esq., B.A., Secretary, C. M. Parikh Esq., B. Com., Assistant Secretary, A. R. Menezes, Esq., Manager, Clearing House.

Some of the objects for which the Association is established are—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to

and prohibition of the use thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Exchange, to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts, to adjust by arbitration or otherwise controversies between persons engaged in the Cotton Trade, to establish just and equitable principles in the said Trade, to maintain uniformity of control of the said trade, to fix or adopt standards of classification of cotton, to acquire, preserve and disseminate useful information connected with the Cotton interest throughout all markets, to decrease or insure the local risk attendant upon business, and generally to control, promote and regulate the Cotton Trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted. To establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Clearing House. To regulate the handling and exportation of Cotton from India and the importation of Cotton into India in so far as it may be imported. To bring, prosecute, or defend, or aid in bringing, prosecuting, or defending any suits, actions, proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association, and to prescribe the principle of framing of contracts with a view to eliminate the temptation and possibility of speculative manipulation.

The Association has erected a fine Exchange Building at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, and a large Trading Hall on the lines of Liverpool and New York Exchanges.

The inaugural ceremony of the opening of the Exchange Building was performed by His Excellency Sir Leslie Wilson, Governor of Bombay, on the 1st December 1925 in the presence of a large gathering which included most of the prominent business men of the City and many leading citizens.

There is a membership of 418 members.

The Bombay Cotton Annual containing matters relating to every branch of the Trade is published annually in December and statistics are issued twice weekly.

EXPORTS OF RAW COTTON FROM INDIA
(In thousands of bales of 400 lbs) to various Countries for year ending 31st March —

Bombay is the great centre of the cotton trade. The principal varieties are Dholleras, Broach, Oomras (from the Berars), Dharwar and Coomptas. Broach is the best cotton grown in Western India. Hinganghat cotton, from the Central Provinces, has a good reputation. Bengals is the name given to the cotton of the Gangetic valley, and generally to the cottons of Northern India. The Madras cottons are known as Westerns, Coconadas, Colmbatores and Tinnevellys. The best of these is Tinnevely. Cambodia cotton has been grown with success in Southern India, but it shows a tendency to revert. The high prices of cotton realised of recent years have given a great impetus to cultivation. Government have also been active in improving the class of cotton produced, by seed selection, hybridization and the importation of exotic cottons. Although these measures have met with a considerable measure of success, they have not proceeded far enough to leaven the

whole outturn, which still consists for the most part of a short-staple early maturing variety suitable to soils where the rainy season is brief.

Reference has been made to the popularity of the Indian handloom cloths in the earliest days of which we have record. This trade grew so large that it excited alarm in England, and it was killed by a series of enactments, commencing in 1701, prohibiting the use or sale of Indian calicoes in England. The invention of the spinning jenny and the power loom and their development in England converted India from an exporting into an importing country, and made her dependent on the United Kingdom for the bulk of her piece-goods. The first attempt to establish a cotton mill in India was in 1838, but the foundations of the industry were really laid by the opening of the first mill in Bombay in 1856. Thereafter, with occasional set backs from famine, plague and other causes, its progress was rapid.

The following statement shows the quantity (in pounds) of yarn of all counts spun in all India for the twelve months April to March, in each of the past 4 years —

(a) Figures for Rajkot are being reported from January 1930

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 74 per cent of the quantity produced in British India. The United Provinces of Agra and Oudh and Madras produced about 7 per cent and 8 per cent respectively, while Bengal and the Central Provinces produced 4.7 and 5.2 per cent. Elsewhere the production is as yet very limited.

BOMBAY ISLAND.

Here is a detailed statement of the quantity (in pounds) and the counts, or numbers, of yarn spun in Bombay Island —

| | 1927-28 | 1928-29 | 1929-30 | 1930-31. |
|------------|-------------|-------------|-------------|-------------|
| Nos. 1—10 | 61,759,070 | 82,435,744 | 53,035,403 | 53,638,486 |

| Wastes, &c | 6,170,243 | 5,720,242 | 6,709,881 | 5,792,771 |
| TOTAL | 803,940,378 | 648,283,337 | 383,409,013 | 867,044,558 |

In the early days of the textile industry the energies of the millowners were largely concentrated on the production of yarn, both for the China market, and for the handlooms of India. The increasing competition of Japan in the China market, the growth of an indigenous industry in China and the uncertainties introduced by the fluctuations in the China exchanges consequent on variations in the price of silver compelled the millowners to cultivate the Home market. The general tendency of recent years has been to spin

higher counts of yarn, importing American cotton for this purpose to supplement the Indian supply, to erect more looms, and to produce more dyed and bleached goods. This practice has reached a higher development in Bombay than in other parts of India, and the Bombay Presidency produces nearly 78·8 per cent of the cloth woven in India. The United Provinces produces 3·2 per cent, the Central Provinces 4 per cent and Madras 4 per cent. Grey and Bleached goods represent nearly 74 per cent of the whole production.

ANALYSIS OF WOVEN GOODS

The following brief extract is taken from the statement of the quantity (in pounds and their equivalent in yards) and description of woven goods produced in all India, including Native States —

| — | 1927-28 | 1928-29 | 1929-30 | 1930-31. |
|---|---------------|---------------|---------------|---------------|
| Grey and Bleached piece-goods— | | | | |
| Pounds | 1,403,467,859 | 330,925,376 | 421,758,613 | 460,325,143 |

* Year ending 31st August

† Does not include 24 Mills in course of erection

The Jute Industry.

Considering its present dimensions, the jute industry of Bengal is of very recent origin. The first jute mill in Bengal was started at Rishra in 1855, and the first power-loom was introduced in 1859. The original outturn was 8 tons per day. In 1909 it had grown to 2,500 tons per day. It is now 4,000 tons per day, and it shows every indication of growing and expanding year by year. Another interesting thing about the jute industry of Bengal is that, although it is practically a monopoly of Scotsmen from Dundee, the industry itself owes its inception to an Englishman. The founder of the industry was George Acland, an Englishman, who began life as a midshipman in the navy, and was for some years in the East India Marine Service. He quitted this service while still a young man, and engaged in commercial pursuits in Ceylon, where he was successful. Later on he turned his attention to Bengal, and arriving in Calcutta about 1853 he got into touch with the management of the paper works, then at Serampore, where experiments were being tried with country grasses and fibre plants to improve the quality or cheapen the manufacture of paper. This seems to have suggested to Acland the manufacture of ree, and in 1854 he proceeded to England, with a view to obtaining machinery and capital in order to manufacture goods from that material. During this trip he visited Dundee, and while there Mr John Kerr of Douglas Foundry, suggested to him the importing of machinery into Bengal, where the jute comes from and spin it there. This suggestion bore fruit, or shortly afterwards Acland placed orders with Kerr for a few systems of preparing and spinning machinery, and returned to India the same year accompanied by his two sons and a few Dundee mechanics who were to assist him in erecting and operating the first jute mill in Bengal. This, as has been stated, was at Rishra, the site of the present Wellington mill, near Serampore and here, in 1855, the first machine spun jute yarns were made. As not infrequently happens the pioneer got very little out of his venture. After several ups and downs the Acland interest in the Rishra mill ceased in 1867, and the company which Acland had formed in 1854 was wound up in 1868.

Power-loom.—The pioneer's example was followed by Mr George Henderson of that silk and firm and in 1859 the Borneo Jute Co was launched under his auspices. To this company is due the credit of introducing the power-loom for jute cloth. Unhampered by the financial difficulties which had burdened the Aclands, the Borneo Jute Co made rapid progress, doubling their works in 1864, and clearing their capital twice over. In 1872 the mills were turned into a limited liability company the present "Barnagore Jute Factory Co., Ltd." Four other mills followed in succession—Gouripore, Serajgunge, and India Jute Mills.

"From 1865 to 1873" writes Mr David Wallace in "The Romance of Jute" "the five mills excepting the Rishra mill simply coined money and brought the total of their looms up to 1,250." To illustrate the pros-

perity of the industry at this period we may take the dividends paid by the Barnagore Company. On the working of their first half year, a 15 per cent interim dividend was declared, which seemed to justify the enormous capital at which the company was taken over from the Borneo Company, and share touched 68 per cent premium. The dividend for the first year, ending August 1873, was 25 per cent, for 1874, 20 per cent, and for 1875, 10 per cent. Then came a change. The investing public had forgotten the effect of the Port Canning bubble, and the condition of the jute industry in 1872-73 seeming to offer a better return than coal or tea, both of which had just enjoyed a boom, it was only necessary to issue a prospectus of a jute mill to have all the shares snapped up in the course of an afternoon.

In 1872-73 three new companies were floated locally—the Fort Gloster, Budge and Sibpore, and two Home companies, the Champdany and Samnugger, all of which commenced operations in 1874. In 1874-5 eight other mills were launched—the Howrah, Oriental (now Union), Asiatic (now Sooran), Clive, Bengal Pressing and Manufacturing Co (now the Bellaghatta-Barnagore branch mill), Rustomjee (now the Central), Ganges (registered in England), and Hastings, owned by Messrs Birkmyre Bros. of Greenock fame—in all thirteen new companies, coming on all of a heap and swelling the total looms from 1,250 up to 3,500. This was too much of a strain for the new industry, and for the next ten years all the mills had a severe struggle. The older ones all survived the ordeal, but four of the new concerns—the Oriental, the Asiatic, the Bengal Pressing and Manufacturing Co and the Rustomjee—became moribund, to appear again later on under new names and management. Fort Gloster also suffered badly.

Between 1875 and 1882 only one new mill was put up. This was Kamarhatti, promoted by Messrs Jardine, Skinner & Co., which came into being in 1877, as the result of Mr Barry's visit to Calcutta in 1876, when he transferred the agency of the Gouripore Co from Messrs Jardine, Skinner & Co to his own firm. This mill, together with additions made by some of the other mills, brought the total looms up to 5,150 in 1882. By the end of 1885 the total was further augmented by the Hooghly, Mitaghur, Victoria and Kanknarrah mills, bringing the number of looms at work up to 6,700. From this period on to 1894 no new mills came into existence except the Calcutta Twist Mill, with 2,460 spindles, since merged into the Wellington branch of the Champdany Co. Between 1896 and 1900 the following new mills were started—The Gordon Twist Mill with 1,800 spindles (now acquired by Anglo-India), Khardah, Gondolpara (French owned), Alliance, Arathoon, Anglo-India, Standard, National, Delta (which absorbed the Serajgunge), and the Kinnison. A full of four years witnessed large extensions to the existing mills, after which came the following series of new mills, besides further heavy extensions—Dalhousie, Alexandra, Nahati, Lawrence, Reliance, Belvedere, Auckland, Kelvin and Northbrook.

Progress of the Industry

The record of the jute industry may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for each year from 1917-18 up to 1926-27 and the figures in brackets represent the variations for each period, taking the average of the quinquennium, from 1879-80 to 1883-84 as 100 —

| | Number of
mills at
work | Authorized
Capital (in
lakhs of Rs.) | Number (in thousands) of | | |
|----------------------|-------------------------------|--|---|------------|-----------------|
| | | | Persons
employed
daily
(average) | Looms | Spindles |
| Average— | | | | | |
| 1879-80 to 1883-84 | 21 (100) | 270.7 (100) | 38.8 (100) | 5.6 (100) | 88 (100) |
| 1884-85 to 1888-89 | 24 (114) | 341.6 (126) | 52.7 (136) | 7 (127) | 138.4 (157) |
| 1889-90 to 1893-94 | 30 (124) | 402.6 (149) | 64.3 (166) | 8.3 (151) | 172.8 (196) |
| 1894-95 to 1898-99 | 31 (148) | 522.1 (193) | 80.7 (223) | 11.7 (213) | 244.8 (278) |
| 1899-1900 to 1903-04 | 36 (171) | 680 (251) | 114.2 (294) | 16.2 (295) | 334.6 (380) |
| 1904-05 to 1908-09 | 46 (219) | 960 (356) | 165 (425) | 24.8 (451) | 510.5 (580) |
| 1909-10 to 1913-14 | 60 (286) | 1,209 (443) | 208.4 (537) | 33.5 (600) | 661.8 (786) |
| 1914-15 to 1918-19 | 73 (348) | 1,403.6 (519) | 259.8 (668) | 39.7 (722) | 821.2 (933) |
| 1917-18 | 76 (362) | 1,428.5 (528) | 266 (680) | 40.6 (738) | 884 (948) |
| 1918-19 | 76 (362) | 1,477.2 (546) | 276.5 (710) | 40 (727) | 839.9 (954) |
| 1919-20 | 76 (362) | 1,563.6 (579) | 280.4 (724) | 41.0 (745) | 856.1 (972) |
| 1920-21 | 77 (367) | 1,923.5 (712) | 288.4 (758) | 41.6 (745) | 869.9 (988) |
| 1921-22 | 81 (386) | 2,122.4 (784) | 288.4 (743) | 43.0 (782) | 908.3 (1,032) |
| 1922-23 | 86 (409) | 2,304.7 (859) | 321.2 (828) | 47.5 (863) | 1,003.1 (1,140) |
| 1923-24 | 89 (424) | 2,485.8 (922) | 330.4 (851) | 49.0 (891) | 1,043.4 (1,186) |
| 1924-25 | 90 (424) | 2,213.8 (814) | 341.7 (881) | 50.3 (914) | 1,067.6 (1,213) |
| 1925-26 | 90 (420) | 2,134.7 (788) | 331.3 (854) | 50.5 (918) | 1,063.7 (1,209) |
| 1926-27 | 93 (443) | 2,119.8 (783) | 333.0 (860) | 51.0 (927) | 1,083.8 (1,231) |
| 1927-28 | 91 (443) | 2,269.7 (838) | 335.8 (865) | 52.2 (949) | 1,105.6 (1,256) |
| 1928-29 | 95 (452) | 2,336.6 (863) | 343.8 (886) | 52.4 (933) | 1,118.1 (1,259) |

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The value of jute manufactures exported by sea in 1924-25 was over thirty-three times as great as the average value of the export in the period 1879-80 to 1883-84 —

| | Jute manufactures | | Value in lakhs of Rs. |
|----------------------|----------------------------------|-----------------------------------|-----------------------|
| | Gunny bags in millions of number | Gunny cloths in millions of yards | |
| 1879-80 to 1883-84 | 54.9 (100) | 4.4 (100) | 124.9 (100) |
| 1884-85 to 1888-89 | 77 (140) | 15.4 (350) | 162.9 (130) |
| 1889-90 to 1893-94 | 111.5 (203) | 41 (932) | 289.3 (232) |
| 1894-95 to 1898-99 | 171.2 (312) | 182 (4,136) | 518 (415) |
| 1899-1900 to 1903-04 | 208.5 (376) | 427.2 (9,709) | 828.5 (662) |
| 1904-05 to 1908-09 | 257.8 (469) | 698 (15,864) | 1,442.7 (1,154) |
| 1909-10 to 1913-14 | 339.1 (618) | 870 (2,015) | 2,044.4 (1,621) |
| 1914-15 to 1918-19 | 667.6 (1,216) | 1,156 (26,273) | 3,019 (2,418) |
| 1919-20 | 342.7 (624) | 1,276.1 (28,980) | 5,001.5 (4,004) |
| 1920-21 | 553.9 (1,007) | 1,302.7 (29,800) | 3,299.4 (2,638) |
| 1921-22 | 346.7 (631) | 1,120.6 (25,000) | 2,989.5 (2,400) |
| 1922-23 | 344.2 (628) | 1,254.3 (27,350) | 1,049.4 (840) |
| 1923-24 | 413.7 (752) | 1,348.7 (29,952) | 4,228.4 (3,392) |
| 1924-25 | 425.1 (774) | 1,450.2 (32,095) | 5,148.8 (4,122) |
| 1925-26 | 425.0 (774) | 1,461.3 (32,211) | 5,752.1 (4,605) |
| 1926-27 | 449.0 (818) | 1,503.1 (33,181) | 5,200.3 (4,222) |
| 1927-28 | 463.1 (843) | 1,552.7 (34,289) | 5,321.4 (4,260) |
| 1928-29 | 497.6 (906) | 1,568.2 (34,640) | 5,656.4 (4,528) |
| 1929-30 | 622.3 (1,132) | 1,650.5 (37,511) | 5,168.7 (4,130) |

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year although the increase was very much less than that in the case of manufactures. During the war years exports declined very considerably. The cessation of the war stimulated the export trade and in 1919-20 the export showed an increase, as compared with the average of the war quinquennium (1914-15 to 18-19). In the following two years, the export recorded a decrease and in 1922-23 they again made a recovery and amounted to 578,000 tons.

The total quantity of jute manufactures exported by sea from Calcutta during the year 1922-23 was 668,000 tons as against 639,000 tons in the preceding year and 603,500 tons in the pre-war year 1913-14. The values of these exports amounted to Rs 40.28 lakhs, or an increase of Rs 10.36 lakhs over the preceding year and Rs 12.08 lakhs over the pre-war year. The shipments of gunny bags were valued at Rs 15.82 lakhs and of gunny cloth Rs 24.24 lakhs as against Rs 13.86 and Rs 15.92 lakhs respectively in the preceding year and Rs 12.48 and Rs 15.58 lakhs in the pre-war year.

The price of raw jute reached a very high point in 1906-07, the rate being Rs 65 per bale. In 1907-08 it dropped to Rs 42 per bale, and the fall was accentuated in 1908-09 and 1909-10, the price having declined to 36 4 and Rs 31, in 1917-18 it dropped to Rs 38-8-0 but rose again in 1919-20 up to Rs 77-8-0. In 1920-21 it dropped to Rs 65 but rose again to Rs 86.

It again declined to Rs 66. In 1922-23 the price rose to Rs 73 at the end of September, but fell back again to Rs 50 at the end of November and recovered at Rs 64 at the close of the year.

a report which the Association promptly pigeon-holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of jute.

The working agreements referred to above have been followed by others, differing in points of detail, but with the same object in view namely the restriction of production. During the past 10 years a policy of curtailment of output has been continuously in force. The mills in the Membership of the Association, comprising some 95 per cent of the trade, are at present working 40 hours per week, with 15 per cent of the total complement of looms sealed, and the current agreement incorporates a clause which provides that the mills will not instal any extra productive machinery or relative buildings during the currency of the agreement, which remains in operation up to 31st December 1931. An agreement in substantially the same terms comes into force with effect from 1st January 1932 and it will remain in force until three months notice if intention to alter the present working arrangements, or to terminate the agreement has expired.

An Association, styled the **Calcutta Jute Dealers Association**, has been formed in Calcutta to promote and to guard the common interests of its members as dealers in jute for local consumption. The members are balers and brokers of jute for sale to the jute mills in and around Calcutta. The present Committee—Mr Geo Moran, C.I.E. M.L.A.C., *Chairman*, Members—Mr T Kerr, Mr H. A. Luke, Mr G. C. Moon, Mr J. L. Ruthven and Mr C. S. Taylor.

Effects of the War—The official review of the Trade of India in 1916-17 says—The value of the exports of raw jute increased in 1916-17 by nearly Rs 65 lakhs to Rs 1,029 lakhs. The quantity exported, however, was less than in the preceding year. The estimated yield of the crop was 12 per cent above that of the previous year, viz., 1,490,000 tons or 8,340,000 bales. Owing to the lack of tonnage and other abnormal circumstances brought about by the war, the quantity exported was 10 per cent, below that of the previous year. Of the consumers the United Kingdom and Italy took less, while the United States, France (mainly via Dunkirk), Russia (via Vladivostok) and Brazil took greater quantities. There were, of course, no exports to enemy countries which took more than 27 per cent in the five years ending 1913-14, the pre-war year. The increase in the value accompanied by a decrease in the volume of exports was due to the very high range of prices during the months of September, October, November and December. Towards the close of the year under review prices steadily declined, and have since gone still lower.

Jute Manufactures—The value of the exports now approximates to Rs 42 crores. In spite of the war with its attendant difficulties of freight and finance, the exports of gunny cloth showed an increase of Rs 241 lakhs of which Rs 163 lakhs were due to higher prices and Rs 78 lakhs to an increase in the volume of exports. There were also an increase of Rs 118 lakhs in the value of gunny bags exported. The number of bags shipped in-

creased while the weight decreased, and bags for war purposes being lighter than the ordinary bags for transporting grain. Exports to Australia in 1916-17 were a record. The United Kingdom with Australia took more than half of the number of bags exported while the United States took more than half of the quantity of cloth exported.

There were 74 mills at work throughout the year with 41,292 looms and 863,339 spindles. The number of persons employed was 285,881. There were no difficulties as regards the supply of labour.

The number of gunny bags shipped from Calcutta during 1922-23 declined from 386 million bags to 342 million bags, but the value increased from Rs 13,87 lakhs to Rs 15,82 lakhs. Shipments of gunny cloth rose from 1,120 million yards to 1,251 million yards, valued at Rs 15,02 lakhs and Rs 24,24 lakhs respectively.

Hemp and Jute Substitutes

Experiments have been made during the last few years by the Agricultural Department of the Government of India with the **Deccan hemp plant** (*Hibiscus cannabinus*), which yields a fibre very similar to jute. As a result, a new variety of the plant, known as Type 3, has been obtained, which it is now proposed to introduce into several parts of India, and, as a beginning, the variety is to be grown on a number of estates in Bihar. A sample of the fibre prepared from this variety by the usual methods of retting was 10 ft to 12 ft long, of an exceptionally light colour, well cleaned, and of good strength. It was valued at £18 per ton with Bimlipatam jute at £12 10s, and Bengal first mark jute at £17 per ton. Deccan hemp has been grown fairly extensively in Bombay, the Central Provinces, and Madras, where it is used for ropes and cordage and also for the manufacture of a coarse sackcloth. A valuable feature of the plant is its suitability for cultivation in such parts of India as are not suitable for jute.

Prior to the war, the United Kingdom's requirements of hemp were mainly supplied by the following countries in order of importance—the Philippine Islands, New Zealand, India, Russia, Italy and Germany. The opinion appears to be held that the effect of the war will be to cause very considerable changes in the character of the fibre market. There will probably be labour difficulties, it is thought, in the preparation of the hemp crops of Russia and Hungary and it is not unlikely that the world will look to countries such as India for the supply of fibres which may be used as substitutes for the European varieties of hemp. There can be no doubt that one of the early effects of the war was to firm up hemp prices. As far as Indian hemp is concerned, values were persistently depreciated during the first six months of 1914 owing to large stocks held, but the closure of the Russian hemp market on the outbreak of war resulted in a marked improvement in values, and there was a keen demand and a considerable rise in price. Exports from Calcutta during 1922-23 made a great recovery from the previous year. The quantity advanced by 37 per cent from 197,412 cwts to 269,487 cwts and the value from Rs 26.93 lakhs to Rs 36.68 lakhs.

THE WOOL INDUSTRY

Wool exported from India consists not only of wool grown in India itself but of imports from foreign sources, these latter coming into India both by land and by sea. Imports by sea come chiefly from Persia but a certain quantity from Persia also comes by land, while the main imports are from Afghanistan Central Asia, Tibet and Nepal. Quetta, Shikarpur, Amritsar and Multan are the main collecting centres for wool received by land from Afghanistan and Persia whence it is almost invariably sent to Karachi for subsequent export overseas.

Imports and Exports—A considerable amount of wool is imported annually from Tibet and in normal years from Afghanistan. Imports by sea in 1929-31 amounted to 31,141 tons valued at Rs 184 lakhs, showing a marked increase compared with the previous year. Imports from Australia showed a proportionately smaller increase than those from other countries amounting to 1.6 million lbs valued at a little under Rs 10 lakhs.

Production in India—The production of wool in India is estimated at 60 million lbs, the estimate being arrived at from the available figures of the number of sheep in the country and their estimated yield per fleece, the average quantity of wool yielded per sheep per annum being taken at only 2 lbs.

All Indian wools are classed in the grade of carpet wools and it is correct to say of perhaps fully half the breeds of sheep found on the plains of India that they yield a kind of hair rather than of wool. They are reared chiefly on account of the mutton, and the fleece has been generally regarded as of subsidiary interest. In many respects in actual fact, the Indian plains sheep approximate more nearly to the accepted type of the goat rather than of the sheep. Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhound with tucked up belly, having some coarseness of form, the feet light, the limbs bony, sides flat and the tail short".

Mill manufacture—The number of woollen mills at work in British India in 1902 was three, with an authorised capital of Rs 38,50,000, and employing 23,800 spindles and 624 looms. The number of persons employed

in the industry then was 2,550, and the quantity of woollen goods produced 2,148,000 lbs. At the end of 1917 the number of mills had risen to five, with an authorised capital of Rs 2,50,00,000 employing 30,608 spindles and 1,155 looms. The weight of goods produced then was 9,744,264 lbs and the number of persons employed 7,824. With regard to Indian States, there was one mill in Mysore in 1903 with a capital of Rs 6,00,000, employing 1,430 spindles and 45 looms. The quantity of goods produced was 1,136,000 lbs and the number of persons employed 297. In 1907 there was still only the one mill working in an Indian State—the authorised capital had been increased to Rs 15,00,000, the quantity of goods produced to 1,724,087 lbs, and the number of persons employed to 563. Three of the mills manufacture all classes of woollen and worsted goods, the remainder manufacturing blankets only. The existence of these mills in India proved of great service to Government in the meeting of war requirements, and they were all employed to their fullest capacity in supplying army demands for great coat cloth, serges puttees, flannels, blankets and hosiery. Their total capacity, however, was not sufficient to meet the full requirements of the army, and consequently their supplies had to be supplemented by large imports from home. The bulk of the wool used by the Indian mills is Indian wool, although it is supplemented to some extent by the importation of merinos and cross-breds from Australia for the manufacture of the finer classes of goods. Their market for manufactured goods is almost entirely in India itself.

Blanket weaving and carpet manufacture are carried on in various parts of the country, notably in the Punjab and the United Provinces. Woollen pile carpets are made in many of the jails. Amritsar had a considerable trade at one time in weaving shawls from *pashm*, the fine under fleece of the Tibetan goat, but its place has been taken to some degree by the manufacture of shawls from imported worsted yarns, but more generally by the manufacture of carpets of a fine quality which find a ready sale in the world market. This work is done entirely on hand looms and the carpets fetch a high price.

Bibliography—Notes on wool in India. By A. H. Silver and J. K. Mehta, Govt Press, Calcutta, (1919).

Silk.

In the early days of the East India Company the Indian Silk trade prospered greatly, and various sub-tropical races of the Silkworm were introduced. But the trade gradually declined for the following reasons —

In the seventeenth and eighteenth centuries India's chief competitor in the silk trade was the Levant Company. Successful efforts, however, were made to acclimatise in Europe one or two races of a temperate worm, procured from China and Japan. When sericulture became part of the agriculture of France and Italy, a quality of silk was produced entirely different from that of India and Turkey, and its appearance created a new demand and organized new markets.

All subsequent experience seems to have established the belief that the plains of India, or at all events of Bengal, are never likely to produce silk that could compete with this new industry. On the lower hills of Northern India, on the other hand, a fair amount of success has been attained with this (to India) new worm, as, for example, in Dehra Dun and Kashmir. In Manipur, it would appear probable that *Bombyx mori*, possibly obtained from China, has been reared for centuries. The caprice of fashion has, from time to time, powerfully modified the Indian silk trade. The special properties of the *korah* silk were formerly much appreciated but the demand for them has now declined. This circumstance, together with defective systems of rearing and of hand-reeling and weaving, accounts largely for the present depression in the mulberry silk trade of India.

Mulberry-feeding worms—Sir George Watt states that in no other country does the necessity exist so pressingly as in India to treat the subject of silk and the silk industries under two sections, viz., Bombycidae, the domesticated or mulberry feeding silkworms, and Saturniidae, the wild or non-mulberry-feeding worms. In India the mulberry worm (*Bombyx Mori*) has been systematically reared for many centuries, there being six chief forms of it. In the temperate tracts of India various forms of *Morus alba*, (the mulberry of the European silk-producing countries), are grown specially as food for the silkworm. This is the case in many parts of the plains of Northern India, Baluchistan, Afghanistan, Kashmir, and along the Himalaya at altitudes up to 11,000 feet. The other species even more largely grown for the Indian silkworm is *M. Indica* of which there are many distinctive varieties or races. This is the most common mulberry of Bengal and Assam as also of the Nilgiri hills.

India has three well known purely indigenous silkworms, the *tasar*, the *muga* and the *eri*. The first is widely distributed on the lower hills, more especially these of the great central tableland, and feeds on several jungle trees. The second is confined to Assam and Eastern Bengal, and feeds on a laurel. The third exists in a state of semi-domestication, being reared on the castor-oil plant. From an art point of view the *muga* silk is the most interesting and attractive, and the cocoon can be reeled readily. The

eri silk, on the other hand, is so extremely difficult to reel that it is nearly always carded and spun—an art which was practised in the Khasi Hills of Assam long before it was thought of in Europe.

Experiments and results—Numerous experiments have been made with a view to improving sericulture in India. French and other experts are agreed that one of the causes of the decline of the silk industry in India has been the prevalence of diseases and parasites among the worms, the most prevalent disease being pebrine. M. Lafont, who has conducted experiments in cross breeding, believes that improvement in the crops will be obtained as soon as the fight against pebrine and other diseases of the worms is taken up vigorously by the producers of seed and the rearers of worms, while improvement in the quality of the cocoons will be obtained by rearing various races, pure and cross breeds.

In Kashmir and Mysore satisfactory results have been obtained. In the former State sericulture has been fostered on approved European principles with Italian reeling machinery, seed being imported annually on a large scale. In 1897 in Mysore Mr. Tata, after selecting a plantation and site for rearing houses, sent to Japan for a Superintendent and trained operatives. The Mysore authorities have made a grant of Rs. 3,000 a year to the Tata farm in return for instruction given to the people of Mysore in Japanese methods of growing the mulberry and rearing the insects. The products of the Mysore State are exported to foreign countries from Madras. The work of the Salvation Army is also noteworthy in various parts of India. They have furnished experts, encouraged the planting of mulberry trees, and subsidised several silk schools. The draft prospectus has been issued of a silk farm and institute to be started at Simla under the auspices of the Salvation Army. The Lieutenant-Governor of the Punjab has permitted the school to be called after his name, and the Punjab Government made a grant of Rs. 2,000 towards the expenses. Sir Dorabji Tata has also made a donation of Rs. 1,000. The Bengal Silk Committee under the guidance of some French experts have conducted cross-breeding experiments with a view to establish a multi-voltine hybrid of European quality. There is a Government sericultural farm at Berhampore, where, it is said, a pure white multi-voltine of silk worm is reared. The results of the Bengal Committee's labours may be summed up as follows: the only really effective method of dealing with the problem is to work up gradually to a point at which the whole of the seed cocoon necessary for the province will be supplied to rearers under Government supervision, and to establish gradually a sufficient number of large nurseries throughout the silk districts of the province.

In 1915 there was issued by the Agricultural Research Institute, Pusa, a *Bulletin* (No. 48 of 1915) entitled "First Report on the Experiments carried out at Pusa to improve the Mulberry

Silk Industry—In a short Prefatory note Mr Bainbridge Fletcher (Imperial Entomologist) explains that the object of the Bulletin is to place on record some of the more important experiments which were commenced at Pusa, in the year 1910 and have since been carried on in the endeavour to fix a superior multivoltine race of the Mulberry Silkworm which would not degenerate and which would yield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at present.

Central Nurseries—The report of the Agricultural Department, Bengal, for the year ending June 30, 1913, gives an account of a scheme which has been devised with the object of reclaiming the silk industry. The aim of the scheme is gradually to establish throughout the silk districts a sufficient number of central nurseries with rearing houses and thus enable the whole of the seed cocoons required in the province to be supplied under Government supervision. It is believed that this is the only really effective method of dealing with the problem. A number of the existing smaller nurseries were closed during 1913 and others are being converted into enlarged and improved central nurseries with rearing houses complete. The ultimate success of the scheme depends

largely on the willingness of the rearers to pay an adequate price for pure seed.

A pamphlet was published in 1915, by Mr M. N. De, Sericultural Assistant at Pusa, which contains practical hints on improved methods which are recommended to be used for reeling mulberry silk in Bengal and other silk producing districts. It has been found that, by the provision of two small pulleys to the ordinary Bengal type of reeling machine, superior thread can be obtained, the cost of the extra apparatus is merely nominal (five or six annas per machine) whilst the suitability of the machine for cottage workers is maintained. By attention to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pans, great improvements can be effected in most silk centres in Bengal and other districts.

Exports of Silk—As a result of the war the trade has shown in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by Rs 12 lakhs to Rs 27½ lakhs, of which raw silk accounted for Rs 24 lakhs. In 1916-17 the total exports rose to Rs 54½ lakhs. In 1920-21 exports of raw silk and silk manufactures amounted to Rs 10 lakhs in value, or a third of that of the previous year.

Indigo.

Indigo dyes are obtained from the *Indigofera* a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, India having about 40. Western India may be described as the headquarters of the species, so far as India is concerned, 25 being peculiar to that Presidency. On the eastern side of India, in Bihar, Bengal, Assam and Burma, there is a marked decrease in the number of species but a visible increase in the prevalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the dyers of Holland, and it was the desire to obtain a more ample supply of dyestuff that led to the formation of the Dutch East India Company and so to the overthrow of the Portuguese supremacy in the East. Opposition to indigo in 17th century Europe was keen owing to its interference with the wood industry, but it was competition to obtain indigo from other sources than India that led to the first decline of the Indian indigo industry. In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India, and as one of the main purposes of the industry, the province of Bengal was selected for this revival. It had no sooner been organised, however, than troubles next arose in Bengal itself through

misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous Memorandum of 1837. This led to another migration of the industry from Lower and Eastern Bengal to Tirhut and the United Provinces. Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable dye. The first killed the madder dye of Europe, then the safflower, the lac and the al dyes of India, and are now advancing rapidly with synthetic indigo, intent on the complete annihilation of the natural dye. Opinions differ on many aspects of the present vicissitude, regarding the exports from India have seriously declined and salvation admittedly lies in the path of cheaper production both in cultivation and manufacture. These issues are being vigorously faced and some progress has been accomplished, but the future of the industry can scarcely help being described as of great uncertainty. The issue is not the advance of new regulations of land tenure, but one exclusively of natural versus synthetic indigo. (See Watt's 'Commercial Products of India'.) In this connection it may be noted that increases in the price of coal in England, due to labour difficulties, have greatly strengthened the position of natural indigo. In February 1915 a conference was held at Delhi, when the possibility of assisting the natural indigo industry was considered from various points of view—agricultural, industrial and commercial. The agricultural and industrial aspects of the question is fully discussed by Mr. A. D. Howard of Pusa in Bulletin No. 11, and 12 of

the Agricultural Research Institute. Other aspects of the question were fully examined last year in the *Agricultural Journal of India* by Mr. W. A. Davis, Indigo Research Chemist to the Government of India. An Indigo Cess Bill was passed in the Imperial Legislative Council in 1918. It provides for a cess on indigo exported from India for the scientific investigation of the methods of cultivation and manufacture of indigo, the proceeds of the cess being received and expended by Government.

Decline of the Industry—Since synthetic indigo was put upon the market, in 1897, the natural indigo industry of India has declined very rapidly, apart from slight recoveries in 1906-07 and 1911-12, the decline continued without a break until the revival due to the impossibility of obtaining artificial dyes in sufficient quantities during the war.

The total yield in 1930-31 was estimated at 13,500 cwts. The exports, which are no longer of much importance, amounted only to 934 cwts.

OILS AND OIL CAKES.

Oilseeds, which had ranked fourth among India's exports in the two preceding years, occupied in 1930-31 the fifth position, giving place to tea, the first three groups being, as usual, cotton and jute, raw and manufactured, and foodgrains. The total exports of oilseeds fell from 1,195,000 tons valued at Rs. 26.46 lakhs to 1,037,000 tons valued at Rs. 17.86 lakhs. Details of oilseeds exported during 1930-31 appear in the section of the Year Book dealing with exports.

A pamphlet on the subject recently published by the Commercial Intelligence Department points out that it is both economically and industrially unsound for India to export her oil seeds instead of manufacturing the oils and oil cakes in India. It allows other countries to reap the manufacturers' profits and at the same time deprives Indian agriculture of the great potential wealth, as cattle-food and manure, contained in the oil cakes. An immense quantity of oil is, as a matter of fact, already manufactured in this country by more or less crude processes. Village oil mills worked by bullocks and presses worked by hand exist in all parts of the country and supply most of the local demand for oil. There has also been a great increase in recent years in the number of oil mills worked by steam or other mechanical power. These crush all the commoner oil seeds and development has been especially marked in the case of mustard oil, castor oil and groundnut oil. In spite of all this there has been a perceptible diminution in the export of oil from India, particularly of cocoanut oil and linseed oil, and an increase in the export of oil seeds, which is particularly marked in the case of copra and groundnuts. The situation created by the War has naturally led to too much discussion of the possibility of developing on a large scale the existing oil-milling industry in India.

There are three difficulties with which any proposal to develop in India an oil-milling industry on a great scale is faced. In the first place, there exist high protective tariffs in European countries which encourage the export from India of the raw material rather than the manufactured product. Secondly, there is a better market for the oil cake in Europe than in India and the freight on oil seeds is less than the freight on cake. Thirdly, it is much easier and less expensive to transport oil seeds by sea than it is to transport oil. While this has been the position in the European markets, Indian-made oils, other than cocoanut oil, have made enough headway in Eastern markets to suggest the possibility of a development of those markets.

The problem of finding a market for oil cakes is equally important. The value of oil cakes is much better appreciated in Europe than in India. The Indian cultivator is prejudiced against the use of machine-made cake as a cattle food or as manure because he considers that it contains less oil and therefore less nourishment than the village-made cake. He is therefore unwilling to buy it except at a reduced price. His prejudices on this point have no justification in fact since experts are agreed that mill cake is a better food for cattle than village-made cake. Even when the mill cake contains less oil than the village cake, there is still more oil in the cake than cattle can digest. The excess of oil in the village cake where it exists, is a drawback and not an advantage to the use of the cake as food. A considerable amount of demonstration work has been done by the Agricultural Departments of Government in order to remove the cultivator's prejudices and there is said now to be an increasing demand for most classes of mill cake.

Tea.

Among plantation crops in India tea is the most important. The indigenous tea plant, growing in a wild condition was first discovered in Assam about 1820. It soon drew the attention of the East India Company, which after some enquiries started an experimental garden in 1835. After working for five years it was handed over to the Assam Company. It may be

said, however, that the foundations of the present tea industry were laid between 1856 and 1859. Since the latter date the growth of the industry has been phenomenal and "in less than a hundred years the British Empire has become the tea garden and tea shop of the world."

The following table shows the growth of the industry since 1875

Progress of the Industry

| Year | Area under tea in 000 acres | Production in 000,000 lbs | Year | Area under tea in 000 acres | Production in 000,000 lbs |
|---------------------|-----------------------------|---------------------------|------|-----------------------------|---------------------------|
| 1875-1880 (average) | 173 | 34 | 1920 | 654 | 322 |
| 1880-84 | 241 | 57 | 1925 | 672 | 335 |
| 1885-89 | 307 | 90 | 1926 | 679 | 364 |
| 1900-1904 | 500 | 195 | 1927 | 690 | 361 |
| 1910 | 583 | 249 | 1928 | 702 | 372 |
| 1915 | 694 | 352 | 1929 | 712 | 401 |

It will be seen from the above table that during the last fifty years while the area under tea has risen by over 300 per cent the production has increased more than ten times. Assam and Bengal are the two most important centres of the tea industry in India. Assam alone accounting for more than half the total production.

The following table shows the various centres of the industry in the country and their relative importance —

| Provinces | Area under crop '000 acres | Production '000 lbs | Average daily working strength (permanent and temporary) |
|----------------------------|----------------------------|---------------------|--|
| Assam — | | | |
| Surma Valley | 145 | 73,784 | 156,489 |
| Assam Valley | 285 | 185,157 | 400,995 |
| Total | 430 | 258,941 | 557,484 |
| Bengal — | | | |
| Darjeeling | 61 | 23,009 | 65,522 |
| Jalpaiguri | 128 | 85,427 | 125,032 |
| Chuttagong | 6 | 1,517 | 5,745 |
| Total | 195 | 109,953 | 196,899 |
| Madras — | | | |
| Nilgiris | 32 | 11,403 | 30,759 |
| Malabar | 13 | 6,493 | 12,832 |
| Coimbatore | 22 | 9,700 | 27,217 |
| Others | * | 34 | 44 |
| Total | 67 | 27,630 | 70,852 |
| Coorg | * | 169 | 620 |
| Punjab | 10 | 1,930 | 10,995 |
| United Provinces | 6 | 1,489 | 3,871 |
| Bihar and Orissa | 4 | 853 | 2,902 |
| Total British India | 712 | 400,965 | 843,623 |
| Indian States | 77 | 32,033 | 86,849 |
| Total India | 789 | 432,998 | 930,472 |

* Less than 500 acres

Although India produces such large quantities of tea its consumption of tea is comparatively very little, about 57 million lbs as compared with 421 million lbs in the United Kingdom and the consumption per head is only 18 lb as compared with 9.20 lbs in the United Kingdom.

The low domestic consumption however enables India to export large quantities to other countries the principal among which is the United Kingdom. It is estimated that India supplies about 40 per cent of the world demand of this commodity.

The following table explains briefly the position as regards the *export of tea from India* —

| Year | Amount exported
(million of lbs.) | Value in lakhs
of rupees | (Col 3 as
percentage of
value of total
exports) |
|---------|--------------------------------------|-----------------------------|--|
| 1 | 2 | 3 | 4 |
| 1926-27 | 349 | 29.04 | 9 |
| 1927-28 | 362 | 32.48 | 10 |
| 1928-29 | 360 | 26.60 | 8 |
| 1929-30 | 377 | 26.01 | 8 |

The following figures show the proportion of exports of tea from India by sea sent to different parts of the world to the total exports —

| | 1928-29
per cent | 1929-30
per cent |
|-------------------|---------------------|---------------------|
| To United Kingdom | 83.0 | 84.2 |
| To Rest of Europe | 2.0 | 2.2 |
| To Asia | 5.8 | 3.8 |
| To America | 5.7 | 5.8 |
| To Australia | 1.6 | 1.3 |
| To Africa | 1.9 | 2.7 |
| | 100 | 100 |

A considerable quantity of Indian tea imported into the United Kingdom is normally re-exported to other foreign countries.

The year 1931 was one of the most critical through which the tea industry has passed since its early difficulties. From 1923 to 1927 the prices obtained for tea were good, but in 1928 a decline set in, and in 1929 and 1930 prices fell further still. The price of Indian common tea particularly fell more than that of others. While as compared to 1923, 'all tea' fluctuated in the London market within a range of 25 per cent, Indian common tea fell by about 50 per cent.

The following table gives the average wholesale prices of tea in Mincing Lane from 1922-30, in Pence per lb.

The fall in tea prices greatly affected the profits of tea companies. The following table which shows the profit per acre of 65 tea companies gives an idea of the effect on profits of the fall in prices.

Profit per Acre of 65 Indian Tea Companies

| | 1913 | 1924 | 1928 | 1929 |
|--------------------------------|----------|----------|----------|---------|
| Average profit per mature acre | £ 6-10-7 | £ 15-2-0 | £ 10-0-0 | £ 6-9-0 |
| Average profit in pence per lb | 2.6 | 6.4 | 3.84 | 2.26 |
| Average crop per mature acre | 599 lbs | 560 lbs | 625 lbs | 684 lbs |

Average Wholesale Prices of Tea, in Mincing Lane, 1922-30, in Pence per lb.

| Year | North
India | South
India |
|------|----------------|----------------|
| 1922 | 15.46 | 14.00 |
| 1923 | 18.76 | 18.14 |
| 1924 | 19.92 | 19.02 |
| 1925 | 17.68 | 17.62 |
| 1926 | 19.36 | 19.00 |
| 1927 | 19.01 | 18.88 |
| 1928 | 16.49 | 15.40 |
| 1929 | 15.72 | 15.35 |
| 1930 | 14.69 | 14.52 |

The following table shows the variations in the average prices of Indian tea sold at auction sales in Calcutta and the index numbers of these prices with base 1901-02 to 1910-11 100.

| | Average price at
auction sales | |
|--------------------|-----------------------------------|------------------|
| | Price
per lb | Index
Number. |
| 1901-02 to 1910-11 | As p
6.0 | 100 |
| 1927-28 | 14.10 | 247 |
| 1928-29 | 11.4 | 189 |
| 1929-30 | 9.11 | 165 |

taking allowance for the re-exports from India of imported Coffee, the consumption of coffee in India in 1930 was approaching four times the amount consumed in 1925

The daily average number of persons employed in the Coffee plantations in 1929-30 was returned as 92,504 of whom 55,972 were permanently employed and 36,532 temporarily employed as compared with 94,865 persons (44,744 garden labour and 19,094 outside labour permanently employed and 31,027 temporary outside labour) in 1928-29. The general trade depression did not fail to

affect the coffee industry but in addition to the general slump in trade there was an additional factor which depressed coffee prices and this was the exceptionally heavy crops of Brazilian Coffee. Since the year 1925 there has been a general downward trend in Coffee prices but until the end of 1929 the fall was comparatively slow, but since then it has been very rapid. This will be clearly seen from the fact that while the average wholesale price of Indian Coffee in London was 140 in 1923 and 127s in 1929 it fell to 80s in 1930.

INDIAN TOBACCO

The tobacco plant was introduced into India by the Portuguese about the year 1605. As in other parts of the world, it passed through a period of persecution but its ultimate distribution over India is one of the numerous examples of the avidity with which advantageous crops or appliances are adopted by the Indian agriculturist. Five or six species of tobacco are cultivated, but only two are found in India, namely, *N. Tabacum* and *N. rustica*. The former is a native of South America, and is the common tobacco of India. About the year 1829 experiments were conducted by the East India Company towards improving the quality of leaf and perfecting the native methods of curing and manufacturing tobacco. These were often repeated, and gradually the industry became identified with three great centres, namely, (1) Eastern Bengal and Northern Bengal (more especially the district of Rangpur), (2) Madras, Trichinopoly, Dindigul, Coconada and Calicut in Southern India, and (3) Rangoon and Moulmein in Burma. Bengal is the chief tobacco growing Province, but little or no tobacco is manufactured there. The chief factories are near Dindigul in the Madras Presidency, though owing to the imposition of heavy export duties on the foreign leaf used as a cigar wrapper, some cigar factories have been moved to the French territory of Pondicherry.

The question of improving the quality of Indian tobaccos has received the attention of the Botanical section of the Agricultural Research Institute, Pusa, and three Memoirs have been published recording the results of investigations in that direction. The immediate problem at Pusa is the production of a good cigarette tobacco. Many attempts have been made in the past to introduce into India the best varieties of cigarette tobacco from America, but the results have been disappointing. It is now hoped to build up by hybridization new kinds of tobacco, suited to Indian conditions of growth, which possess in addition the qualities necessary to obtain a better price.

Area under Cultivation—The cultivation of tobacco is very widespread in Burma. The two main varieties are called "Burmese tobacco" and "Havana tobacco". Of the Burmese tobacco there are two main varieties, 'Siywet-gyi', the large-leaved variety and 'Seywet-gyun', a smaller-leaved variety with

pointed leaves. The former yields a heavier crop, but the latter gives better quality. There is always a great demand on the market for both the Havana and the Burma tobacco. The smooth leaves of the Havana plant are used for the wrappers and the coarser Burmese leaf for the filling.

The most important tobacco tracts in British India are—(i) the Coimbatore and Dindigul tract of Madras, where the *Usi-Kappal* and *Wara Kappal* varieties are largely grown, the former supplying the Trichinopoly cigar, (ii) the Godavari Delta of Madras, (iii) the Rangpur tract of Bengal, (iv) the Districts of Bihar and Orissa, (v) Guzerat in Bombay and (vi) the delta tract of Burma.

The season for harvesting varies in different localities ranging from December to June, but the bulk of the crop is harvested during the months of February, March and April. The leaves when quite dry, are assorted and placed in heaps in stacks to ferment. They are then tied into bundles of 25 or 30, a useless leaf being employed for tying each bundle. The leaves are laid perfectly flat, the bundles being fan-shaped. In this condition they are baled, the broom-like ends projecting outwards. By varying the degree of fermentation of the leaves different qualities of tobacco are obtained. A black variety is used in India for cake tobacco, and this is the most common product, but a certain amount of yellow leaf is grown for cigar making.

Exports—Exports of unmanufactured tobacco rose from 26 million lbs during 1929-30 to 28 million lbs in 1930-31, but owing to the fall in prices the value dropped from Rs 99½ lakhs to Rs 96½ lakhs. The bulk of the shipments were as usual from Madras, which raised its exports by 1½ million lbs. Bengal and Bombay also increased their contributions but those from Burma shrank substantially. The United Kingdom continues to be India's best customer and in 1930-31 took ten million lbs. Owing to the preference accorded to Empire grown tobacco, there has been a remarkable increase in the use of Indian tobacco in the United Kingdom although there is yet room for further improvement in the direction of curing, packing and grading of the Indian leaf. Before the war the average exports of unmanufactured tobacco from India to the United Kingdom amounted to 135,000 lbs only.

The Opium Trade.

Mention opium and half the Western world directs its thought to India, as though India were a most unscrupulous producer of the most noxious drug on earth. Refer to the League of Nations' proceedings in regard to opium and again, mainly under the leadership of American representatives, one finds India and the Government of India held up to humanity as traffickers in opium and as thereby obstacles to making the world a better place to live in. In fact, neither India nor the Government of India has anything to be ashamed of in its opium history. Whatever may be the case in other countries, centuries of inherited experience have taught the people of India discretion in the use of the drug and its misuse is a negligible feature in Indian life. Abuse of its properties is rarer in India than the abuse of alcohol in Western countries. So much for the internal position.

The record as regards exports is equally clean. India has never driven hard bargains to secure the sale of the product overseas. Where it has been bought the reason is its superiority over other supplies because of the stringent regulations by which its manufacture has always, under the British authorities, been regulated in India, in order to secure the purity and cleanliness of the finished product. Directly any importing country has expressed a desire to have the trade reduced, the Government of India have responded by stiffening their restrictions on export. There have, in recent years, mainly at the instance of America, been numerous International conferences with a view to making opium and drugs derived from it more difficult to obtain and in every case it has been found that India had already given the lead in the special regulations which it was proposed to lay down.

The China Trade—The classic case of Indian restriction of her export opium trade is provided by China. There is a long history of Indo-Chinese negotiations on the subject, but it is unnecessary to go further back into these than 1911. On 8th May of that year, there was drawn up between India and China an agreement under which the Government of India assented to (1) the payment of an import duty three times the existing amount in return for the promised abolition of provincial taxes, (2) the partial closure of China to Indian opium by provinces, including not only stoppage of transit passes, but also treaty port closure, Shanghai and Canton excepted, (3) the total extinction of trade before 1917 on proof of total cessation of opium production in China, and (4) revision of the agreement on due notice by either party. This agreement, as its terms indicate, was on the side of China the outcome of a professed desire to stamp out the opium trade and opium consumption in her midst. And on her side China, in the agreement, undertook, among other things, to reduce production in China *par passu* with the reduction of exports from India.

In addition to the limit to the China trade imposed by the agreement, the Government of India undertook in order to lessen the danger of smuggling into China, and as an earnest of their desire to assist that country, strictly to

confine the remainder of Indian opium export to the legitimate demands of the non-China markets. A figure was elaborately calculated for these markets and India drastically cut her non-China exports down to it. In 1911. In subsequent years she progressively reduced the permissible export limit and in 1913 she stopped exports to China altogether.

The financial sacrifice thereby undertaken by India in order to help the Chinese in their professed desire for reform amounted to many millions sterling a year. China never carried out her side of the bargain. She is still demonstrably the greatest opium producing country in the world and the only effect of the reduction, and eventual abolition of imports from India is better trade for Chinese opium producers and merchants and largely increased imports of opium into China from Persia and Turkey.

Agreements observed by India—The Government of India have carried out to the letter their side of the 1911 agreement. They have gone further. Not only were exports to China stopped and exports to non-China countries in the last limited in accordance with the agreement with China, but exports to non-China countries have, on the voluntary initiative of India, been subjected to successive restraining agreements with the countries concerned. The Government of India introduced, with effect from 1st January 1923, a certificate system recommended by the League of Nations, whereby all exports of opium must be covered by certificates from the Government of the importing country that its consignment is approved and is required for legitimate purposes. The pressure exerted by the League of Nations in this regard was not pressure upon the Government of India but upon the Governments of the importing countries and, so far as India was concerned, the new system was welcomed because it removed from the shoulders of the Government of India all responsibility in regard to opium consumption in the importing countries and laid it upon their own respective Governments. In 1926, in order to fulfil the spirit of her international agreements India decided, though she was in no way bound by their letter to do so, to reduce her exports to Far Eastern countries for other than medical and scientific purposes by 10 per cent yearly, so as to extinguish them altogether by December 1935, and effect has been given to that policy at considerable financial sacrifice. India is the only country that has made any considerable sacrifices of the kind.

International Aspect of the Problem—It was only during the processes and negotiations by which the Indian opium export trade to China was being suppressed that the Opium question began to assume a widely international aspect. This happened on the initiative of the U.S.A., at whose instance an International Opium Commission met at Shanghai in 1909 and formulated a series of recommendations for the suppression of opium smoking and the regulation of the use of opium and morphia. The United States thereafter advanced a further proposal for an International Conference at the Hague. This met on 1st December 1911,

treasured household medicine of the people, to whom qualified medical assistance is inaccessible. It is also taken as a sedative, as a tonic and as a restorative to lessen or avert fatigue and in other ways in which, when moderately used it is relatively innocuous.

Present Policy—The current attitude and policy of the Government of India were lately explained in their behalf to the League of Nations at Geneva. Their representative declared that any genuine measure of reform initiated by a Provincial Minister in connection with it would receive encouragement and support from the Central Government and showed that the policy of that Government is, and has been, one of non-interference with the moderate use of raw opium, whether the object of the consumer be some real or supposed physical benefit or merely the indulgence of the almost universal desire of human beings, particularly those whose occupations involve exposure or severe bodily exertion, for a stimulant or narcotic. Excessive indulgence it is and always has been the desire of Government to express.

Opium is under the current Indian constitution a Provincial Transferred Subject. Nevertheless, owing to the jealous watching and criticism by observers in every continent, the Government of India called an official All-India Conference, which was opened at Simla by Lord Irwin, on 5th May 1930, to consider the question of certain areas where opium consumption was alleged to be unduly high. This followed on the prosecution of special provincial inquiries by committees set up by the Local Governments at the special instance of His Majesty's Government. The Conference, after an exhaustive discussion of the phenomena presented by the various areas selected for investigation, and in the light of the personal knowledge of the representatives of the different Provinces and of the reports of the local committees, concluded that it appeared that certain parts of Assam and Calcutta might correctly be regarded as having excessive consumption and that Orissa and the Ferozepore District of the Punjab might be held to provide cases for further inquiry. In other cases the Conference considered that there was no evidence of prevalent excess. But they gave a series of examples to show that there were simple explanations showing harmless causes for what appeared to be excessive consumption in many places.

While speaking at the Second Geneva Opium Conference on 10th January 1925, Lord Cecil stated that he had seen figures apparently taken from a report made by the United States Treasury, to the effect that consumption was greater in America than in India. The estimate framed by the Advisory Committee of the League of the annual requirements of opium for strictly medicinal and scientific purposes is 600 milligrammes or 0.25 grains per capita which is roughly equivalent to 6 Indian seers per 10,000. The Health Committee of the League opined that this could be reduced to 450 milligrammes, or 0.94 grains in countries possessing a well developed medical service. The consumption per capita in British India during 1924-25 worked out at 17.2 grains per head. The rate of consumption has certainly fallen since the compilation of this published figure. The amount includes veterinary uses and these are extensive, though to secure statistics of the quantity of opium given to animals is impossible. Allowance also has to be made for the poor morphine content of Indian opium, which is about 9 per cent at 90 deg consistence, and the limited number of medical practitioners trained on Western lines to administer strictly measured doses. Lord Cecil's statement at the League of Nations was received with extreme criticism by Mr Porter of the American delegation. Mr Porter said the American statistics cited had been disavowed and that Lord Cecil's observations were a "vile slander upon the people of the United States." Lord Cecil apologised and withdrew his statement. But Mr Frederick Wallis, Commissioner of Correction, New York, writing in the *Current History Magazine* for February, 1925, showed the annual per capita consumption in Italy to be one grain, in Germany 2 grains, in England 3 grains, in France 4 grains and in the United States 36 grains. In "Current History" for March, 1925, Mr Wallis defended this last figure and said that in view of the smuggling into the United States "it would appear to me that the consumption would be much larger than the Government officially gave as 36 grains."

Opium policy has on several occasions during the past few years come under discussion in the Central Indian Legislature and in regard to it the Government of India and the non-official members of the Legislature have been in accord.

GLASS AND GLASSWARE

The imports of glass and glassware in 1930-31 showed, in common with other articles, a heavy decline compared with the previous year, receding in value from Rs 2,52 lakhs to Rs 1,46 lakhs. Japan continues to occupy the foremost position in the trade with Czechoslovakia next. Details appear in the Exports Section of the Year Book.

Manufacture of Glass in India—Glass was manufactured in India in centuries before Christ and Pliny makes mention of "Indian Glass" as being of superior quality. As a result of recent archaeological explorations, a number of small crude glass vessels have been discovered indicative of the very primitive

stage of the industry. But no further traces of ancient Indian Glass Industry as such survive, yet, it is certain that by the sixteenth century it was an established industry producing mainly bangles and small bottles. The quality of the material was inferior and the articles turned out were rough. Beyond this stage the industry had not progressed until the nineties of the last century. Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this line. Since then a number of concerns have been started, a number of them have failed, while some are still clinging to life owing to war conditions. They mainly devote themselves to the manufacture

of bangles and lampware side by side with bottle-making on a small scale. This, therefore, is the criterion which determines the two well-defined classes of the industry in its present stage, (1) indigenous Cottage Industry and (2) the modern Factory Industry.

(1) The indigenous Cottage Industry which is represented in all parts of the country, but has its chief centres in Ferozabad District of U. P., and Belgaum District, in the South, is mainly concerned with the manufacture of cheap bangles made from glass cakes or blocks made in larger factories. The industry is at present in a flourishing state and supplies nearly one-third of the Indian demand for bangles. The quality has been improved by the discovery of new glazing processes and for the present the turnover in this line has gone up to 20 lakhs of rupees a year. But these bangles have now to face a very hard competition from Japan whose "silky" bangles are ousting the old type Indian ones.

(2) The modern Factory type of organization of this industry is just in its infancy at present. The existing factories either stop at producing glass cakes for bangles as in Ferozabad or simple kind of lampwares and bottles. With the existing state of knowledge and machinery in India they can neither produce sheet and plate glass, nor do they pretend to manufacture laboratory or table glass. Artistic glassware is out of the question and the private capitalists who have to run their concerns mostly with commercial ends do not think it worth their while to spend money and labour on it. War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, etc., and in order to meet the Indian demand for them new factories were started and old revived which produced only cheap and simple kind of lampware and bottles on small scale. The total production of these Indian Glass Works has not been exactly estimated, but it is generally supposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware. There are at present 14 factories engaged in the production of lampware, of which two or three only produce bottle and carboys also. The chief centres for the former kind are Bombay, Jubbulpore, Allahabad and Bijnor and Ambala, while bottles are only manufactured at Naini and Lahore, and recently at Calcutta.

During the later years of the war period a number of Glass Works were opened in the Bombay Presidency and adjoining districts local manufacture having been stimulated by the cessation of imports of German, Austrian and Belgian glass.

Causes of failure—Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventable causes, prominent among which were (1) Lack of enlightened management (2) Lack of proper

commercial basis, as in some cases the proprietors had a number of other more larger concerns to look to (3) Bad selection of site. An ideal site for a Glass Factory would be determined by the (a) nearness of quartz and fire-clay, (b) nearness of fuel, and (c) by the nearness of market. At least two must be present. In some concerns, two were absent. (4) Specialisation was lacking, some factories in their initial stages trying to manufacture three or four different kinds of glassware simultaneously like lampware, bottles, and bangles, etc. (5) Paucity of sufficient fluid capital for initial expenses for machinery or other improvements or even in some cases for running the concern in the beginning.

But beyond these there are certain real and special causes that contributed to the failure of some of these and hinder the progress of the rest. Chief among them are (1) The industry is in its infant stage and hence such failures are but incidental. (2) No expert guidance in this line, there is a lack of men and good literature. (3) Paucity of skilled labour of higher type. The present Indian workmen in this line and blowers are few in number and illiterate. They, therefore, master the situation and are unamenable to management. (4) Heavy cost of good fuel, the works usually being situated where good sand and quartz can be obtained, and consequently, in most cases, at a great distance from the coal-fields. (5) To a certain extent, competition from Japan and European countries.

Alkali used is almost entirely of English manufacture being Carbonate of Soda 98-99% in a powdered form. This alkali has almost completely taken place of the various Alkaline Earths formerly employed by the Glass Bangle manufacturers as the latter cannot be used in the manufacture of glass which is to compete with the imported article. These points must be carefully noted for future guidance.

The industry developed considerably under war conditions, but in peace times, in this transition stage, immediate efforts must be made in the direction of what the Indian Industrial Commission say in their Report (Appendix E) viz. "The Glass industry, even in its simplest form is highly technical and can be efficiently carried on only by scientifically trained managers and expert workmen. The present stage has been reached by importing men, only partially equipped with the necessary qualifications, from Europe and Japan, and by sending Indian students abroad to pick up what knowledge they can. The glass industry is a closed trade and its secrets are carefully guarded, so that the latter method has not proved conspicuously successful."

Bibliography—Indian Industries Commission Report (Appendix), Indian Munitions Board, Industrial Handbook, etc. "Notes on Glass Manufacture" By C. S. Fox. (Bulletin No. 29 of Indian Industries and Labour, 1922.)

HIDES, SKINS AND LEATHER.

India's local manufactures of skins and leather have steadily increased in recent years. Previous to the outbreak of war, the trade in raw hides in this country was good, there was a large demand for hides, and prices ruled high. On the declaration of war, the trade which had up till then been brisk was seriously dislocated. Exports to enemy countries especially to the great emporium of Indian hides, Hamburg, were stopped, and exporters had to find new markets for the raw material. The raw hide business of India had up to that time been largely, if not quite entirely, in the hands of German firms or firms of German origin and Germany had the largest share of India's raw hides. In the four months before the outbreak of war she took 39 per cent of the total exports. In 1912-13 she took 32 per cent and in 1913-14, 35 per cent. Germany still takes the major share of India's raw hides while America takes the bulk of goat skin exports. Shipments of tanned hides go mostly to Great Britain.

The trade in hides and skins slumped heavily in 1930-31, exports falling from Rs 10.04 lakhs in value in 1929-30 to Rs 11.74 lakhs. Details are given in the Export Section of the Year Book.

Conditions of the Trade.—The trade in hides and skins and the craft in leather manufacture are in the hands either of Mahomedans or of low caste Hindus, and are on that account participated in by a comparatively small community. The traffic is subject to considerable fluctuations concomitant with the vicissitudes of the seasons. In famine years for instance the exports of untanned hides rise to an abnormal figure. The traffic is also peculiarly affected by the difficulty of obtaining capital and by the religious objection which assigns it to a position of degradation and neglect. It has thus become a monopoly within a restricted community and suffers from the loss of competition and popular interest and favour.

Uses of Indian Hides.—The fifteenth report of the Imperial Economic Committee states that Indian hides, both raw and partially tanned, are largely used for the upper leather of boots, partially tanned skins are used for fancy leather articles, bookbinding and for covering the small rollers used in cotton mills for drawing the thread. Raw sheepskins are used for similar articles and also for gloves. They are exported mostly to Germany, France and Italy. Raw goatskins are used almost entirely in the manufacture of glace kid, of which commodity the United States is the chief producer. Eighty-five per cent of exports of Indian raw goatskins are sent direct to the United States. The consumption of glace kid in the United Kingdom has remained stationary during the last five years none the less production up to 1928 increased somewhat and exports have slightly grown.

The chief markets for Indian raw hides are in Central and Southern Europe, Hamburg being an important distributing centre. Directly after the war an effort was made to direct more of this trade to the United Kingdom, but it has drifted back to Germany. The assortment and grading of raw hides exported from Calcutta before the war, largely the result of the work of German firms established there, had reached a

high standard. After the war the trade became somewhat disorganised from a variety of causes, among which may be cited fiscal changes, the entry into the trade of new and at first inexperienced firms, the increased cost of arranging for supervision at up country points. It has, however, been recovering its reputation.

Protecting the Industry.—The report of the Industrial Commission pointed out that the principal difficulty at present in the hides and leather industry was the lack of organisation and expert skill. Government action to foster the industry was first taken in September 1919, when a Bill was introduced in the Imperial Legislative Council further to amend the Indian Tariff Act, 1894. The effect of this Bill was officially described as follows: "It is to impose an export duty of 15 per cent on hides and skins with a rebate of 10 per cent on hides and skins exported to other parts of the Empire, and there tanned. Its object is to ensure that our hides and skins shall be converted into fully tanned leather or articles of leather so far as possible in India and falling this in other parts of the Empire, instead of being exported in a raw state for manufacture in foreign countries." Sir George Barnes who was in charge of the Bill and described the tanning industry as one of the most promising Indian industries explained that "the present position is that we have in India at the present time some hundreds of tanneries for the tanning of hides, a large number of which have come into existence in order to satisfy military requirements during the war. We have in fact the foundations of a flourishing tanning industry, but there is reason to fear that it may tend to dwindle and disappear with the diminution of military requirements, if some other support is not given. We want to keep this industry alive, and we believe that in this case protection in the shape of a 15 per cent. export duty is justifiable and ought to be effective. It is clearly just also that the same measure of protection should be extended to the tanners of skins whose business, as I have already stated, was injured by the necessities of the war. Though Indian tanneries have enormously increased in number during the past three years, they can only deal with a comparatively small proportion of the raw hides and skins which India produces, and it is to the advantage of India and the security of the Empire generally that this large surplus should, so far as possible, be tanned within the Empire, and with this end in view the Bill proposes a 10 per cent rebate in respect of hides and skins exported to any place within the Empire. I should add that it is proposed to limit by notification the benefit of this rebate to hides and skins actually tanned within the Empire, and Indian hides and skins re-exported from an Empire port for the purpose of being tanned abroad will not be entitled to any rebate."

Indigenous methods.—India possesses a large selection of excellent tanning materials such as Acacia pods and bark, Indian sumach, the Tanner's cassia, Mangroves, and Myrabolams. By these and such like materials and by various methods and contrivances, hides and skins are extensively cured and tanned and the leather worked up in response to an immense, though purely local, demand.

INDIAN INVENTIONS AND DESIGNS.

A handbook to the Patent Office in India which is published by the Government Press, Calcutta, gives the various Acts, rules, and instructions bearing on the subject together with hints for the preparation of specifications and drawings, hints for searchers and other valuable information that has not hitherto been readily accessible to the general public in so convenient a form. In the preface the Controller of Patents and Designs explains the scope of the Patent laws in India and indicates where in they differ from English law and procedure.

The foundation of patent legislation throughout the world lies in the English Statute of Monopolies which was enacted in 1623, the 21st year of King James the First. In part this Act has been repealed, but the extant portion of the more important section 6 is as follows — "Provided also that any declaration before mentioned shall not extend to any letters patent and grants of privilege for the term of fourteen years or under, hereafter to be made of the sole working or making of any manner of new manufactures within this realm to the true and first inventor and inventors of such manufactures, which others at the time of making of such letters patent and grants shall not use, so as also they be not contrary to the law nor mischievous to the State by raising prices of commodities at home, or hurt of trade, or generally inconvenient, the said fourteen years to be accomplished from the date of the first letters patent or grants of such privilege hereafter to be made, but that the same shall be of such force as they should be if this Act had never been made, and of none other."

The existing Indian Patent Law is contained in the Indian Patents and Designs Act, 1911 supplemented by the Indian Patents and Designs (Temporary Rules) Act 1915 and by the Rules made under those Acts. The Patent Office does not deal with trade mark or with copyright generally in books, pictures, music and other matters which fall under the Indian Copyright Act III of 1914. There is, in fact, no provision of law in British India for the registration of Trade Marks which are protected under the Merchandise Marks Act (IV of 1889) which forms Chapter XVIII of the Indian Penal Code.

On the whole, Indian law and procedure closely follow that in the United Kingdom for the protection of inventions and the registration of designs, as they always have done in matters of major interest. One main difference exists, however, as owing to the absence of provision of law for the registration of trade marks, India cannot become a party to the International Convention under which certain rights of priority are obtainable in other countries.

The first Indian Act for granting exclusive privileges to inventors was passed in 1856, after an agitation that had been carried on fitfully

for some twenty years. Difficulties arising from an uncertainty as to the effect of the Royal Prerogative prevented earlier action, and, owing to some informalities the Act itself was repealed in the following year. In 1859 it was re-enacted with modifications, and in 1872 the Patterns and Designs Protection Act was passed. The protection of Inventions Act of 1883, dealing with exhibitions, followed, and then the Inventions and Designs Act of 1888. All these are now replaced by the present Act of 1911.

The existing Acts extend to the whole of British India, including British Baluchistan and the Santhal Parganas. This of course includes Burma, but it does not embrace the Native States. Of the latter three, viz., (1) Hyderabad (Deccan), (2) Mysore, (3) Gwalior have ordinances of their own for which particular mention is made in the Indian Patent Office in Calcutta. The object of the Act of 1911 was to provide a simpler and more direct, and more effective procedure in regard both to the grant of patent rights and to their subsequent existence and operation. The changes made in the law need not here be referred to in detail. They gave further protection both to the inventor, by providing that his application should be kept secret until acceptance, and to the public, by increasing the facilities for opposition at an effective period. At the same time a Controller of Patents and Designs was established, with power to dispose of many matters previously referred to the Governor-General in Council, and provision was made for the grant of a sealed "patent" instead of for the mere recognition of an "exclusive privilege." The provisions of the Act follow with the necessary modifications those of the British Inventions and Designs Act of 1907.

New Legislation.—Important amendments have been made in the Indian Patents and Designs Act since 1911, the most important being the priority given to Indian Inventors over others to apply for British patents within 12 months from the date of the Indian application. Similarly an applicant for a British patent has priority over other applicants in India for 12 months from the date of his British application.

Part I (Patents) of the Act of 1911 has been further amended by Act VII of 1936 and includes the following:

If an Application comprises more than one invention the additional inventions may be made the subject matter of additional applications bearing the same date as the original application.

The term of the Patent will be 16 years instead of 14 years.

Insurance in India.

According to the report by Mr. N. Mukherji, Actuary to the Government of India, contained in the Indian Insurance Year Book, 1930, the number of companies subject to the provisions of the Indian Life Assurance Companies Act of 1912 and the Indian Insurance Companies Act of 1928 is 257, of which 108 companies are constituted in India and 149 companies are constituted outside India. Of the 108 Indian companies, 46 are established in the Bombay Presidency, 20 in Bengal, 10 in the Madras Presidency, 12 in the Punjab, 4 in Delhi, 2 each in the United Provinces and the Central Provinces, 1 in Ajmer and 2 in Burma. Of the 149 non-Indian companies, 72 are constituted in the United Kingdom, 30 in the British Dominions and Colonies, 10 in the Continent of Europe, 13 in the United States of America, 10 in Japan and 5 in Java.

Most of the Indian companies carry on life assurance business only. They are 71 in number and of the remaining 37 Indian companies, 18 carry on life business along with other insurance business and 19 carry on insurance business other than life. As regards non-Indian companies, most of them carry on insurance business other than life. Out of the total number of 149 non-Indian companies, 125 carry on insurance business other than life, 9 carry on life business only and 15 carry on life business along with other insurance business. Of the latter 24 companies, 17 are constituted in the United Kingdom, 6 in the British Dominions and Colonies and 1 in Germany.

The total new life assurance business effected in India during 1929 amounted to 143 thousand policies assuring a sum of 28½ crores and yielding a premium income of 1½ crore, of which the new business done by Indian companies amounted to 103 thousand policies assuring a sum of about 16½ crores and having a premium income of nearly a crore. The share of the British companies in respect of new sums assured is 4½ crores, of the Dominion and Colonial companies about 7½ crores and of the single German company ¼ crore.

The average sum assured under the new policies issued by Indian companies is Rs. 1,628 and under those issued by non-Indian companies Rs. 3,086 and the average annual premium per Rs. 1,000 sum assured is Rs. 55 in the case of Indian companies and Rs. 57 in the case of non-Indian companies.

The total life assurance business effected in India and remaining in force at the end of 1929 amounted to 650 thousand policies assuring a total sum of 142 crores including reversionary bonus additions and having a premium income of 7-1/3 crores. Of this the share of Indian companies is represented by 472 thousand policies assuring a sum of 78 crores and having a premium income of nearly 4 crores.

Most of the Indian companies now transact life assurance business on the select life principle but there are still some which carry on business on the **dividing plan** under which the sum assured is not fixed but depends on the division of a portion of each year's premium income amongst the claims arising in that year. This form of life assurance business is unsound. Before the Act of 1912 was passed there were numerous companies which transacted life assurance business on the dividing plan and most of them came to grief. Of such companies which were in existence at the time of the passing of the Act the majority have disappeared and some have stopped issuing policies on the dividing plan. A few new companies have taken up this dividing insurance business and it will not be long before they realise their mistake.

Some Indian life offices have extended their operations outside India, mostly in British East Africa and in the Near East. The total new sums assured by these offices outside India in 1929 amounted to about a crore and the average sum assured under each policy was Rs. 2,848.

A striking feature of the Indian companies is the almost negligible amount of business done by them under **annuity contracts**, while in the case of the non-Indian companies annuity contracts constitute an appreciable portion of their total life assurance business. Even the small amount of annuity business the Indian companies were getting in the past is gradually decreasing. Evidently annuity contracts have not yet found favour with Indians in general.

The life assurance business of Indian companies has steadily increased during the last ten years. The following table shows the new business effected since 1920 in each year and the total business remaining in force at the end of the year.

| Year | New business written during the year | Total business remaining in force at the end of the year |
|------|--------------------------------------|--|
| 1920 | 5,17 lakhs | 31 crores |
| 1921 | 5,47 " | 34 " |
| 1922 | 5,64 " | 37 " |
| 1923 | 5,85 " | 39 " |
| 1924 | 6,89 " | 42 " |
| 1925 | 8,15 " | 47 " |
| 1926 | 10,35 " | 53 " |
| 1927 | 12,77 " | 60 " |
| 1928 | 15,41 " | 71 " |
| 1929 | 17,29 " | 82 " |

The net income of the Indian companies under their life assurance business from premiums and interest amounted to 17½ crores in 1929 and was in excess of 2½ crores over the corresponding income of the previous year. Claims amounted to 12½ crores and exceeded the previous year's figure by 1 crore. Claims by death showed an increase of 8½ lakhs and claims by survivorship of 1½ lakhs. For the first time during 1929 claims by survivorship were larger than claims by death.

The life assurance funds increased by over 1½ crores during 1929 and amounted to 1½ crores

at the end of that year. The average rate of interest earned on the life funds during the year was nearly 5½ per cent as against 5 1/3 per cent realised in the previous year.

The Post Office Insurance Fund was instituted by the Government of India in 1883 for the benefit of the postal employees but gradually admission to it has been thrown open to almost all classes of Government servants who are employed on civil duties.

The following are some of the important particulars relating to the business of the Fund during the two years 1929 and 1930 —

| Year ending 31st March | New business effected during the year | | Total business remaining in force at the end of the year | | Total income | Life Assurance fund at the end of the year |
|------------------------|---------------------------------------|--------------------|--|--------------------------------|--------------|--|
| | Number of policies | Total sums assured | Number of policies | Total sums assured and bonuses | | |
| 1929 | 7,582 | 1,43,41,000 | 61,474 | 13,02,47,000 | 63,17,000 | 3,64,44,000 |
| 1930 | 8,591 | 1,49,56,000 | 71,179 | 14,17,81,000 | 69,36,000 | 4,02,80,000 |

Fire, Marine and Miscellaneous Insurance Business. The net Indian premium income of all companies under insurance business other than life assurance during 1929 was nearly 3 crores of which the Indian companies' share was over ½ crore and that of the non-Indian companies nearly 2½ crores. The total amount is composed of—

1,55 lakhs from fire,
68 lakhs from marine, and
76 lakhs from miscellaneous insurance business.

The Indian companies received—
23 lakhs from fire,

11 lakhs from marine, and
18 lakhs from miscellaneous insurance business.

The total assets of Indian companies amount to 25 crores of which the stock exchange securities form the bulk. These securities are shown in the accounts at a net value of 18 crores. Loans on policies and mortgages are shown at 2½ crores. Land and house property are valued at 1½ crore. Deposits, cash, stamps, etc. are shown at 1½ crore. Agents' balances and other outstanding items at 1 crore, and loans on personal security and other miscellaneous assets at ½ crore. Over half a crore of the total assets of the Indian companies is invested outside India.

Customs Tariff.

General import duties are levied for fiscal purposes and not for the protection of Indian industries. But the tariff has been modified with a view to admitting free or at favourable rates articles, the cheap import of which was considered necessary in the interests of the country. Thus certain raw materials, manures, agricultural implements and dairy appliances are admitted free. Machinery, printing materials, etc., are assessed at 2½ per cent and iron and steel railway material and ships at 10 per cent. High duties are imposed on tobacco, liquors and matches.

Re-Imports—Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re-import exempted from duty on the following conditions—

The Collector of Customs must be satisfied—

- (1) of the identity of the articles,
- (2) that no drawback of duty was paid on their export,
- (3) that the ownership has not changed between the time of re-export and subsequent re import,
- (4) that they are private personal property re-imported for personal use, not merchandise for sale,
- (5) that not more than three years have passed since they were re-exported.

Duty is, however, charged on the cost of repairs done to the articles while abroad which should be declared by the person re-importing the articles in a form which will be supplied to him at the time of re-importation.

To facilitate identification on re-importation an export certificate giving the necessary particulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examination.

This concession of free entry on re-importation is not extended for the benefit of Companies or Corporate Bodies.

Drawbacks—When any goods, capable of being easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re-exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eighths of such duties shall, except as otherwise hereinafter provided, be repaid as drawback.

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re-export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended

term as the Chief Customs Authority, or Chief Customs Officer on sufficient cause being shown in any case determines, provided further that the Chief Customs Officer shall not extend the term to a period exceeding 3 years.

When any goods, having been charged with Import duty at one Customs port and thence exported to another, are re-exported by sea as aforesaid, drawback shall be allowed on such goods as if they had been so re-exported from the former port.

Provided that, in every such case, the goods be identified to the satisfaction of the Officer in-Charge of the Custom House at the port of final exportation, and that such final exportation be made within three years from the date on which they were first imported into British India.

No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re-export.

No such payment of drawback shall be made until the vessel carrying the goods has put out to sea, or unless payment be demanded within six months from the date of entry for shipment.

Every person, or his duly authorised agent, claiming drawback on any goods duly exported, shall make and subscribe a declaration that such goods have been actually exported, and have not been re-landed and are not intended to be re-landed at any Customs port, and that such person was at the time of entry outwards and shipment, and continues to be, entitled to drawback thereon.

Merchandise Marks—Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relating to merchandise marks. In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1889, and connected Acts and the notifications issued thereunder. The following summary of the regulations in force does not claim to be exhaustive. For those seeking more complete information a reference is suggested to the Merchandise Marks Manual which is published under the authority of the Government of India and obtainable of all agents for the sale of Indian Government publications.

Infringements or offences may be classified conveniently under four heads—

- 1 Counterfeit trade marks,
- 2 Trade descriptions that are false in respect of the country of origin,
- 3 Trade descriptions that are false in other respects, and
- 4 Lengths not properly stamped on piece-goods.

Schedule II—(Import Tariff).

Under this Schedule the reference is to "real value" for the purposes of the Customs Act, 1878 (VIII of 1878), unless an article is otherwise provided for.

The ordinary trade description of each article and cover for the article, if different, they are separately provided for.

| | Unit | Tariff Values | Duty |
|--|----------|-------------------|--|
| I Food, Drink and Tobacco | | Rs and p | |
| II | | | |
| 1 Indian mounds of 82 lbs avoirdupois weight | | | Such rate or rates of duty not exceeding one rupee as the Governor General in Council may, by notification in the Gazette of India, from time to time prescribe,* <i>per cent ad valorem</i> |

| 63 | ARMS, AMMUNITION AND MILITARY STORES—contd
Subject to the exemptions specified in Serial No 64 all articles other than those specified in Serial Nos 61, 65 and 165 which are arms or parts of arms within the meaning of the Indian Arms Act, 1878 (excluding springs used for air-guns which are dutiable as hardware under Serial No 84), all tools used for cleaning or putting together the same, all machines for making, loading, closing or capping cartridges for arms other than rifled arms and all other sorts of ammunition and military stores, and any articles which the Governor-General in Council may, by notification in the Gazette of India, declare to be ammunition or military stores for the purposes of this Act | | <i>Ad valorem</i> | 50 per cent |
| 64 | The following Arms, Ammunition and Military Stores —
(a) Arms forming part of the regular equipment of a commissioned or gazetted officer in His Majesty's Service entitled to wear diplomatic, military naval, Royal Air Force or police uniform
(b) A revolver and an automatic pistol and ammunition for such revolver and pistol up to a maximum of 100 round per revolver or pistol, (1) when accompanying a commissioned officer of His Majesty's regular forces, or of the Indian Auxiliary Force or the Indian Territorial Force or a gazetted police officer, or (11) certified by the commandant of the corps to which such officer belongs, or, in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving or, in the case of a police officer, by an Inspector General or Commissioner of Police, to be imported by the officer for the purpose of his equipment
(c) Swords for presentation as army or volunteer prizes
(d) Arms, ammunition, and military stores imported with the sanction of the Government of India for the use of any portion of the military forces of a State in India being a unit notified in pursuance of the First Schedule to the Indian Extradition Act, 1903
(e) Morris tubes and patent ammunition imported by officers commanding British and Indian regiments or volunteer corps for the instruction of their men * | | | Free |

* Under Government of India, Finance Department (Central Revenues) Notification No 36, dated the 23rd May 1931, 22 inch Adapters imported by officers commanding a unit of the Army in India for the instruction of their men are also exempt from payment of import duty.

* Under Government of India, Finance Department (Central Revenues) Notification No 19, dated the 17th May 1930, bagging for raw cotton made from jute rove, weighing not less than 1½ lbs per square yard and having a total of not more than 250 warp and weft threads per square yard, is liable to duty at Rs 5-8-0 per ton

† Under Government of India, Finance Department Notification No 1428, dated the 17th November 1923, Jute Rags such as are used for paper making, are exempt from payment of export duty provided that the Customs Collector is satisfied that they are useless for any purpose to which cloth or rope is ordinarily put

§ Under Government of India, Finance Department (Central Revenues) Notification No 35, dated the 25th September 1926, hide and skin cuttings and fleshings such as are used for glue-making, are exempt from payment of export duty

Finance.

The gradual evolution of the present financial organisation of India is in many respects a reflection of her constitutional development. Those who take a broad view of the history of Federal States—and by whatever name it may be called India must in its political structure be a Federal State—nothing is more impressive than the ebb and flow in what may be called the adjustment of Federal and State powers of the central government and the federal component though in India we use the term Government of India and Provincial Governments to describe them. In the earliest days of British rule the Provincial governments were independent of the central government and responsible only to the authority sitting in London. After the middle of the nineteenth century the process was reversed and the Government of India was all powerful in controlling the Provinces, down to the smallest items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon who sought to derive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found too heavy in the days of his successors and a continuous process of devolution took the form of long term contracts with the Provincial Governments and later in the assignment of definite heads of revenue to the Provincial Governments thus removing the dual authority and responsibility which had clogged progress. A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed. Here for all practical reasons Provincial finance was entirely separated from the finances of the Government of India and with one reservation in their own financial houses made master in the Government of India did not then permit them to do entirely without contributions from the Provinces. These contributions were fixed in the shape of definite sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in cash. They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total (or the Government of India is a great railway of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its revenues to the point when they would balance without drawing from the Provinces. There was an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, on commercial principles. The year 1924-25 was marked by a step of great importance in the better organisation of Indian finance. As is explained in detail under the section Railways, the Government of India is a great railway which owns and operates itself a very large system through what are leased to the railway companies in other lines which are leased to the general finances of the State. The effects of this were unfortunate in that the railways were not managed on commercial principles. Then the annual

so the contributions were reduced as fast as the finances of the Government of India permitted. They finally disappeared from the Budget in 1928-29.

But this did not end the discussion; indeed it was only the first phase. A large issue remains and despite the extinction of the Provincial contributions the finances of some of the Provinces are in an unsatisfactory state. Broadly the issue may be put in this way. The Government of India has taken the growing heads of revenue those which issue from taxes on income and customs. The Provinces are left with revenue or which are actually declining, like land excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition. At the same time the Provinces are confronted with the great growing sources of expenditure like those on education and sanitation which bulk largely in Provincial budgets. The burden is heaviest in the industrial provinces such as Bombay and Bengal. The standard of living is high wages and costs are a good deal above those of the agricultural provinces. This means an expensive administration. On the other hand the industrial progress which induces this costlier administration pours all its taxable product into the coffers of the Government of India. Rules made to give Bombay and Bengal some share in the Income Tax receipts have been inoperative in practice. Whilst therefore relief is felt at the abolition of the Provincial Contributions under the 1919 settlement it is still this pressure for some share in the revenues from the taxes on income which it is believed alone can put the industrial Provinces on a satisfactory basis. The question was remitted to the Parliamentary Commission which under the chairmanship of Sir John Simon is charged with the duty of inquiring into the working of the Indian constitution and making proposals for the future. In 1925 a financial expert Mr Layton was added to the Secretariat for this duty because all the evidence went to show that the adjustment of these differences was an integral part of the working of the constitutional machine.

Railway Finance.—The year 1924-25 was marked by a step of great importance in the better organisation of Indian finance. As is explained in detail under the section Railways, the Government of India is a great railway which owns and operates itself a very large system through what are leased to the railway companies in other lines which are leased to the general finances of the State. The effects of this were unfortunate in that the railways were not managed on commercial principles. Then the annual

Triennium The differentiation in favour of Great Britain was adopted as a convenient means of classification for the purpose in view which was to impose a protective duty on goods competing with Indian mill products and to leave alone goods not competing with them. To have imposed the new duty on all goods would have been to lay a heavy burden on the consumer without producing a particle of benefit for the Indian manufacturer. Political extremists vehemently opposed the protective differential duty because it nominally gave advantage to Great Britain and put forward an amendment to make it applicable to all imported piece-goods. Government declined to make the change in their proposals on the ground that a general duty would impose a colossal further burden on the consumer without serving any useful purpose. Government on the other hand accepted an amendment from Moderate political critics, abolishing the differentiation in so far as it affected plain grey goods, in regard to which there was shown to be competition between British and Indian mills. This amendment the Assembly adopted by 82 votes to 42 in preference to the extremist amendment. The Bill was also passed by the Council of State. The Assembly made only one substantial cut in the appropriation grants demanded by Government. That was the reduction of the grant required for the Army Department from Rs 5,47,000 to one rupee. When the remaining grant for one rupee was submitted to the House the President declared that he heard none shout "aye" and that therefore that also was cut. The grant was restored by the Governor-General. The annual Finance Bill was passed without serious amendment.

The 1931-32 Budgets—India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maximum the following year. The net result from the Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September. When Sir George Schuster faced the Legislative Assembly at the end of February, he had a sorry tale to tell. Trade depression, coupled with civil disobedience movement, had completely vitiated the estimates made for 1930-31. These estimates showed a surplus of Rs 86 lakhs, the revised estimates worked up to a deficit of Rs 13.56 crores, which the Finance Member said would remain uncovered and would be added to the unproductive debt. The main items of deterioration as compared with the Budget can be summarised as follows —

| | Lakhs |
|--|--------------|
| Important revenue heads, viz,
Customs, Taxes on Income,
Salt and Opium (net) | 12,10 |
| Posts and Telegraphs (including
the Indo-European Telegraph
Department) | 89 |
| Finance headings, viz, Debt
services, Currency and Mint | 1,38 |
| Other heads | 5 |
| Total Rs | 14,42 |

Turning to the estimates for 1931-32, the Finance Member said they must face a fall in tax revenue, as compared with the current Budget estimates, of no less than Rs 13.16 crores, including a drop of Rs 8 crores in Customs and 4½ crores in Income tax. The total deterioration under Finance headings was Rs 376 lakhs and on commercial departments Rs 118 lakhs. This meant a total deterioration of Rs 18.10 crores as compared with the Budget estimates for the current year and as those provided for a surplus of Rs 86 lakhs the net deficit would be Rs 17.24 crores. To meet this deficit the Finance Member announced a cut of Rs 175 lakhs in army expenditure and retrenchment to the extent of Rs 98 lakhs in civil expenditure, making a total saving of Rs 273 lakhs. The estimated deficit was reduced thereby to Rs 14.51 crores, which he proposed to cover by fresh taxation.

New Taxation Proposals—His proposals were grouped under two heads, Customs and Income Tax. Referring to the first the Finance Member said "The heads in respect of which I propose alterations of the substantive tariff itself, are liquors, sugar, silver bullion, betelnuts, spices and exposed cinematograph films. The liquor duties are to be enhanced appreciably, the duty on beer and the like is at present undoubtedly low relatively to those on other alcoholic beverages and will be raised by about 66 per cent above the present level, while those on wines and spirits (except denatured spirit and spirit used in drugs and medicines) will be raised by between 30 and 40 per cent. The duty on silver bullion I propose to increase from 4 to 6 annas per ounce. The other items mentioned will be transferred from the general rate of duty (now 15 per cent *ad valorem*) to the "luxury" rate at 30 per cent. Of the surcharges, we have at a stroke added to the 10 per cent schedule a surcharge of 2½ per cent, to the general or 15 per cent schedule one of 5 per cent, and to the "luxury" or 30 per cent schedule one of 10 per cent. By far the most important of these surcharges is that 5 per cent on the general revenue schedule of 15 per cent, and connected with this, I must mention a feature of particular importance. We propose for this purpose to treat the basic duty of 15 per cent on cotton piece-goods on the same lines as the general 15 per cent schedule and to place the surcharge of 5 per cent on these goods also. The surcharge on the 15 per cent schedule is expected to yield 90 lakhs for cotton piece-goods and 2.63 lakhs for other goods. Coming now to the schedule of non-protective special duties, here we have made additions appropriate to the general scheme, and I need only mention specially the surcharges that I propose to levy upon kerosene and motor spirit. Both customs and excise duty on kerosene are to be raised by 9 ples per gallon, while motor spirit is to bear a surcharge of 2 annas per gallon. Finally, I must explain my proposals as regards sugar. The position is special, because, while I am now proposing an increase in the duty for revenue purposes, we had received, just when my budget proposals were on the point of completion, the recommendations of the Tariff Board for

even in the current year, will be up to this average, so that the total absorption in 6 years will be about 650 million ounces. As against this the Government of India have sold out of their own holdings a total of only about 90 million ounces since 1926. Yet it is suggested that even this moderate realisation is to stop and that India is to stand aside and keep her own home market free to absorb the production from the Mines of Mexico and the United States. This is a clearly unacceptable idea, and however anxious we may be—as indeed we are—to help, we must, as a condition of co-operation secure fair consideration of India's interests. In the meanwhile, we must retain a free hand."

WAYS AND MEANS.

The Ways and Means position was explained as follows —

| (In crores of rupees) | | | (In crores of rupees) | | |

Reception by the Assembly—Strong opposition was manifested in the Assembly to the new income tax and super tax rates, and on the plea that Government's duty was to retrench expenditure still further, an amendment was passed reducing the proposed revenue from this source by Rs 240 lakhs. Government found themselves unable to accept this cut, and the Finance Bill was returned to the Assembly

by the Governor-General with the recommendation that it should be passed with an amendment to the Finance Member's original scheme involving a reduction in the lowest grades of income tax and leaving the higher grades untouched. The estimated decrease in revenue was about a crore of rupees compared with nearly two and a half crores created by the Assembly's vote. The following were the rates recommended by the Governor-General —

to deal with the situation on three distinct lines, firstly, to reduce expenditure, secondly, to impose an emergency cut in salaries, and thirdly, to impose fresh taxation. Retrenchment measures in civil expenditure he estimated would save about Rs 30 lakhs in the current year, and Rs 250 lakhs next year, while military expenditure next year would be curtailed by Rs 450 lakhs. A ten per cent cut in pay in both civil and military departments would lead to a saving of Rs 60 lakhs in the current year and Rs 190 lakhs next year. Turning to new methods of raising revenue the Finance Member said his first proposal would be an immediate increase in the salt revenue by abolishing the credit system, which would mean that the revenue would be increased by a crore of rupees each year on this account. The main plank of his new taxation proposals was to put a temporary surcharge on all existing taxes with the exception of Customs export duties, the surcharge being 25 per cent on the existing rates in each case. He proposed that the surcharge for the current year in income-tax should only be 12½ per cent, but it would be collected at this rate on the whole year's income. Government held that in the present emergency they were justified in reducing the income tax exemption limit and imposing a small tax of four ples in the rupee on incomes between Rs 1,000 and Rs 2,000 per annum. Dealing with special increases and new taxes, the Finance Member said "We propose to increase the import duty on artificial silk piece-goods from 20 to 40 per cent and on artificial silk yarn from 10 per cent to 15 per cent. We also propose to increase the duty on brown sugar from Rs 6-12-0 to Rs 7-4-0 per cwt. This follows the Tariff Board's recommendation. As regards boots and shoes, we propose that there should be imposed as an alternative to the 20 per cent duty a minimum of 4 annas per pair. The duty will thus be 20 per cent or 4 annas a pair, whichever is the higher. We also propose to increase the duty on camphor and on electric bulbs from 20 to 40 per cent. As regards all these articles the surcharge will be levied on the increased duty."

"Then there are three items formerly on the free list on which we think it justifiable to impose a small duty on revenue grounds. The result of the surcharges imposed in last Budget and proposed now is that the level of the general revenue tariff has been increased from 15 to 25 per cent. There is, therefore, some justification for adding a 10 per cent duty to articles hitherto free. We propose to put duties of 10 per cent on machinery and dyes, and of ½ anna per lb on raw cotton. I must expect criticism of these duties especially from the cotton mills, and I must acknowledge that their imposition may appear to be in some ways inconsistent with previous policy. The justification must be the need for revenue, while as regards the cotton mills we may claim that on balance their position will be improved by our surcharge proposals, for under these the import duties on cotton piece-goods will be increased by one quarter. This more than offsets the burden of ½ anna per lb on goods made from imported cotton, and affords an effective answer to possible criticisms on the grounds to which I have referred. I have one more word to say as regards the income-tax proposals. In considering the cut to be applied to the salaries of Government officials we considered what total

reduction of their emoluments could fairly be imposed. If the general rate of reduction is to be 10 per cent, that represents what we think fair, and if further increases of income tax were to be added, that would go beyond the reasonable limit. We therefore propose that increases of income tax both by way of surcharge on existing rates or by way of imposition of a tax for the first time on salaries from Rs 1,000 to Rs 2,000 should be merged in any general cut which we are imposing or which the Provincial Governments may impose."

The Finance Member's final proposal was to increase the postage for inland letters to 1½ annas instead of 1 anna and for postcards to 9 ples instead of 6 ples. That enhancement was expected to produce Rs 7½ lakhs in a full year and go a long way to cover the deficit of Rs 92 lakhs in the working results of the Posts and Telegraphs Department which would be left even if the recommendations of the Posts and Telegraphs Accounts Enquiry Committee were accepted.

Need for Solvency—The net result for the current year was an estimated increase in taxation of Rs 711 lakhs which, together with Rs 37 lakhs from increased postal charges and Rs 100 lakhs from salt revenue, meant, with retrenchment measures, an improvement of Rs 938 lakhs as against an estimated deficit of Rs 19 55 crores. They would thus close the year with a deficit of Rs 10 17 crores. On the other hand, in 1932-33 they would feel the full benefit of the retrenchment measures and the extra taxation, making a total improvement of Rs 24 73 crores against an estimated deficit of Rs 19 50 crores. They should thus close the year with a surplus of Rs 5 23 crores. The combined result of the two years would be a deficit of Rs 4 94 crores, which they were justified in regarding as covered by making during this period of exceptional stress a reduction of about Rs 247 lakhs in each year for the provision for reduction or avoidance of debt. The net administrative expenditure would according to their plans, proceed as follows—

| | |
|---------|-----------------|
| 1930—31 | Rs 79 67 crores |
| 1931—32 | Rs 74 66 crores |
| 1932—33 | Rs 65 95 crores |

Concluding his speech Sir George Shuster said "I referred at the outset of my speech to the dangers now that we are divorced from a gold standard, of any inflationary action for the purposes of meeting the current expenditure of the Government. If once that process starts, it may be impossible to save the country from a complete collapse of its currency. That has been the experience of all countries whose currencies collapsed after the War. They all went through the same process. Budgetary deficits, met first by borrowing, then a reluctance of the public to subscribe to government loans or treasury bills, then recourse to the note-printing press and inflation to provide funds to meet current public expenditure, then collapse in confidence in the currency, notes printed faster and faster until the amounts reached astronomical figures and finally the complete disappearance of any value to the currency at all. We want to erect a solid barrier against the possibility of India getting on to that slippery slope. That is the essential justification for our proposals. We have heard

THE LAND REVENUE.

The principle underlying the Land Revenue system in India has operated from time immemorial. It may be roughly formulated thus—the Government is the supreme landlord and the revenue derived from the land is equivalent to rent. On strictly theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The latter pays for it according to the value of his holding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary. Under the former the amount of revenue has been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe. The actual cultivators became the tenants of the landlords. While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State. This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1859. It also obtains in certain districts of Madras.

Temporary Settlements.

Elsewhere the system of Temporary Settlements is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographic surveys carried out by the Survey Department of the Government of India. Each village area, wherever the Temporary Settlement is in vogue, has been carefully mapped, property-boundaries accurately delineated, and records of rights made and preserved. Under the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer are thus described in Strachey's *India* (revised edition, 1911)—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land. He has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly required several years of constant work. The establishment of agricultural departments and other reforms have however led to much simplification of the Settlement Officer's Proceedings, and to much greater

rapidity in the completion of the Settlements. All the work of the Settlement Officer is liable to the supervision of superior officers, the assessments proposed by him require the sanction of the Government before they become finally binding, and his judicial decisions may be reviewed by the Civil Courts. It is the duty of the settlement officer to make a record of every right which may form the subject of future dispute, whether affecting the interests of the State or of the people. The intention is to alter nothing, but to maintain and place on record that which exists."

The Two Tenures

Under the Temporary Settlement land tenures fall into two classes—peasant-holdings and landlord-holdings, or *Ryotwari* and *Zemindari* tenures. Broadly speaking, the difference between the two in a fiscal sense is that in *Ryotwari* tracts the *ryot* or cultivator pays the revenue direct. In *Zemindari* tracts the landlord pays on a rental assessment. In the case of the former, however, there are two kinds of *Ryotwari* holdings—those in which each individual occupant holds directly from Government, and those in which the land is held by village communities, the heads of the village being responsible for the payment of revenue on the whole village area. This latter system prevails in the North. In Madras, Bombay, Burma and Assam, *ryotwari* tenure is on an individual basis, and the Government enters into a separate agreement with every single occupant. The basis of assessment on all classes of holdings is now more favourable to the cultivator than it used to be. Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land during the ensuing period of settlement. Now the actual yield at the time of assessment alone is considered, so that the cultivator gets the whole of the benefit of improvements in his holding subsequently brought about either by his own enterprise or by "unearned increment." The Government, however, may at a new settlement re-classify a holding so as to secure for itself a fair share in an increment that may have resulted from public works in the vicinity, such as canals and railways, or from a general enhancement of values. But the principle that improvements effected by private enterprise shall be exempt from assessment is now accepted by the Government and provided for in definite rules.

Incidence of the Revenue.

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circumstances of the holding. Under the Permanent Settlement in Bengal Government derive rather less than £3,000,000 from a total rental estimated at £12,000,000. Under Temporary

EXCISE.

The Excise revenue in British India is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. It is a common place amongst certain sections of temperance reformers to represent the traffic in intoxicating liquors as one result of British rule. There is, however, abundant evidence to show that in pre-British days the drinking of spirituous liquors was commonly practised and was a source of revenue.

The forms of intoxicating liquor chiefly consumed are country spirit, fermented palm juice, beer made from grain, country brands of rum, brandy, etc., locally manufactured malt beer and imported wine, beer and spirits. Country spirit is the main source of revenue, except in the Madras Presidency, and yields about two-thirds of the total receipts from liquors. It is usually prepared by distillation from the Mhowra flower, molasses and other forms of unrefined sugar, fermented palm juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Administration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a special shop was annually granted. This of course was a kind of control, but it only enabled Government to impose haphazard taxation on the liquor traffic as a whole by means of vend fees. It did not enable Government to graduate the taxation accurately on the still-head duty principle nor to insist upon a standard of purity or a fixed strength of liquor. Moreover for political and other reasons the extent of control could not at first be complete. There were tribes of aborigines who regarded the privilege of making their own liquor in their private homes as a long established right and who believed that liquor poured as libations to their god should be such as had been made by their own hands. The introduction of any system amongst those peoples had to be worked very cautiously. Gradually as the Administration began to be consolidated the numerous native pot-stills scattered all over the country under the crude arrangements then in force began to be collected into Central Government enclosures called Distilleries, thus enabling Government to perfect its control by narrowing the limits of supervision, and to regularize its taxation by imposing a direct still-head duty on every gallon issued from the Distillery. Under Distillery arrangements it has also been possible to regulate and supervise thoroughly the manufacture of its liquor and its disposal subsequent to leaving the Distillery by means of a system of transport passes, establishment supervision, improved distribution and vend arrangements.

Various Systems.

The Out-Still System may be taken to include all systems prior in order of development to the imposition of Still-head duty. Briefly

stated the stages of development have been—First farms of large tracts, Second farms of smaller areas, Third farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area, Fourth farms of similar right subject to control of means and times for distilling and the like. The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Excise Administration in most provinces of British India has progressed on uniform lines. The keynote lying in attempts, where it has not been possible to work with the fixed duty system in its simplest forms, to combine the farming and fixed duty systems with the object of securing that every gallon of spirit should bear a certain amount of taxation. The Out-Still System has in its turn been superseded by either the Free-supply system or the District Monopoly system. The Free-supply system is one of free competition among the licensed distillers in respect of manufacture. The right of vend is separately disposed of. The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum still-head duty revenue in the monopoly area being guaranteed to the State during the term of the lease.

The recommendations of the Indian Excise Committee of 1905-06 resulted in numerous reforms in British India, one of them being that the various systems have been or are gradually being superseded by the Contract Distillery System under which the manufacture of spirit for supply to a district is disposed of by tender, the rate of still-head duty and the supply price to be charged are fixed in the contract and the right of vend is separately disposed of. This is the system that now prevails over the greater portion of British India. The other significant reforms have been the revision of the Provincial Excise Laws and Regulations, and the conditions of manufacture, vend, storage and transport, an improvement in the quality of the spirit, an improved system of disposal of vend licenses, reductions and re-distributions of shops under the guidance and control of Local Advisory Committees and gradual enhancement of taxation with a view to checking consumption.

Since the issue of the report of the Excise Committee 1905-06, no less than 213,000 square miles of territory were transferred from the out-still to the distilling system. In 1905-06 39 per cent of the total excise area and 28 per cent of the population of that area were served by out-stills, the proportions in 1912-13 were only 15 and 8 per cent respectively.

Excise has now been made over entirely to the Provincial Governments, and the duties

vary from province to province. The governing principle in fixing these rates is the highest duty compatible with the prevention of illicit distillation. In the Bombay Presidency the issue of spirit to all country spirit shops has been rationed on the basis of consumption for the year 1920-21. From that consumption reduced to proof gallons 10 per cent is deducted in the case of shops in Bombay City and 5 per cent elsewhere and the ration is then fixed for each shop according to the issues in the corresponding month of 1920-21. This is the most important step taken by the new Government to reduce consumption. Two large distilleries in the Presidency have been placed entirely under Government management, thus partially superseding the Contract Distilling system.

Sap of the date, palmyra, and coconut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma the sale of shop licenses is the sole form of taxation. Country brands of rum, and so called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer for European and Eurasian consumption. The uniform fee of 8 annas per gallon is levied all over India at the time of issue.

Foreign liquor is subject to an import duty at the tariff rates, which are set out in the Customs Tariff (q v). It can only be sold under a license.

Since the war Brandy and Whisky have been manufactured in considerable quantities at Baroda.

The base used is the Mhowra flower. It is drunk in big towns as a substitute for German spirit, and is excised at tariff rates.

Drugs—The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an

active drug when collected separately, and bhang, or the dried leaves of the hemp plant whether male or female cultivated or uncultivated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possession. Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charas has been prohibited in the Bombay Presidency except Sindh from the 1st April 1922.

Opium—Opium is consumed in all provinces in India. The drug is commonly taken in the form of pills, but in some places, chiefly on social and ceremonial occasions, it is drunk dissolved in water. Opium smoking also prevails in the City of Bombay and other large towns. The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned shops. Further legislation against opium smoking in clubs and dens is now under contemplation.

The revenue from opium is derived mainly from exports of what is called provision opium to foreign countries and from the sale to Provincial Governments of excise opium for internal consumption in India. The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export to foreign countries having been stopped with effect from 7th April, 1926. In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations.

It has been decided to reduce the total of the opium exported since the calendar year 1926 by 10 per cent annually in each subsequent year until exports are totally extinguished at the end of 1935.

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This opium is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from Province into Province.

SALT.

The salt revenue was inherited by the British Government from Native rule, together with a miscellaneous transit dues. These transit dues were abolished and the salt duty consolidated and raised. There are four great sources of supply, rock salt from the Salt Range and Kohat Mines in the Punjab, brine salt from the Sambhar Lake in Rajputana, salt brine condensed on the borders of the lesser Rann of Cutch, and sea salt factories in Bombay, Madras and at the mouth of the Indus.

The Salt Range mines contain an inexhaustible supply. They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana salt comes from the Sambhar Lake.

and evaporated by solar heat. In the Rann of Cutch the brine is also evaporated by solar heat and the product is known as Baragarn salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923. In Bombay and Madras sea water is let into shallow pans on the sea-coast and evaporated by solar heat and the product sold throughout India. In Bengal the damp climate together with the large volume of fresh water from the Ganges and the Brahmaputra into the Bay of Bengal render the manufacture of sea-salt difficult and the bulk of the supply, both for Bengal and Burma is imported from Liverpool, Germanv Aden, Bombay and Madras.

Broadly, one-half of the indigenous salt is manufactured by Government Agency, and the remainder under license and excise systems.

In the Punjab and Rajputana the salt manufactories are under the control of the Northern India Salt Department, a branch of the Commerce and Industry Department. In Madras and Bombay the manufactories are under the supervision of Local Governments. Special treaties with Native States permit of the free movement of salt throughout India, except from the Portuguese territories of Goa and Damaun, on the frontiers of which patrol lines are established to prevent the smuggling of salt into British India.

From 1888-1903 the duty on salt was Rs 2-8 per maund of 82 lbs. In 1903, it was reduced to Rs 2, in 1905 to Rs 1-8-0, in 1907 to Rs 1 and in 1916 it was raised to Rs 1-4-0. The successive

reductions in duty have led to a largely increased consumption, the figures rising by 25 per cent between 1903-1908. In 1923 the duty was doubled bringing it again to Rs 2-8. In 1924 it was reduced to Rs 1-4-0. The duty remained at Rs 1-4-0 from March 1924 to 29th September, 1931. It was raised to Rs 1-9-0 with effect from 30th September 1931. Prior to 17th March, 1931, the excise duty and import duty on salt were always kept similar, but by the Indian Salt (Additional Import Duty) Act, XIV of 1931 the import duty on foreign salt was fixed at Rs 1-8-0 from 17th March 1931 and it was again raised to Rs 1-13-6 from the 30th September 1931.

CUSTOMS.

The import duties have varied from time to time according to the financial condition of the country. Before the Mutiny they were five per cent, in the days of financial stringency which followed they were raised to 10 and in some cases 20 per cent. In 1875 they were reduced to five per cent, but the opinions of Free Traders, and the agitation of Lancashire manufacturers who felt the competition of the Indian Mills, induced a movement which led to the abolition of all customs dues in 1882. The continued fall in exchange compelled the Government of India to look for fresh sources of revenue and in 1894 five per cent. duties were re-imposed, yarns and cotton fabrics being excluded. Continued financial stringency brought piece-goods within the scope of the tariff, and after various expedients the demands of Lancashire were satisfied by a general duty of $3\frac{1}{2}$ per cent on all woven goods—an import duty on goods by sea, an excise duty on goods produced in the country. The products of the hand-loom are excluded. These excise duties are intensely unpopular in India, for reasons set out in the special article dealing with the subject. In 1910-11, in order to meet the deficit threatened by the loss of the revenue on opium exported to China, the silver duty was raised from 5 per cent to 4d an ounce, and higher duties levied on petroleum, tobacco, wines, spirits, and beer. These were estimated to produce £1 million annually.

The Customs Schedule was completely recast in the Budget of 1916-17 in order to provide additional revenue to meet the financial disturbance set up by the war. The general import tariff, which had been at the rate of 5 per cent *ad valorem* since was raised to $7\frac{1}{2}$ per cent *ad valorem*, except in the case of sugar, as India is the largest producer of sugar in the world the import duty on this staple was fixed at 10 per cent. There was also a material curtailment of the free list. The principal article of trade which was not touched was cotton manufactures. For the past twenty years the position has been that cotton twists and yarns of all kinds are free of duty while a duty at the rate of $3\frac{1}{2}$ per cent is imposed on woven goods of all kinds whether imported or manufactured in Indian mills. The Budget left the position as it stood. The Government of India would have been glad to see the tariff raised to 5 per cent, without any corresponding alteration of the excise, but were over-ruled by the Cabinet on the ground that this controversial matter must come up for discussion after the war. Finally

the Budget imposed export duties on tea and jute. In the case of tea the duty was fixed at Rs 1-8-0 per 100 lbs, in the case of jute the export duty on raw jute was fixed at Rs 2-4-0 per bale of 400 lbs, approximately equivalent to an *ad valorem* duty of 5 per cent, manufactured jute was charged at the rate of Rs 10 per ton on sacking and Rs 16 per ton on Hessians.

The Customs Tariff was further materially modified in the Budget for 1917-18. In the previous year an export duty on jute was imposed at the rate of Rs 2-4-0 per bale of 400 lbs in the case of raw jute and Rs 10 per ton on sackings, and Rs 16 per ton on Hessians, these rates were doubled, with a view to obtaining an additional revenue of £500,000. The import duty on cotton goods was raised from $3\frac{1}{2}$ per cent to $7\frac{1}{2}$ per cent without any alteration in the Excise, which remained at $3\frac{1}{2}$ per cent. This change was expected to produce an additional revenue of £1,000,000. The question of the Excise was left untouched, for the reason, amongst others, that the Government could not possibly forego the revenue of £320,000, which it was expected to produce. With these changes in operation the revenue from Customs in 1920-21 was Rs 32,37,29,000.

The Customs Tariff was further raised in the Budget of 1921-22 in order to provide for the big deficit which had then to be faced. The general *ad valorem* duty was raised from $7\frac{1}{2}$ to 11 per cent, a special duty was levied on matches of 12 annas per gross boxes in place of the existing *ad valorem* duty of $7\frac{1}{2}$ per cent. The duties on imported liquors was raised to 5 annas per degree of proof per gallon, the *ad valorem* duty of $7\frac{1}{2}$ per cent was raised to 20 per cent in the case of certain articles of luxury, the import duty on foreign sugar was increased from 10 to 15 per cent and the duty on manufactured tobacco was raised by 50 per cent. The Customs duties were further increased in the Budget of 1922-23. The Government proposals in this direction have been described in an early passage. They were to raise the general Customs duty from 11 to 15 per cent, the cotton excise duty from $3\frac{1}{2}$ per cent to $7\frac{1}{2}$ per cent, the duty on sugar from 15 to 25 per cent, a duty of 5 per cent on imported yarn, a rising duty on machinery, iron, steel and railway material from $2\frac{1}{2}$ per cent to 10 per cent together with the general duty on articles of luxury from 20 per cent to 30 per cent. In the course of the passage of the Budget through the Legislatures the cotton excise duty was

retained at $3\frac{1}{2}$ per cent, the duty on machinery was retained at $2\frac{1}{2}$ per cent and the duty on cotton piece-goods at 11 per cent, the other increases being accepted. In 1925 the Cotton Excise duties were finally abolished. Full details with regard to the customs duty are set out in the section on Indian Customs Tariff (*q v*). The Customs duties have been repeatedly raised in recent Budgets both as a protective measure and for revenue purposes. The latest duties will be found in detail under the 1930-31 and 1932-33 taxation proposals in the Financial Section of the Year Book. The estimated revenue from the Customs in 1930-31 is Rs 41.49 crores.

The Senior Collectors were Covenanted Civilians specially chosen for this duty, before the introduction of the Imperial Customs Service in

1906. Since that date, of the five Collectorship at the principal ports (Calcutta, Bombay, Madras, Rangoon, and Karachi) three are ordinarily reserved for Members of the I.C.S. (i.e., "Covenanted Civilians"). The other two are reserved for members of the Imperial Customs Service.

Assistant Collectors in the Imperial Customs Service are recruited in two ways: (a) from members of the Indian Civil Service—3 vacancies, and (b) by the Secretary of State—19 vacancies. There are in addition a few Gazetted Officers in what is known as the Provincial Customs Service. These posts are in the gift of the Government of India, and are usually filled by promotion from the subordinate (in the Government sense of the word) service. The "subordinate" staff is recruited entirely in India.

INCOME TAX.

The income tax was first imposed in India in 1860, in order to meet the financial dislocation caused by the Mutiny. It was levied at the rate of four per cent or a little more than 9½d in the pound on all incomes of five hundred rupees and upwards. Many changes have from time to time been made in the system, and the present schedule was consolidated in the Act of 1886. This imposed a tax on all incomes derived from sources other than agriculture which were exempted. On incomes of 2,000 rupees and upwards it fell at the rate of five pies in the rupee, or about 6½d in the pound, on incomes between 500 and

2,000 rupees at the rate of four pies in the rupee or about 5d in the pound. In March 1903 the minimum taxable income was raised from 500 to 1,000 rupees. The income tax schedule was completely revised, raised, and graduated in the Budget of 1916-17 in the general scale of increased taxation imposed to meet the deficit arising out of war conditions.

Since then the process has been almost continuous and in every financial difficulty the authorities turn to the Income Tax as a means of raising fresh revenue. The last revision was in the Supplementary Finance Bill of 1931, when the scale was fixed as follows:—

(RATES OF INCOME-TAX)

A. In the case of every individual, Hindu undivided family, unregistered firm and other association of individuals not being a registered firm or company:—

| | RATE |
|--|---------------------------------------|
| (1) When the total income is less than Rs 2,000 | (<i>Table Footnote</i>) |
| (2) When the total income is Rs 2,000 or upwards, but is less than Rs 5,000 | Six pies in the rupee |
| (3) When the total income is Rs 5,000 or upwards, but is less than Rs 10,000 | Nine pies in the rupee |
| (4) When the total income is Rs 10,000 or upwards but is less than Rs 15,000 | One anna in the rupee |
| (5) When the total income is Rs 15,000 or upwards, but is less than Rs 20,000 | One anna and six pies in the rupee |
| (6) When the total income is Rs 20,000 or upwards, but is less than Rs 30,000 | One anna and seven pies in the rupee |
| (7) When the total income is Rs 30,000 or upwards but is less than Rs 40,000 | One anna and eleven pies in the rupee |
| (8) When the total income is Rs 40,000 or upwards, but is less than Rs 100,000 | Two annas and one pie in the rupee |
| (9) When the total income is Rs 100,000 or upwards | Two annas and two pies in the rupee |

B. In the case of every company and registered firm whatever its total income

Two annas and two pies in the rupee

A B—Additional tax (Sur charge) for the financial year:—

1931-32 at 12½ per cent
and
1932-33 at 25 per cent

over the rates prescribed by the Indian Finance Act, 1931, except in cases of income between Rs 1,000 to Rs 1,999.

Tax at 2 pies on incomes between Rs 1,000 to Rs 1,999 for the year 1931-32 and

Tax at 4 pies for the year 1932-33 on the same income

RATES OF SUPER-TAX.

In respect of the excess over thirty thousand of total income —

| | RATE |
|--|---|
| (1) in the case of every company— | |
| (a) in respect of the first twenty thousand rupees of such excess | Nil |
| (b) for every rupee of the remainder of such excess | One anna in the rupee |
| (b) for every rupee of the remainder of such excess | One anna in the rupee |
| (2) (a) in the case of every Hindu undivided family — | |
| (i) in respect of the first forty-five thousand rupees of such excess | One anna and three pies in the rupee |
| (ii) for every rupee of the next twenty-five thousand rupees of such excess | Nil |
| (b) in the case of every individual, unregistered firm and other association of individuals not being a registered firm or a company — | |
| (i) for every rupee of the first twenty thousand rupees of such excess | Nine pies in the rupee |
| (ii) for every rupee of the next fifty thousand rupees of such excess | One anna and three pies in the rupee |
| (c) in the case of every individual, Hindu undivided family, unregistered firm and other association of individuals not being a registered firm or a company | |
| (i) for every rupee of the next fifty thousand rupees of such excess | One anna and nine pies in the rupee |

| (iii) for every rupee of the next fifty thousand rupees of such excess | Two annas and nine pies in the rupee |
| (iv) for every rupee of the next fifty thousand rupees of such excess | Three annas and three pies in the rupee |
| (v) for every rupee of the next fifty thousand rupees of such excess | Three annas and nine pies in the rupee |
| (vi) for every rupee of the next fifty thousand rupees of such excess | Four annas and three pies in the rupee |
| (vii) for every rupee of the next fifty thousand rupees of such excess | Four annas and three pies in the rupee |
| (viii) for every rupee of the next fifty thousand rupees of such excess | Five annas and three pies in the rupee |
| (ix) for every rupee of the next fifty thousand rupees of such excess | Five annas and nine pies in the rupee |
| (x) for every rupee of the remainder of such excess | Six annas and three pies in the rupee |

The head of the Income-Tax Department of a province is the Commissioner of Income-tax who is appointed by the Governor-General in Council. The rest of the income-tax staff in a province are subordinate to him and they are appointed and dismissed by him. His power of appointment and dismissal is, under section 5 (4) 'subject to the control of the Governor-General in Council,' but the Governor-General in Council exercises this control through the local Government.

The estimated yield of Income-tax in 1929-30 was Rs. 16,59,60,000

HISTORY OF THE COINAGE.

The Indian mints were closed to the un-restricted coinage of silver for the public from the 26th June 1893, and Act VIII of 1893, passed on that date, repealed Sections 19 to 26 of the Indian Coinage Act of 1870, which provided for the coinage at the mints for the public of gold and silver coins of the Government of India. After 1893 no Government rupees were coined until 1897, when, under arrangements made with the Native States of Bhopal and Kashmir, the currency of those States was replaced by Government rupees. The re-coinage of these rupees proceeded through the two years 1897 and 1898. In 1899 there was no coinage of rupees, but in the following year it seemed that coinage was necessary, and it was begun in February 1900, the Government purchasing the silver required and paying for it mainly with the gold accumulated in the Paper Currency

Reserve. In that and the following month a crore of rupees was coined and over 17 crores of rupees in the year ending the 31st March 1910 including the rupees issued in connection with the conversion of the currencies of Native States. From the profit accruing to Government on the coinage it was decided to constitute a separate fund called the Gold Reserve Fund as the most effective guarantee against temporary fluctuations of exchange. The whole profit was invested in sterling securities, the interest from which was added to the fund. In 1906 exchange had been practically stable for eight years, and it was decided that of the coinage profits devoted to this fund, six crores should be kept in rupees in India; instead of being invested in gold securities. The Gold Reserve Fund was then named the Gold Standard Reserve. It was ordered in 1907 that only

one-half of the coinage profits should be paid into the reserve, the remainder being used for capital expenditure on railways. The Gold Standard Reserve was called into action before the year 1907-08 was out. Exchange turned against India, and in March 1908, the Government of India offered bills on the Secretary of State up to half a million sterling, while the Secretary of State sold £1,000,000 Consols in order to meet such demands. During April to August, further sterling bills were sold for a total amount of £8,058,000. On a representation by the Government of India, the Secretary of State agreed to defer the application of coinage profits to railway construction until the sterling assets of the Gold Standard Reserve amounted to £25,000,000. On the outbreak of the war in August 1914 the Reserve was drawn upon to meet the demands for sterling remittances, and Government offer to sell £1,000,000 of Bills weekly.

Gold

Since 1870 there had been no coinage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891-92.

A Royal proclamation was issued in 1918 establishing a branch of the Royal Mint at Bombay. It stated—Subject to the provision of this proclamation the Bombay Branch Mint shall for the purpose of the coinage of gold coins be deemed to be part of the Mint, and accordingly, (a) the Deputy Master of the Bombay Branch Mint shall comply with all directions he may receive from the Master of the Mint whether as regards the expenditure to be incurred or the returns to be made or the transmission of specimen coins to England or otherwise and (b) the said specimen coins shall be subject to the trial of the pyx under section 12 of the Coinage Act, 1870, so that they shall be examined separately from the coins coined in England or at any other branch of the Mint, and (c) the Deputy Master of the Bombay Branch Mint and other officers and persons employed for the purpose of carrying on the business of the Branch Mint may be appointed, promoted, suspended and removed and their duties assigned and salaries awarded and in accordance with the provisions of section 15 of the Coinage Act, 1870. Pending the completion of the arrangements at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign. Altogether 2,109,703 pieces of these new coins of the nominal value of Rs 3 16 45 545, were struck at the Bombay Mint. The actual coinage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff.

The Indian Currency Act of 1927 established a new ratio of the rupee to gold. It established this ratio at one shilling and sixpence by enacting that Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London. A rate of one shilling and sixpence forty-nine

sixty-fourths was notified as Government's selling rate for sterling to meet these obligations.

With the receipt of large consignments of gold, the Bombay Mint made special arrangements for the refining of gold by the chlorine process and at the end of the year 1919-20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold. The Refinery turned out 16,62,466 fine tolas of refined gold in 1920-21.

Silver

The weight and fineness of the silver coins are —

| | FINE
SILVER
grains | ALLOY
grains | TOTAL
grains |
|-----------------------------------|--------------------------|-----------------|-----------------|
| Rupee | 165 | 15 | 180 |
| Half-rupee | 82½ | 7½ | 90 |
| Quarter-rupee or 4-anna piece | 41¼ | 3¼ | 45 |
| Eighth of a rupee or 2-anna piece | 20½ | 1½ | 22½ |

One rupee = 165 grains of fine silver

One shilling = 80½ grains of fine silver

One rupee = shillings 2 0439

Copper and Bronze

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1875 and into the Madras and Bombay Presidencies by Act XXII of 1844.

The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows —

| | Grains
troy |
|---|----------------|
| Double pice or half-anna | 200 |
| Pice or quarter-anna | 100 |
| Half-pice or one-eighth of an anna | 50 |
| Pie being one-third of a pice or one-twelfth of an anna | 33½ |

The weight and dimensions of bronze coins are as follows —

| | Standard
weight in
grains troy | Diameter
in milli-
metres |
|-----------|--------------------------------------|---------------------------------|
| Pice | 75 | 25.4 |
| Half-pice | 37½ | 21.15 |
| Pie | 25 | 17.45 |

Nickel

The Act of 1906 also provides for the coinage of a nickel coin. It was directed that the nickel one-anna piece should thenceforth be coined at the Mint and issue. The notification also prescribed the design of the coin, which has a waved edge with twelve scollops, the greatest diameter of the coin being 21 millimetres and its least diameter 19.8 millimetres. The desirability of issuing a half-anna nickel coin was considered by the Government of India in 1909 but after consultation with Local Governments it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin. The two-anna nickel coin was introduced in 1917-18, and the four-anna and eight-anna nickel coins in 1919. The eight-anna nickel is now being withdrawn from circulation.

The Currency System.

The working of the Indian currency system which has commanded a large amount of public attention since 1893, was forced to the front in 1920, as the result of measures taken to stabilise the exchange value of the rupee after the fluctuations caused by the war. These assumed so much importance, and they continue to bulk so largely in all Indian economic questions, that we propose to give here a short summary of the Indian currency system in non-technical language

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallic system, with silver as the standard of value and a circulation of silver rupees and notes based thereon. But with the opening of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily receded in value. The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Government of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises. As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable increase in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange.

Closing the Mints—The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report. It was decided in 1893 to close the mints to the unrestricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupees to the circulation. Rupees remained unlimited legal tender and formed the standard of value for all internal transactions. Since Government refused, and no one else had the power to coin rupees, as soon as circumstances led to an increased demand for rupees, the exchange value of the rupee began to rise. By 1898 it had approached the figure of one shilling and fourpence. Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve. These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy.

II THE NEW STANDARD.

The Fowler Committee rejected the proposal to re-open the Mints to the free coinage of silver. They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence, or fifteen rupees to the sovereign. They further suggested that the British sovereign should be made a legal tender and a current coin in India, that the Indian mints should be thrown open to the unrestricted coinage of gold, so that the rupee and the sovereign should freely circulate side by side in India. The goal which the Committee had in view was a gold standard supported by a gold currency. Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and four pence, save by the fraction which covered the cost of shipping gold to India. But if the balance of trade turned against India, it was still possible for the rate of exchange to fall. To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set aside in a special reserve, to be called the Gold Standard Reserve. Inasmuch as the cost of coining rupees was approximately elevenpence halfpenny, and they were sold to the public at

one and fourpence, the profits were considerable, they were to have been kept in gold, so as to be freely available when required for the support of exchange.

A 16 pence Rupee—The Government of India professed to accept all the recommendations of the Fowler Committee, actually only a portion of them was put in practice. The official rate of exchange was fixed at one and fourpence. The sovereign and the half sovereign were declared unlimited legal tender in India. But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency. The gold mint was not set up. The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities. These practices gave rise to conditions which were never contemplated by the Fowler Committee. Reference has been made to the Home Charges of the Government of India, which at the time amounted to about seventeen millions sterling a year. These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London. These Bills when presented

in India were cashed at the Government Treasuries. Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities. In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it, than to ship the gold to India. Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills. Considerable quantities of sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces.

Sterling Remittance—This system worked until 1907-08. A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak in November. This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve. There had been very heavy coining of rupees in India and the amount in the Reserve was ample. But the Reserve was in securities not in gold, and was therefore not in a

liquid form, nor was the time an opportune one for the realisation of securities. Moreover the authorities did not realise that a reserve for use in times of emergency. It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm up, meantime he would finance himself by drawing on the funds in the Gold Standard Reserve. But it was apparent that the stoppage of the sales of Councils was not enough, there was an insistent demand for the export of gold, or the equivalent of gold. The Government of India refused and exchange fell to one and threepence twenty-three thirtyseconds. Ultimately the authorities had to give way. It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirtyseconds, representing gold export point, and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve. Bills to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered. Thus were gradually evolved the main principles of the Indian currency system. It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London, it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation, some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India. It was described by one of the most active workers in it as a "limping standard."

III THE CHAMBERLAIN COMMITTEE

This brings us to the year 1913. There were many critics of the system. Some banked for a return to the open mints, others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country. But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee. But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office. These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India, at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure, at the transfer of a solid block of the Paper Currency Reserve from India to London, at the holding of a portion of the Gold Standard Reserve in silver in order to facilitate the coining of rupees, and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the require-

ments of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high. All these things were done, it was contended, on the advice of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme. The India Office for long ignored this criticism, until it was summarised in a series of articles in *The Times* and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of silver for coining purposes from Messrs. Montagu & Co. instead of through their recognised and constituted agents, the Bank of England. The Government could no longer afford to stand aloof and yet another Currency Committee was appointed under the chairmanship of Mr. Austen Chamberlain. This is known as the Chamberlain Committee.

New Measures—The conclusions of this Commission were that it was unnecessary to support the Gold Standard by a gold currency, that it was not to the advantage of India to encourage the internal use of gold as currency, that the internal currency should be supported by a thoroughly adequate reserve of gold and sterling, that no limit should be fixed to the amount of the Gold Standard Reserve, one half of which should be held in gold, that the silver branch of the Gold Standard Reserve should be abolished, that Reverse Councils should be sold on demand, that the Paper Currency should be made more elastic, and that there should be two Indian representatives out of three on the Finance Committee of the India Office. The Com-

mittee dealt inconclusively with the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilty, but do not do it again." They gave a passing commendation to the idea of a State Bank. Sir James Begbie, the only Indian banker on the Committee, appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when increases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign.

IV. CURRENCY AND THE WAR

The report was in the hands of the Government of India shortly before the outbreak of the war. Some immediate steps were taken, like the abolition of the silver branch of the Gold Standard Reserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the war broke out. The early effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sale of Reverse Councils, £8,707,000, being sold up to the end of January 1915. There were withdrawals from the Post Office Savings Banks, and a net sum of Rs 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold, Notes to the extent of Rs 10 crores were presented for encashment and the Government were obliged to suspend the issue of gold. But these were transient features and did not demand a moratorium, confidence was soon revived and Exchange and the Note issue continued strong. The difficulties which afterwards arose were from causes completely unanticipated by all students of the Indian currency. They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries, a heavy expenditure in India on behalf of the British Government, and a phenomenal rise in the price of silver. If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India. It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom chiefly Treasury Bills, and the issue of coined

rupees. But simultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27½ pence per standard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within any limits and to provide a sufficiency to meet the demand.

Rise in Exchange—The measures adopted by the Government of India in these emergencies were to bring exchange under rigid control, confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council Bills, so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence—

| Date of Introduction | Minimum Rate for Immediate Telegraphic Transfers |
|----------------------|--|
| 3rd January 1917 | 1 4½ |
| 28th August 1917 | 1 5 |
| 12th April 1918 | 1 6 |
| 13th May 1919 | 1 8 |
| 12th August 1919 | 1 10 |
| 15th September 1919 | 2 0 |
| 22nd November 1919 | 2 2 |
| 12th December 1919 | 2 4 |

V. THE 1919 COMMITTEE.

The effect of these measures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the rupee at one and fourpence. The war being over, a Committee was appointed to advise in regard to the future of Indian exchange and

currency. It sat in 1919 and reported towards the end of the year. Its main recommendations are summarised below—

(1) It is desirable to restore stability to the rupee and to re-establish the automatic working of the Indian currency system.

(i) The reduction of the fineness or weight of the rupee, the issue of 2 or 3-rupee coins of lower proportional "like" content than the present rupee, or the issue of a nickel rupee, are expedients that cannot be recommended.

(iii) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currency from the risk of becoming inconvertible cannot be entertained.

(iv) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benefit.

(v) Indian trade is not likely to suffer any permanent injury from the fixing of exchange at a high level.

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fail to adjust themselves with equal rapidity to the lower level of prices, then it might become necessary to consider the problem afresh.

(vi) The development of Indian industry would not be seriously hampered by a high rate of exchange.

(vii) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into consideration.

(viii) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control.

(ix) The balance of advantage is decidedly on the side of fixing the exchange value of the rupee in terms of gold rather than in terms of sterling.

(x) The stable relation to be established between the rupee and gold should be at the rate of Rs. 10 to one sovereign, or, in other words at the rate of one rupee for 1130.016 grains of fine gold, both for foreign exchange and for internal circulation.

(xi) If silver rises for more than a brief period above the parity of 2s. (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue. Such measures might be (a) reduction of sale of Council Bills, (b) abstention from purchase of silver, (c) use of gold to meet demands for metallic currency. If it should be absolutely necessary to purchase silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a loss.

(xii) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term. There is no obligation to sell drafts to meet all trade demands, but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sterling cost of shipping gold to India. At present this rate will vary but when sterling is again equivalent to gold, it will remain uniform.

The Government of India should be authorised to announce, without previous reference to the Secretary of State on each occasion, their readiness to sell weekly a stated amount of Perverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United Kingdom.

(xiii) The import and export of gold to and from India should be free from Government control.

(xiv) The statutory minimum for the metallic portion of the Paper Currency Reserve should be 40 per cent. of the gross circulation.

As regards the fiduciary portion of the reserve the holding of securities issued by the Government of India should be limited to 20 crores. The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's maturity, issued by Government within the British Empire.

The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s. to the rupee. The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years.

(xv) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange.

Minority Report—The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note Issue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form. In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase silver for coining purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold. All other recommendations are subsidiary thereto. But in this they were not unanimous. An important member of the Committee, Mr. Dadiba Dalal, of Bombay, appended a minority report in which he urged the adoption of the following course:—

(a) The money standard in India should remain unaltered, that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1.

(b) Free and unfettered imports and exports by the public of gold bullion and gold coins.

(c) Free and unfettered imports and exports by the public of silver bullion and silver coins.

(d) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender.

(e) As long as the price of silver in New York is over 92 cents, Government should not manufacture silver rupees containing 165 grains fine silver

(f) As long as the price of silver is over 92 cents Government should coin 2 rupee silver coins of reduced fineness compared with that of the present silver rupee and the same to be unlimited legal tender

(g) Government to sell Council Bills by competitive tenders for the amount defined in the Budget as required to be remitted to the Secre-

tary of State The Budget estimate to show under separate headings the amount of Council Bills drawn for Home Charges, for Capital Outlay and Discharge of Debt Council Bills to be sold for Government requirements only and not for trade purposes, except for the purpose mentioned in the next succeeding recommendation

(h) "Reverse" drafts on London to be sold only at 1s 3/20-3/2d The proceeds of "Reverse" drafts to be kept apart from all other Government funds and not to be utilised for any purpose except to meet drafts drawn by the Secretary of State at a rate not below 1s 4/3-3/2d per rupee

VI. THE TWO SHILLING RUPEE

The fundamental recommendation of the Committee was that the rupee should be linked to gold and not to sterling, in view of the decline in the value of sterling, that it should be linked at the rate of two shillings instead of the standard value, one and fourpence all other recommendations were ancillary to this But it is very important to bear in mind the twofold problem which confronted the Committee It would be quite easy to fix any low ratio provided the paper currency were made inconvertible, or the rupee debased to such a point that the Government in providing rupee currency, were independent of the price of silver But if the convertibility of the rupee were to be maintained, and if the rupee were not to be debased, it was essential that the new ratio should be one at which the Government could reasonably rely on purchasing without loss the silver necessary to meet the heavy demands for rupee in India For reasons set out in the Report, the Committee came to the conclusion that the Government could reckon on purchasing silver for coining at a little under two shillings gold, and that powerfully influenced them in fixing the new ratio at two shillings gold

The Report Adopted—The Currency Committee's Report was signed in December 1919, but it was not until February 1920 that action was taken thereon In the first week of that month a Notification was issued in India accepting the principal recommendations in the Report and notifying that the necessary official action would be taken thereon This action covered a wide field, but for the sake of clarity in this narrative we shall concentrate on the main issue, the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade That may be summarised in a sentence A policy which was avowedly adopted to secure fixity of exchange produced the greatest fluctuations in the exchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hundreds of big traders to the verge of bankruptcy.

Financial Confusion—This result was produced by many causes It has been explained above that the essential features of the Indian currency system are the free sales of Council Bills at gold export point in London to prevent exchange from rising above the official standard and the sale of Reverse Councils in India at gold export point to prevent exchange from falling below the official standard Now when the

Currency Report was signed the Indian exchanges were practically at two shillings gold But between the signing of the Report and the taking of official action, there was a sensational fall in the sterling exchanges, as measured in dollars, the dollar-sterling rate, inasmuch as America was the only free gold market, being the dominating factor in the situation Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification accepting the Currency Committee's Report was issued The Indian exchanges were two shillings and fourpence, and weak at that, the gold rate was about two shillings ninepence There was an immediate and prodigious demand for Reverse Councils, to take advantage of this high rate of exchange, the market rate jumped up to two shillings eightpence

Effect of the Rise—The effect of a rise in exchange has been well described in the words of the Currency Committee's Report, it is that a rising exchange stimulates imports and impedes exports, the effect of a falling exchange is the reverse

Now when the official notification of the two shilling rupee was made the Indian export trade was weak The great consuming markets of Great Britain and America were glutted with Indian produce The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit The only Indian staples which were in demand were foodstuffs, and as the rains of 1920 failed over a wide area, the Government were not able to lift the embargo on the export for foodstuffs, save to a limited extent in the case of wheat On the other hand, the import trade was strong Orders had been placed for machinery and other manufactured goods during the war and after the Armistice for delivery at the discretion of manufacturers These began to come forward

Difficulties Accentuated—In accordance with the principles laid down by the Currency Committee these difficulties were accentuated by the action of Government in raising exchange by an administrative act The weak export trade was almost killed At the same time the temptation of a high exchange gave powerful stimulus to the import trade and orders were placed for immense quantities of manufactured goods, in which textiles filled a important place Afterwards other forces intervened which accentuated the difficulties of the situation There was a severe commercial crisis in Japan and this

artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If let alone, the natural fall in exchange would have tended to correct the adverse balance of trade, the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand, importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55 millions of Reserve Councils before abandoning

their effort to stabilise exchange at the new ratio, the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India—was Rs 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamia—this expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

VII COMMISSION OF 1925-26.

These unfortunate experiments induced a period of great caution in dealing with Indian currency. The currency quacks having had their way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, followed. Left alone Exchange established itself round about the old ratio of fifteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Imperial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater elasticity was established in the currency by the power to issue emergency currency up to Rs. 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now purchases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own strength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Saksosch as the chief gold expert. The personnel of the Committee was strongly criticised in India, on the ground that the Indian membership was inadequate, and that the individuals selected were not authoritative, a resolution was passed in the

Assembly hostile to the whole body. Nevertheless the Committee arrived in India in November 1925 and took evidence in Delhi, Bombay and Calcutta. It sailed for England in February 1926, and resumed its hearings in London, and reported on July 1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and they are textually reproduced in order that they may be above question—

(i) The ordinary medium of circulation should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.

(ii) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.

(iii) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.

(iv) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.

(v) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.

(vi) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.

(vii) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.

(viii) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is made as to the form of the note.

(ix) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department

(x) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be at its discretion to employ such methods of remittance as it may find conducive to smooth working

(xi) During the transition period the Government should publish a weekly return of its remittances made. A trial should be made of the system of purchase by public tender in India

(xii) The cash balances of the Government and of the Secretary of State outside India as well as the banking reserves in India should be in the hands of the Reserve Bank. The Government of India Act should be amended accordingly

(xiii) The transfer of Reserve assets should not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931

(xiv) During the transition period the currency authority (i.e. the Government until the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange. This obligation should be embodied in statutory form of which the outline is suggested

(xv) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 18 6d

(xvi) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel should be on sale at post offices

(xvii) Measures should be taken to promote the development of banking in India

(xviii) Every effort should be made to remedy the deficiencies in the existing body of statistical data

A Minute of Dissent—Whilst all the members of the Commission signed the report, one of them, Sir Purshotamdas Thakordas, did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that their efforts were emasculated by successive Secretaries of State, who had in view something which was often called the

(xix) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years

(xx) The balance of the Reserve should be held in self liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years

(xxi) A figure of Rs 50 crores has been fixed as the liability in respect of the contractibility of the rupee circulation. Recommendations are made to secure that an amount (equal to one fifth of the face value of any increase or decrease in the number of silver rupees in

the duty of carrying through its remittances, it is to act generally as a bank of the banks, and its principal function will be to re-discount bankable bills held by the commercial banks. Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits is to be paid over to the Government. In return for making over the note issue and the reserves, the Government is to nominate the managing-governor and deputy managing-governor, and three members of the Board—five members from a Board of fourteen. In order to free the Bank from political pressure, the Commission think it desirable to provide that no person shall be appointed President or Vice-President of a Local Board, or shall be nominated as a member of the Central Board, if he is a member of any of the legislatures.

The main principle underlying this recommendation is not open to question. It is of paramount importance to remove the Indian currency system from official management and to link the control of currency with the control of credit. This connotes the establishment of a Central Bank. But it is not the complete essential, far from it.

India is sometimes spoken of as the sink for the precious metals. So long as she chiefly absorbed silver the West looked on with benevolent approval, now she is turning to gold the attitude is different. Indian capital is sometimes described as inadequate and timid. But critics do not realise that the banking organisation of the country is so hopelessly inadequate that hundreds of millions of people have no secure refuge for their store of value other than gold and silver bullion in their own possession. The Exchange Bank cling to the seaports. The indigenous banks follow their example. The Imperial Bank is the only organisation which can carry reliable credit facilities into the mofussil. The old Presidency Banks were lamentably slow in exercising this responsibility. The pace has been quickened, and as the price of the free use of the Government balances the Imperial Bank was called upon to open a hundred new branches. The total number of its branches is yet only a hundred and sixty-four, and it was stated by a competent banking authority in evidence before the Commission that India needed at least five thousand.

This extension of banking facilities is of transcendental importance. In an address to the University of Delhi last year Sir Basil Blackett committed himself to a remarkable statement. "To some it may sound fantastic, in view of this historic habit—reliance on external capital—to talk of India's not supplying the whole of her own capital requirements but also becoming a lender of capital for the development of other countries. Yet, I believe firmly that, given the necessary development of banking and credit facilities and goodwill and readiness to profit by the counsel and assistance of European businessmen, the time is not very far distant when India will be doing both these things. India would seem by nature to be destined to be a creditor country, if only her people will it so." But Indian resources will not be mobilised without the vehement development of branch banks.

As matters stand this work can only be done by the Imperial Bank, and though it is moving it is with desperate slowness. There are one or two features common to most of the hundred new branches it has opened. They attract deposits, they facilitate the investment habit; but they do not pay. To many who are in close touch with Indian conditions it seems that any measure which would weaken the capacity of the Imperial Bank to prosecute this unremunerative, but imperatively necessary, work by the diversion of the Government balances to the Indian Reserve Bank, or the division of these balances between the two banks, would be a retrograde measure. There are other considerations. The amount of re-discounting to be done in India is not large, as the Exchange Banks, which finance the export trade, re-discount in London, which is always likely to be the cheaper market. The number of men in India qualified to act on the directorate of banks is small. Are there enough to constitute the reliable directorates for two great banking institutions? The Commission rather glaze over these difficulties. They think that the Reserve Bank will be able to spare for the Imperial Bank sufficient funds from the Government balances to enable it to prosecute the work of opening new branches, also that a bill market will rapidly develop. But their arguments wear an aspect of special pleading. However, the issue can be put in a nutshell. India must have a Central Bank. It is found impossible to develop, even as a temporary measure, the Imperial Bank into a Central Bank, then there must be a Reserve Bank on the lines sketched in the Report. But if a new Reserve Bank is established, it is essential that provision shall be made for the Imperial Bank to enjoy the free use of a sufficient share of the Government balances to enable it vigorously to develop banking facilities in the mofussil and this obligation should be made compulsory.

The Note Issue—Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency, the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900, it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market, and it placed the Indian currency system, as occurred during the war, at the mercy of the silver market. The maintenance of the convertibility of the note into silver rupees of the present fineness is only possible so long as silver does not rise above 48d an ounce. The removal of this anomalous provision, the Commission say, is an essential step in Indian currency reform which must be taken sooner or later. "No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes, a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value." Both proposition can be accepted in their entirety.

The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself, it was always convertible on demand, but from increased facilities for the encashment of notes, beginning with the introduction of universal notes of small denomination and steadily progressing as experience was gained. We can therefore endorse the conclusion of the Commission that the best way to foster the use of currency notes is to establish confidence in their practical convertibility, and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them. There has been another factor in popularising the note which commands less attention. The rise in prices made the rupee an unsuitable medium for large commercial transactions from the bulk and weight of the amount of currency required.

The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain this obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be reissued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupees, at its option, but it will be the duty of the Bank to supply rupees freely in such quantities as may be required for circulation, and of the Government to furnish the Bank with such coin. The currency position is such that the change in the legal status of the note will be unfelt. India is suffering from a surplus of rupees, the total volume of which is estimated at approximately Rs 400 crores. There are Rs 85 crores of silver coin and bullion in reserve. The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor. Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency market from the dependence on the silver authority which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation.

The reception of the Report followed very closely the lines indicated as probable in the article in *The Bankers' Magazine* which we have quoted extensively above. There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to one and fourpence. There was, particularly in Bombay, a reluctance to agree to the establishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re-moulded in order to make it the Central Bank, with the functions proposed to be re-mitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard, and the establishment of an organi-

sation which would link currency with credit with branches in other parts of India, whose main efforts were directed to the ratio, and to the idea that the legal ratio should be one and four, not one and six.

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six, and to support it by the sale of bullion on the lines laid down in the Report. At the request of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers were not available the discussion of this measure was postponed until the 1927 session. On November 15th the Government of India issued a notification to the following effect—

"After considering the report of the Royal Commission on Indian Currency and Finance the Secretary of State for India in Council in agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission subject to such further consideration of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian Legislature during the forthcoming session."

The new Ratio.—So far from closing the discussion this notification intensified it. Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February March 1927. The Indian Currency Bill was however accepted by the Assembly by a small majority, and adopted by the Council of State. It established the ratio of one shilling and sixpence gold at a price of twenty-one rupees three annas ten ples per tola of fine gold in the form of bars containing not less than forty tolas and would sell for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London. A rate of one shilling fivepence forty-nine sixths sterling was notified as Government's selling rate for these obligations.

Exchange has since remained stable at the one and sixpenny rate, but the proposal to establish a Reserve Bank for the control of Currency has not matured owing to differences between the Government and the Legislature as to the exact form of the Bank. World trade depression in the last few years made it increasingly difficult for the Government of India to maintain the statutory ratio but their difficulties were solved when Great Britain went off the Gold standard in September 1931 and the rupee was linked to sterling. By the end of the year exports of commercial gold from India had begun to show their effects and on December 30 the T.T. rate had risen to 1,0 1/2, compared with 1 1/2 on September 18.

The characters of the Reserves which are the backbone of the Indian currency system are shown below—

Composition of the Currency Reserves held against the note circulation at the end of each month (In lakhs of rupees)

| MONTH. | Gross circulation of notes | COIN AND BULLION RESERVE | | | | | | | SECURITIES | | | |
|-----------|----------------------------|--------------------------|-----------------------|-------------------------|-------------------------|---------------------------|---|---|---|--------------------------------|---------------------------|----------------------------|

THE RESERVE BANK

An essential part of the scheme formulated by Currency Commission was the formation of a Reserve Bank, to take over the Note Issue custody of the Government remittances, and act as a true banker's bank. The Commission pointed out that India was one of the few great countries where the control of currency was divorced from the control of credit, and where Government carried out immense financial transactions through its own agency, and proposed the Reserve Bank as the apex of the new financial system.

There was no need to create a body of shareholders and that if a bank with share capital was created there was the risk of it falling under the domination of foreign capitalists, or of Indian capitalists in the big cities.

The real ground of objection was the first, the legislature sought to make the Bank responsible to the legislature that opened the great question whether the Reserve Bank should be commercial or political.

The New Bill—After conferring with the authorities in London, the Finance Member published in January 1928 the draft of an entirely new Bill. On the main point it was uncompromising. It provided for a shareholders bank, with a capital of five crores of rupees, and it entirely excluded political interest in the management by stipulating that members of the legislatures were precluded from becoming directors. On all other points it sought to meet the objections to the original scheme. The provisions in this respect governed the directorate and the qualifications for shareholders. As these are important they are set out here—

The Shareholders—(1) The original share capital of the Bank shall be five crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up

(2) No amount in excess of twenty thousand rupees shall be issued to any one person or to any two or more persons jointly, and no person shall be allowed to acquire an interest in the share capital of the Bank, whether held in his own right, or held jointly with others, or held partly in his own right and partly jointly with others, to a value in excess of twenty thousand rupees

The Government accepted these recommendations, and in January 1927 introduced a Bill to give effect to the Commission's advice. They proposed a shareholders bank, with a commercial directorate tempered by Government nominees, and a new agreement with the Imperial Bank freeing it from some of the restrictions imposed. The Bill was referred to a Select Committee, when a marked divergence of opinion was manifested. A majority of the Committee carried recommendations for the formation of a shareholders' bank into a State Bank, with a strong element of directors selected by the legislatures. This changed Bill was before the legislature in September, and was withdrawn by the Government for further consideration, it being understood that the Secretary of State for India objected to the drastic changes made in the original scheme.

These objections to the original scheme have been summarised under the following heads. That a Reserve Bank in charge of the credit and currency should be responsible to the legislature that only a State Bank would carry the confidence of the people, that a Reserve Bank does not require much capital, and therefore

(3) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Madras, Rangoon and Delhi, and a separate issue of shares shall be made in each of the areas served by those registers, as hereinafter defined, and shares shall not be transferable from one register to another save in accordance with conditions to be prescribed by the Governor-General in Council.

(4) A shareholder shall be qualified to be registered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a shareholder in more than one register or as a holder of an interest in the share capital of a total nominal value exceeding twenty thousand rupees, and no person who is not—

(a) domiciled in India, or

(b) a British subject ordinarily resident in India, or

(c) a company registered under the Indian Companies Act, 1913, or a society registered under the Co-operative Societies Act, 1912, or a scheduled bank, or a corporation or company incorporated by or under an Act of Parliament or any law for the time being in force in any of His Majesty's dominions and having a branch in British India, shall be registered as a shareholder or be entitled to payment of any dividend on any share

Management—The essential clauses of the Bill relating to the management of the Bank are —

The general superintendence of the affairs and business of the Bank shall be entrusted to a Board of Directors which may exercise all powers and do all such acts and things as may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Bank in general meeting

Save as expressly provided in this Act

—(a) no person may be a Director who is not or has not at some time been—(i) actively engaged in agriculture, commerce, finance or industry, or (ii) a director of any company as defined in clause (2) of section 2 of the Indian Companies Act, 1913, or of a corporation or company incorporated by or under any law for the time being in force in any place outside British India and (b) no person may be a Director who is—(i) a government official, or (ii) an officer or employee of any bank or (iii) a director of any bank, other than a registered society as defined in clause (e) of section 2 of the Co-operative Societies Act, 1912

The election or appointment as Director of any person who is a member of the Indian Legislature or of a local Legislature shall be void, unless within one month of the date of his election or appointment he ceases to be such member, and if any Director is elected or nominated as member of any such Legislature he shall cease

to be a Director as from the date of such election or nomination, as the case may be.

The Board shall consist of the following Directors, namely —(a) a Governor and two Deputy Governors to be appointed by the Governor-General in Council after consideration of any recommendation made by the Board in that behalf, (b) four Directors to be nominated by the Governor-General in Council, (c) two Directors to be elected by the Associated Chambers of Commerce, (d) two Directors to be elected by the Federation of the Indian Chambers of Commerce, (e) one Director, representing the interest of agriculture to be elected by provincial co-operative banks holding shares to the nominal value of not less than five thousand rupees, (f) eleven Directors to be elected on behalf of the shareholders on the various registers, (g) one government official to be nominated by the Governor-General in Council

The shareholders registered on the various registers shall elect delegates for the purpose of electing Directors to represent them on the Board, and the numbers of delegates shall be as follows, namely —(a) for the Bombay register—twenty-four members, (b) for the Calcutta register—twenty-four members, (c) for the Madras register—ten members, (d) for the Rangoon register—ten members, (e) for the Delhi register—twenty-four members

The election of delegates for the shareholders on a register shall be held once in every five years, at a convenient time before the expiry of the term of office of the retiring Directors for the election of whose successors the delegates are to be elected

(5) Delegates shall hold office for a period of five years

Reception of the Bill—When the Bill was published many of those who were opposed to the original scheme seemed to be chary of committing themselves to an opinion. But the general attitude may be fairly indicated in these terms. By those who accepted the idea of a shareholders' bank, the Bill was regarded as a considerable improvement, inasmuch as it safeguarded the country against either alien or capitalist control, and gave every part of the country, and every important interest, representation on the directorate. Those who wanted a State, or in other terms a political bank, stood fast in their opposition, and objected the scheme root and branch. There was the further criticism that the original Bill having passed through Select Committee, and been discussed in the legislature, it was unconstitutional to withdraw it and substitute a fresh measure, the correct procedure they maintained, was for the original Bill, as amended by the Select Committee and the legislature to be proceeded with. The Bill failed to secure the support of the Legislature and was withdrawn

Trade.

India is pre-eminently an agricultural country, and that fact dominates the course of its trade. The great export staples are the produce of the soil—wheat, seeds, cotton and jute. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such year as 1896-97 and 1899-1900. Well over thirty per cent of the culturable area of the Punjab is under irrigation and huge new works are in progress to utilise the waters of the Punjab in the Indus in Sind. Whilst these great works have been carried out or are in progress to spill on the land the floods of the snowed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South like the Cauvery are being harnessed to preserve their flood waters for Madras. All over India irrigation works, large and small, are being restlessly pressed forward, and their effect is to give a far greater stability to Indian agriculture.

for a year or two the export trade reeled under the shock. The progress of the Dawes Plan and the measures taken under the League of Nations to assist Austria and Hungary back to industrial health had a special bearing on the prosperity of India, they have been elements of importance in inducing her recovery of prosperity.

But whilst India is pre-eminently an agricultural country, she ranks at the International Labour Office at Geneva as one of the great industrial countries of the world. Her manufacturing industries are few in number and are concentrated in a few areas, but they are of great importance. The largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the Tata Iron and Steel Company where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has lost a considerable part of its export trade to Japan, the Far East and East Africa, the mills find their principal outlet in India itself, and even there they are subject to severe competition from Japan and China. The iron and steel industry is for the most part a home industry, though large quantities of Indian pig iron are shipped to the Far East, and in some years to the western ports of North and South America. Therefore whilst India is still in the main an agricultural country, three-quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing importance, and their prosperity every year affects in an increasing degree the general prosperity of the people.

I.—GENERAL

The year 1930-31 witnessed one of the worst industrial and trade depressions in history in which India fully shared. Unsettled political conditions caused by the civil disobedience campaign and the boycott of British and foreign goods were also factors in India's trade decline. Imports of private merchandise into British India totalled in value Rs. 164.82 crore a fall of Rs. 75.98 crore, or nearly a third compared with the figures for the previous year. Exports dropped by Rs. 90.32 crore or over a third to Rs. 220.49 crore. The fall in the value of exports due to the disastrous slump in the prices of agricultural raw materials while the decline in the value of imports may be attributed to the reduced purchasing power of consumers in India and the unsettled political situation. The monsoon was good giving a favourable season and almost all the principal crops showed an increased outturn. Labour unrest continued to be a feature of the industrial situation but though the number of disputes was about the same as that of the previous year the number of workmen involved and the loss of working days were much less than during 1929. The most important strike of the year was a general strike on the G. I. P. Railway which however, collapsed in the two months.

Volume of Trade—The following figures have been compiled to show the values of imports and exports of merchandise on the basis of the declared values in 1922-23. These statistics are necessarily approximate, but they are sufficiently accurate to afford a fairly reliable measure of the course of trade —

(In crores of Rupees)

| | 1913-14 | 1922-23 | 1923-24 | 1924-25 | 1925-26 | 1926-27 | 1927-28 | 1928-29 | 1929-30 | 1930-31 |
|---|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Import | 183 | 138 | 120 | 137 | 143 | 156 | 181 | 190 | 189 | 157 |
| Exports | 144 | 214 | 240 | 250 | 246 | 228 | 248 | 260 | 263 | 235 |
| Total trade in merchandise excluding re-exports | 437 | 352 | 360 | 387 | 389 | 384 | 429 | 450 | 452 | 392 |

The table shows a serious retrogression from the record level attained in the preceding year, indicating as it does a decline of Rs 60 crores on 1913-14 prices in the total trade in merchandise (excluding re-exports). It is significant that the decline on the import side was considerably heavier than that on the export side.

Prices in India—Prices in India followed the general collapse elsewhere. The Calcutta wholesale prices index number for September, 1929, was 143. By January 1931, it had fallen to 98, a drop of about 32 per cent. The fall in prices was higher in India than in other countries owing to the fact that in India raw materials, especially agricultural raw materials, form the most important part of the production of the country.

The greatest decline was in the case of raw jute which showed a fall of 50 per cent in March 1931 as compared with September 1929. Oilseed ran a close second, the fall in price being 49 per cent in March 1931. Wheat came third with a fall of nearly 47 per cent to its credit. Thus, in these three important cases alone prices fell by nearly half in the course of 18 months. The fall in the case of raw cotton was 36 per cent and that in the case of rice 35 per cent. Jute manufactures showed a fall of 34 per cent. The fall in the case of these three items was, therefore, nearly 35 per cent each. The only exception to this heavy fall in the price of agricultural commodities was supplied by tea which showed a fall of only 12 per cent. On the other hand, the fall in the case of imported manufactured articles was comparatively much smaller than in the case of agricultural products. Cotton manufactures and sugar recorded a fall of 10 per cent each, and metals one of 15 per cent. In none of

these latter cases, therefore, was the fall greater than about 25 per cent and it will thus be seen that agricultural commodities suffered to a far greater extent than manufactured articles. In other words, the prices of India's exports fell considerably more than the prices of her imports and this differential had a very great bearing on the foreign trade of the year.

Imports—On the import side the principal feature of the year was the drastic reduction in the Indian demand for imported textiles. The aggregate value recorded under the textile group amounted to Rs 41 crores as against Rs 78 crores recorded in 1929-30. The special significance of this retrogression lies in the circumstance that the textile group which had hitherto been the most important item in the import trade of India was forced to yield its place of predominance to the metal group. The decline under textile was primarily the effect of a reduction in imports of cotton piecegoods, the total receipts of which amounted to only 890 million yards valued at Rs 20,05 lakhs in the year as compared with 1,919 million yards valued at Rs 50,25 lakhs in 1929-30. Naturally enough, all the three principal descriptions of cotton piecegoods—grey, white and coloured—had their respective shares in this heavy decrease, grey goods declining by 561 million yards, white by 202 million and coloured by 237 million yards. But the most striking single factor with regard to cotton piecegoods was the falling off in consignments from the United Kingdom, notably of grey goods, imports of which from that source alone showed a reduction of 377 million yards. The decline under piecegoods was supplemented by a reduction in imports of cotton twist and yarn from 44 million lbs valued at Rs 6,00 lakhs to 29 million lbs valued at Rs 3,08 lakhs. There were concurrent reductions under some of the other important items included in the textile group—

Bombay's share amounted to Rs 3,23 lakhs which meant a reduction of Rs 1,20 lakhs, but in spite of this decline her percentage share remained stable at 63

Balance of Trade—The visible balance of trade in merchandise and treasure for the year 1930-31 was in favour of India to the extent of Rs 38 crores compared with Rs 53 crores in the preceding year, Rs 52 crores in 1928-29 and the record figure of Rs 109 crores in 1925-26. The net imports of treasure on private account fell from Rs 26 crores to Rs 24 crores, of which net imports of gold were valued at Rs 13 crores and of silver at Rs 11 crores. Net imports of currency notes amounted to Rs 3 lakhs.

Tariff Changes—The changes in the tariff made under the Indian Finance Act, the Cotton Textile Industry (Protection) Act, the Indian Tariff (Amendment) Act and the Steel Industry (Protection) Act, all of 1930, were dealt with in the preceding year's review. Since then five Acts have been passed introducing extensive changes in the tariff.

The Steel Industry (Protection) Act, 1931, which was passed on the 28th February, gave effect to the recommendations of the Tariff Board concerning certain railway materials made of steel. It imposed a specific duty of Rs 2-4 per cwt on fish bolts and nuts, ordinary bolts and nuts, and dogspikes and another of Rs 2 per cwt on rivets and gibs, cotters, keys, distance pieces and other fastenings for use with iron or steel sleepers. It also brought chrome-steel switches and crossings as well as stretcher bars which form part of them under the protective tariff.

The Gold Thread Industry (Protection) Act, 1931, which was passed on the 28th February, gave effect to the recommendations of the Tariff Board on the question of extending protection to the gold thread industry in India. It imposed, for a period of ten years, a protective duty of 50 per cent *ad valorem* on silver thread and wire including so called gold thread and wire mainly made of silver and imitation gold and silver thread and wire, as well as silver leaf and lametta, metallic spangles and articles of a like nature. It also restored the duty on silver plate and on silver manufactures "not otherwise specified" to the original level of 30 per cent *ad valorem*.

The Indian Finance Act, 1931, which came into operation on the 30th March, introduced extensive changes in the customs tariff to provide additional financial resources. The changes fall into two distinct classes, increases in the substantive rates and additional impositions of the nature of surcharges. In the first category, the duty on ale, beer, porter, cider and other fermented liquors was raised by about 66 per cent above the old level, while those on wines and spirits (except denatured spirit and spirit

used in drugs and medicines) were raised by between 30 and 40 per cent. Duties on all grades of sugar (except molasses) and sugar candy were raised by Rs 1-4 per cwt and that on silver from 4 *as* to 6 *as* per ounce while betelnuts, spices and exposed cinematograph films were transferred from the general rate of 15 per cent to the 'luxury' rate at 30 per cent *ad valorem*. In the second category a surcharge of 2½ per cent was imposed on articles bearing 10 per cent duty, 5 per cent on articles bearing 15 per cent or the general rate of duty (except raw hemp) and 10 per cent on articles liable to 30 per cent or luxury duty. Other important surcharges are—15 per cent on cigars Rs 1-8 per thousand and on cigarettes 12 *as* per lb on unmanufactured tobacco, 9 pias per gallon on kerosene 2 *as* per gallon on motor spirit Rs 2-8 per ton on batching oil 4 pias per gallon on lubricating oil, 2½ per cent on fuel oil 10 per cent on arms and motor cars, motor cycles etc 2½ per cent on artificial silk yarn and thread, 7½ per cent on silk mixtures and Rs 2 per ton on Portland cement. Another important surcharge is that of 5 per cent *ad valorem* on cotton piecegoods.

The Finance Act also raised the excise duties on motor spirit, kerosene and silver bullion corresponding to the increases in the customs duties on these articles, the enhanced rates being 8 *as* per gallon 2½ *as* per gallon and 6 *as* per ounce, respectively.

All these changes in the customs and excise duties came into effect on the 1st March 1931, under the provisions of the Provisional Collection of Taxes Act, 1918.

The Salt (Additional Import Duty) Act, 1931, which came into force on the 18th March, imposed a temporary additional customs duty of 4½ *as* per maund on foreign salt in the interests of the Indian salt industry. It will remain in force up to 31st March 1932.

The Wheat (Import Duty) Act, 1931, which came into force on the 20th March, imposed a temporary customs duty of Rs 2 per cwt on foreign wheat in order to assist the sale of indigenous wheat in India. It also raised the duty on wheat flour to the same level and will remain in force up to 31st March 1932.

In addition to the statutory changes mentioned above, the protective duties on iron and steel galvanized sheets and articles made therefrom were increased with effect from the 30th December 1930, under Section 3 (4) of the Indian Tariff Act, 1894. The rate for non fabricated sheets was raised from Rs 30 to Rs 67 per ton while in the case of sheets fabricated or made into pipes and tubes, the alternate specific rate of Rs 33 per ton was in each case raised to Rs 73 per ton. The additional protection is to remain in force up to 31st March 1932.

Imports—(continued)

(In thousands of Rupees)

| | 1926 27 | 1927 28 | 1928 29 | 1929 30 | 1930 31 | Percentage on total imports of merchandise in 1930 31 |

| Jute and jute goods | 40,37 | 24,11 | 26,58 | 24,20 | 18,37 | 11 |
| Clocks and watches and parts | 25,66 | 27,22 | 27,61 | 23,47 | 16,86 | 10 |
| Matches | 65,00 | 39,37 | 17,22 | 10,89 | 4,11 | 02 |
| All other articles | 12,83,75 | 15,01,80 | 15,21,61 | 14,33,69 | 10,53,89 | 6 30 |
| TOTAL VALUE OF IMPORTS | 231,22,08 | 240,83,64 | 253,30,60 | 240,70,09 | 164,82,09 | 100 |

Cotton manufactures (Rs 25,25 lakhs)—The total value of the imports of cotton manufactures amounted to Rs 25,25 lakhs as against Rs 59,49 lakhs in the preceding year, a decline of Rs 34,24 lakhs or 57 per cent. Imports of cotton twist and yarn amounted to 29 million lbs valued at Rs 3,08 lakhs in 1930-31 as against 44 million lbs valued at Rs 6,00 lakhs in 1929-30, the decline in quantity being 34 per cent and in value 49 per cent. Imports of piecegoods in the year under review were 890 million yards in quantity and Rs 20,05 lakhs in value as compared with 1,919 million yards and Rs 50,25 lakhs in the preceding year, showing a decrease of 54 per cent in quantity and 60 per cent in value. These figures give a clear idea of the enormous fall, both in quantity and value, in the imports of cotton manufactures. The total decline in the value of imports in 1930-31 amounted to Rs 75,98 lakhs or 31.5 per cent. The decline in the total value of imports under

cotton manufactures in the year under review as compared with the preceding year amounted to Rs 34,24 lakhs or 57 per cent. As against this the decline in value under machinery was only 22 per cent, under sugar 30 per cent and under metals 33 per cent. Thus it will be seen that the magnitude of the decline in value under cotton piecegoods was much greater than in the case of the other articles. It may be surmised, therefore, that the political situation, i.e., the boycott, which was aimed most directly at imported cotton piecegoods, was responsible, to some extent, for the reduction of imports under this head. There is no doubt whatever that a part of the decline was due to the reduced purchasing power of the consumer in India, already explained in the preceding chapter. But the higher magnitude of the fall under cotton piecegoods was almost certainly due to the boycott directed against foreign piecegoods.

The value of the different classes of cotton manufactures imported during the past five years and the pre war year 1913-14 as set forth below —

Cotton Twist and yarn (Rs. 3,63 lakhs):—The imports of cotton twist and yarn in 1927-28 were valued at Rs. 3,63 lakhs, or 1,134 million yards, as against Rs. 3,08 lakhs, or 984 million yards, in 1926-27, an increase of 18 per cent in value and 45 per cent in quantity. In 1921-22 the imports were valued at Rs. 2,44 lakhs, or 744 million yards, and the decline since 1921-22 was 40 per cent in value and 24 per cent in quantity. The imports of cotton twist and yarn in 1927-28 were valued at Rs. 3,63 lakhs, or 1,134 million yards, as against Rs. 3,08 lakhs, or 984 million yards, in 1926-27, an increase of 18 per cent in value and 45 per cent in quantity. In 1921-22 the imports were valued at Rs. 2,44 lakhs, or 744 million yards, and the decline since 1921-22 was 40 per cent in value and 24 per cent in quantity.

are and for the last thirty years. The decrease was due chiefly to the decline in the former being 210 million yards or 41 per cent and in the latter of white goods did not decline to the same extent as that of grey goods, the decline under that head being 202 million yards or 41 per cent. As for the imports of coloured goods declined slightly more than those of white goods, being 206 million yards in the year under review as against 218 million yards in the preceding year, a decline of 7 million yards or 10 per cent. As for the imports of coloured goods, the imports of grey goods showed a decline of Rs. 14 lakhs, or 21 per cent, to Rs. 7 crores. White goods declined in value from Rs. 13 crores in 1926-27 to Rs. 12 crores in 1927-28, whereas the value of coloured goods declined from Rs. 10 crores in 1926-27 to a little under Rs. 9 crores in 1927-28.

Cotton piecegoods (Rs. 2,965 lakhs): The imports of cotton piecegoods in 1927-28 were valued at Rs. 2,965 lakhs, or 1,134 million yards, as against Rs. 2,44 lakhs, or 744 million yards, in 1926-27, an increase of 21 per cent in value and 53 per cent in quantity. In 1921-22 the imports were valued at Rs. 1,84 lakhs, or 544 million yards, and the decline since 1921-22 was 38 per cent in value and 26 per cent in quantity.

It is seen from the above table that in the year 1927-28 the imports of grey goods declined to Rs. 1,134 lakhs, or 1,134 million yards, as against Rs. 1,134 lakhs, or 1,134 million yards, in 1926-27, a decline of 18 per cent in value and 45 per cent in quantity.

Imports in all the three lines declined considerably. Under printed goods the quantity declined from nearly 200 million yards to 100 million yards in 1930-31, whereas the value declined from Rs 5.77 to Rs 2.61 lakhs. Imports of dyed goods decreased from 151 million yards valued at Rs 4.92 lakhs in 1929-30 to 93 million yards valued at Rs 2.69 lakhs in 1930-31. Similarly, the takings of coloured goods declined from 133 million yards valued at Rs 4.47 lakhs in the preceding year to 49 million yards valued at Rs 1.52 lakhs. The detailed figures relating to *Imported piecegoods* are given below in millions of yards —

| Grey (unbleached) | 1913-14
(pre-war
year) | 1929-30 | 1930-31 |
|--|------------------------------|--------------|--------------|
| Dhutis, saris and
scarves | 806 1 | 501 1 | 171 0 |
| Jaconets, Madapol-
lams, mulls, etc | 150 4 | 53 0 | 19 3 |
| Longcloth and
shirtings | 545 4 | 340 1 | 166 3 |
| Sheetings | 2 | 14 7 | 4 1 |
| Drills and jeans | 21 3 | 13 4 | 2 4 |
| Other sorts | 10 8 | 3 2 | 1 9 |
| TOTAL | 1,534 2 | 925 5 | 365 0 |

| White (bleached) | 1913-14
(pre-war
year) | 1929-30 | 1930-31 |
|--|------------------------------|--------------|--------------|
| Dhutis, saris and
scarves | 104 3 | 15 5 | 15 4 |
| Jaconets, Madapol-
lams, mulls, etc | 307 9 | 219 7 | 135 2 |
| Longcloth and
shirtings | 115 3 | 104.1 | 71 9 |
| Nainsooks | 204 7 | 53 1 | 25 9 |
| Drills and jeans | 5 7 | 6 6 | 3 8 |
| Checks spots and
stripes | 16 1 | 12 0 | 3 7 |
| Twills | 8 3 | 16 8 | 7 7 |
| Other sorts | 31 0 | 15 8 | 8 0 |
| TOTAL | 793 3 | 473 6 | 271 6 |

| Coloured,
printed or dyed | 1913-14
(pre war)
year | 1929-30 | 1930-31 |
|------------------------------|------------------------------|--------------|--------------|
| Dhutis, saris and
scarves | 115 2 | 33 0 | 19 1 |
| Cambrics, etc | 113 6 | 43 5 | 20 5 |
| Shirtings | 152 6 | 105 6 | 54 7 |
| Prints and chuntz | 209 7 | 61 3 | 33 7 |
| Drills and jeans | 30 0 | 86 6 | 33 3 |
| Checks spots and
stripes | 19 7 | 26 2 | 12 5 |
| Twills | 31 4 | 36 6 | 16 0 |
| Other sorts | 159 6 | 90 7 | 55 9 |
| TOTAL | 831 8 | 483 5 | 245 7 |

Under greys all the items showed very considerable decreases, that in the case of dhutis amounting to 330 million yards and in the case of longcloth and shirtings to 174 million yards.

The percentage shares in 1913-14 and in the

past five years of the United Kingdom and Japan, the two principal competitors in the Indian piecegoods import trade, in each of the three important classes of piecegoods are set forth below —

Percentage shares of the United Kingdom and Japan in the imports of cotton piecegoods

| | 1913-14 | | 1926-27 | | 1927-28 | | 1928-29 | | 1929-30 | | 1930-31 | |
|--------------------|----------------|-------|----------------|-------|----------------|-------|----------------|-------|----------------|-------|----------------|-------|
| | United Kingdom | Japan | United Kingdom | Japan | United Kingdom | Japan | United Kingdom | Japan | United Kingdom | Japan | United Kingdom | Japan |
| Cotton piecegoods— | | | | | | | | | | | | |
| Grey | 98 8 | 5 | 78 7 | 20 7 | 74 4 | 24 5 | 69 4 | 28 8 | 56 2 | 43 5 | 39 2 | 59 8 |
| White | 98 5 | | 96 4 | 5 | 94 7 | 1 0 | 94 8 | 1 0 | 92 1 | 2 9 | 84 6 | 10 3 |
| Coloured | 92 6 | 2 | 71 1 | 19 2 | 69 8 | 20 3 | 66 2 | 21 7 | 57 6 | 31 9 | 60 0 | 30 2 |

As in the previous year, the share of Japan in the imports of grey goods increased, whereas the share of the United Kingdom decreased correspondingly. The share of Japan in grey goods has been increasing rapidly from 1928-29 when it was only about 29 per cent. In 1929-30 it went up to 42½ per cent and in the year under review it was nearly 60 per cent. On the other

hand, the share of the United Kingdom had been consistently diminishing in the last five or six years, but particularly so in the last three years. In 1928-29 the share of the United Kingdom under grey goods was 79 per cent. By 1928-29 it had fallen to 69 per cent. In 1929-30 it dropped to 56 per cent but the fall in 1930-31 was of much greater magnitude than in any of the preceding

years, the share in that year being only 39 per cent. As regards white goods also, Japan has been making herself felt very distinctly in the last two years, though as yet her share is not of considerable magnitude. In 1929-30 Japan's share under white goods was 3 per cent. In 1930-31 it was slightly over 10 per cent. On the other hand the share of the United Kingdom declined from 92 per cent to a little under 85 per cent. In coloured goods however, Japan had a serious set back both in actual quantity and even in percentage share. The share of the United Kingdom on the other hand revived slightly. In 1929-30 the shares of the United Kingdom and Japan were 55 and 52 per cent respectively. In 1930-31 they were 60 and 30 per cent respectively.

Artificial silk (Rs 3,03 lakhs)—The trade under this head decreased both in quantity and value though on account of falling prices the decrease in quantity was much less than that in value. Imports of artificial silk yarn amounted to 7.1 million lbs valued at Rs 81 lakhs as compared with 7.4 million lbs valued at Rs 99 lakhs in the preceding year. The share of the United Kingdom fell from 1.4 million lbs valued at Rs 19½ lakhs in 1929-30 to a little over 1 million lbs valued at Rs 12 lakhs in 1930-31. Imports from Italy, on the other hand increased from 3.5 million lbs valued at a little under Rs 46 lakhs in 1929-30 to 4.5 million lbs valued at Rs 59½ lakhs in 1930-31. The share of the United Kingdom 1.4 per cent of the total quantity imported Italy contributed 0.3 per cent and the United Kingdom 1.4 per cent. The share of France went down from 883,000 lbs in 1929-30 to 1,21,000 lbs in the year under review. Similarly, the shares of Germany and Switzerland fell from 363,000 lbs and 406,000 lbs in 1929-30 to 270,000 lbs and 80,000 lbs respectively in 1930-31. The Netherlands, however, sent 763,000 lbs in the year under review as compared with 430,000 lbs in the preceding year.

As regards piecegoods of cotton and artificial silk the outstanding feature, as in the previous year, was the enormous growth of imports from Japan under this head. The total imports of these piecegoods in the year under review were 51.5 million yards valued at Rs 2,12 lakhs as compared with 56.6 million yards valued at Rs 3,15 lakhs in the preceding year. Thus, there was a decrease of about 5 million yards in the total imports. In spite of this decrease in the total imports Japan considerably increased her share from 25 million yards valued at Rs 1,40 lakhs in 1929-30 to 38 million yards valued at Rs 1,50 lakhs in 1930-31. As in the previous year Japan remained the largest single supplier of piecegoods of artificial silk and cotton and her share in the total trade amounted to 74 per cent as compared with 44 per cent in 1929-30. This remarkable increase was at the expense of all other suppliers of this class of piecegoods mainly of Italy, the United Kingdom and Switzerland. Imports from the United Kingdom went down from 7.2 million yards valued at Rs 41½ lakhs in 1929-30 to 2.4 million yards valued at Rs 12½ lakhs in 1930-31.

Silk, raw and manufactured (Rs. 2,99 lakhs)—The imports of raw silk declined from 2.2 million lbs valued at Rs 1,23 lakhs in 1929-30 to 1.94 million lbs valued at Rs 88 lakhs in 1930-31. The predominant supplier of

raw silk was as usual, China, including Hongkong which supplied 1.92 million lbs, that is almost the whole of the imports into India. Imports from Japan fell from 38,000 lbs to 17,000 lbs. Imports of silk piecegoods decreased from 22.9 million yards valued at Rs 2,23 lakhs in 1929-30 to 16.7 million yards valued at Rs 1,27 lakhs in 1930-31. As usual, the bulk of the supplies came from China and Japan which together sent 16 million yards out of the total of 1.67 million yards. The imports of goods of silk mixed with other materials showed a considerable increase in the year under review amounting to 4.6 million yards as compared with a little under 3 million yards in the preceding year. The increase in quantity imported was entirely due to larger shipments from Japan which amounted to nearly 4 million yards as compared with 2 million yards in the preceding year.

Wool, raw and manufactured (Rs 2,31 lakhs)—There was a decrease of nearly Rs 2 crores in the value of imports under this head as compared with the preceding year. The decrease was spread over both raw wool and woollen manufactures. Imports of raw wool declined from 6.7 million lbs valued at Rs 52 lakhs in 1929-30 to 3.1 million lbs valued at Rs 18½ lakhs in 1930-31, imports from all the consigning countries declining considerably. The United Kingdom sent 420,000 lbs valued at a little under Rs 5 lakhs in the year under review as compared with 1.2 million lbs valued at Rs 16½ lakhs in the previous year. Imports from Persia declined from 2.4 million lbs valued at Rs 9 lakhs in 1929-30 to 879,000 lbs valued at Rs 3 lakhs in 1930-31. The share of Australia also declined from 2.4 million lbs valued at Rs 22 lakhs in the preceding year to 1.6 million lbs valued at a little under Rs 10 lakhs. It will be seen that the magnitude of the decline in the case of Australia was much smaller than in the case of the other countries. Imports of woollen piecegoods in 1930-31 declined considerably as compared with the preceding year and were less than 50 per cent of what they were in 1928-29. Imports in the year under review amounted to 7.7 million yards, whereas in 1928-29 they amounted to 12.6 million yards and in 1928-29 to 16 million yards. The decline in the value was even greater.

Metals and manufactures thereof (Rs 15,91 lakhs)—The imports of metals and manufactures thereof declined by 259,000 tons or 35 per cent in quantity, from 1,028,000 tons in 1929-30 to 769,000 tons in 1930-31 and by Rs 7½ crores or 3 per cent in value from Rs 23½ crores to Rs 16 crores. Iron and steel represented nearly 80 per cent of this total as compared with Rs 17 crores in 1929-30 and receded to the fourth place in order of importance among India's imports in 1930-31 being cotton manufactures, machinery and millwork and sugar. If such items as machinery and millwork, hardware, cutlery, implements and instruments, and motor vehicles are grouped with metals and manufactures thereof under one head the total value would aggregate Rs 46½ crores, while the value of yarn and textile fabrics, which normally form the most important group among India's imports, amounted to Rs 33½ crores in the year under review. In the preceding year the metals group accounted for Rs 63½ crores, while the textile head totalled Rs 72½ crores.

Iron and steel (Rs 10.88 lakhs)—Imports into British India of iron and steel, including pig and old iron, amounted to 614,000 tons in 1930-31 as compared with 973,000 tons in the preceding year. The share of the United Kingdom fell from 50 per cent to nearly 44 per cent, the lowest percentage ever recorded, while the percentage shares of all other countries showed a distinct advance.

Other metals (Rs 5.02 lakhs)—Imports of metals, other than iron and steel declined from 55,500 tons valued at Rs 6.38 lakhs in 1929-30 to 54,000 tons valued at Rs 5.02 lakhs in 1930-31, the decrease being noticeable in the case of each description of non-ferrous metals with the exception of copper and zinc.

Machinery and millwork (Rs 15.13 lakhs)—Imports of machinery and millwork, which are recorded in value only, declined from Rs 10.35 lakhs in 1929-30 to Rs 15.13 lakhs in 1930-31. A part of this decline is attributable to the fall in prices that took place during the year. With the exception of mining, refrigerating and sugar machinery, all other branches of the trade showed decreases in value. The most noticeable decrease was recorded under prime-movers, the imports of which fell from Rs 4.12 lakhs in 1929-30 to Rs 2.74 lakhs in 1930-31. The loss under this head was due largely to smaller importation of railway locomotive engines and oil engines of the industrial type which were valued at Rs 1.30 lakhs and Rs 69 lakhs as compared with Rs 1.07 lakhs and Rs 1.06 lakhs respectively in 1929-30. Imports of textile machinery receded from Rs 3.92 lakhs to Rs 2.83 lakhs, mainly due to a decline in jute mill machinery.

Motor vehicles (Rs 4.99 lakhs)—There was a set-back in the imports of motor cars into India during the latter half of 1929-30, and this continued during 1930-31. The period was marked by severe economic and financial

depression. Customers naturally resorted to careful buying and owners were generally reluctant to replace their cars so long as there was any utility left in them, while not a few have abandoned the use of motor cars altogether owing to expenses involved. All these factors affected the sale of new vehicles. In India the peak of motor car imports was reached in 1928-29 when no fewer than 19,567 cars to the value of Rs 1.21 lakhs were imported. In the following year imports fell to 17,399 valued at Rs 3.76 lakhs and in 1930-31 the number declined further to 12,001 valued at Rs 2.58 lakhs. There was a substantial decrease in the imports from the United States of America, the number falling from 9,020 valued at Rs 1.95 lakhs in 1929-30 to 5,098 valued at Rs 1.00 lakhs in 1930-31 while the imports from Canada, consisting chiefly of new Ford cars, increased from 2,318 valued at Rs 42 lakhs to 3,250 valued at Rs 54 lakhs. The participation of America in the Indian trade is steadily on the decrease, for the combined imports from the United States of America and Canada represented 66 per cent of the total number of cars imported in 1930-31 as compared with 69 per cent in 1929-30 and 74 per cent in 1928-29. On the other hand, although the number of British cars imported fell from 3,758 valued at Rs 97 lakhs to 2,835 valued at Rs 71 lakhs, their proportion to the total imports advanced from 10 per cent in 1928-29 to 22 per cent in 1929-30 and 23 per cent in 1930-31. Italy sent 917 cars and France 261 as against 1,150 and 304 respectively in 1929-30. The imports of motor omnibuses, vans, lorries in 1930-31 numbered 8,913 valued at Rs 142 lakhs as compared with 15,306 valued at Rs 242 lakhs in the preceding year. The bulk of the imports came, as usual, from the United States of America and Canada which together supplied 96 per cent of the total number as compared with 97 per cent in 1929-30.

The following statement shows the number of Motor Vehicles registered in British India up to the 31st March 1931.—

| Provinces | Motor Cars
including
Taxi-cabs | Motor cycles
including
Scooters
and
Auto wheels | Heavy motor
vehicles
(lorries,
buses, etc.) | Total |
|---|--------------------------------------|---|--|------------|
| | Number | Number | Number | Number |
| Bengal including Calcutta | 33,220 | 4,849 | 4,128 | 42,197 |
| Bombay City | (a) 8,336 | (a) 499 | (a) 873 | (a) 9,708 |
| Bombay Presidency (excluding Bombay
City and Sind) | (a) 9,027 | (a) 772 | (a) 70 | (a) 9,869 |
| Madras City | 12,331 | 3,013 | 1,902 | 17,246 |
| Madras Presidency (excluding Madras
City) | 7,752 | 1,873 | 7,032 | 17,257 |

| Ajmer-Merwara | 550 | 152 | 181 | 883 |
| Assam | (c) 2,169 | (c) 306 | (c) 1,079 | (c) 4,154 |
| Total | 135,536 | 24,964 | 44,665 | 205,165 |

- (a) Represent number of vehicles registered during the year ending 31st March 1931.
 (b) Represent number actually running during the year 1930-31.
 (c) Relate to the year ended 31st December 1930.

Hardware (Rs 3,60 lakhs)—This head includes a number of varied items, such as implements and tools, metal lamps, enamelled ironware, builders' and domestic hardware which are chiefly recorded in value. In each of the two years 1928-29 and 1929-30 the value of the trade had been over Rs 5 crores, but in 1930-31 owing partly to lower prices and partly to reduced demand the value declined to Rs 3,60 lakhs which however was higher than the pre-war annual average of Rs 3,17 lakhs.

Sugar (Rs 10,96 lakhs)—The sugar industry had another bad year. Imports of sugar of all sorts, including molasses, decreased from 940,000 tons in 1929-30 to 901,000 tons in 1930-31, the decline in value being from Rs 15.51 lakhs to Rs 10.94 lakhs. The decline in the imports of sugar was due to some extent to the falling off of beet sugar imports from 131,000 tons to 78,000 tons. Imports of sugar 16 D S and above increased from 807,000 tons to 815,000 tons. The main increase was in the imports from Java which rose from 779,000 tons to 802,000 tons in the year under review. Imports from the United Kingdom of sugar 16 D S and above went down very considerably from 14,000 tons to a little over 1,250 tons. Imports from Ceylon increased by over 2,000 tons. Imports from China, including Hongkong, increased to 1,000 tons from 2,800 tons in the preceding year. The total amount of beet sugar imported during the year was 78,000 tons as compared with 131,000 tons in the preceding year. Imports from most of the countries however, an interesting feature of the year was the arrival of 42,600 tons from Russia which had no share in this trade during the two preceding years. The bulk of the imports of beet sugar during the year was received in Sind and Bombay.

Mineral Oils (Rs 10,48 lakhs)—Imports of all kinds of mineral oils into India in 1930-31 were slightly less than in the preceding year and amounted to 242½ million gallons valued at Rs 10.48 lakhs as compared with 252½ million gallons valued at Rs 11.04 lakhs in 1929-30. This represented a decline of only 4 per cent in quantity and of 5 per cent in value. Actually there was a fall in the imports of all oils except petrol which registered an increase. Of the total quantity of mineral oils imported in 1930-31, kerosene oil represented 41 per cent, fuel oil 44 per cent and lubricating oils 11 per cent as compared with 42, 43 and 11 per cent respectively in 1929-30. Imports of kerosene oil declined in quantity from the record figure of 106½ million gallons in 1929-30 to 99 million gallons in 1930-31 and from Rs 5.89 lakhs to Rs 5.34 lakhs. Coastwise imports from Burma to India proper amounted to 110 million gallons as compared with 122 million gallons in 1929-30. Of the foreign supplies, the United States of America reduced her contribution from 23 to 21 million gallons, and Persia from 29 to 18 million gallons. On the other hand, larger supplies were available from Russia which considerably increased her production during the year in accordance with Government plans. Imports from Russia, including Georgia and Azerbaijan, totalled 47 million gallons as compared with 37 million gallons in 1929-30.

Provisions (Rs 4,88 lakhs)—The total value of imported provisions steadily declined from Rs 6,21 lakhs in 1928-29 to Rs 5,64 lakhs in 1929-30 and further to Rs 4,88 lakhs in 1930-31.

Liquors (Rs 3,32 lakhs)—The total quantity of liquors imported fell by 5 per cent from 7,570,000 gallons in 1929-30 to 7,182,000 gallons in 1930-31, the corresponding decline in value being 12 per cent from Rs 3,77 lakhs to Rs 3,32 lakhs. The decrease was shared by all the provinces. Bombay took the largest quantity, 1,721,000 gallons compared with 2,290,000 gallons in 1929-30 and was closely followed by Bengal with 2,063,000 gallons as compared with 2,219,000 gallons in the preceding year. In the previous year with Rs 95 lakhs or 5 lakhs more than the value of the imports into Bombay their respective imports in 1929-30 were valued at Rs 1,125 lakhs and Rs 1,032 lakhs as against Rs 68 lakhs and Rs 39 lakhs respectively in 1929-30. Burma took 928,000 gallons valued at Rs 48 lakhs in 1930-31 compared with 1,042,000 gallons valued at Rs 53 lakhs in the preceding year. Of the total quantity of imported liquors, ale, beer and porter accounted for over 64 per cent, spirits 32 per cent and wines only 3 per cent.

Paper and Pasteboard (Rs 2,87 lakhs)—The total imports of paper and pasteboard fell from 2,740,000 cwt. valued at Rs 3,72 lakhs to 2,294,000 cwt. valued at Rs 2,87 lakhs in 1930-31, of which 1,985,000 cwt. (valued at Rs 2,60 lakhs) represented paper of all kinds as against 2,303,000 cwt. (valued at Rs 3,35 lakhs) in the preceding year. Imports of paper showed decreases in quantity and value in all varieties of paper except printing paper which was imported to the extent of 683,000 cwt. valued at Rs 99 lakhs as against 606,000 cwt. valued at Rs 123 lakhs in 1929-30.

New-printing paper declined from 486,000 cwt. valued at Rs 431,000 to 431,000 cwt. valued at Rs 63 lakhs in 1930-31. Other kinds of printing paper also recorded a decrease from 320,000 cwt. valued at Rs 60 lakhs to 252,000 cwt. valued at Rs 46 lakhs. Norway with her resources of wood pulp maintained the lead in the printing paper trade and supplied 242,000 cwt. valued at Rs 30 lakhs as compared with 251,000 cwt. valued at Rs 34 lakhs in 1929-30. Australia came next with 152,000 cwt. valued at Rs 16 lakhs and the United Kingdom with 77,000 cwt. valued at Rs 10 lakhs in 1929-30. As a result in the preceding year being 150,000 cwt. and imports of writing paper and envelopes registered a decline from 245,000 cwt. valued at Rs 19 lakhs to 157,000 cwt. valued at Rs 47 lakhs in 1930-31.

Chemicals (Rs 2,61 lakhs)—The total imports of chemicals (excluding medicinal preparations and medicines) declined by Rs 15 lakhs from Rs 2,79 lakhs in 1929-30 to Rs 2,61 lakhs in 1930-31. Soda compounds accounted for 117 lakhs or 45 per cent as compared with Rs 1,21 lakhs or 43 per cent in the preceding year. The United Kingdom was as usual the principal supplier of sodium carbonate, imports of which amounted to 1,052,000 cwt. valued at Rs 64 lakhs as against 1,204,000 cwt. valued at Rs 71 lakhs in 1929-30.

Drugs and Medicines (Rs 1.94 lakhs)—The total value of imported drugs and medicines recorded a fall of 14 per cent from Rs 2.26 lakhs in 1929-30 to Rs 1.94 lakhs in 1930-31.

Salt (Rs 1.18 lakhs)—The imports of foreign salt by sea into British India increased by 9 per cent in quantity from 644,000 tons in 1929-30 to 704,000 tons in 1930-31 but, owing to lower prices, declined in value by 9 per cent from Rs 1.30 lakhs to Rs 1.18 lakhs. Aden continued to be the principal source of supply, although receipts from that source were on a smaller scale and amounted to 188,000 tons as compared with 232,000 tons in 1929-30. With the establishment of new salt works in Italian Somaliland and in the Sudan consignments from Italian East Africa and Egypt considerably increased from 68,000 and 105,000 tons to 154,000 and 135,000 tons respectively. The supplies from Germany also advanced from 63,000 tons to 97,000 tons, while those from the United Kingdom and Spain fell from 83,000 and 69,000 tons to 42,000 and 67,000 tons respectively.

Cinematograph Films—The cinematograph film-making industry, although of comparatively recent origin, has been firmly established in India and it has, on the one hand, resulted in an increasing demand for raw films (i.e., those on which no pictures have been impressed) and has, on the other, been slowly but steadily ousting the foreign made exposed films from the field. The imports of the former which totalled 19 million feet (Rs 8½ lakhs) in 1928-29 rose to 21½ million feet (Rs 8½ lakhs) in 1929-30 and further to 28 million feet (Rs 11 lakhs) in 1930-31, while those of the latter gradually receded from 10½ million feet (Rs 20 lakhs) to 10¼ million feet (Rs 19 lakhs) in 1929-30 and to 10 million feet (Rs 19½ lakhs) in the year under review.

Spices (Rs 2.55 lakhs)—The improvement noticed in 1929-30 in the imports of spices proved to be short-lived and the receipts which had aggregated 1,654,000 cwts valued at Rs 3.26 lakhs in 1929-30 fell to 1,347,000 cwts valued at Rs 2.55 lakhs in 1930-31. This was due largely to a contraction in the supplies of betel nuts from the Straits Settlements.

Tobacco (Rs 1.51 lakhs)—The Indian tobacco manufacturing industry passed through a period of unprecedented crisis during the year. The industry maintained its position for the first two months of the year, but subsequently encountered more difficult times, when the campaign of the boycott of cigarettes spread all over India. There was a remarkable fall in the imports of unmanufactured tobacco for consumption in local factories, the consignments amounting to only 1½ million lbs., the lowest since 1922-23, as compared with 4½ million lbs. in 1929-30 and nearly 7 million lbs. in 1928-29. The supplies from the United States of America

accounted for 92 per cent of the total quantity imported as against 97 per cent in 1929-30.

Foreign made cigarettes also recorded a decrease from 5½ million lbs. valued at Rs 2.13 lakhs to 3 million lbs. valued at Rs 1.22½ lakhs. Nearly 93 per cent of the total quantity of cigarettes imported came from the United Kingdom as compared with over 99 per cent in 1929-30. A feature of the trade has been the receipt of 144,000 lbs. of low grade cigarettes valued at Rs 2 lakhs from China whose contribution in the preceding year was insignificant.

Glass and Glassware (Rs 1.65 lakhs)—The value of the imports of glass and glassware, which had reached the total of Rs 2.52 lakhs in 1929-30 receded to Rs 1.65 lakhs. Although all the principal suppliers were affected by this set-back, Czechoslovakia with her consignments worth Rs 36 lakhs in 1930-31 suffered most. Japan continued to occupy the foremost position in the trade. The value of her supplies, however, went down from Rs 74 lakhs to Rs 55 lakhs.

Dyeing and Tanning Substances (Rs 2.59 lakhs)—Notwithstanding a decline in quantity from 19 million lbs. in 1929-30 to 16½ million lbs. in 1930-31, the imports of coal tar dyes recorded an increase in value from Rs 1.97 lakhs to Rs 2.08 lakhs. Aniline dyes formed 77 per cent of the total quantity of coal tar dyes imported as compared with 70 per cent in the preceding year.

Precious Stones and Pearls (Rs 60 lakhs)—The imports of precious stones and pearls unset recorded a further decline from Rs 1.10 lakhs in 1929-30 to Rs 60 lakhs in 1930-31, of which diamonds accounted for Rs 46 lakhs and pearls unset for Rs 11 lakhs as compared with Rs 83 and Rs 23½ lakhs respectively in the preceding year.

Cement (Rs 55 lakhs)—Imports of cement declined in quantity from 121,000 tons to 112,000 tons and in value from Rs 64 lakhs to Rs 55 lakhs. Although the United Kingdom maintained her predominant position in this line, she lost fresh grounds to Japan which considerably extended her business in India.

Coal (Rs 28½ lakhs)—Imports of foreign coal declined by 30 per cent in quantity from 224,000 tons in 1929-30 to 156,000 tons in 1930-31 and by 32 per cent in value from Rs 41½ lakhs to Rs 28½ lakhs. Bombay was naturally the largest consumer, but her takings were considerably reduced from 183,000 tons to 104,000 tons.

As usual, Natal had the lead in this trade, but the imports from that country, including consignments from Portuguese East Africa, fell off from 197,000 tons to 126,000 tons. The United Kingdom supplied 23,000 tons or 4,000 tons more than in 1929-30, while receipts from Australia declined from 2,000 tons to 1,000 tons. The following table shows the sources of imports of foreign coal during the past five years—

| — | 1926-27 | 1927-28 | 1928-29 | 1929-30 | 1930-31 |
|------------------------|---------|---------|---------|---------|---------|
| | Tons | Tons | Tons | Tons | Tons |
| United Kingdom | 13,000 | 52,000 | 39,000 | 19,000 | 23,000 |
| Natal | 86,000 | 155,000 | 105,000 | 197,000 | 121,000 |
| Japan | 1,000 | 6,000 | 1,000 | 1,000 | 1,000 |
| Portuguese East Africa | 26,000 | 35,000 | 21,000 | | 5,000 |
| Australia | 13,000 | 9,000 | 1,000 | 2,000 | 1,000 |

Matches (Rs. 4 lakhs).—The Indian match industry, sheltered by high tariff, is now able to meet India's domestic requirements, and imports of foreign matches are insignificant. Only 397,000 gross of match boxes valued at Rs 4 lakhs were imported in 1930-31 as compared with 974,000 gross valued at Rs 11 lakhs in 1929-30 and 13½ million gross valued at Rs 2,04 lakhs in 1921-22, when the local industry was not developed and when lower duties prevailed. Imports were, as usual, mostly from Sweden and, to a far less extent, from Japan and the Straits Settlements.

III—EXPORTS OF MERCHANDISE

The following table shows the comparative importance of the principal articles exported from British India —

EXPORTS

(In thousands of Rupees)

| — | 1926-27 | 1927-28 | 1928-29 | 1929-30 | 1930-31 | Percentage on total exports of merchandis in 1930-31 |
|-------------------------------|----------|----------|----------|----------|----------|--|
| { Cotton, raw and waste | 50,14,19 | 48,19,53 | 66,69,10 | 65,60,35 | 46,72,65 | 21 19 |

| All other articles | 4,53,92 | 5,16,15 | 4,07,82 | 4,54,43 | 3,71,77 | 1 69 |
| TOTAL VALUE OF EXPORTS | 3,01,43,58 | 3,19,15,35 | 3,30,12,79 | 3,10,80,55 | 2,20,49,26 | 100 |

Cotton (Rs. 46.33 lakhs)—The Indian cotton crop of the season 1930-31 was estimated at 4,822,000 bales of 400 lbs each as compared with 5,234,000 bales in the preceding year. The increased demand of the Indian mill industry for home cotton together with the lower demand from other countries led to a small decrease in the exports of raw cotton in the year under review as compared with the preceding year. Exports in 1930-31 amounted to 3,926,000 bales as compared with 4,070,000 bales in 1929-30. The year's exports, however, were greater than those for 1928-29, which amounted to 3,712,000 bales. Owing to the disastrous decline in the price of Indian cotton, there was an enormous decrease in the value of the exports of the year under review. This amounted to Rs 46.33 lakhs as compared with Rs 65.08 lakhs in the preceding year. Japan, as usual, was India's biggest customer and took 1,685,700 bales valued at Rs 21 crores as compared with 1,639,600 bales valued at Rs 27 crores in the preceding year. Thus, though Japan took a larger quantity of cotton in the year under review as compared with the preceding year, yet the value of the exports fell by over Rs 6 crores. China, the next biggest customer, also increased her share from 566,500 bales in 1929-30 to 605,500 bales in 1930-31, the value of the exports declin-

ing, however, from Rs 9.34 lakhs to Rs 7.41 lakhs. The United Kingdom took 280,800 bales valued at Rs 3 crores in 1930-31 as compared with 270,200 bales valued at Rs 4.31 lakhs in 1929-30. Exports to Spain amounted to 106,000 bales valued at Rs 1.16 lakhs as compared with 80,000 bales valued at Rs 1.22 lakhs. The takings of most of the other countries showed decreases. Italy took 361,900 bales valued at Rs 3.77 lakhs in the year under review as compared with 392,700 bales valued at Rs 5.79 lakhs in the preceding year. Exports to Germany declined from 344,100 bales valued at Rs 4.89 lakhs in 1929-30 to 309,000 bales valued at Rs 3.30 lakhs in 1930-31. Exports to Belgium declined to 217,500 bales valued at Rs 2.64 lakhs in the year under review as compared with 340,800 bales valued at Rs 5.63 lakhs in the preceding year. The takings of France declined from 252,900 bales valued at Rs 3.92 lakhs in 1929-30 to 231,700 bales valued at Rs 2.68 lakhs in 1930-31. The United States of America and the Netherlands took 44,000 and 58,200 bales respectively as compared with 81,200 and 63,600 bales in the preceding year.

The following statement gives the monthly exports of Indian cotton during the last five years together with the pre-war average —

Jute and Jute Manufactures (Rs 44,78 lakhs)—The total area under jute in 1930 was 3,531,000 acres as compared with 3,415,000 acres in 1929. The yield of the 1930 crop was estimated to be 11.2 million bales which was about a million bales more than the outturn of 1929.

The total weight of raw and manufactured jute exported during the year amounted to 1,386,000 tons or 379,000 tons less than in the preceding year. The total value declined from Rs 79 crores in 1929-30 to nearly Rs 45 crores in 1930-31, a drop of Rs 34 crores. Raw jute accounted for 29 per cent of this value and jute manufactures for 71 per cent as compared with 34 per cent and 66 per cent respectively in the preceding year. The following statement compares the quantities exported during 1913-14 and each of the past three years—

| — | 1913-14 | 1928-29 | 1929-30 | 1930-31 |
|--------------------------|---------|---------|---------|---------|
| Jute (in thousand tons) | 709 | 808 | 807 | 620 |
| Bags (in millions) | 369 | 408 | 522 | 434 |
| Cloth (in million yards) | 1,061 | 1,568 | 1,651 | 1,271 |

The total exports of raw jute declined from 4,519,000 bales valued at Rs 27 crores to 3,470,000 bales valued at a little under Rs 13 crores. Germany, as usual, was the largest customer, but her takings amounted to 946,000 bales valued at Rs 3.50 lakhs as compared with 1,212,000 bales valued at Rs 7.41 lakhs in the preceding year. Exports to the United Kingdom declined from 923,000 bales valued at Rs 5.56 lakhs in 1929-30 to 604,000 bales valued at Rs 2.23 lakhs in 1930-31.

Foodgrains and Flour (Rs 29.88 lakhs)—Exports under this head went up to some extent in quantity in the year under review as compared with the preceding year. This was, however, due entirely to the larger exports of wheat as compared with the abnormally low figure of the

preceding year and exports of rice and other kinds of foodgrains showed a decline in 1930-31. The total quantity of foodgrains and flour exported amounted to 2,614,000 tons as against 2,510,000 tons in the preceding year, an increase of 104,000 tons. The value, however, declined from Rs 34.79 lakhs to Rs 29.88 lakhs, a decline of Rs 4.91 lakhs. Shipments of wheat amounted to 197,000 tons in the year under review as compared with 13,000 tons in the preceding year, an increase of 184,000 tons. Exports of wheat-flour declined from 51,000 tons to 47,000 tons. Exports of rice declined from 2,298,000 tons in 1929-30 to 2,254,000 tons in 1930-31, a decline of 44,000 tons only. Shipments of pulse amounted to 82,000 tons in the year under review as compared with 97,000 tons in the preceding year. Exports of barley almost reached the vanishing point and were 1,000 tons only as compared with 6,000 tons in the preceding year and 138,000 tons in 1928-29. Exports of jowar and bajra amounted to 7,000 tons in the year under review as compared with 15,000 tons in the preceding year. It will thus be seen that the exports of foodgrains and flour other than wheat declined by 80,000 tons, whereas exports of wheat showed an increase of 184,000 tons.

Tea (Rs 23.56 lakhs)—The total production of tea in India in 1930 was estimated at 391 million lbs as compared with 433 million lbs in 1929 and 404 million lbs in 1928. As usual, Assam contributed the largest share, viz., 233 million lbs or 60 per cent of the total output and Southern India 55 million lbs or 14 per cent. Production in Assam decreased by 26 million lbs, whereas production in the rest of Northern India decreased by 13 million lbs. The total area under tea in 1930 was 805,800 acres, as against 788,000 acres in 1929. The total shipments of tea during the year showed a decrease of 5 per cent in quantity and of 9 per cent in value. Only 938,000 lbs of green tea were exported during the year, the balance of 355 million lbs consisted of black tea. Exports to the United Kingdom totalled 299 million lbs valued at Rs 20 crores in 1930-31 as compared with 317 million lbs valued at Rs 22 crores in 1929-30.

Exports of tea by sea to foreign countries

| — | 1905-06 | 1915-16 | 1925-26 | 1926-27 | 1927-28 | 1928-29 | 1929-30 | 1930-31 |
|---|---------|---------|---------|---------|---------|---------|---------|---------|
| | lbs | lbs | lbs | lbs | lbs | lbs | lbs | lbs |
| | (1,000) | (1,000) | (1,000) | (1,000) | (1,000) | (1,000) | (1,000) | (1,000) |
| From Northern India (Calcutta and Chittagong) | 199,737 | 301,403 | 280,024 | 304,057 | 315,109 | 309,845 | 326,363 | 307,147 |
| From Southern India (Madras ports) | 12,680 | 25,840 | 43,133 | 42,935 | 45,744 | 49,321 | 49,671 | 48,575 |
| From Bombay, Sind and Burma | 1,807 | 11,227 | 2,576 | 1,372 | 761 | 436 | 600 | 517 |
| TOTAL | 214,224 | 338,470 | 325,733 | 349,264 | 361,614 | 359,602 | 376,634 | 356,239 |

Oilseeds (Rs 17.86 lakhs)—Oilseeds which had ranked fourth among India's exports in the two preceding years occupied in 1930 31 the fifth position, giving place to tea the first three groups being as usual cotton and jute, raw and manufactured and foodgrains. The total exports of oilseeds fell from 1,195,000 tons valued at Rs 26.47 lakhs to 1,037,000 tons valued at Rs 17.86 lakhs and showed a decrease of 13 per cent in quantity and 33 per cent in value over the preceding year. Indian supplies were plentiful but there was a reduction in consumption in markets abroad owing to a rise in the price of oilcakes caused by the difficulty of obtaining them comparatively low prices in the home market. Further, the oil cake industry of our country during the year was not so active as in the year below that. It will be seen from the table that a substantial decrease in the quantity and value of oilseeds exported in 1930 31 is the only exception.

The following table shows the quantities of oilseeds exported in 1929 30, 1929 30, 1930 31 and the value in lakhs of rupees—

| | 1929 30 | 1929 30 | 1930 31 |
|--------------------------|---------|---------|---------|
| Quantity (thousand tons) | | | |
| India | 370 | 167 | 248 |
| Rapeseed | 273 | 77 | 257 |
| Groundnut | 212 | 78 | 44 |
| Caster | 114 | 121 | 714 |
| Cotton | 240 | 151 | 100 |
| Sesamum | 110 | 30 | 58 |
| Opium | 31 | | 11 |
| Others | 85 | 24 | 14 |
| TOTAL | 1,433 | 1,195 | 1,037 |

Hides and Skins (Rs 11.74 lakhs)—The trade under this head had a very bad year—the total value falling from Rs 16.04 lakhs to Rs 11.74 lakhs, a decline of Rs 4.30 lakhs or 27 per cent. This heavy set back was due to the great decline in the prices of hides and skins, especially those of the raw material. Owing to the trade depression, there was also a reduction in the demand from most countries. The average declared value for raw hides and skins declined from Rs 0.109 to Rs 0.088 per lb, whereas in the case of tanned hides and skins the decline was from Rs 1.115 to Rs 1.193 per lb. Shipments of raw hides and skins during the year amounted to 45,300 tons valued at Rs 5.47 lakhs as compared with 53,100 tons valued at Rs 7.98 lakhs in the preceding year.

Lac (Rs 3.14 lakhs)—The total exports of lac declined by 18 per cent in quantity from 669,000 cwts in 1929 30 to 547,000 cwts in 1930 31 and by 55 per cent in value from Rs 6.97 lakhs to Rs 3.14 lakhs. The decrease was particularly noticeable in the case of manufactured lac (i.e., shellac and button lac) which formed the bulk of the exports.

Raw Wool (Rs 2.51 lakhs)—The trade in raw wool continued to decline, the exports

Oils (Rs 47 lakhs)—The total exports of oils were valued at Rs 47 lakhs in 1930 31 as compared with Rs 72.4 lakhs in 1929 30. Animal and mineral oils form a very small proportion of the total and the trade is practically confined to essential and non-essential vegetable oils, almost all varieties of which recorded decreases, shipments of vegetable oils declined from 1,348,000 gallons valued at Rs 32 lakhs to 1,140,000 gallons valued at Rs 24 lakhs in 1930 31.

Metals and Ores (Rs 7.94 lakhs)—The total exports of metals and ores declined from 872,000 tons (valued at Rs 3,32 lakhs) to 528,000 tons (valued at Rs 2.42 lakhs) in 1930 31, there being a heavy reduction in the shipments of manganese ore which formed about 92 per cent of the total quantity of ores shipped from India. The exports of manganese ore in 1929 30 constituted a record at 816,000 tons valued at Rs 2.29 lakhs, but declined in 1930 31 to 486,000 tons valued at Rs 1.39 lakhs representing a fall of 40 per cent in quantity and of 39 per cent in value. Exports of pig iron declined by 23 per cent in quantity from 569,000 tons in 1929 30 to 439,000 tons in 1930 31 and by 34 per cent in value from Rs 2.59 lakhs to Rs 1.70 lakhs. Japan, owing to the accumulation of stocks resulting from increased domestic production considerably curtailed her requirements of Indian pig iron from 350,000 tons to 161,000 tons while both the United States of America and the United Kingdom raised their purchases from 86,000 and 71,000 tons to 108,000 and 99,000 tons respectively. The following table shows the production of pig iron and steel in India during the past three years—

(In thousand tons)

| | 1929 30 | 1929 30 | 1930 31 |
|------------------------|---------|---------|---------|
| Production of pig iron | 1,050 | 1,376 | 1,140 |
| " " steel (ingots) | 396 | 581 | 625 |
| " " finished steel | 276 | 412 | 434 |

Other Exports—Other important exports from India included paraffin wax (Rs 2.82 lakhs), oilcakes (Rs 2.03 lakhs), coffee (Rs 192 lakhs), raw rubber (Rs 130 lakhs), spices (Rs 127 lakhs), manures (Rs 123 lakhs), opium (Rs 122 lakhs), teakwood (Rs 117 lakhs), dyeing and tanning substances (Rs 108 lakhs) and unmanufactured tobacco (Rs 96 lakhs).

Index Prices.

The Director General of Commercial Intelligence, Calcutta, publishes every year an addendum to the publication Index Numbers of Indian Prices 1861-1926 which brings up to date (1) the unweighted index numbers of 28

exported articles, (2) the un-weighted index numbers of 11 imported articles, (3) the general un-weighted index number for 39 articles and (4) the weighted index numbers of 100 articles on base 1873 100

The following table contains these index numbers since the year 1925 —

| Year | Exported
articles
28
(unweighted) | Imported
articles
11
(unweighted) | General
Index No for all
(39) Articles
(unweighted) | Weighted
Index No
(100)
Articles
equated to 100
for 1873 |
|------|--|--|--|---|
| 1925 | 233 | 211 | 227 | 265 |
| 1926 | 225 | 195 | 216 | 260 |
| 1927 | 209 | 185 | 202 | 258 |
| 1928 | 212 | 171 | 201 | 261 |
| 1929 | 216 | 170 | 203 | 254 |

Besides the above wholesale price index numbers, the Director General of Commercial Intelligence, Calcutta, compiles a wholesale

price index number for Calcutta while the Bombay Labour Office compiles similar statistics for Bombay and Karachi

The following table gives these index numbers since 1925

Wholesale price index numbers for, Calcutta, Bombay and Karachi

| Year | Calcutta | Bombay | Karachi |
|------|----------|--------|---------|
| 1925 | 159 | 163 | 151 |
| 1926 | 148 | 149 | 140 |
| 1927 | 148 | 147 | 137 |
| 1928 | 145 | 146 | 137 |
| 1929 | 141 | 145 | 133 |
| 1930 | 116 | 126 | 108 |

About the end of the year 1929 there began a sharp decline in wholesale prices and although this fall has been somewhat arrested in recent months the Bombay and Karachi and Calcutta wholesale price index numbers for the month of November 1931 were as low as 107.99 and 97 respectively

The various Provincial Governments publish in their respective *Gazettes* fortnightly and monthly statements of retail and wholesale prices of certain important commodities. In addition to these, however, some of the Provincial Governments also publish working class cost of living index numbers. Such index numbers are being published regularly every month for the following centres, for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay, for Nagpur and Jubbulpore by the Department of Industries, Central Provinces and Berar, for seven centres in Bihar and Orissa by the Department of Industries, Bihar and Orissa, and for Rangoon by the Office of the Director of Statistics and Labour Commissioner, Burma, Rangoon

The Bombay working class *cost of living* Index number with base July 1914-100 stood at 109 in December 1931 the average for the year being 110. The Ahmedabad cost of living

index number with base August 1926 to July 1927-100 stood at 75 in November 1931 while the Sholapur cost of living index number with base February 1927 to January 1928-100 stood at 71 in November 1931. The Nagpur cost of living index number for November 1931 on base January 1927-100 was 64. In November 1931 while the Jubbulpore Index on the same base was 63. For Rangoon, four different index numbers with base 1913 100 are compiled for (a) Burmese, (b) Tamils, Telugus and Oriyas, (c) Hindustanis and (d) Chittagonians. The Index Number in November 1931 for these were 107, 111, 112 and 107 respectively.

The catastrophic fall in prices which commenced at the end of 1929 continued also during 1931 although with less vigour than in 1930,

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry and the majority of the Indian Economic Enquiry Committee of 1925 made many suggestions for the improvement of price statistics and advocated the passing of a Census and Statistics Act. This latter suggestion has also been endorsed by the Whitley Commission on Indian Labour.

Air Routes : London-Galilee-Karachi.

TIME TABLE OF THE JOURNLY

The following is the time table of the Imperial Airways mail service between England and India via the Mediterranean, to be in force from 1st January 1925.

The following route and time table is held good —

Link Service to Africa —

| | | |
|---------|-----------|-----|
| Galilee | dep 09 30 | Sat |
| Cairo | arr 12 30 | " |

The fares from Karachi are as follows —
to Baghdad £14 to Athens £89 to London £295. The through fare from Karachi to London allows for a weight of 100 kilos (221 pounds) per passenger, and a passenger is entitled to free conveyance of luggage to the extent of the difference between his own weight and the 221 pounds mentioned above. The rate for excess luggage is just over twelve shillings per kilo. Children in arms are weighed with and carried under the same tickets as their mothers or nurses, and other children are charged full fare.

On the Indian State Air Service between Karachi and Delhi, via Jodhpur, the fare is Rs. 160, and the same rule regarding baggage applies but the charge for excess baggage is naturally less.

Africa and the Far East

Several new air services which are of considerable importance to India have been inaugurated, and of these the most notable is the England-Africa service which connects with the England-India service by a connection from Cairo to Galilee and provides an entirely new route between Delhi and South Africa.

Other important air lines recently established are the French service between Paris and Saigon and the Dutch service between Amsterdam and Batavia, both of which pass through Baghdad and Karachi.

Baghdad, in particular, is developing rapidly in importance and it is said, not without reason, that it will soon become the Clapham Junction of the air. This will certainly be the case if the projected services from Persia and Russia materialise.

The proposed extension of the England-India air mail to Australia is still under discussion—a state of affairs which conceivably may be hastened by the establishment of the French and Dutch services to the Far East.

The Indian Stores Department.

Current Rules of Working.—Government in 1930 under pressure from the Public Accounts Committee of the Legislative Assembly issued orders that the purchase of all classes of stores handled by the Department, which may be obtainable in India in conformity with the rules for the supply of articles for the public service, by the undermentioned departments and officers should in future invariably be entrusted to the Stores Department—

Indian Posts and Telegraphs Department,

Director, Geological Survey of India,

Chief Inspector of Mines in India

Chief Inspector of Explosives with the Government of India,

Controller of Printing and Stationery, India (except Printing and Stationery stores),

Controller of Patents and Designs,

Director General of Observatories,

Principal, Indian School of Mines,

Director of Civil Aviation in India,

P W D, Delhi Province (except special articles of furniture and fittings),

Superintending Engineer, P W D, Simla, and

Department of Industries and Labour, Secretariat

Revised Rules to regulate the purchase of stores (other than printing and stationery stores) by all departments and officers of the Central Government and of the Provinces other than Governors Provinces, came into effect on 1 January 1931 with the object of effecting the policy of Government of making purchases of stores for the public service in such manner as to encourage the development of industries in India to the utmost possible extent consistently with economy and efficiency. They prescribe that preference in making purchases shall be given in the following order—

First, to articles which are produced in India in the form of raw materials or are manufactured in India from raw materials produced in India, provided that the quality is sufficiently good for the purpose,

Second, to articles wholly or partially manufactured in India from imported materials, provided that the quality is sufficiently good for the purpose,

Third to articles of foreign manufacture held in stock in India, provided that they are of suitable type and quality requisite,

Fourth, to articles manufactured abroad which need to be specially imported

The new rules are expected materially to widen the scope of operations of the department. The value of the contracts entered into by the department for the supply of stores during 1929-30, the latest period for which figures are available, was Rs 4,20,26,000. This was an increase of 19 per cent on the record in the preceding year despite the constant downward trend of market prices and economies effected by the extension of measures of standardisation and bulking of demands. The fullest possible advantage was taken of the resources of India and as a result a large quantity of new business was placed with Indian manufacturers. Textile stores bought were almost entirely of Indian origin or of Indian manufacture and there was a considerable increase in the value and proportion of engineering, hardware and miscellaneous stores wholly or partly made in India. There was continued large reduction in the number and value of indents on the London Stores Department.

The increase in the value of purchases recorded in 1929-30 was contributed principally by the following indenting authorities—

Civil depts of Central Government, increase 77 per cent

Railway administrations, increase 45 per cent

Indian States, increase 653 per cent

Quasi-public bodies, increase 12 per cent

Possibilities of Indian sources of supply continued to be explored and as a result 170 firms were added to the list of approved contractors. Efforts to assist manufacturers in India to improve the quality of their products by means of technical advice and suggestions were continued.

Financial Loss.—The department's accounts for 1928-29 as presented in the report for that year disclosed a deficit of Rs 4,06,793. The final accounts subsequently compiled showed the deficit to be Rs 6,92,161. The actual deficit has since been shown to have been Rs 10,61,782. The figure is larger than that for any preceding year. The percentage of working expenses was 44.5 per cent higher than in any preceding year. The department ascribe the deterioration of its position to industrial unrest.

The question of definitely declaring the department to be a commercial or service undertaking has long been under consideration of Government and they decided in January 1930 that it could not for the present be declared a commercial undertaking, as some of its activities were admittedly not of a commercial character, and that it should therefore be treated as a public service department.

Bombay Stamp Duties.

| | Rs | a | | Rs | a |
|---|-----|---|--|----|----|

| | | | Where it exceeds Rs 500 but does not exceed Rs 600 | 19 | 0 |

| | Rs | a | | Rs | a |
|--|-----|---|--|----|---|
| Where it exceeds Rs 600 but does not exceed Rs 700 | 22 | 8 | (b) Of any Stock or marketable Security exceeding in value Rs 20—Subject to a maximum of Rs 20, a. 2 for every Rs 10,000, or part. | | |
| Where it exceeds Rs 700 but does not exceed Rs 800 | 26 | 0 | <i>Vote of Protest</i> by a Ship's Master | 1 | 0 |
| Where it exceeds Rs 800 but does not exceed Rs 900 | 29 | 8 | <i>Partnership</i> —Where the capital does not exceed Rs 500 | 5 | 0 |
| Where it exceeds Rs 900 but does not exceed Rs 1,000 | 33 | 0 | In any other case | 20 | 0 |
| And for every Rs 500 or part thereof in excess of Rs 1,000 | 17 | 8 | Dissolution of | 10 | 0 |
| <i>Copy of Extract</i> —If the original was not chargeable with duty, or if duty with which it was chargeable does not exceed 1 Rupee | 1 | 0 | <i>Policy of Insurance</i> — | | |
| In any other case | 2 | 0 | (1) <i>Sea</i> —Where premium does not exceed rates of 2a, or $\frac{1}{4}$ percent of amount insured | 0 | 1 |
| <i>Counterpart or Duplicate</i> —If the duty with which the original instrument is two Rupees chargeable does not exceed rupee—The same duty as is payable on the Original In any other case | 2 | 0 | In any other case for Rs 1,000 or part thereof | 0 | 1 |
| <i>Delivery Order</i> | 0 | 1 | (2) <i>For time</i> —For every Rs 1,000 or part insured, not exc 6 months | 0 | 2 |
| <i>Entry in any High Court of an Advocate or Vakil</i> | 500 | 0 | Exceeding 6 and not exceeding 12 months | 0 | 4 |
| In the case of an Attorney | 500 | 0 | If drawn in duplicate, for each part—Half the above rates, for Sea and Time | | |
| <i>Instrument</i> —Apprenticeship | 10 | 0 | (3) <i>Fire</i> —When the sum insured does not exceed Rs 5,000 | 0 | 8 |
| Divorce | 2 | 0 | In any other case | 1 | 2 |
| Other than Will, recording an adoption or conferring or purporting to confer Authority to adopt | 20 | 0 | In respect of each receipt for any payment of a premium on any renewal of an original policy—One-half of the duty payable in respect of the original policy in addition to the amount, if any chargeable under Art 53 (<i>Receipt</i>) | | |
| <i>Lease</i> —Where rent is fixed and no premium is paid for less than 1 year, same duty as Bond for whole amount, not more than 3 years, same as Bond for average annual rent reserved, over 3 years, same as Conveyance for consideration equal to amount or value of the average annual rent reserved, for indefinite term, same as Conveyance for a consideration equal to the amount or value of the average annual rent which would be paid or delivered for the first ten years if the lease continued so long, in perpetuity, same as Conveyance for consideration equal to one-fifth of rents paid in respect of first 50 years Where there is premium and no rent, same as Conveyance for amount of premium, premium with rent, same as Conveyance or amount of premium in addition to the duty which would have been payable on the lease if no fine or premium or advance had been paid or delivered | | | (4) <i>Accident and Sickness</i> —Against Railway accident, valid for a single journey only | 0 | 1 |
| <i>Letter</i> —Allotment of Shares | 0 | 2 | In any other case—for the maximum amount which may become payable in the case of any single accident or sickness where such amount does not exceed Rs 1,000, and also where amount exc Rs 1,000, for every Rs 1,000 or part | 0 | 2 |
| Credit | 0 | 2 | (5) <i>Life, or other Insurance, not specifically provided for</i> — | | |
| License | 10 | 0 | For every sum not exceeding Rs 250 | 0 | 2 |
| <i>Memo of Association of Company</i> —If accompanied by Articles of Association | 30 | 0 | Exceeding Rs 250 but not exceeding Rs 500 | 0 | 4 |
| If not so accompanied | 80 | 0 | For every sum insured not exceeding Rs 1,000 and also for every Rs 1,000 or part | 0 | 6 |
| <i>Notarial Act</i> | 2 | 0 | If drawn in duplicate for each part half the above rates | 0 | 8 |
| <i>Note or Memo</i> intimating the purchase or sale— | | | Insurance by way of indemnity against liability to pay damages on account of accidents to workmen employed by or under the insurer or against liability to pay compensation under the Workmen's Compensation Act of 1923 For every Rs 100 or part payable as premium | 0 | 1 |
| (a) Of any Goods exceeding in value Rs 20 | 0 | 4 | | | |

| | Rs a | | Rs a. |
|--|------|---|-------|
| In case of a re-insurance by one Company with another— $\frac{1}{2}$ of duty payable in respect of the original insurance, but not less than 1 anna, or more than 1 Re. | | <i>Release</i> —that is to say, any instrument whereby a person renounces a claim upon another person or against any specified property— | |
| Policies of all classes of Insurance not included in Article 47 of Schedule 1 of Stamp Act of 1899 covering goods, merchandise, personal effects, crops and other property against loss or damage, are liable to the same duty as Policies of Fire Insurance | | (a) If the amount or value of the claim does not exceed Rs 1,000—The same duty as a Bond for such amount or value as set forth in the Release | |
| <i>Power of Attorney</i> — | | (b) In any other case | 10 0 |
| For the sole purpose of procuring the registration of one or more documents in relation to a single transaction or for admitting execution of one or more such documents .. | 1 0 | <i>Respondentia Bond</i> —The same duty as a Bond for the amount of the loan secured. | |
| When required in suits or proceedings under the Presidency Small Causes Courts Act, 1882 | 1 0 | <i>Security Bond</i> —(a) When the amount secured does not exceed Rs 1,000—The same duty as a Bond for the amount secured. | |
| Authorising 1 person or more to act in a single transaction other than that mentioned above | 2 0 | (b) In any other case | 10 0 |
| Authorising not more than 5 persons to act jointly and severally in more than 1 transaction, or generally .. | 10 0 | <i>Settlement</i> —The same duty as a Bond for the sum equal to the amount or value of the property—settled as set forth in such settlement | |
| Authorising more than 5 but not more than 10 persons to act | 20 0 | <i>Revocation of Settlement</i> —The same duty as a Bond for a sum equal to the amount or value of the property concerned as set forth in the instrument of revocation but not exceeding ten rupees | |
| When given for consideration and authorising the Attorney to sell any immovable property—The same duty as a Conveyance for the amount of the consideration | | <i>Share-warrant</i> to bearer issued under the Indian Companies Act—One and a half times the duty payable on a conveyance for a consideration equal to the nominal amount of the shares specified in the warrant | |
| In any other case, for each person authorised | 2 0 | <i>Shipping Order</i> | 0 1 |
| <i>Promissory Notes</i> — | | <i>Surrender of Lease</i> —When duty with which lease is chargeable does not exceed Rs 5—The duty with which such Lease is chargeable | |
| (a) When payable on demand— | | In any other case | 5 0 |
| (i) When the amount or value does not exceed Rs 250 | 0 1 | <i>Transfers of Shares</i> —One-half of the duty payable on a Conveyance for a consideration equal to the value of the share | |
| (ii) When the amount or value exceeds Rs 250 but does not exceed Rs 1,000 | 0 2 | <i>Transfer of any Interest secured by a Bond, Mortgage-deed, or Policy of Insurance</i> —If duty on such does not exceed Rs 10—The duty with which such Bond, &c, is chargeable | |

| (a) If the consideration for which the property was mortgaged does not exceed Rs. 1,000—the same duty as a bond for the amount of such consideration as set forth in the Reconveyance | | | |
| (b) In any other case | 10 0 | | |

The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the Indian Year Book. The Congress was founded in 1885 by Mr Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year, the fundamental principles of the Congress were laid down to be —

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India,

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved, and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the Extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

“The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country.”

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal. But the union then effected was purely superficial, the difference between the Moderates and the Extremists was fundamental, the Extremists cap-

tured the machinery of the Congress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr Gandhi and his lieutenants. In 1927 the Congress actually adopted independence as the goal of India. In the following two years the Congress made what the extreme leftists described as a climb-down, while the Liberals moved towards the left, with the result that for a time there appeared to be a commonness of purpose between the Liberals and Congressmen. Both boycotted the Statutory Commission on Indian Reforms and both collaborated in drawing up a scheme of Dominion Status for India. This state of undefined alliance continued for some months. At its 1928 Session the Congress, while adhering to Independence, agreed to accept Dominion Status if granted, before the end of 1929. Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England and the two Indias. Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfilment of the “ultimatum” issued at its previous Session, the Congress, at its 1929 Session, declared for complete independence or “Purna Swaraj.” Throughout the year 1930 the Congress was engaged in a defiance of the law of the land which it was hoped, would help India to attain complete independence. The extremist methods commanded a large measure of support in the country. Notwithstanding the proceedings of the Round Table Conference, a struggle went on in India between the Congress persisting in illegal activities and the Government endeavouring to put down lawlessness. The year 1931 opened well and it looked as though this deadlock would end. For a time it appeared that the Congress would give up direct action and follow the path of conference and negotiation. It actually suspended civil disobedience by virtue of an agreement arrived at with the Government, but the fulfilment of the terms of this agreement again gave rise to trouble and another agreement was concluded. As a result of this Mr Gandhi on behalf of the Congress, actually went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its subversive activities. More about this in the next edition of the *Indian Year Book*.

THE NON-CO-OPERATION MOVEMENT.

It was in 1920 that Mr Gandhi, who had only in the previous year unsuccessfully started his Passive Resistance struggle as a protest against the Rowlatt Act, conceived his idea of non-co operation. Originally intended to be a protest against the British policy towards

Turkey, the “fighting” of two other grievances was later on added to its first object, namely, the punishment of officials in the Punjab Martial Law regime and the securing of Swaraj for India. Mr Gandhi and Mr Shaikat Ali were able in 1920 to get the Calcutta Special Congress

to endorse their programme of "progressive non-violent non-co operation" which was reiterated by the annual session at Nagpur which, on Mr Gandhi's motion, changed its old creed into "the attainment by India of Swaraj by all legitimate and peaceful means". The stern measures adopted by local Governments led to the imprisonment of a large number of active Congressmen with the result that the Ahmedabad Congress in 1921 made a grim resolve to challenge the 'repression movement' by appointing Mr Gandhi as dictator and by resolving to start a 'No Tax' campaign at Bardoli. The riots in Chauri Chaura in 1922 preceded by the Bombay riots in 1921 during the Prince of Wales visit (see 1923 and 1924 editions of this book) opened Mr Gandhi's eyes to the impossibility of maintaining a non-violent atmosphere under exciting conditions. He suspended his proposed civil disobedience campaign and replaced it by what is known as the Bardoli Programme which eschewed all the aggressive items of non-co operation in favour of the promotion of inter-communal unity and khaddar. Soon after Mr Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for six years (See 1923 and 1924 editions)

This turn of events threw cold water on the enthusiasm of non-co-operators who got discouraged. In order, therefore, to sound the country's readiness for aggressive action once more, the All-India Congress Committee appointed a Committee, known as the Civil Disobedience Committee in June 1922. The Committee toured the country and in October, 1922, produced two reports, one favouring Council entry to offer obstruction to Government and the other recommending the adoption of the Bardoli Programme. A battle royal ensued between the two parties for two or three years, the Swarajists—or the 'Co-operators,' as they were derisively called by the non-co-operators—carrying the day throughout. Every little triumph of the Swarajists meant a diminution of the prestige and influence of the No-Changers. This went on for some time until the Belgaum session of the Congress, presided over by Mr Gandhi himself, suspended the non-co operation programme. Thereby the movement was practically killed, and, strange to say, it received its death-blow at the hands of the very author of its being. But the fond parent did not lose heart and bided his time. His chance came in 1928 when the Congress was split into two warring camps. One was ready to accept Dominion Status for India, while the other would have nothing short of independence. At the psychological moment Mr Gandhi staged a re-entry into the political arena—he had been but a silent spectator during the five preceding years—and, professing to effect a compromise within the Congress, provided a loophole for the revival of non-co-operation. Although Dominion Status was actually declared in 1929 to be the goal of Indian political progress, Mr Gandhi insisted on having it on the spot and when that was naturally refused he returned to his old love, non-co-operation and boycott. He had been biding his time, and the astute politician, that he is, he reintroduced in December 1929 his formula that had been dead

five years. Now, it was not full boycott, the ban being placed only on the legislatures. Sadder and wiser—but, unfortunately, not sufficiently sad and wise—he exempted law courts, schools, etc., from his scheme. Complete independence was declared and non-co-operation was revived. Indeed the Congress Executive was authorised to give the signal also for a campaign of non-payment of taxes and civil disobedience. Early in 1930 the Congress executive appointed Mr Gandhi as 'Dictator' for all India and gave him power to launch civil disobedience as and when he thought fit. This Mr Gandhi did in March and practically the whole country was set ablaze. There was open defiance of the law all over the land notwithstanding the efforts of the Government to put down illegal activities. The movement waned by the end of the year through sheer exhaustion and civil disobedience was suspended early in 1931 as a result of negotiations between the Viceroy and Mr Gandhi. The year 1931 was a year of negotiations although the discussions centred round alleged breaches of the Viceroy Gandhi understanding. The efforts for peace were carried to the point of inducing Mr Gandhi to participate in the Round Table Conference in London to formulate a constitution for India. All this, however, proved to be a lull in the storm which again broke out in full fury early in the New Year.

Congress in 1925-30

The career of the Congress between the Belgaum session, when the N C O movement was suspended, and the years 1929-30, when civil disobedience was revived, was comparatively dull. During the first half of 1925 the Congress policy was one of aimless drift. The death of Mr C. R. Das demoralised the Swarajists. Mr Gandhi promptly went to their rescue and at the end of the year the Swarajists' political programme was formally adopted by the Calcutta Congress. The 41st session of the Congress, which met in Assam during Christmas week in 1926, set its face against the acceptance of ministries or other offices in the gift of the Government—in other words, discountenanced "Responsive Co-operation", a new creed which had sprung up within the Swarajist ranks—and approved of the policy of rejection of budget and refusal of supplies until a response to the 'national demand' was forthcoming.

All this talk and quarrel about the internal affairs of the Congress were set at rest by the non-inclusion of Indians on the personnel of the **Royal Commission on Indian Reforms**. Most of the leaders railed that it would be an insult to India if Indians were not appointed members of the Commission. Even moderates, reputed for their sobriety and reasonableness, affected extremism. The Viceroy endeavoured—but in vain—to explain the position to Indian leaders (See Year Book of 1928).

Congressmen, of course, met during Christmas 1927 and resolved to boycott the Simon Commission, declared independence as the goal of India and offered some solutions for the Hindu-Muslim problem. In the following year the Congress in its plenary session at Calcutta declared specifically, though conditionally, that

Dominion status would be acceptable to India. This, it will be recalled, marks a return to 1908 when, soon after the Surat split, it was stated that the objects of the Congress were, among other things, "the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire." This, however, proved to be a mere smoke-screen raised by Congress tacticians, not excluding Mr Gandhi, to conceal from the world their real intention which was disclosed in December 1929. More about this presently.

The boycott of the Commission was a miserable failure and this reminded the Congressmen of the next duty which the 1927 session had imposed on them, namely, the drafting of a "Swaraj" constitution for India. This they set out to do about the middle of 1928 when representatives of almost all political organisations met in Bombay at the invitation of the Congress Executive and appointed a Committee presided over by Pandit Motilal Nehru, to undertake the task.

The Committee consulted various leaders in the country and after two or three months' hard labour produced a document, which however, instead of being an all parties' report evoked more controversy than any other proposal in recent years regarding the future of India. An All Parties' Convention met at Calcutta for the purpose of receiving and considering the All Parties' Committee's report. The Convention adopted the Committee's proposal that India should have the same constitutional status in the community of nations known as the British Empire as the other Dominions with a Parliament having powers to make laws for peace, order and government of India and an executive responsible to that Parliament. The Convention, however, failed to find a solution acceptable to all for the communal question. (See Year Book of 1929)

The Congress which met in Calcutta during Christmas in 1928 under the presidency of Pandit Motilal Nehru, was divided into three camps, the advocates of complete independence, those who wanted Dominion status and nothing beyond that, and Pandit Motilal sandwiched between the two, with one foot in either camp. This was just the opportunity for which Mr Gandhi had apparently been waiting, and he staged a come back at the psychological moment. He threw in his weight with Pandit Motilal and sponsored a compromise formula. This satisfied neither wing but eventually a resolution was adopted which approved of the Nehru Report as a great step in political advance and, whilst adhering to the Madras resolution on independence, the Congress was prepared, subject to the exigencies of the political situation, to adopt the Nehru constitution, if it was accepted by the British Parliament before the expiry of 1929, and if that did not happen the Congress would revive non-violent non-co-operation, Congressmen could, in the meanwhile, carry on propaganda for independence.

A few months later Mr Gandhi submitted to the All India Congress Committee a scheme for organising "nation wide civil resistance and whole-scale non-co-operation" by enrolling a quarter of the entire population of the country in

the Congress so as to build "an irresistible structure the decisions of which will be felt by the Viceroy."

The political outlook was gloomy, indeed, and there was a clear call for a generous gesture from Britain. Lord Irwin, the sympathetic Viceroy, saw this and strove his utmost to placate legitimate Indian feeling. He undertook a trip to England on four months' leave and had long conversations with the India Office Chief and the newly formed Labour Cabinet of Britain. He returned in the last week of October and within a few days of his arrival issued from Delhi a statement which has since become famous as the **Viceroy's Declaration** of October 31, 1929. "I am authorised", he said, "on behalf of His Majesty's Government, to state clearly that, in their judgment, it is implicit in the Declaration of 1917 that the natural issue of India's constitutional progress, as there contemplated, is the attainment of Dominion Status." His Excellency announced the British Government's intention to summon a conference of representatives of British India and Indian States to discuss British Indian and All-Indian problems for seeking the greatest possible measure of agreement for the final proposals to be placed before Parliament.

Later the Viceroy made it plain that the Conference was designed to elicit the greatest possible measure of agreement for the final proposals which it would be the duty of His Majesty's Government to submit to Parliament and that it was impossible for him or for His Majesty's Government in any way to prejudge the action of the Conference or to restrict the liberty of Parliament.

The main feature of the Congress session held shortly after was the reascendancy to power of Mr Gandhi. The principal resolution went through successfully and, in fulfilment of the Calcutta Congress "ultimatum," Independence was declared when the New Year was rung in and the "Independence flag" was hoisted.

The resolution, as adopted, laid down that "nothing can be gained in the existing circumstances by the Congress being represented at the proposed Round Table Conference, and, in pursuance of the resolution passed at the Calcutta Congress last year, this Congress now declares that 'Swaraj' in the Congress creed shall now mean 'complete independence.' Therefore, the Congress declares the Nehru scheme of Dominion Status to have lapsed and hopes that all parties in the Congress will devote their exclusive attention to the attainment of complete independence. The Congress declares a complete boycott of the central and provincial legislatures. The Congress authorises the All-India Congress Committee, whenever it deems fit, to launch upon a programme of civil disobedience, including non-payment of taxes, whether in selected areas or otherwise and under such safeguards as it may consider necessary." Here were laid the foundations of a campaign of lawlessness that threw the country into chaos in the following year.

Events moved very fast in India. In 1930 which has been epochal in the country's political history. On the one hand, the British Govern-

[illegible]

Civil Disobedience Movement

In pursuance of the resolution of the Lahore Congress it was decided by the Congress leaders that in the near future to test the strength and efficiency of the country to undertake and carry out a programme involving loss of life and sacrifice and with this end in view they organised what has since been called the "Independence Day" demonstration. The response according to the Congress leaders, exceeded anticipations. Having thus constituted the new revolutionary policy of the Lahore Congress and satisfied themselves that their methods would obtain general support in the country, the Working Committee appointed at Lahore met at Ahmedabad and decided to inaugurate mass civil disobedience. It appointed Mr. Gandhi as the "Dictator" of the Congress and gave him full powers to launch, conduct and carry on the movement.

Before taking what he described as his "final plunge" in politics, Mr. Gandhi wrote in first week of March his famous letter to the

Viceroy announcing his determination to launch civil disobedience if his demands were not met. They were the famous Eleven Points of Mr Gandhi—total prohibition, reduction of the rupee ratio to 1s 4d, reduction of the land revenue to at least 50 per cent and making it subject to legislative control, abolition of the salt tax, reduction of the military expenditure to at least 50 per cent, to begin with, reduction of the salaries of the higher grade service men to one half or less, so as to suit the reduced revenue, protective tariff on foreign cloth, the passage of the Coastal Traffic Reservation Bill, discharge of all political prisoners, withdrawal of all political prosecutions, abrogation of section 124-A, of the Regulation of 1818 and the like, and permission to all Indian exiles to return, the abolition of the C I D or its popular control and the issue of licenses to use fire-arms for self-defence, subject to popular control.

The reply sent to Mr Gandhi by the Private Secretary to the Viceroy regretted that Mr Gandhi contemplated "a course of action which is clearly bound to involve violation of the law and danger to the public peace."

When his impossible demands were turned down, Mr Gandhi outlined a programme of civil disobedience consisting of various items calculated to subvert the Government by breaking certain laws, reducing its income from excise and customs duties, inducing Government servants to resign, picketing liquor shops and shops dealing in foreign, particularly British, goods, mainly British cloth, and urging the masses not to pay land revenue, chowkidari tax and forest grazing fees. The salt Act was the first target.

After organising his forces in various centres in the country, Mr Gandhi inaugurated his civil disobedience movement by setting out on a march on foot from his Ashram at Sabarmati with the object of breaking the salt law and defying the Government! "Dictator" marched through Gujerat making halts en route. This part of the country, where most men, women and children regarded him as an *avatar* (incarnation of Deity), thanks to the propaganda of Mr Vallabhbhai Patel, was only too ready to accept his advice. At each one of the halting places a number of Government servants announced their resignations. The people were urged to look out for his signal and carry on the fight even if he was arrested. At the end of three weeks he reached Dandi, a village on the coast near Surat, and on April 6, the fateful day on which the movement was really initiated, he picked up salt on the seashore without paying duty. The police did not interfere. His followers started manufacturing salt by heating sea water and the salt so manufactured was sold in small packets all over the country. This was the signal for Congressmen to break the law all over the country simultaneously.

On the first few occasions, the Government merely looked on, but the law-breaking fever spread fast and wide. Eventually the authorities took measures to prevent the manufacture and sale of illicit salt. They were resisted by Congress volunteers who formed a cordon round

the spot where salt was made and defied the police to arrest them. The police arrested them at first, but they could not obviously arrest hundreds of spectators who, though not actually engaged in salt making, were encouraging the law-breakers, jeering at the police and indulging in hostile demonstrations. When these crowds began to indulge in violence against the police the latter had perforce to disperse them by means of the regulation staff known as "lathi". This went on for a while without bringing Purna Swaraj any nearer. Mr Gandhi found a way out of the rut by declaring that he proposed to raid the salt works at Dharasana near Surat. Similar raids were planned on the salt depot at Wadala, in Bombay. Shortly after this, however, Mr Gandhi was arrested under the provisions of a century-old Regulation and confined during the pleasure of the Government as a state prisoner whose activities were a danger to the Government established by law.

The raids on the salt works at Dharasana and Wadala were carried out repeatedly and hundreds were injured when the police repelled the raid and dispersed the raiders and sympathisers. The advent of the monsoon put an end to salt making and salt depot raids. But other illegal activities were taken up.

The anniversary of a dead leader, "Independence Day" or some such pretext was utilised to organise anti Government demonstrations. The arrest of persons who were courting arrest was also the occasion for a display of hostility against the Government. Such disturbances occurred in several places, and the police had to impose a ban on meetings, processions, demonstrations and the like which invariably disturbed the public peace and led to clashes. Even these prohibitory orders were disobeyed thereby compelling the police to use force. Two such instances occurred in **Sholapur and Peshawar**. In the former place the police were attacked, constables mobbed and murdered in broad daylight, and Government buildings and law courts set on fire. Martial law was introduced and quiet restored after a long time. In Peshawar also rowdy crowds defied the police and even the military. British troops were stoned. People were so much inflamed that it took a number of weeks for the return of normal conditions. It was revealed during the Peshawar disturbances that the Congress propaganda had to some extent interfered with the discipline of a few Indian sepoys.

Nor did the Congress stop here. Thanks to its persistent propaganda, the martial races inhabiting the border were taught to hate the British and to expect the establishment of "Gandhi Raj" at an early date. A belief that the British administration was weakening spread across the border to the Afghans who carried out a series of raids on Peshawar. Not that these were by any means successful, they were easily repelled and severely punished. But it would not do to allow them to continue in the false belief that they could defy the British Government with impunity. The Government, therefore, took prompt punitive measures and put an end to the raids.

regarding the intentions of the British Government having been allayed by delegates who had returned from the London Conference, negotiations were rendered easier and the points for settlement narrowed down. But it was not quite easy for the Congress to switch from non-co-operation straight to co-operation. Its leaders were obsessed by considerations of prestige and a number of insignificant and artificial difficulties were raised.

For instance, the right of villagers in salt areas to manufacture salt for their own consumption without paying the duty was one of the main demands made by Mr Gandhi as a condition precedent to the Congress participation in the Round Table Conference. This was granted with certain restrictions, but other similar demands could not be so easily conceded. Mr Gandhi demanded an open inquiry into alleged police excesses in Bardoli. Government could hardly grant such request. Again, the Congress spokesman insisted on the return to the peasants of their forfeited lands owing to their persistence in the no rent campaign. While Government agreed to return such lands as had not already been sold by public auction, they could not obviously undertake to return those which had become the property of third parties. Thus, after prolonged negotiations and bargaining, the Congress secured the Government's assent to what has since become famous as the Irwin-Gandhi Pact or the Delhi Pact.

The main provisions of this agreement were the withdrawal by the Congress of the civil disobedience movement and by the Government of all the Ordinances, the release of all political prisoners whose offences did not involve any physical violence, and the participation of the Congress in the second Round Table Conference on the basis of the Premier's statement of 19th January, 1931. Picketing in the shape of peaceful persuasion not infringing the ordinary penal law was to be permitted and Congressmen were to enjoy the liberty to propagate Swadeshi, although the boycott of British goods as a political weapon was to be given up.

This "truce" was signed on the 5th of March and was hailed all over the country as the dawn of a new era of co-operation. The past was for a time forgotten and there was a lull in political activity. All were eagerly looking forward to the Congress delegates contributing the weight of their influence and experience to the success of the second Round Table Conference. Nevertheless, a strong under-current of resentment ran through the ranks of the Congress who openly complained that Mr Gandhi had weakly surrendered to the Government in agreeing to call off the struggle. This feeling, which was held by the wild men of the left and impetuous youths, was enhanced by the execution of Bhagat Singh and his accomplices who had been judicially found guilty of murder and other terrorist crimes. The execution was the signal for a furore in the country, much to the chagrin of Mr Gandhi. The extremists utilised this circumstance for carrying on propaganda against the Delhi Pact.

The protests raised in the country against the execution of Bhagat Singh proved a real eye opener to Mr Gandhi who confessed to a feeling of disappointment at the failure of his preachings of non-violence to convert the masses into a realisation of the futility and dangers of terrorism. At the same time, however, he failed to take an uncompromising stand against showering encomiums on assassins. While he could not, and did not, approve of the actions of Bhagat Singh and his accomplices which led to their execution, he had a good word or two to say for their bravery, courage and self-sacrifice in laying down their lives for what they mistakenly conceived to be their duty to their country. The leftists who had in the meanwhile made heroes of murderers openly disapproved of Mr Gandhi's statements and for a time looked as though that Mr Gandhi might fail to secure the undivided support of the Karachi Congress to the Delhi Pact.

It was in this state of feeling that the forty-fifth session of the Congress met at Karachi under the Presidentship of Mr Vallabhbhai Patel.

Mr Patel's presidential address to the Congress was more important than the usual addresses of Congress Presidents, as it indicated the lines on which Mr Gandhi presented the Congress case at the Round Table Conference later. "Independence does not exclude the possibility of equal partnership for mutual benefit and dissolvable at the will of either party," declared Mr Patel. He denounced those who urged the severance of the British connection. Britain's help would be of great value to the country. India needed her military skill for her defence and in several other spheres British help would be invaluable to the country. But, power and control, including financial control, must be in the hands of Indians. He declared that the Delhi Agreement was perfectly honourable to both parties. Under its terms, "it is open for us to press for 'purna swaraj', to ask for complete control over our defence forces, foreign affairs, finance, fiscal policy and the like." He was certain the Congress would endorse the settlement. Boycott of British goods as such had been given up for obvious reasons, but Mr Patel repudiated the claim for equality of treatment to British industry. "The protection of Indian industries", he said, "to the exclusion of British or foreign, is a condition of our national existence even under a state of partnership."

The outstanding feature of the Karachi session was the unprecedented outburst of revolutionary sentiment which throughout characterised its proceedings. It was always there, but dormant, and the execution of Bhagat Singh stirred it up. The revolutionaries, particularly from Bengal, asserted themselves publicly and a determined effort was made to torpedo the Delhi Pact. The intensity of feeling could be gauged by the action of a few youths who on the arrival of Mr Gandhi went to the length of presenting him with a black flower in token of Bhagat Singh's execution. Thus Mr Gandhi had to work against insuperable odds and it speaks volumes for his great personal influence that he managed to carry the day. This, however, he achieved only by subscribing to a resolution which only half-heartedly con-

In view of this deadlock, it was expected that Mr. Gandhi would refuse to go to London for the Round Table Conference. The Congress Working Committee, however, at a meeting held in Bombay in June, authorised Mr. Gandhi to proceed to London even without communal peace, "in order to avoid any possibility of the Congress attitude being misunderstood in any shape or form." This only served to confirm the Muslim suspicion that the Congress did not mean well by them, and subsequent negotiations to arrive at an understanding were foredoomed to failure. The Congress made two more attempts in July to arrive at a formula and eventually drew up a "compromise between undiluted communalism and undiluted nationalism." Joint electorates were to form the basis of representation in the future constitution of India, but it was agreed that there should be reservation of seats in the Federal and Provincial Legislatures on the basis of population with the right to minorities to contest additional seats in any province where they were less than 25 per cent. This was, of course, not acceptable to the Muslims, who, to a man, stood by the Fourteen Points.

Disappointment at the failure to solve the communal tangle rendered the political outlook gloomy and the Congress leaders began to wonder whether any good would result from their participation in the Round Table Conference. Meanwhile, those of them who were itching for a fight had succeeded in working up in the country parts, particularly in Gujerat and the U P., a situation which the Government could hardly tolerate.

In the United Provinces, particularly, an agrarian dispute of a purely economic character, aggravated by growing trade depression, was turned to political advantage by Congressmen. In the result, although the no-rent campaign being part of the civil disobedience movement, was abandoned under the Delhi Pact, it was revived now, nominally as an economic agitation but really as a political weapon. The Government had perforce to take measures to ensure the collection of land revenue, but the Congress protested against them. This was added to the long list of sins and omissions and commission, of which the Congress accused the Government. Similarly in Gujerat, it was alleged that the police were using excessively coercive measures to collect Government dues.

On all these grounds, cumulatively, Mr. Gandhi declared that the Delhi Pact had been broken by the Government and that, therefore, he was released from his obligation thereunder to participate in the Round Table Conference on behalf of the Congress. "The civilians have undone the statesman's work", Mr. Gandhi complained. Mr. Gandhi released for publication what he described as a charge sheet against the Government, who replied with an equally long list of instances in which the Congress agents had broken the Delhi Pact. Lengthy correspondence passed between Mr. Gandhi and the officers of the Government of Bombay and the Government of India, the main point of which was Mr. Gandhi's demand that the Congress should be recognised as an intermediary between the people and the Government and the Government's firm repudiation of that contention. Numerous interviews took place between Congress leaders and Government officers, all of which unfortunately proved fruitless. This new deadlock again

darkened the political horizon, but Mr. Gandhi was induced to ask for an interview with the new Viceroy, Lord Willingdon, to "clear up certain misunderstandings."

Then began what were known as the Simla talks. Mr. Gandhi asked for an impartial inquiry into the incidents at Bardoli and once again the Government of India turned it down. Nor was the Congress allowed to negotiate with the Government as a parallel body on an equal footing. Eventually, however, the Government offered to institute a departmental inquiry into the charges made by the Congress against officials in Bardoli and this provided a loop-hole for the Congress to get out of the awkward corner into which it had placed itself. Affecting to be satisfied with this concession, Mr. Gandhi agreed to go to London.

The agreement which was arrived at, as a result of these negotiations, known as the Simla Pact, confirmed the Delhi Agreement and provided for its continuance. The claim of the Congress to some special status, not enjoyed by ordinary members of the public, was abandoned. Demands for inquiry into alleged police excesses in several parts of the land were turned down except in Bardoli, where a restricted inquiry was ordered to be held by a civilian.

Within a few hours of the conclusion of this agreement, Mr. Gandhi took a special train from Simla and arrived in Bombay just in time to sail by the English mail boat. (The part played by Mr. Gandhi at the R T C is referred to in the "Indian Round Table Conference" section.)

With Mr. Gandhi away, conditions worsened in India and his lieutenants continued their activities in defiance of both the Delhi and the Simla Pacts. Very soon an unsatisfactory situation was created in India which found its counterpart in the poor progress made in London towards reaching an agreed formula for the future constitution of India.

Congress propaganda in areas like the North-West Frontier Province, easily susceptible to subversive doctrines, resulted in a flare up. The tribes on and across the Frontier were led to believe that the British authority was on the wane, and Peshawar was actually invaded. The "Red Shirt" movement, organised by a follower of Mr. Gandhi, was assuming menacing proportions and the Government had to act. An Ordinance was promulgated with a view to checking the spread of this movement, and Khan Abdul Gaffar Khan, its author, was deported from the scene of his operations.

Similarly, an Ordinance was issued to check the aggressive no-rent campaign in the United Provinces, and Pandit Jawaharlal Nehru was arrested for disobeying certain orders passed on him under this Ordinance.

The hollowness of the Congress charges was revealed by the findings of the Inquiry Officer who went into the allegations against the police and the Government in Bardoli. He held that there had been no cases of undue coercion and found most of the Congress charges unfounded.

This gloomy situation coincided with the return of Mr. Gandhi on the 28th of December, without having achieved anything substantial at the Round Table Conference beyond re-stating the impossible Congress demands proclaimed many a time before. The stage was thus set for another political struggle in the country, which began in

Indian Delegation which ultimately formed the basis of agreement at the Conference. On the communal question also the Liberal Delegation strove hard to conciliate the claims of the different minorities and all but succeeded in solving that difficult problem.

In India the attitude of the Liberal Party towards the civil disobedience movement was one of disapproval, but the Party spared no efforts to interpret the inner meaning of the movement and explain to the Government its origin and the forces underlying it. On several occasions the Party also disapproved the measures adopted by the Government to deal with the lawless activities in the land and expressed the opinion that such steps only made the disease worse.

The annual session of the Liberal Federation during Christmas had to be postponed owing to the absence of many of its leaders in London and owing to the fact that the discussions at the Round Table Conference had not concluded by then.

The annual session met in July of 1931 under the presidency of Mr C Y Chintamani and several resolutions embodying the Liberals' considered views on various aspects of the proposed constitutional reforms were adopted. The President delivered a lengthy but powerful speech in which he strongly criticised the recommendations of the various committees of the Round Table Conference. "Federation or no federation", he declared, "we must have responsible government, not less at the centre than in the provinces, and we must have it without any more delay". He voiced dissatisfaction with the findings of the Defence Sub-Committee of the Round Table Conference and opposed the provision of safeguards in the realms of finance, commerce etc as recommended by the respective Committees.

The principal resolutions passed by the Federation demanded that the Federal Executive should be made responsible to the popular Chamber of the Legislature, the residuary powers must be vested with the Central Government, a definite scheme for the Indianisation of the Defence Forces including officers and men within a specified time should be immediately propounded and provision of facilities for the training of Indians for service in all arms of defence, so as to complete the process within a specified period, should be in charge of a Minister responsible to the Legislature, the future Government of India must have complete freedom to adopt measures for the promotion of basic trades and industries, no special powers must be given to the Governor-General and the Governors except in extreme cases of emergency, separate electorates should be done away with and there should be joint electorates with reservation of seats for minorities, there should be no statutory fixation of a majority and the position of all important minorities should be equitably considered in the determination of weightage.

This firm attitude was further stiffened when details of the Round Table Conference scheme began to be worked out both in England and in India in the latter half of the year. On numerous occasions Liberals expressed the fear lest by the time the full scheme was drawn up there should be very little responsibility left with the centre in matters financial,

fiscal and political. The proceedings of the second Round Table Conference, the failure of the Congress and Muslim delegates to arrive at a satisfactory settlement of the communal problem and the ascendancy of the Conservative Party in England have set the Liberals thinking hard. They are waiting for the completion of the picture and then they will outline in detail their attitude towards the entire question of reforms.

For details of the part played by Liberals in the Round Table Conference see below.

Indian Round Table Conference

After the failure of the Simon Commission to receive adequate support during their two journeys in India, the Government both in England and India devised a Round Table Conference Scheme of the Conference was announced in November 1929, but the actual start was delayed by about twelve months.

The Conference met in London in November 1930 without the Congress being represented thereon. It began under excellent auspices. His Majesty the King Emperor declared it open and expressed the hope that the Conference would lay "the true foundation of self-government for India based on a fusion of the divergent claims into mutual obligations". The Premier, who presided, expressed his determination to solve the Indian problem. At an early stage in the Conference, the Indian Princes responded to the invitation of Sir Tej Bahadur Sapru to join an All-India Federation. This was the main factor which contributed to the satisfactory achievement of the largest measure of agreement on the scheme which emerged from the deliberations of the Conference—namely, an All-India Federation, with responsible government in the centre and with certain safeguards during the period of transition between now and the establishment of a fully self-governing unit of the Empire.

Details of this scheme were not settled until after the year 1930 had expired. The Conference dispersed for the Christmas holidays after holding preliminary sessions, settling the main outline and appointing several sub-committees to report on a number of heads of reform: the structure of the federation, the constitution of the various legislatures, defence, franchise, protection to minorities, the separation of Burma, the formation of Sind as a separate province, etc.

These committees having completed their work, their reports were discussed and noted in the plenary session of the Conference held early in 1931. As a result of their recommendations and the discussions thereon the Premier made his famous statement of 19th January. He declared in broad outlines the scheme of reforms that it was proposed to confer on India. The scheme was based on three crucial points: (1) that there must be an all India federation of British India and the States, (2) that there should be responsibility in the central government, and (3) that there should be safeguards, especially in regard to finance, commerce and the minorities.

When this statement was made the leaders of the Congress party were in jail, but the members of the Congress Working Committee were soon released and Mr Gandhi and his colleagues

were allowed to meet in Allahabad to discuss the pronouncement. At first they were in no mood to see the merits of the scheme and had all but decided to reject it when they received an appeal from Sir Tej Bahadur Sapru and the Rt Hon V S Sastri to defer decision until after they had interviewed the Viceroy Lord Irwin. Mr Gandhi took the whole of the Congress Working Committee with him to Delhi where numerous interviews took place between Mr Gandhi and the Working Committee on the one hand and H I the Viceroy and his Executive Council on the other. As a result of these negotiations the Congress agreed to give up its barren and ruinous policy of non-co-operation and the Irwin Gandhi Pact was concluded whereby Mr Gandhi on behalf of the Congress accepted the three main planks of the Premier's statement and consented to participate in the Round Table Conference.

The annual session of the Congress which met at Karachi shortly after ratified the pact by an overwhelming majority and chose Mr Gandhi as its sole representative at the London Conference. Between then and his departure however a controversy arose over the fulfilment of the terms of the Delhi Pact especially regarding the release of prisoners the return of forfeited property and relief in the shape of remission of land revenue to those peasants who had become impoverished as a result of their participation in the Congress no rent campaign. After prolonged and delicate negotiations carried on at Simla between Mr Gandhi and the new Viceroy Lord Willingdon another agreement was arrived at which in effect confirmed the Delhi Pact and by meeting some of the Congress demands enabled Mr Gandhi to sail for London.

The session of the second Round Table Conference began with the meetings of the Federal Structure Committee. Progress however was unfortunately hampered firstly by the British General Elections as a result of which the members of the Cabinet could spare little time for Indian affairs and, secondly, by the unhelpful—described by some as obstructive, attitude of the Minorities especially the Mahomedans. They declared that unless their rights were effectively safeguarded in the new constitution they would non-co-operate with the work of the Conference.

Indeed, at one time it was feared that the Conference would be brought to an abrupt end without achieving anything substantial. The return to the House of Commons of about 500 Conservatives and the presence in the new National Government of a majority of Tories lent strength to this fear. It was actually proposed to restrict the Reforms to the grant of Provincial Autonomy, but an influential letter addressed to the Premier and signed by all the Liberal and Independent members of the Conference, not excluding Messrs Gandhi and Malaviya, brought about a welcome result. It is believed that this strong attitude on the part of the majority of the delegates induced the Premier to talk the Muslims round.

By far the greatest difficulty which confronted this session of the Conference was the communal problem, the Minorities question. The Minorities Committee of the Conference was called only to be adjourned and for some weeks the members of the various communities held

informal conferences to arrive at an understanding. The Muslim had already crystallised their demands in the shape of their Fourteen Points (see the Muslim section). The depressed classes which had till then consented to joint electorates with reservation of seats now made a somersault and plumped for separate electorates. Europeans and Anglo Indians and to a certain extent the Sikhs also joined. Numerous proposals were made and after prolonged negotiations the differences were narrowed down to one or two seats in one or two provincial legislatures. But unfortunately unwise counsels prevailed and the schism between the majority (Hindus) and the minorities became unbridgeable. This led the minorities alone to enter into a covenant for safeguarding their rights.

The Congress attitude was uncompromisingly set out by Mr Gandhi who however, yielded ground to the Princes to enable them to enter the Federation and to the Mahomedans for safeguarding their position. But on the question of the depressed classes he was adamant and refused to concede them separate electorates on the ground that the depressed classes formed part of the Hindu community and any distinction between them and Hindus would only serve to widen the gulf between them. He suggested adult franchise and representation on a population basis.

The Liberal delegates who besides the Congress, were the only non-communal political party represented at the Conference strove their utmost to bring about a settlement. While they were willing to concede to the Muslims their claims for safeguards they were not prepared to allow any provision which would impede the formation of nationhood and create a spirit of communalism.

Eventually however, the Conference ended inconclusively and the Premier announced the British Government's scheme of constitutional reforms in India based on the numerous viewpoints that were expressed during the deliberations. This scheme was embodied in a White Paper which was immediately placed before the House of Commons and almost unanimously adopted by that body.

The White Paper is a long document which, generally speaking, confirmed the Premier's January statement. Only the safeguards were defined more clearly and emphasised in the light of Sir Samuel Hoare's speech in the House of Commons namely that they were a condition, precedent to the grant of responsibility in the centre. Clearer assurances were also given to the Minorities that Parliament would not enact any new legislation unless their rights were specifically and amply safeguarded.

The White Paper also foreshadowed the appointment of three committees of the Conference to proceed to India: (1) a committee presided over by Lord Lothian to recommend any franchise reform; (2) a committee under the Chairmanship of the Rt Hon J C C Davidson, to report on the financial aspects of the States joining the Federation; and (3) a committee under the Chairmanship of Lord Eustace Percy to suggest financial arrangements under the new Federal Government. The personnel of these Committees was not announced before the end of the year.

(For fuller treatment see pages 874-881)

The Moslem League.

The All-India Moslem League came into being in 1906 out of the universal desire among leading Mussalmans at that time for an effective organisation to protect their communal interests. With a view to secure separate Muslim representation in the legislative bodies of the land under the Minto-Morley scheme of constitutional reforms then under discussion, Indian Moslems who had been hitherto keeping aloof from politics organised the League. Its original objects were the promotion of loyalty to British Government, the protection of political and other rights of Mussalmans and to place their needs and aspirations before Government in temperate language and to promote inter-communal unity without prejudice to the other objects of the League. Moslem opinion slowly advanced and in 1913 the securing of self government within the British Empire was included in the objects. The League was a powerful and influential body in 1916 and 1917, and what is known as the Lucknow pact of communal representation arrived at between the League and the Congress in 1916 was bodily incorporated in the Government of India Act, 1919. The birth of the Khilafat Committee however overshadowed the League which from 1919 had almost disappeared till April 1923 when it met for a brief period under the presidency of the late Mr Bhurgri, but had to be adjourned for want of a quorum. In 1924, however, some influential Moslem leaders like Mr M. A. Jinnah thought that the Khilafat Committee's functions having ceased in view of the Turkish deposition of the Khalifa decided to revive the League which met under Mr Jinnah's chairmanship at Lahore in May 1924. The Lahore session practically did nothing else save to reorganise the scattered branches of the League. The reconstructed League commanded comparatively less influence. And what little authority it exercised disappeared with the formation in 1923 of the All Parties Muslim Conference. This latter body was representative of the Muslim masses as well as classes in the sense that the Muslim League was not.

The League in 1923-29—The 1925 and 1926 sessions of the League were noted for their virility. The Muslims displayed greater allegiance to their communal organisation in proportion to the loyalty of the Hindus to their Mahi Sabha. Suspicion and distrust, enmity and open hostility began to prevail between the two communities. Proportionate distribution of the loves and fishes of office, on the political side, and the questions of the Hindus playing music before mosques and the Mahomedans killing cows, on the religious side, constituted the points of difference which frequently led to inter communal riots. The situation was regarded with grave concern by serious minded leaders, some of whom, under the leadership of Mr Jinnah, met at Delhi early in 1927 and offered, in the name of the Muslims, to surrender their right to communal electorates, provided, among other things, Sind was constituted into a separate province and reforms were introduced in the N. W. Frontier Provinces and Baluchistan. This offer, however, was acceptable neither to

the Hindus nor the Muslim masses who insisted on the continuance of the separate electorates. A schism set in the Muslim League which was accentuated by the announcement of the personnel of the Statutory Commission on Indian Reforms. The non inclusion of Indians on the Commission was construed by a certain section of the Muslims as an insult to India and those who held this view decided to boycott the Commission. The majority of the community, however, thought otherwise. The gulf between the two sections widened during 1928-1929 Session served to strengthen the new organisation, the All Parties Muslim Conference. Refusing to walk into Mr Jinnah's parlour the supporters of the All Parties Muslim Conference were engrossed in their constructive work. They were joined by the members of the Shaif section of the League who had come to Delhi in the hope of making up their differences with the Jinnah group but who were sadly disillusioned.

The All Parties Muslim Conference—The publication of the Nehru Report hastened the advent of the All-Parties Muslim Conference. The Conference was called in 1923 to counteract the effect of the Nehru Report and to formulate the Muslim community's demand in regard to the future constitution of India. Notwithstanding the refusal of the Jinnah Leaguers to participate in the proceedings, the Conference was attended by almost all the prominent Muslim leaders of the country, including a very large number of the members of the Councils and the Assembly. There was ready agreement on the unsuitability of the Nehru Report, but difference of opinion prevailed with regard to the goal of India. Persons like Mr Mahomed Ali stood for complete independence and, of course, for the boycott of the Commission, while Sir Mahomed Shaif, who had a very large following, favoured co-operation with the Commission in the framing of a constitution within the Empire. Things were a gloomy aspect for a while, but thanks mainly to the tact of the President, the Aga Khan, a compromise was reached whereby the mention either of "Dominion status" or "Independence" was omitted from the resolution put before the Conference which demanded merely "a federal constitution". Similarly it referred neither to the Simon Commission nor to the Nehru Report, but insisted on compliance with the demands of the Conference by any agency which devised a constitution.

Muslim Activities in 1930-31—Unlike the Congress, the Muslim political organisations are known for their lethargy except during the week when their annual meetings are held. During the past two years, however, they displayed unusual activity. This is no doubt due to the summoning of the Round Table Conference to settle the basis of India's future constitution. Unattracted by the negative but spectacular programme of the Congress, the majority of the Muslims appreciated the danger of allowing their case to go by default at the momentous London Conference and took a lively interest in its work before and during its proceed-

throats " Muslims could never be expected to give up separate electorates. If Mr. Gandhi started any campaign against Muslims' resolve through the assistance of a handful of Muslim supporters, he would be the cause of serious trouble in the country. Later Mr. Shaukat Ali asked Mr. Gandhi to 'leave the Muslims alone' "

Shortly after the All-India Conference had held its special session, the Nationalist Muslims met in conference and passed a resolution which favoured the introduction of a federal constitution, residuary powers vesting in the federating units. Representation in the Legislatures was to be on the basis of (a) universal adult franchise, (b) joint electorates, (c) reservation of seats in the Federal and Provincial Legislatures on a population basis for minorities less than 30 per cent, with the right to contest additional seats. The resolution added that Nationalist Muslims were prepared to negotiate for a settlement of the outstanding questions on the basis of joint electorates and adult franchise.

In pursuance of this offer, negotiations were opened between the two wings of the Muslim community. A conference was arranged in Bhopal at the invitation of His Highness the Nawab, but apparently nothing useful came out of it. A further attempt was made at Simla in June and the argument as usual turned on the question of communal or joint electorates, in

particular, on Dr. Ansari's proposal to have separate electorates for a limited period only and thereafter joint electorates. After a few days' negotiations a deadlock ensued and the All-India Muslim Conference section resolved not to carry on the discussion any further. This resolution, it was explained, was adopted solely for the reason that the Nationalist Muslims refused to accept the offer of a modified formula providing for the continuance of separate electorates for five years followed by a referendum on the introduction of joint electorates and further on the ground that it had failed to suggest an alternative formula. The Ansari section on the other hand blamed the Government for their failure to reach an agreement and complained that "the Simla atmosphere" was not conducive to the continuance of negotiations.

Thus ended the last effort to evolve a formula acceptable to the whole Muslim community. Mr. Gandhi, of course, made much of the fact that the attitude taken up by the Muslim delegates did not have the support of the Nationalist Muslims, who, he claimed, represented the real feeling among the Muslim masses. Subsequently, in London, he repeated his argument that, as there was no Nationalist Muslim in the Conference, it was to that extent defective in its representative character. (For the activities of the Muslim delegate in London see the Indian Round Table Conference section)

The Khilafat Committee.

The origin of the Central Khilafat Committee is to be found in the closing days of the Great War when Turkey was feeling the consequences of defeat at the hands of the Allies. Mussulmans in India naturally sympathised with their co-religionists in Turkey and carried on ceaseless agitation against the division of Turkey into small bits among the Allies. Being anxious for the safety of the holy places of Islam and opposed to the dismemberment of Turkey, they felt a considerable amount of bitterness against the British, who as the principal Allied Power, were dictating their own terms to vanquished Turkey. Formed thus for the protection of the Khilafat as a temporal as well as a religious Power, the Central Khilafat Committee was exploited to good purpose by the leaders of the Congress movement in India which had found in "the Punjab Wrongs" an effective means of propaganda against the British rule in India. Commonness of ill feeling towards the British brought the two closer. While it gave impetus to the Congress by securing for the Congress support from the Muslims, it also received support from the Congress in agitating for the "righting of the Khilafat wrongs". Thus the two worked side by side, mutually helpful.

Madras Khilafat Conference under the chairmanship of Mr. Shaukat Ali unfolded a programme of progressive non-co-operation and

appealed to the country for support. The Khilafat Committee, with the huge funds at its disposal, was able to draft in a large number of delegates to the Calcutta special Congress in 1920 when the non-co-operation programme was accepted by that body with two more objects added to it, namely, the obtaining of Swaraj and the righting of the Punjab wrongs.

With the deposition of the Khilafat by the Kemalists and the revival of the Moslem League, the Committee's activities have been considerably restricted. Recently the Committee sent a deputation -- Nejd to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Committee to Turkey, the Turkish Government did not quite like the idea which had consequently to be abandoned.

The 1925 session of the Khilafat Conference was rendered lively by Mr. Hasrat Mohani whose speech strongly criticised Sultan Ibn Saud was subsequently expunged. The resolution adopted by the conference under the presidency of Mr. Abul Kalam Azad condemned the British policy in Iraq and the League's decision on Mosul and declared that if the Turks went to war on the latter issue the Conference would deem it its duty to help them.

For some years since then one heard little about the public activities of the Committee, although many of its domestic quarrels engaged the attention of the public. Funds, however, continued to be collected for the "activities" of the Committee which could hardly be specified. Things dragged on until the latter half of 1927, when the leaders found the Khilafat organisation a useful tool for purposes of their propaganda for boycotting the Statutory Commission on Indian Reforms. This was successfully achieved by the extremist wire-pullers at Madras in 1927.

In the next year, however, a peculiar situation arose as the result of the publication of the Nehru Report. This document raised many controversial issues. Its two main recommendations, namely, Dominion Status for India and joint electorates with temporary reservation of seats, were not acceptable to the Khilafatists whose ideal was an extreme type of nationalism coupled with rank communism. They wanted complete independence for India but insisted on the continuance of separate electorates. This state of mind found expression at the annual session of the Khilafat Conference which met in 1928 at Calcutta.

In the years following the publication of the Nehru Report, the Khilafat Committee reappeared on the Indian political stage and vigorously strove to repudiate the document. This it succeeded in doing, as the Muslims with one voice condemned it as pro-Hindu. As months passed by, it became increasingly clear to the Muslims that the Congress was getting more and more Hindu-ridden and that they could not expect due protection for their communal rights from the Congress or its leaders. The appreciation of this situation by the Muslim masses was mainly due to the activities of the Khilafat Committee and its leaders. Thus when the Khilafat Conference met in Lahore in 1929 it was resolved that the Khilafatists should participate in the Round Table Conference convened by the British Government to settle the future constitution of India, although in the same breath the Conference declared itself in favour of independence. This latter, however, was but a wordy sop to the extremists, as the main body of Khilafat workers started in 1929 and continued since then a regular fight against the Congress.

In the past two years, in addition to the effective prevention of the Muslims from joining the Congress unless the communal question was satisfactorily settled, the Khilafat Committee did a considerable work abroad. The Ali brothers, who were the soul of the Khilafat movement, worked for the Arab federation and the Tanzim of Mussulmans all over the world. During this time, the movement lost Maulana Mahomed Ali, who passed away in London in the midst of his strenuous work for his country and his co-religionists, and the work of carrying on the increasing activities of the Khilafat Committee fell on the shoulders of his brother

Maulana Shaukat Ali. The invitation to bury the departed leader in the mosque of Omar in Jerusalem brought the Indian Muslims closer to the Arabs. This fellow feeling among Muslims in different parts of the globe found expression in a huge conference held in Jerusalem which served to create a new spirit of internationalism among the followers of Islam—one of the cherished objects of the Indian Khilafatists.

As the representatives of Indian Muslims in the London Conference, the Ali brothers effectively safeguarded their interests. In addition, Maulana Shaukat Ali repeatedly impressed on British audiences and leaders the advisability of keeping the Indian Muslims contented as it would please Muslims in other parts of the world.

The history of the Khilafat movement followed a peculiar course on the North-Western Frontier Province of India. There the Khilafat organisation conducted a ceaseless agitation over the local grievances of the Muslim population and the disaffection towards the Government thus created was promptly exploited by the Congress for furthering its own lawless activities. Being sturdy people accustomed to fighting, they often found it impossible to observe the Congress creed of non-violence. A number of clashes ensued, with attendant casualties.

The Khilafat Committee also did a lot of constructive work during the past two or three years. It inculcated a spirit of swadeshim among the Muslim masses, worked for their educational and social upliftment and organised an efficient volunteer corps for maintaining order at public meetings, processions, demonstrations, etc., and in restoring peace in areas where communal tension had prevailed. The volunteers did much useful work in Bombay, Calcutta, Bangalore and Delhi. The Committee approached the Government for the appointment of the Haj Inquiry Committee. It rendered great services to the pilgrims by giving facilities for their journey, supplying them with information and literature concerning the holy places and attending to their comforts in countless other ways. A number of night schools were established in Rangoon, Delhi, Bombay and other places for the education of the adults of the community. In Bombay alone there are 30 night schools. The committee also organised a volunteer corps with 5,000 "regulars." They made themselves useful in maintaining order at public meetings, processions, demonstrations, etc., and also in restoring peace in areas where communal tension had prevailed.

The 1931 session of the Khilafat Conference was held in March in Bombay under the presidency of Maulana Abdul Majid of Badaun who repudiated the Congress charge that the Muslims were traitors to the country, and affirmed that they were only fighting for their rights. Meetings of allied organisations were also held in Bombay, such as the first All India Muslim Volunteers' Conference and the Muslim Youths' Conference.

The Round Table Conference

The first session of the Indian Round Table Conference, which was held in London during the autumn of 1930 and January 1931, was remarkable for the spirit of unity. At the first sitting Sir Tej Bahadur Sapru, on behalf of the British Indian Delegates, extended an invitation to the Princes and States to consider entering an All Indian Federation, which would establish a federal government and a federal executive, embracing both the British Provinces and the Indian States in one whole, associated for common purposes, but each securing control of their own affairs, the Provinces autonomous, and the States sovereign and autonomous. This, though it struck an unexpected note at the Conference, was no more than the fruition of an old idea. The authors of the Montagu-Chelmsford Report, which laid the foundations of the great Reform Act of 1919, visualised the steady progression of the federal idea, but the notable passage in which they indicated this purpose slipped into the background in the confused and difficult days that followed. Sir John Simon and his colleagues, who conducted the parliamentary inquiry into the working of this Act, declared their adhesion to the federal idea, and proposed as a contribution to it the establishment of A Council of Greater India, in which the representatives of British India and the Indian States should sit for the discussion of matters of common concern. The Government of India, in a lengthy despatch on the Simon Report, also adhered to the federal principle, though they expressed the view that it was a distant ideal. Many Indian publicists had declared the faith that without the adoption of the federal principle no substantial growth of the Indian constitution was practicable. But although federalism had always been in the background, none had possessed sufficient courage to bring it into the forefront until Sir Tej Bahadur Sapru invited the Princes to consider it. The invitation was promptly accepted. His Highness the Maharaja of Bikaner, speaking for the general body, at once took up the gage, and declared that subject to the incorporation in the statute of certain defined conditions—they were in substance the guaranteeing of the sovereignty and treaty rights of the States, and the protection of their essential interests, the Princes and States would favourably consider any such proposal, later he averred his belief that provided the completed picture was satisfactory seventy-five per cent of the States would join a federation.

Real Progress—By common consent, this patriotic offer by the Princes and States transformed the situation. The goal of the British-Indian publicist was the establishment of responsible government in India, with "safeguards" during the transitional period, and ultimate Dominion status for that responsible government. With the assurance of the participation of the Princes and States, bringing a powerful element of stability into the governing machine, Lord Reading, speaking for the Liberals, accepted the crucial proposition of a responsible govern-

ment at the centre. Later, the spokesmen for the Conservative Party took up the same position, though perhaps in more cautious terms. On this guiding principle substantial progress was made in sketching the outline of a federal constitution. True, the Minorities Question, that is to say the adequate protection of the minorities in the Indian population, especially the great Moslem community, remained unsettled and Moslem acceptance of responsibility at the centre was conditional on the solution of this very thorny issue. But the measure of progress was so satisfactory before the Conference separated in January 1931, that speaking for His Majesty's Government the Prime Minister, Mr Ramsay MacDonald, was in a position to make the following announcement,

"The view of His Majesty's Government is that responsibility for the Government of India should be placed upon Legislatures, Central and Provincial, with such provisions as may be necessary to guarantee, during a period of transition, the observance of certain obligations and to meet other special circumstances, and also with such guarantees as are required by minorities to protect their political liberties and rights.

"In such statutory safeguards as may be made for meeting the needs of the transitional period, it will be a primary concern of His Majesty's Government to see that the reserved powers are so framed and exercised as not to prejudice the advance of India through the new constitution to full responsibility for her own Government."

Participation of Congress—But representative as it was in all other respects, the first session of the Congress embraced no representative of The Indian National Congress. For various reasons that stood aloof. During the interval between the rising of the first session, and the convening of the second, negotiations were carried on with a view to the Congress suspending the Civil Disobedience Movement on which it had embarked and joining in the task of framing the new constitution. These discussions ended in what was called "The Gandhi-Irwin Pact", which embodied a settlement covering the whole field in dispute, and in an undertaking on the part of the Congress to participate in The Round Table discussions, and to suspend civil disobedience. After many hesitations Mr Gandhi, who was appointed sole representative of the Congress, sailed for England, and others who had remained aloof from the earlier proceedings joined the Delegation. At first Mr Gandhi's contribution to the work of the Conference was helpful. Though he was perhaps more anxious to justify Congress, and to maintain its right to speak for India, he accepted the principle of federation, and the task of making it easy for the Princes and States to enter therein. But afterwards his contribution was less helpful.

Specially was this the case in relation to the Minorities.

Federalism Resumed—The failure of all efforts to settle the minorities question, and the conclusion of this Pact, created a new situation. It has been made clear that the acceptance of responsibility at the Centre, the crux of the Federal Scheme, was conditional, so far as the Moslems were concerned, on the settlement of the communal issue. It was therefore a question whether any useful purpose would be served by continuing to consider a constitution from which the seventy millions of Moslems, not to speak of the other minorities, stood aloof. The doubt was cleared when the Federal Structures Committee resumed its sittings on the 16th November, and the spokesmen for the Moslem Community announced that they were willing that the discussions should go forward, on the express condition that they reserved to themselves the proviso that unless and until the Moslem demands and safeguards were incorporated in the constitution it would not be acceptable to them.

From this point the work of the Conference went rapidly forward, though over it hung a certain shadow of unreality, arising from the open sore of communalism and the uncertainty of the attitude of the Congress at every stage. The Federal Structures Committee issued further reports, and as these were accepted by the Conference in a brief plenary session they represent the main conclusions of that body to date.

The Legislatures—Having weighed the various considerations, the conclusion was that, the Committee recommend that the 200 members of the Upper House should be chosen in the main to represent the component Units—the Provinces of British India and the States—and that the representatives of the British Indian Provinces should be elected by the Provincial Legislatures by the single transferable vote. Candidature for the Federal Legislature should not, of course, be restricted to members of a Provincial Legislature, though such persons should be eligible if otherwise qualified. But no person should be a member of both a Provincial and the Federal Legislature.

In the case of those States which secure individual representation, their representatives will be nominated by the Governments of the States. In the case of those States, however, (and there will necessarily be many such) to which separate individual representation cannot be accorded, the privilege of nomination will have to be shared in some manner which it will be easier to determine when the various groups have been constituted—a process which will, of course, entail a detailed survey of local and regional circumstances.

For the Lower Chamber, the Committee consider that the selection of the British Indian representatives should be by election otherwise than through the agency either of the Provincial Legislature or of any existing local self-government bodies. Most members consider that election should be by territorial constituencies consisting of qualified voters who will cast their votes directly for the candidate of their choice. Others have advocated some method whereby some of the obvious difficulties which must confront a candidate, in canvassing and maintaining contact with so large an area as the average constituency will involve, may be obviated.

The actual framing of the constituencies must necessarily depend largely upon the detailed arrangements to be made for the revision of the existing franchise—a task which is to be undertaken by a special Franchise Committee. The Committee therefore recommend that this body should be charged also with the duty of making proposals for the constituencies to return the British Indian members of the Lower Chamber of the Federal Legislature, and that it should explore fully the alternatives of direct and indirect election, indicated in the preceding paragraph, in the light of the practical conditions which will be presented by the size of constituencies, their populations and the proportion of this population to be enfranchised.

Distribution of Seats—As regards the apportionment of the British Indian seats in both Chambers to the Provinces *inter se*, the

Committee recognise that the population ratio, which they were disposed to recommend in their previous Report as the guiding principle, would not produce a satisfactory result unless it were tempered by other considerations. To take only one instance, it would immediately reduce the Bombay Presidency—a Province of great historical and commercial importance, which has for many years enjoyed approximately equal representation in the Central Legislature with the other two Presidencies and the United Provinces—to less than half the representation these latter will secure.

For the Upper Chamber, which will represent in the main the Units as such, the Committee think that the guiding principle should be a reasonable approximation to equality of representation for each Unit. Absolute equality, having regard to the great variations in size and population between the Provinces, would obviously be inequitable. The problem is a difficult and complicated one, involving the careful assessment of local factors. But the suggestion has been made that a possible solution might, for example, be to assign to each of the Provinces which exceeds 20 millions in population—namely, Bengal, Madras, Bombay, the United Provinces, the Punjab and Bihar and Orissa—an equal number of seats, say, 17, to the Central Provinces (if it included Berar) and Assam, say, 7 and 5 seats respectively, to the North-West Frontier Province, 2 seats, and to Delhi, Ajmer, Coorg and British Baluchistan 1 seat each.

In the Lower Chamber, representing as it will primarily the population of the federated area, we consider that the distribution should tally as closely as possible with the population ratio, but that some adjustment will be required in recognition of the commercial importance of the Bombay Presidency and of the general importance in the body politic of the Punjab, which it will be generally conceded is not strictly commensurate with its population as compared with that of other Provinces. We suggest that this adjustment might be secured in the case of Bombay, to some extent at all events, by adequate weightage of the special representation which we have recommended for Indian and European Commerce and, in the case of the Punjab, by some arbitrary addition to the 18 seats which it would secure on the basis of its population. Here again, the Committee are not in a position to make a definite recommendation, but they take note of a suggestion which has been made for the allotment to the Punjab and Bombay, and also to Bihar and Orissa, of 26 seats each, to Madras, Bengal and the United Provinces, of 32 seats each, to the Central Provinces, of 12, to Assam, of 7, to the North-West Frontier Province, of 3, and to the four minor Provinces, of 1 each—by this measure securing a distribution of the 200 seats which might be held to satisfy reasonable claims without doing undue violence to the population basis. But these figures, obviously require further consideration.

The States Quota.—The Committee recognise that this is primarily a matter for settlement among the Princes themselves, but the representatives of other interests can hardly regard it as a matter of indifference since, until a satisfactory solution is found, the idea of

federation necessarily remains inchoate, and an important factor in determining the decision of individual States as to adherence to the Federation will be lacking. In view of the admitted difficulties of the question, the Committee are anxious to assist by friendly suggestions towards the consummation of an acceptable and generally accepted conclusion. The Committee are fully aware that the effective establishment of federation postulates the adherence of the major States and that the absence of even a few of the most important States, however many of the smallest might be included, would place the Federation under grave disadvantages. At the same time, they think that it is essential that the States as a whole should secure representation which will commend itself to public opinion as generally reasonable, and that it is hardly less important to satisfy, so far as may prove possible, the claims of the small States, than to provide adequate representation for those which cover large areas.

Two suggestions have been advanced, in the course of the Committee's discussions, for the solution of this problem. The first was that the matter should be entrusted to the Chamber of Princes, with such arrangements as would secure an adequate voice in its deliberations to the small States, and to such States as are not represented in the Chamber at all. The second, based on the belief that the inherent difficulties of the problem would prove such that the Princes—acting through whatever agency—would be unable to evolve a plan which would meet with general acceptance and satisfy all claims, and consequently that a procedure based upon the first suggestion would merely involve infructuous delay, was that the task of apportionment should be remitted to an impartial Committee or tribunal on which the States themselves should not be given any representation, but before which they would all be invited to urge their claims.

The Committee are not in a position, for reasons already stated, to make any definite recommendation as to the acceptance of either of these suggestions, but they consider that the best course would be to allow a period of time, which should not, they think, extend beyond the end of March, 1932, within which the Princes should be invited to arrive at a settlement, on the understanding that, if within that period a settlement were not in fact secured, an impartial tribunal would be set up by His Majesty's Government to advise as to the determination of the matter.

Special Interests.—We affirm our previous recommendation that provision should be made for the special representation of the Landlord Interest, of Commerce (European and Indian) and of Labour. The number of seats to be assigned to each of these four interests and their apportionment amongst the various Provinces are questions which should be considered by the Franchise Committee, as also is the question of their method of election. Wherever possible, the method should be election rather than nomination.

The two Chambers.—The careful consideration we have now given to the matter has led us to the view that nothing should be done in

the new constitution which would have the effect of placing either Chamber of the Federal Legislature in a position of legal subordination to the other. It would be a misconception of the aims which we have in view to regard either Chamber as a drag or impediment on the activities of the other. In our view, the two Chambers will be complementary to each other, each representing somewhat different, but we hope, not antagonistic, aspects of the Federation as a whole. Absolute equality between the two Chambers of a bicameral Legislature is no doubt unattainable, and, if it were attainable, might well result in perpetual deadlock, and there is no less doubt that, the provisions of the constitution notwithstanding, the evolution of political development will inevitably result, in the course of time, in placing the centre of gravity in one Chamber.

But so far as the letter of the constitution is concerned we consider that, subject to the consideration shortly to be mentioned, there would be no justification for endowing one Chamber at the outset with legislative powers which are denied to the other. We accordingly recommend that, while the constitution should provide that, subject to the special provisions to be referred to later, no Bill should become law until it is assented to by both Chambers, it should contain no provisions which would disable either Chamber from initiating, amending or rejecting any Bill, whatever its character. This principle should, however, in the opinion of almost all the British Indian Delegates, be subject to the exception that the right of initiating Money Bills should vest in the Lower Chamber alone, though the States Delegation were almost unanimously opposed to the drawing of this distinction. Subject, of course, to the decision on the point just mentioned, the principle of equality also appears to us to demand that the Government should be entitled to test the opinion of the other Chamber if one Chamber has seen fit to reject a Government Bill, and that in the event of its passage by the Second Chamber it should be treated as a Bill initiated in that Chamber and taken again to the first.

In the event of rejection by one Chamber of a Bill which has been passed by the other, or of its acceptance by either in a form to which the other will not agree, we recommend that, subject to certain conditions which should be set out in the constitution, the Governor General should have power, either after the lapse of a specified period or, in cases of urgency, at once, to secure the adjustment of the difference of opinion by summoning a Joint Session.

As regards the voting of Supply, the opinion of British Indian Delegates was almost unanimously in favour of confining this function to the Lower Chamber. Their view was based on the precedent afforded in this respect, not merely by almost every other constitution, but by the actual powers which have been enjoyed, by the Indian Legislative Assembly during the past ten years. The States Delegates, however, were almost unanimously of opinion that the principle of equality of powers should apply also to the voting of Supply. In their view

since the Supply required by the Federal Government will be required for the common purposes of the Federation (or for the common purposes of British India) there is no logical reason which could be adduced in favour of depriving the representatives of the Federal Units in the Senate of a voice in the appropriation of the revenues, the responsibility of raising which they would share equally with the members of the other Chamber

Whatever may be the decision between these conflicting views, the Committee assume that the Demands for Grants, whether voted upon by both Chambers or only by the Lower Chamber, would be so arranged as to separate expenditure required for Federal purposes from that required for "Central" purposes, so that the latter might stand referred to a Standing Committee of the British Indian members of both Chambers

The Federal Court—The necessity for the establishment of a Federal Court was common ground among all members of the Committee

The Court ought, in the opinion of the Committee, to have an exclusive original jurisdiction in the case of disputes arising between the Federation and a State or a Province, or between two States, two Provinces, or a State and a Province. The Committee are of opinion that disputes between Units of the Federation could not appropriately be brought before the High Court of any one of them, and that a jurisdiction of this kind ought rather to be entrusted to a tribunal which is an organ of the Federation as a whole. It would seem to follow that the Court should have seisin of justiciable disputes of every kind between the Federation and a Province or between two Provinces, and not only disputes of a strictly constitutional nature, but that in the case of disputes between the Federal Government and a State, between a State and a Province, or between two States, the dispute must necessarily be one arising in the federal sphere, that is to say, one in which a question of the interpretation of the constitution (using that expression in its broadest sense) is involved, since otherwise the jurisdiction would extend beyond the limits of the Treaties of cession which the States will have made with the Crown before entering the Federation. The Committee are disposed to think that decisions by the Court, given in the exercise of this original jurisdiction, should ordinarily be appealable to a Full Bench of the Court

The suggestion that the Federal Court should, for Federal purposes, be invested with some kind of advisory jurisdiction, such as that conferred on the Privy Council by section 4 of the Judicial Committee Act, 1833, met with general approval and the Committee adopt the suggestion subject to certain conditions. In the first place, they are clear that the right to refer matters to the Court for an advisory opinion must be vested in the Governor-General, and secondly, they think that no question relating to a State ought to be referred without the consent of that State

A strong opinion was expressed in the Committee that the time had come for the creation of a Supreme Court for British India to which an appeal should lie from all Provincial High

Courts in substitution for a direct appeal to the Privy Council. They recommend, that the Constitution Act should prescribe the jurisdiction and functions of the Supreme Court, and that the Federal Legislature should be given the power to adopt these provisions of the Constitution Act in the future, if it should think fit to do so

Federal Finance.—The question of finance was remitted to a special committee, whose report was accepted in principle by the Conference, subject to the proviso that a "fact-finding" expert committee should work out the details. The committee divided the revenue into federal and provincial heads, as shown below, and made important recommendations on the question of Income Tax and Provincial contributions

Federal

External Customs, including Export duties
Salt
Export Opium

Excises on articles on which Customs duties are imposed (with the exception of Excises on Alcohol, Narcotics and Drugs)

Receipts from Federal Railways, Federal Posts and Telegraphs, and other Federal commercial undertakings

Profits of Federal Currency
Corporation tax
Contributions from Provinces
Contributions from States

Provincial

Land revenue
Excises on Alcohol, Narcotics and Drugs.
Stamps with the possible exception of Commercial Stamps

Forests
Provincial commercial undertakings
Succession duties, if any
Terminal taxes, if any

The first seven taxes in the present First Schedule to the Scheduled Taxes Rules

Taxes on Income.—We are agreed that such taxes should still be collected from the whole of British India by one centralised administrative service. We are all of the opinion that the net proceeds should, subject to the special provisions mentioned below, be re-distributed to the Provinces. On any other basis it will be impossible to secure, even ultimately, a uniformity of Federal burdens as between the Provinces and the federating States, or to avoid a clash of conflicting interests in the Federal Legislature when there is a question of raising or lowering the level of taxation. The distribution of the proceeds of Income-tax among the Provinces may also form a very convenient means of alleviating the burden of two or three of the Provinces which under the present system, are universally admitted to be poorer than the others. We are bound to assume that there may be a substantial

COMMITTEES IN INDIA

Franchise Committee.—The following Committees were appointed to continue in India the discussions of the Round Table Conference, and they started work in India in January, 1932. Lord Lothian (Chairman), Dr B R Ambedkar, Khan Bahadur Aziz-ul-Haq, Sir Ernest Bennett, M.P., Mr R A Butler, M.P., Lord Dufferin and Ava, Sir John Kerr, Mr Ernest Miller, Major J Milner, M.P., Diwan Bahadur Ramaswami Mudaliyar, Miss Mary Pickford, M.P., Sir Sundar Singh, Majithia, Mrs Subbarayan, Mr S B Tambe, and Sir Muhammad Yakub

Secretaries.—Mr T C S Jayaratnam, I.C.S., and Mr J G Lalithwaite (India Office). Assistant Secretaries.—Mr S P Thompson, I.C.S., and Mr F H T Ward

Federal Finance Committee.—Lord Eustace Percy, M.P., (Chairman), Colonel K N Haksar, Nawab Sir Muhammad Akbar Hydari, Sir Louis Kershaw, Mr H Shankar Rau, (Member and Secretary), and Mr F P Robinson (H M Treasury)

Assistant Secretary.—Mr K Anderson (India Office)

States Inquiry Committee.—Mr J C C Davidson, M.P. (Chairman), Sir Reginald Glancy, Sir Maurice Gwyer, Lord Hastings, Major-General Sir Robert Hutchison, M.P., Mr J R Martin, and Sir Charles Stuart-Williams

Secretaries.—Mr K. S. Fitze, I.C.S., and Mr P J Patrick (India Office)

Consultative Committee.—In his Statement on December 1, 1931, the Prime Minister announced the intention of His Majesty's Government to keep the Conference in being through a "working committee" of the delegates, to be nominated by himself, with which, through the Governor-General, His Majesty's Government would keep in effective touch. It is the intention of His Majesty's Government that this working committee of the Conference should be brought into effective consultation on the recommendations of the three committees referred to above before final conclusions on their recommendations are adopted by His Majesty's Government. Besides this it will, of course, participate in such constructive work, in pursuance of the general policy indicated in the Prime Minister's Statement, as can be undertaken independently

The Prime Minister nominated the following members of the Round-Table Conference to be members of this Consultative Committee, under the chairmanship of the Governor-General as deputy for himself.—The Rajah of Sarila, Sir Manubhai Mehta, Nawab Sir Muhammad Akbar Hydari, Sir Mirza Muhammad Ismail, Mr M. R. Javakar, Rao Bahadur V T Krishnama Chari, Nawab Liaquat Havat Khan, Sir C P Ramaswami Aiyer, Mr E C Benthall, Mr A H Ghuznavi, Mr N M Joshi, Dr B S Moonje, Sir A P Patro, Sir Tej Bahadur Sapru, Captain Rajah Sher Muhammad Khan of Domell,

Dr Shafa'at Ahmad Khan, Rao Bahadur Srinivasan, Sardar Saheb Ujjal Singh, and Mr Zafrullah Khan

Secretaries.—Mr A Latif, O.B.E., I.C.S. and Mr B Rama Rao, C.I.E., I.C.S.

BURMA ROUND TABLE CONFERENCE

The Conference was held in London in December 1931, and January, 1932

Chairman.—Lord Peel

Conservatives.—Lord Winterton and Mr J S Wardlaw Milne

Liberals.—Lord Mersey and Mr Isaac Foot

Labour.—Mr G H Hall and Major D Graham Pole

Mr J A Woodhead attended the Conference on behalf of the Government of India and Sir S A Smyth and Mr T Lister on behalf of the Government of Burma

Delegates from Burma.—U Ba Pe, U Maung Maung Ohn Ghine, U Aung Thin (for separation), U Chit Hlaing, U Soe Thein, U Su, (Tharrawaddy) U Pu, U Ni (various anti separation parties), Sir Oscar de Glanville, Mr R B Howison and the Hon K B Harper (unofficial Europeans), Shwe Ba (Karen), Mr N M Cowasji Mr S N Haji (Indians), Mr C H Campagnac (Anglo-Indian), the Sawbwa of Hsipaw State and the Sawbwa of Yawngwe State (Shan States)

Constitution of Burma

Cabinet Plans explained.—The Prime Minister announced the policy of His Majesty's Government on the question of constitutional reform in Burma at the final plenary sitting of the Burma Round-Table Conference in January 1932

The Main Points in his Statement were.—The Government's intention, in the event of Burma electing to pursue her political development apart from India, was to place responsibility upon her Legislature for the administration not only of the subjects which will fall within the range of Provincial Governments in India, but also subjects which will be administered in India by the Central authority

The Legislature to be bicameral—the Upper House to consist partly of elected and partly of nominated members, the Lower House to be directly elected

Adequate representation of minority communities and special interests like commerce

The Ministry to consist of about six, but not more than eight, Ministers appointed by the Governor and collectively responsible to the Legislature

Governor's Powers.—In order that the stability of the Realm may be maintained, the Governor must have special powers, including—

Administering in responsibility to Parliament the subjects of Defence and External affairs

The administration of the Shan States and other dependencies

Intervention of the Legislature for the supply required for the administration of the Shan States, and to secure the execution of legislation essential thereto

The direction of military policy, including the issue of money and coinage, the protection of life and interests of officers recruited by the Crown or the Secretary of State

A continuation of the present discussion on the subject of the union to refer to legislative powers and to return Bills for consideration

It will be the endeavour of His Majesty's Government to ensure that these powers shall not prejudice the advance of Burma to self-government

The administration of financial questions, including the power of taxation and raising revenue, and expenditure on subjects outside the sphere of the Governor's personal responsibility, to be entrusted to the Legislature

The Constitution must contain provision ensuring equal rights and opportunities for any British subject ordinarily resident or carrying on trade or business in Burma

Separation.—The Burmese people to decide at the General Election (due to be held in November next) whether or not they are in favour of separation from India

In this connexion the Prime Minister made the significant statement that if an Indian Federation is established it cannot be on the basis that members can leave it as and when they please. He supplemented the "clear picture of a general constitutional scheme" he had read by pointing out that necessarily in such a statement reservations have to be specified and thus present a formidable appearance. The powers that remained without any reference being made to them were very great. In addition to the subjects of which Ministers would have charge in common with Ministers in Indian Provinces, they would have such vastly important Central subjects as civil and criminal law, posts and telegraphs, communications, customs, and income-tax. Of 40 Central subjects in the schedule of the Government of India Act only half a dozen were proposed to be excluded from the purview of the Burma Ministry and Legislature.

The Indian Legislature.

The Indian Legislature with its Assembly, the fourth of its line, newly returned by the constitutional order, was three times summoned during 1921 the first meeting being the ordinary Delhi cold weather one, the second the normal autumn meeting, in Simla, and the third a special session called in Delhi in November to pass measures which had been outlined in September to meet the emergency financial situation brought about in India by the collapse of the markets throughout the world.

The first meeting of the Delhi winter session of the Assembly was on 14th January and pending the election of President Mr. Shanmukham Chetty was nominated by His Excellency the Governor-General to take the chair. The presidential election on 17th January resulted in the elevation of Sir Ebrahim Rahimtulla to the chair, after a spirited contest in which several candidates participated.

It was the Viceroy (Lord Irwin) addressed the Assembly on the afternoon of 17th January. "India, like the rest of the world (he said) has suffered seriously from an almost universal trade depression and in the nature of things has felt the full weight of the collapse in world prices of agricultural products. The troubles

arising from this state of affairs, as I recently had cause to point out, are being seriously aggravated by the disturbances resulting from the civil disobedience movement. I do not wish to dwell at length on this aspect of that movement to day, nor indeed is it profitable to indulge in recriminations about the past." But, said the Viceroy, "a political movement must be judged and dealt with not according to the professions of those who initiate it or carry it into effect but in the light of practical results." His Excellency referred to the determined efforts of Congress to establish a parallel government and especially to the pernicious and cruel effort to persuade people not to pay agricultural rents and land revenue. He referred to the Ordinances as means which he had taken to combat these insidious and dangerous attempts to cripple the administration and to save the small agriculturists "from the effects of a propaganda by people who have little to lose but are callously ready to involve the small landholder in the risks of legal processes and even forfeiture of his land." The Viceroy also referred to the Bill to be placed before the Legislature to increase Government's power of control over the Press—a Bill the Legislature later passed.

A formal motion for papers on the Round Table Conference produced in the Assembly an interesting debate. There was also a debate on a non official resolution deploring the Government's "policy of repression," but eventually, on the motion of Sir Hari Singh Gour, as leader of the Nationalist party, the debate was adjourned *sine die*.

The House adjourned on 9th February as a mark of respect to the memory of Pandit Motilal Nehru whose death was announced that day.

The outstanding feature of the session was the Assembly's treatment of the annual Finance Bill. The Budget gravely reflected the economic depression and, to make ends meet, the Finance Bill proposed heavy new taxation in particular substantial surcharges on Customs and Income-Tax and an increase in the Customs duty on silver. The non-official party members specially demanded enormous retrenchment as the way to balance the budget, rather than new taxation. At first, the party leaders opposed the Finance Member's suggestion of a Retrenchment Committee. They and their followers finally agreed to the proposal, but the Finance Bill was rejected by the House and had to be enacted by certification. The Council of State approved the Bill.

The Simla session was startled by the departure of sterling from its association with gold. Directly this happened, Government protected themselves by Ordinance from a rush on their reserves and proceeded to take a few days to deliberate on what their policy should be. But meanwhile His Majesty's Government announced in London that the rupee would henceforth be linked with sterling. This led to much protesting by the non-official Indian benches in the Assembly against dictation from Whitehall. There was much disappointment among those who had long been striving to secure depreciation of the rupee. Government were pressed to prohibit the export of gold.

The Finance Member laid before the Assembly an exhaustive financial statement reviewing the outlook in India under pressure of the world depression. He showed that on the existing basis of taxation and despite earnest retrenchment measures, there were likely to be deficits in the current year of 194 crores and 1932-33 of a similar amount. He therefore propounded

an 18-month Budget and Finance Bill, providing for further heavy increases in taxation. He unfolded a rigorous plan of retrenchment in all departments and including an all-round cut in official salaries, from the Viceroy down to a very low level of pay. His proposed new taxation comprised for the current year new and increased Customs duties calculated to yield Rs 154 lakhs, surcharges on existing taxes to bring in Rs 331 lakhs, a surcharge of Rs 21 lakhs on the Salt duty and an increase of Income-Tax calculated to raise a new Rs 205 lakhs. The total new taxation proposed for the current year was thus calculated to produce an additional Rs 711 lakhs and it was also proposed to raise postal and telegraph charges to make them produce another Rs 37 lakhs. The new taxes were proposed to run for 18 months and the extra yield from them in 1932-33 was calculated to be Rs 14,10 lakhs.

No attempt was made to carry the Bill straight through into law. Having been introduced, it was left for a special session, to be called in Delhi in November.

His Excellency the new Viceroy, the Earl of Wallingford, on 14th September addressed a joint sitting of both Houses of his Legislature. This was before the introduction of the new financial programme. His Excellency referred to it and exhorted all members of the public to brace themselves to bear the new burdens which it must impose. His Excellency only briefly touched on the general political situation and spoke with warm satisfaction of the outlook for the Round Table Conference.

The Assembly met in Delhi on 4th November and immediately opened discussion of the new Finance Bill. The new taxation proposals were severely criticised by all sections of non-official members. It was, in the main, said that they were ill chosen because they piled up enormous new taxation on an already overloaded narrow basis, that they would not yield the revenue expected from them but would greatly damage trade. The debates were conducted on a high level, but in the end the Assembly refused to pass the Bill and it, like its next preceding forerunner, had to be enacted by His Excellency the Viceroy by his power of certification and with the assistance of the Council of State.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent with a single people. Nowhere is the complexity of Indian races more clearly exemplified than in the physical type of its inhabitants. No one will controvert the main types, such as the Aryo-Indian, the Shikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differences a much further. The typical features of the Indo-Aryans—Dravidians—differal together from those of Northern Asia, and more especially from the tribes of Malaya, Sumatra, and the Philippines. Whatever may be their origin, it is certain that they have settled in the country for many ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by the hordes of invaders including Aryans, Scythians, Persians and Moghuls, and in the North-East by Mongoloid tribes allied to those of China and India only in a modern geographical sense. Between these foreign elements and the pure Dravidians is borderland where the constituent races have intermingled.

The peoples of the Indian Empire are divided by the Huxley Index (Caste, Tribe and Race, India Census Report 1901, the Gazetteer of India, Ethnology and Caste, Volume I, Chapter C) into seven main physical types. There would be no objection if the Aryan race were included, but that a group of Negroids may be disregarded.

The Turko-Iranian, represented by the Eastern Brahmins and Afghans of Peshawar and the North-West Frontier Province. Probably formed by a fusion of Turk and Persian elements, in which the former predominate. Stature above medium, complexion fair, eyes mostly dark but occasionally grey, hair on face plentiful, head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattis, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall, complexion fair, eyes dark, hair on face plentiful, head long, nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Marathas, Brahmins, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Raj

putana and in Bihar and represented in its upper strata by the Hindustani Brahmins and in its lower by the Chamar. Probably the result of the intermixture in varying proportions, of the Indo-Aryan and Dravidian types. The head form is long with a tendency to medium, the complexion varies from lightish brown to black; the nose ranges from medium to broad, being always broader than among the Indo Aryans, the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo Aryans, while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Bengal Brahmins and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad, complexion dark, hair on face usually plentiful, stature medium, nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa, the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu, the Lepchas of Darjeeling and Sikkim, the Limbus, Murmis and Gurungs of Nepal, the Bodos of Assam, and the Burmese. The head is broad, complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, face characteristically flat, eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Panjyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical specimens the stature is short or below mean, the complexion very dark, approaching black, hair plentiful, with an occasional tendency to curly, eyes dark, head long, nose very broad, sometimes depressed at the root but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in

India, the medley of forest clad ranges, terraced plateau, and undulating plains which stretch roughly speaking, from the Vindhya to Cape Comorin. On the east and the west of the peninsular area the domain of the Dravidian is continuous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro-like proportion of

his nose. In the upper strata of the vast social deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly, and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.

TOWN AND COUNTRY.

The progress of urbanisation in India—if there has been any progress at all—has been very slow during the past thirty years, the whole increase being less than one per cent. An examination of the statistics shows that whilst towns with populations above 50,000, increased by over 16 per cent in the decade, the increase was considerably less in those

between 5,000 and 50,000, whereas the population of towns between 10 to 20 thousand did not keep abreast of the progress of the general population of the country. The statistics reveal the gradual decadence of the medium-size country town and the growth of the larger cities under the influence of commercial and industrial development.

DISTRIBUTION OF POPULATION IN GROUPS OF TOWNS ACCORDING TO SIZE AND IN RURAL TERRITORY

| Class of places | 1921 | | 1921 |
|----------------------|---------|-------------|-----------|
| | Places | Population | Per cent. |
| Total Population | 687,935 | 316,017,751 | 100.0 |
| Rural Territory | 2,313 | 32,418,776 | 10.2 |
| Towns having— | | | |
| I 100,000 and over | 35 | 8,211,704 | 2.6 |
| II 50,000 to 100,000 | 54 | 3,517,749 | 1.1 |
| III 20,000 to 50,000 | 199 | 5,925,675 | 1.8 |
| IV 10,000 to 20,000 | 450 | 6,209,583 | 2.0 |
| V 5,000 to 10,000 | 885 | 6,223,011 | 2.0 |
| VI Under 5,000 | 690 | 2,331,054 | .7 |
| Rural Territory | 685,622 | 283,598,975 | 89.8 |

Migration—Of the population of the Indian Empire only 603,526 were enumerated as born in other parts of the world. Of these about four-fifths came from other Asiatic countries, such as Nepal, Afghanistan, China, Siam, Ceylon, and Arabia and the remainder mostly from Great Britain and other countries of Europe. The emigration from India is approximately 1.7 million, so the numbers who move between India and other countries is about two millions. Of the total immigrant population of 707,000 in Burma 573,000 are Indians, 102,000 Chinese, representing 80 and 15 per cent respectively of the whole number. Of the Provinces which contribute most largely to the streams of migrants the most conspicuous are Bihar and Orissa, about 1½ million, the United Provinces about 1 million, Madras ¾th of a million, Rajputana 3-5th of a million and Hyderabad 1-6th of a million. The number of persons resident in

India who were born outside the Indian Empire is 603,526 and of these 274,000 were born in Nepal, 116,000 in the British Isles, 108,000 in China and 48,000 in Afghanistan.

The statistics of emigration outside India are far from complete.

The number of Indians belonging to regiments and labour-corps outside India at the time of the census was about 125,000. Of these the majority were probably in Mesopotamia and Palestine. According to the returns the number of Indians in the colonies, irrespective of birth-place, amounts to 1,662,000, of whom 1,028,000 or about two-thirds are males. More than four-fifths are Hindus and about half of the remainder are Musalmans. The colonies which attract an appreciable number of emigrants are shown below. About one-ninth of the emigrants failed to specify their province of birth, and of the remainder no

less than 841,000 or 80 per cent were from Madras, 24,000 from Bombay, 18,000 from the Punjab, 17,000 from the North-West Frontier Province and 11,000 from Bengal. The majority of the emigrants work as agricultural labourers on rubber, tea, coffee and other plantations. Under the Defence of India Rules indentured labour emigration was stopped in March 1917, but there had been a considerable outflow of labourers to the colonies in the previous years and more than 2.4 millions of natives of India passed through the ports of Madras and Calcutta as indentured labourers for the various colonies during the decade. Of the labourers 33,000 went from Calcutta, but the bulk were from the Madras Presidency and their

destination was Ceylon and the Straits Settlements. There is very little emigration from the ports of Bombay and Karachi. Altogether about two million labourers returned to India from the colonies during the decade.

Indian emigrants to certain Colonies

RELIGIONS

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded. Speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhists, 3 follow the religion of their tribes, one is a Chris-

tian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist, or a Christian, and the other most probably a Jain, much less probably a Parsi and just as possibly either a Jew, a Brahmo, or a holder of indefinite beliefs. The enumerated totals of the Indian religions are set out in the following table—

| Religion | Actual number in 1921 (000's omitted) | Proportion per 10,000 of population in 1921. | Variation per cent (Increase or Decrease) 1911-1921 |
|--|---------------------------------------|--|---|
| Indo Aryan | 232,723 | 7,262 | + 1 |
| Hindu | 216,735 | 6,856 | — 4 |
| Brahmanic | 216,261 | 6,841 | — 5 |
| Arya | 468 | 15 | +22.1 |
| Brahmo | 6 | 2 | +16.1 |
| Sikh | 3,272 | 103 | + 7.4 |
| Jain | 1,178 | 37 | — 5.6 |
| Buddhist | 1,571 | 50 | + 7.9 |
| Iranian {Zoroastrian (Parsi)} | 102 | 3 | + 1.7 |
| Semitic | 73,511 | 2,325 | + 4.2 |
| Musalman | 68,735 | 2,174 | + 5.1 |
| Christian | 4,754 | 150 | +22.6 |
| Jew | 22 | 6 | + 2.4 |
| Primitive (Tribal) | 9,775 | 309 | — 5.1 |
| Miscellaneous (Minor Religion and religion not returned) | 18 | 1 | —51.5 |

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 80 per cent of the population. Hindus are in the majority in Assam, Bihar and Orissa, the United Provinces, the Central India tracts, Rajputana and Bombay. Muhammadans monopolize the North-West Frontier Province, Paluchistan and Kashmir and are considerable in excess in the Punjab and Eastern Bengal and Sind. They form about 28 per cent of the population of Assam, 14 per cent in the United Provinces and 10 per cent in Hyderabad. The Buddhists are almost entirely confined to Burma where they are 25 per cent of the population. The Sikhs are located in the Punjab and the Jains in Rajputana, Ajmer-Merwara and the north-west States. Those who were classed as Primitive Tribal Religion are chiefly found in Bihar and Orissa, the Central Provinces and Assam, the States of Burma, Malaya, Siam, Sulu, Central India, Hyderabad and a few other places.

under the head of Primitive Tribal Religion. The total number of Christians in India including the Holy Land is 4,754. The remainder are scattered over the country, the largest numbers being in the United Provinces, Bengal, Bihar, Orissa, Burma, Punjab and Assam. 7,262 Jews are also scattered over the Indian Empire.

Christians.—The Christians in India are numbered just over 4,700, or 15 per cent of the population. The majority of them are in the United Provinces, Bihar, Orissa, Bengal, Punjab and Assam. The remainder are scattered over the country, the largest numbers being in the United Provinces, Bengal, Bihar, Orissa, Burma, Punjab and Assam. 7,262 Jews are also scattered over the Indian Empire.

300 thousands, Bombay, Burma and the United Provinces between 200 and 300 thousands and Bengal and Assam between 100 and 150 thousands. Divided racially Europeans (and allied races) number 176 thousands, Anglo-Indians 113 thousands and Indians nearly $4\frac{1}{2}$ millions so that out of every 100 Christians 93 are Indians, 4 are Europeans and 3 are Anglo-Indians.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census of India was taken on the night of February 24th in Burma and on that of 26th in India. The total population of India as thus ascertained is 351,450,689, viz., British Territory 270,612,162 and Indian States 80,838,527 giving an increase of 23,608,869 in British Territory and 8,899,340 in Indian States. These figures are provisional, but the experience of previous Censuses shows that the difference between the population according to the provisional totals and that as finally ascertained does not amount to more than about 1 in 2,500 persons and the figures are therefore sufficiently accurate for practical purposes and can be adopted by Local Governments for administrative purposes and for calculation of proportions and percentages based on population.

The proportional variations at each of the last two Censuses are given below —

| | 1901
to
1911 | 1911
to
1921 | 1921
to
1931. |
|-------------------|--------------------|--------------------|---------------------|
| India | +7 1 | +1 2 | +10 2 |
| Provinces | +5 5 | +1 3 | +9 55 |
| States | +12 9 | +1 0 | +12 3 |

These ratios differ slightly from those in the statements appended, as allowance has been made in the former for the inclusion of new areas. The areas now dealt with for the first time have an estimated population of 18,327 persons.

AGE AND SEX.

The figures of the total population of India are not tabulated by annual age-periods but the table below gives the age distribution of 10,000 males and females in the Indian population

| Age-group | 1921 | | 1911 | |
|-----------|-------|--------|-------|--------|
| | Male | Female | Male | Female |
| 0—5 | 1,202 | 1,316 | 1,327 | 1,433 |
| 5—10 | 1,471 | 1,494 | 1,383 | 1,383 |
| 10—15 | 1,245 | 1,081 | 1,165 | 997 |
| 15—20 | 842 | 815 | 848 | 826 |
| 20—25 | 775 | 881 | 822 | 930 |
| 25—30 | 865 | 885 | 890 | 900 |
| 30—35 | 825 | 833 | 829 | 835 |
| 35—40 | 630 | 565 | 622 | 556 |
| 40—45 | 621 | 621 | 634 | 631 |
| 45—50 | 392 | 346 | 380 | 338 |
| 50—55 | 434 | 438 | 432 | 443 |
| 55—60 | 185 | 168 | 177 | 164 |
| 60—65 | 266 | 298 | 257 | 305 |
| 65—70 | 81 | 79 | 83 | 75 |
| 70 & over | 160 | 180 | 145 | 175 |
| Mean age | 24.8 | 24.7 | 24.7 | 24.7 |

In the whole of British India the infant death-rate amounts to about one-fifth of the total death-rate for all ages and about one fifth of the children die before the age of one year. The ratios of deaths vary in different provinces the birth-rate being an important factor. Thus they are specially high in the United Provinces and Central Provinces where the birth-rate is high and low in Madras which has a lower general birth-rate. The recorded rates in some of the cities are phenomenally high but may, owing to the defective reporting of births, be somewhat exaggerated.

Special causes contribute to the high mortality of infants in India. Owing to the custom of early marriage co-habitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of delivery, seriously affects the health and vitality of the mother and through her of the child. Available statistics show that over 40 per cent of the deaths of infants occur in the first week after birth and over 60 per cent in the first month. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the danger of death in the early months of life from diarrhoea or dysentery.

Infant mortality in Cities

| | | | |
|----------|----|----|-----|
| Bombay | .. | .. | 556 |
| Calcutta | .. | .. | 386 |
| Rangoon | .. | .. | 303 |
| Madras | .. | .. | 282 |
| Karachi | . | .. | 249 |
| Delhi | . | .. | 233 |

Sex Ratio—In the whole of India there is an excess of males over females, the figures being 945 females per thousand males. These results being opposed to experience in most other countries of the world have been challenged and attributed to errors in the Indian census. This reasoning is rejected by the Census authorities, who insist that the disparity between the sexes is due to special conditions in the Indian Empire. The sex ratio has fallen in the last twenty years throughout India. The statistics of birth suggest that the proportion of females born to males born has, if anything, declined during this period, and in any case there has been a marked decline in the last five years of the last decade in most provinces. The decline in the proportion of women however is chiefly due to (a) the absence of famine mortality which selects adversely to males and (b) the heavy mortality from plague and influenza which has selected adversely to females.

Marriage—The subject of polygamy has been discussed fully in the report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The table shows the number of married women per 1,000 married men in India and the main provinces. No definite conclusions however can be drawn from these figures because (1) they probably contain a certain number of widows divorcees and prostitutes who have wrongly returned as married and (2) it is impossible accurately to gauge the effect of migration on the figures of the married in any area. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

Number of married females per 1,000 males

| | | | |
|------------------|----|----|-------|
| India | .. | .. | 1,008 |
| Assam | .. | .. | 976 |
| Benzal | . | .. | 956 |

| Burma | . | .. | 924 |
| C.P. and P. & R. | .. | .. | 1,024 |
| Madras | .. | .. | 1,061 |
| Punjab | . | .. | 1,021 |
| United Provinces | . | .. | 1,012 |

Widows—The proportion of widows in the population is 6.4 per cent, does not differ widely from the figure for European countries but the number of widows is strikingly

large The large number of Indian widows is due partly to the early age of marriage, partly to the disparity in the ages of the husbands and wives but chiefly to the prejudice against the remarriage of widows The higher castes of Hindus forbid it altogether and, as the custom

is held to be a mark of social respectability many of the more ambitious of the lower castes have adopted it by way of raising their social status, while Muhammadans who are closely brought into touch with their Hindu neighbours are apt to share the prejudice,

Proportion of widows in the population per 1,000

| Age | India,
1921 | England
and
Wales,
1911 | Age | India,
1921 | England
and
Wales,
1911 |
|----------|----------------|----------------------------------|-------------|----------------|----------------------------------|
| All ages | 175 0 | 73 2 | 20—25 | 71 5 | 1 5 |
| 0—5 | 7 | | 25—35 | 146 9 | 13 1 |
| 5—10 | 4 5 | | 35—45 | 325 2 | 50 5 |
| 10—15 | 16 8 | | 45—65 | 619 4 | 193 3 |
| 15—20 | 41 4 | | 65 and over | 834 0 | 565 9 |

Early Marriage—The figures clearly show an increase in the numbers of those in the early age-categories who are still unmarried The movement is most marked in the Hindu community but is shared by the other religions,

the change being less noticeable among the Buddhist and Christian communities who are not addicted to early marriage The change is most conspicuous in the age categories 10 to 15 for women and 10 to 20 for men

SOCIAL AND ECONOMIC CONDITIONS.

Literacy—The number of persons in India literate in the sense of being able to write a letter and read the reply is 22 6 millions, amounting, if children under five years of age are excluded, to 82 in every thousand of the population Of males 139 in every thousand at age five and above are literate, the corresponding proportion in the case of females being 21

The Hindus have one literate person in every thirteen, for males the ratio is one in eight and for females one in sixty-three The proportion of Sikh males who are literate is less than that of Hindus One Mahomedan male in 11 and one female in 116 can read and write The low position of Musalmans is partly due to the fact that in Bengal, the Punjab, North-West Frontier Province and Sind, where they predominate, they are mostly agricultural Where they are in a minority, as in the Central Provinces, United Provinces and Madras, they are usually town-dwellers and have a considerably higher proportion of literates The Hindu community embraces every stratum of society and the proportion of literacy is seriously affected by the inclusion of the vast mass of the lower rural classes Some of the higher Hindu castes have more literate males than the Parsis whilst others are on a level with or even below the aboriginal tribes

English—In the whole of India 2 5 million persons or 160 males and 18 females in every ten thousand persons of each sex aged five and over can read and write English

One in thirty males in Bengal and one in forty-three in Bombay are literate in English,

In Madras, Assam and Burma the proportion is 2 per cent while in Bihar and Orissa, the Central Provinces and the United Provinces it is below 1 per cent Of the States Cochin and Travancore have between 3 and 4 per cent, but in others the proportions are much lower More than half the number of Parsi males and one-fourth of their females can read and write English Of Christians nearly all the Europeans and many of the Anglo-Indian are literate in English, but except on the southern coast English literacy is rare among the Indian Christians and the regional proportions therefore largely follow the racial distribution Though the proportions in the other communities, taken on the total populations, are small, some of the higher castes have a fairly large number of English-knowing members In Bengal about half of the Baidya males and a quarter of the Brahman and Kayastha males are literate in English, while in Madras more than a quarter of the Tamil Brahmans can claim this accomplishment Of the Jain in Kathiawar nearly a tenth are literate in English though the Chaturth Jains of Kolhapur, who are cultivators, are less literate than the average of the Presidency During the decade the number of males knowing English rose by 51 per cent and that of females by 57 per cent Among the main Provinces the greatest progress has been made by Bengal, Assam and Bombay and in the States by Cochin, Travancore, Mysore and Baroda

Languages—In the whole Indian Empire 222 languages were returned at the census, dialects, as has been previously explained, not having been separately considered The

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed, partly, to a progressive improvement in the accuracy of the diagnosis and, partly, to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a

considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901, many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons falling from 315 to 267. The small increase in the present decade, amounting to 26,455 persons or one per 100,000 may be due to improvement in record and tabulation but is certainly unexpected.

OCCUPATIONS

India is essentially an agricultural country and agriculture proper supports 224 millions of persons or 71 per cent of the population of the Empire. If we add the pastoral and hunting occupations the percentage rises to 73, while a considerable proportion of the unfortunately large number of persons in the category of vague and unclassifiable occupations are probably labourers closely connected with the occupations of the land. Industries support 10 per cent of the population, but the bulk of these are engaged in unorganised industries connected with the supply of personal and household necessities and the simple implements of work. Organized industries occupy only 1 per cent of the people. In trade and transport, on which less than 6 per cent and 2 per cent, respectively, depend a not inconsiderable number are connected with the disposal of the various kinds of agricultural products. The administration and protection of the country engage only 4,825,479 persons, or $1\frac{1}{2}$ per cent of the population, and the remainder are supported by domestic, miscellaneous and unproductive occupations. Though the extent to which agriculture predominates in individual provinces varies, there is no region in which it does not in some form easily take the first place. In spite of the trade of Calcutta and the numerous industrial and mining concerns of Bengal and Bihar and Orissa the population of the eastern provinces is overwhelmingly agricultural and contains a higher percentage of persons supported by the land than any other tract of India. Of industrial workers the largest

proportions in the local population are in the Punjab, the United Provinces and Bombay. Of these three provinces, however, agriculture dominates the economic life of the first two, where the industrial occupations, though they engage a substantial number of persons, are mostly of the cottage industry type. In Bombay the development of organized industry is of some economic importance, but is at present largely confined to a few of the biggest cities. In the category of unclassified occupations the majority of persons are labourers whose particular form of labour is unspecified and the rest mostly unspecified clerks.

Compared with 1911 the agriculturists have increased a little faster than the total population, though fishermen and hunters are fewer. Miners have risen in number with the recent expansion of the industry. Industries have substantially decreased and of the principal forms of industry the textile workers have dropped considerably, as also have potters and workers in wood and metal. An increase under transport by rail is countered by a drop under transport by road. Trade has increased, trade in textiles showing a slight rise and trade in food a slight drop. The number employed in public administration is practically stationary, but the army has risen while the police has fallen heavily. Law and medicine have gained at the expense of religion, and though instruction has spread letters have fallen. Rentiers are fewer and domestic servants as many. Beggars and vagrants, the raw material of crime and disease, have decreased but criminals, the finished article, have risen in numbers.

ated (060000) 10.

Under the Act of 1903 (XVII) countries to which emigration was lawful, the British Colonies of Mauritius, British Guiana, Trinidad, St Lucia, St Vincent, Natal, St Kitts, Nevis, Seychelles, the Netherlands Colony of Guiana and the Danish Colony of St Emigration to St Lucia, Grenada, St St Kitts, Nevis, the Seychelles and ceased soon after the passing of the demand for fresh labour having

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Immigrant" was extended to cover all persons "assisted" to depart from India.

Present Position—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three—

(a) Control of emigration

(b) Rights of Indians to admission to other parts of the Empire.

(c) Rights and disabilities of Indians domiciled overseas

These questions may be considered separately

Control of Emigration—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows—

"10 (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor-General in Council, by notification in the *Gazette of India*, may specify in this behalf

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber, either without modification

no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position."

The Right Hon'ble Srinivasa Sastri visited the Dominions of Australia, Canada, and New Zealand in the course of 1922 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of his mission was to appeal to the Governments and public of Canada and Australia fully to enfranchise qualified domiciled Indians. At the time of Mr Sastri's visit Indians resident in Queensland and Western Australia had neither the provincial nor the federal franchise. In Canada, Indians resident in

British Columbia were and are still excluded from the dominion as well as the provincial franchise. While successful in securing a more sympathetic atmosphere towards Indians, Mr Sastri failed to bring about any modification in the existing electoral laws.

The question of giving effect to the resolution of 1921 was raised by the Indian representatives at the Imperial Conference, 1923. Their proposal was as follows—

"Let the Dominion Governments who have an Indian population, let His Majesty's Government in the areas under their direct control, such as Kenya, Uganda, Fiji and other places where there are Indians resident, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how soonest the principle of equality implicit in the 1921 Resolution may be implemented."

This proposal was favourably received by the Dominion Premiers, excluding General Smuts, and by the Secretary of State for the Colonies who cordially agreed that there should be full consultation and discussions between him and a Committee appointed by the Government of India upon all questions affecting British Indians domiciled in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr J Hope Simpson, M.P., *Chairman*, H H the Aga Khan, Sir B Robertson, Sir Bahadur T Rangachariar, M.L.A., and Mr K C Roy with Mr E B Ewbank, O.I.E., I.O.S., as Secretary to make representations to the Colonial Office on certain outstanding questions affecting Indians in Kenya and Fiji. The Committee assembled in London early in April 1924 and dispersed towards the end of July. During this period they had several interviews with the Secretary of State for the Colonies and the officials of the Colonial Office, in which they made representations upon a variety of important matters affecting Indians in Kenya in Fiji and in the mandated territory of Tanganyika. In regard to Kenya, the representations covered all questions of interest to India dealt with in the decision of His Majesty's Government. The result of these representations was announced by Mr J H Thomas in the House of Commons on August 7th, 1924. The situation in Kenya also improved as a result of the work of the committee by the decision of the Indian community to relinquish their former attitude of non-co-operation and to accept an arrangement by which they will select five members to be nominated by the Governor to the Legislative Council. The result of the representations which the Committee made on certain outstanding questions relating to Indians in Fiji was announced on January 12th, 1927, when the Government of India published the more important papers relating to the negotiations which had been going on with the Colonial Office for some time.

Summary of present Position—Outside Australia, N Zealand and Canada the position stands as follows—

(1) **South Africa**—The main grievances of Indians, which led to a passive resistance movement headed by Mr Gandhi, were settled by the compromise embodied in the Indians

Relief Act, 1914 and by the guarantee known as the Smuts Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters —

(i) Mr. Gorges, Secretary for the Interior, to Mr. Gandhi June 20th, 1914. "With regard to the administration of existing laws, the Minister desires me to say that it always has been and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights."

(ii) Mr. Gandhi to Mr. Gorges, July 7th, 1914.

By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading no matter how often he shifts his residence or business from place to place in the same township.

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not should be respected."

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows —

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No. 35 of 1908) and Act No. 37 of 1919 should not be repealed.

(2) There should be no compulsory repatriation of Asiatics but

(3) Voluntary repatriation should be encouraged.

(4) There should be no compulsory segregation of Asiatics but

(5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions —

(a) to lay out residential areas for Asiatics,

(b) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted.

(6) These areas should be selected and allocated by a Board of Independent persons in consultation with the Municipal Council and Asiatic community.

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes, outside townships, should be confined to the coast belt, say, 20 to 30 miles inland.

(8) A uniform 'License Law' applicable to all the Provinces of the Union should be possible be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive consolidating Act of Parliament providing, *inter alia* —

(a) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction, outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator.

(b) The grounds upon which an application for the grant of a new license may be refused.

(c) That the reasons for the refusal to grant any license shall be recorded, together with any

evidence tendered for or against the application.

(d) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator.

(e) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business.

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws.

(10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913.

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or grievances and generally safeguard their interests.

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but it was not accepted by the Union Government.

Present Position — Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal. In the remaining two provinces they are not enfranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal. Their immigration into the Union is barred and severe restrictions exist on inter-provincial migration. In the Transvaal they are not allowed to acquire immovable property outside locations and on the Witwatersrand they are subject to the restrictions of the Gold Law.

The anti-Asiatic party have made several efforts, especially in Natal, further to curtail the rights of Indians. Some of these are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms. Examples of recent anti-Asiatic legislation of major importance are

(a) The Natal Rural Dealers Licensing Ordinance, transferring the power of granting trading licenses from the Licensing Officer to an elected Licensing Board, on which Indians may not sit

(b) The Durban Land Alienation Ordinance This Ordinance, which enables Municipalities in selling land to assign it for particular communities, and to that extent to secure segregation, has been allowed on condition that Asiatics are given reasonable opportunity for acquiring adequate residential sites

Anti-Asiatic feeling in South Africa — A bill for the segregation of Asiatics known as the Class Areas Bill was introduced in the Union Assembly in March 1924, which though not specifically directed against Indians, contained provisions which could be used for the compulsory segregation of all Asiatics in certain areas Indian opinion was deeply agitated over the prospect of this legislation which it was apprehended might in the existing state of public opinion in South Africa result in the economic ruin of a large number of Indian traders in the Union In response to the vigorous protests made by the Government of India the Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements of resident Indians The Government of India whilst welcoming the assurance were unable to rest satisfied with this position and made every effort to persuade the Union Government to abandon the project For the moment they have succeeded, as in consequence of the unexpected dissolution of the South African Parliament the bill has lapsed

In Natal an Ordinance was introduced in the Provincial Council in 1921 dealing with the township franchise to the detriment of the Indian community It was again introduced in 1922 and in a modified form in 1923 but in each instance the Union Government withheld its approval In 1923, the Union Government itself introduced a measure entitled "The Class Areas Bill," containing provisions which could be used in urban areas for the compulsory segregation of Asiatics Indian opinion was deeply exercised over the prospects of this legislation, despite the assurance of the Union Government that it desired to apply the measure in a spirit of fairness to the interests and reasonable requirements of Indian residents But in consequence of the unexpected dissolution of the South African House of Assembly in April, 1924, the Bill lapsed Towards the end of December 1924, news was received that the Government of South Africa had given its consent to the Natal Borough Ordinance This measure while safeguarding the rights of Indians already on the electoral roll of Boroughs, prevents further enrolment of Indians as burgesses Similarly the Natal Township Franchise Ordinance (No 3 of 1925) was passed to or to render Indians ineligible for Township Franchise in future Further, towards the end of January 1925, news was received that the Union Government had gazetted a Bill to amend the Mines and Works Act in order to take powers to refuse certificates of competency to natives or Asiatics in certain

occupations The Government of India made suitable representations in the matter to the Union Government and the Select Committee to which the measure was referred altered its wording so as not to refer to Asiatics and natives directly The Bill as amended by the Select Committee was passed by the Union Assembly but rejected by the Senate In January 1926 it was reintroduced and in May it was adopted in a joint Session of the Senate and the Assembly by eighty-three votes to sixty seven In reply to representations made by the Government of India they were informed that there was no present intention on the part of the Union Government of extending regulations beyond the position as it existed prior to the judgment of the Transvaal Provincial Division of the Supreme Court in the case *Rex versus Hildick Smith* when it was held that certain regulations with reference to mines and works which have actually been in force in the Union of South Africa since 1911 and in certain provinces for many years before that date were not valid under sections of the Act in terms of which they were promulgated The Government of India were assured that should any such extension of the scope of these regulations be contemplated in future every reasonable opportunity will be given to all the parties in the Union interested in the matter to make representations

In July 1925, a more comprehensive Bill, known as the Areas Reservation and Immigration and Registration (Further Provision) Bill, was introduced in the Union Assembly The Government of India made effective representations against the provisions of this Bill both on grounds of principle as well as of detail

Deputation to S Africa

Towards the end of November 1925, the Government of India, with the concurrence of the Government of South Africa, sent a deputation to South Africa, the personnel of which was as follows —

G F Paddison, Esq, CSI, IOS, Commissioner of Labour, Madras—*Leader*

Hon'ble Syed Raza Ali, MLC—*Member*

Sir Deva Prasad Sarvadhikary, Kt, CIE—*Member*

G S Bajpai, Esq, CBE, IOS—*Secretary*

The main purpose of the deputation was to collect as soon as possible first-hand information regarding the economic condition and general position of the resident Indian community in South Africa and to form an appreciation of the wishes and requirements of the Indian community in South Africa This deputation was followed by a return visit to India of a Parliamentary deputation from the Union Government of which the following were members —

The Hon'ble F W Beyers, Minister of Mines and Industries, Patrick Duncan, KC, CMG Messrs A C Fordom, J S Marwick, G Reyburn, O S Vermooten, W H Rood, and J R Hartshorne As a result of the investigations of these deputations, the Government of India and

as the Liquor Bill, clause 104 of which purported to prohibit the employment of Indians on any licensed premises—hotels, clubs, breweries, etc. The appearance of this clause, which threatened the livelihood of 3,000 Indians engaged in such occupations, caused consternation among them and the Minister in charge decided to withdraw the clause from the scope of the Bill.

Much of the credit for the salutary measure referred to and the spirit of friendliness which they denote were due to the Right Hon'ble Mr Sastri, the Agent of the Government of India in South Africa, whose tact and honesty earned for him the confidence of the European community, official and non-official alike and an increasing measure of their sympathy and assistance in furtherance of the Indian cause. Gratifying response was made by the Indians to this appeal for £20,000 for the purpose of opening a combined Teachers' Training and High school in Durban. The institution which meets an urgent need for Indians in the Union of South Africa was opened on October 14th, 1922, by His Excellency the Earl of Athlone, Governor General of South Africa. It is known as the Sastri College and has on its staff six fully qualified Indian teachers recruited in India.

In India the Government of India have appointed officers to look after repatriates and their personal property immediately upon their return from South Africa, to arrange for their despatch to their homes and, if possible, to find them employment for which they may be suited.

Early in 1929, the Rt Hon V S Srinivasa Sastri retired on the expiration of his period of appointment, and Sir Kurma Venkata Reddi, Kt, was chosen as his successor. In December 1929, sudden and serious illness compelled Sir Kurma Reddi to return to India on sick leave. During the time he has held his post, Sir Kurma has amply justified his selection to this important office.

Early in February 1930 the Government of the Union of South Africa set up a Select Committee of the House of the Assembly to enquire into certain questions relating to the right of Indians to occupy and own fixed property in the Transvaal and to propose such legislation to the House as it might deem fit. This decision was the result of a number of recent judicial judgments bearing upon the occupation of premises on proclaimed grounds in the Transvaal by persons belonging to the native races of Asia and to the wide-spread belief that the intentions of the Union Parliament as indicated in Act 37 of 1919 which purported to prohibit the acquisition of immovable property by Asiatics subsequent to its coming into operation were being systematically defeated. As the labours of the Committee were likely to affect important Indian interests, and as Sir Kurma Reddi was on leave in India the Government of India deputed Mr J D Tyson, ICS, to make suitable representations to the Committee for safeguarding legitimate Indian interests and to give the Indian community in the Transvaal such assistance as it might need for placing its views before the Committee. The Committee's conclusions which were embodied in a Bill and its Report were placed on the table of the Legislative Assembly of the Union on the 13th May and the Bill prepared by them was

read in the House for the first time on the 14th of that month. As soon as copies of the Bill and the Select Committee's Report reached the Government of India, they made pressing representations to the Government of the Union to allow adequate time for careful examination of the far-reaching provisions of the measure which the Select Committee had prepared. Their representations were not without effect and the Union Government decided to postpone further consideration of the Bill until the next session of the Union Parliament early in 1931.

The bill did not, however, come up before the Union Parliament in 1931, as the Union Government agreed to postpone it further until after the conference between their representatives and the representatives of the Government of India in connection with the revision of the Cape Town Agreement of 1927. This Conference was held at Cape Town in January-February 1932. The Government of India delegation was led by the Honourable Sir Fazl-i-Husain, the other members being the Rt Honourable V S Srinivasa Sastri, Sir Geoffrey Corbett, Sir Percy Lindsay, Mrs Sarojini Naidu, Mr G S Bajpai, and Sir K V Reddi.

(2) **Kenya Colony**—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points—

(a) **FRANCHISE**—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis *plus* an educational test, without racial discrimination for all British subjects.

(b) **SEGREGATION**—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable, secondly, that it was commercially inconvenient, and thirdly, that Indians are in practice unfairly treated in the allocation of sites.

(c) **THE HIGHLANDS**—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now, however, been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(d) **IMMIGRATION**—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

THE SETTLEMENT—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in light of this it was decided—

(a) **FRANCHISE**—A communal franchise was adopted with 11 seats for elected Europeans, 5

House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, viz., an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January, 1927.

In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

The announcement excited serious apprehensions in India with regard to the future position of Indians in those Colonies. A deputation drawn mainly from both houses of the Indian Legislature also waited on His Excellency the Viceroy on the 17th September 1927, and represented the position of Indians in East Africa. One of the suggestions made by the deputation was that permission may be given for a small deputation appointed by the Government of India to go over to East Africa in order—

- (a) to make a general survey of these territories in relation to Indian interests therein and
- (b) to help the resident Indian community in preparing their evidence for the Commission.

The Government of India readily accepted this suggestion and, with the approval of His Majesty's Government, sent Kunwar Maharaj Singh, C.I.E. and Mr R. B. Ewbank, C.I.E., I.C.S., to East Africa. These officers visited Kenya, Uganda, Zanzibar and Tanganyika and their services are understood to have been greatly appreciated by the resident Indian communities. The personnel of the Commission was announced by the Secretary of State for the Colonies on November 14th, 1927, and was as follows—The Right Hon'ble Sir Edward Hilton-Young, P.C., G.B.E., D.S.O., D.S.C., M.P. (*Chairman*), Sir Reginald Mant, K.C.I.E., C.S.I., Sir George Schuster, K.C.M.G., C.B.E., M.C., and Mr G. H. Oldham, *Members*, with Mr H. F. Downie, (*Secretary*). The Commission left England on December 22nd, 1927, and travelled via the Nile to Uganda, and thence to Kenya, Tanganyika,

Zanzibar, Nyasaland, and Northern Rhodesia, visiting the chief centres and hearing the views of representatives of different sections of the community. The Commission also visited Salisbury for the purpose of conferring with the Government of Southern Rhodesia. The report of the Commission was published on the 18th January 1929.

It was examined by the Government of India in consultation with the Standing Emigration Committee of the Indian Legislature and with prominent representatives of all parties in the Legislative Assembly, who were not members of the Committee. The tentative conclusions reached by Government on the main recommendations in the Report were set out in a telegram to the Secretary of State for India of the 19th March 1929, which was published in India in September 1929.

In March 1929, the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

Mr Sastri left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

- (a) press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike,
- (b) invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll,
- (c) oppose the grant of responsible government to Kenya or of any institutions leading up to it,
- (d) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson,
- (e) demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians,
- (f) advocate the continuance of the official majority in the Legislative Council of Kenya,

The Government of India have been asked to consider the possibility of sending a delegation to the Indian Councils in London, to discuss the position of Indians in the Colonies.

The Government of India have been asked to consider the possibility of sending a delegation to the Indian Councils in London, to discuss the position of Indians in the Colonies.

The Government of India have been asked to consider the possibility of sending a delegation to the Indian Councils in London, to discuss the position of Indians in the Colonies.

The conclusion of His Majesty's Government in the White Paper on India in 1920 in the form of a White Paper, and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with the decision a Select Committee was set up in November 1920. The Government of India communicated their views in a despatch to the Secretary of State for India on the 10th December 1920 in the White Paper in so far as it related to the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Hon. Mr. A. S. Srinivasa Sastri, P.C., C.I.E., their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1921.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1921. The decision of His Majesty's Government on the recommendations of the Committee are awaited.

During the year 1927 another matter which engaged Government and the public in India was the report of the Local Government Commission which was appointed by the Governor of Kenya in July 1926 to make recommendations as to the establishment or extension of local Government for certain areas in the Colony. The report of the Commission was submitted to the Governor of Kenya in February 1927. The recommendations made were numerous and so far as Indians were concerned they involved a decrease in the proportion of Indian representation on the local bodies at Nairobi and Mombasa and the creation of an European elected majority in both places. This caused resentment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's Secretary of State for India on the subject.

In 1928 the Local Government (Municipalities) Ordinance was passed. This amended the law relating to Municipal Govt. in Kenya to provide for the nomination of 7 unofficial Indian Members as against 10 European Members to be elected in Nairobi and for the nomination to the Municipal Board of Members of an equal number of European and Indian Members, viz., 7.

(3) Fiji and British Guiana.—Emigration to Fiji was stopped in 1917, under Rule 16 (b) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Government cancelled all outstanding 'Last Indian' from 2nd 7, and also

their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that 'the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji.' In July 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members Messrs Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan, did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute, while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The

Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

In February 1920, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 4th November 1920, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and these have remained unfilled, no Indian having hitherto offered himself for election.

British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr J. J. Nunan, Attorney-General, and Mr J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs Pillai, Keatinge and Tivary visited British Guiana. Mr Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay, Diwan Bahadur P. Kesava Pillai, was an elected member of the Madras Legislative Council of which he was also Vice-President, and Mr Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matter. Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September 1925. His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonisation scheme has not yet come into operation as the Colonial Government are not

In a position at present to afford the cost which it involves.

In March 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The Government of India consulted in the matter the Standing Emigration Committee of the Indian Legislature and are now watching events.

(4) Other Parts of the Empire.—The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony. In Ceylon, Mauritius, and Malaya, the position of Indians has on the whole been satisfactory, and the matters have gone smoothly. The Government of India have now appointed their own Agents in Ceylon and Malaya. The question of the fixation of a standard minimum wage for Indian Estate labourers in Ceylon and Malaya has been the subject of negotiations between the Govt. of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922. So far as Ceylon is concerned a settlement satisfactory to the Govt. of India and that of Ceylon has been arrived at, i.e., the standard wage and other outstanding questions affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as "Indian Labour Ordinance No. 27 of 1927". The Standard Rates of Wages agreed upon were introduced with effect from the 1st January 1929. In 1931, however, it was decided with the concurrence of the Government of India to reduce these wages by 5 cents for men, 4 cents for women and 3 cents for children by way of readjustment owing to the price of rice issued from estates being fixed at Rs. 4.80 instead of Rs. 0.40 per bushel. In regard to Malaya, Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas and the question of their extension to the rest of Malaya is engaging attention.

The rates so fixed were, however, reduced by 20 per cent. with effect from the 5th October 1930 owing to acute depression in the rubber trade. The position is being watched by the Government of India and it is hoped that the rates originally agreed upon will be restored as soon as the present crisis has passed.

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an Officer for the purpose and to give him all

facilities, and in December, 1924, an Indian Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry.

Kunwar Maharaj Singh's report was published by the Government of India in August 1925. The various recommendations made in the report have been commended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, viz., that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the island, the Colonial Govt. expressed their willingness to give effect to several of them.

The present position of Indians in the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia, sub-section (5) of section 30 of the Commonwealth Electoral Act, 1918-24, was amended in 1925, by adding after the word "Asia" the words, "except British India". This means it gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr. Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia, the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It is, therefore, in Western Australia alone that Indians do not enjoy the suffrage in respect of election for the Lower House. By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 45 years of age, or above 60 years, provided such persons are of good character and have resided continuously for at least 20 years. An Invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government.

Indians in Great Britain.

Some seventy years have gone by since the Parsee community, in the persons of the late Dacabhai Naoroji and other members of the firm of Cama & Co., led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained, though there are both Hindu and Mahomedan business men firmly established there. Nor are the professions unrepresented, for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 four Indians—the late Mr Ameer Ali, the first Lord Sinha, the late Sir Binode Mitter and Sir Dinsha Mulla—have served on the Judicial Committee of the Privy Council. Three Indians are on the Secretary of State's Council. In 1919, the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government. In the spring of 1923 Mr (now Sir) Dadiba Dalal was appointed High Commissioner for India being the first Indian to hold the office. He resigned towards the end of 1924 to be succeeded by Sir Atul Chatterjee, who in 1931 was followed by Sir B. N. Mitra. The early years of the present century saw the gathering of a new Indian element in permanent residence—that of retired officials and business men or people of independent means who from preference or in order to have their children educated in England, leave the land of their birth and seldom if ever visit it again. Further the stream of Indian summer visitors includes wealthy people who come regularly. Sectionally, the only Indian community to be fully organised is that of the Parsis. They have an incorporated and well-endowed Parsi Association of Europe. Its centre Zoroastrian House, 11, Russell Road, West Kensington, opened in 1929, includes a room devoted to ritual and ceremonial purposes, a reading room and library, and rooms for social intercourse. The Arya Bhavan, a home for orthodox Hindus visiting London was opened at 30, Belsize Park, Hampstead, in the summer of 1928. Indian business interests have been organised by the formation of the Indian Chamber of Commerce in London, with Offices at 53, New Broad Street, E.C. 2. The East India Association (3 Victoria Street S.W. 1) established in 1867, provides a non-partisan platform for the discussion of Indian problems, and exists "to promote the welfare of the inhabitants of India." The British Indian Union, (8 Grosvenor Gardens, S.W. 1) under the presidency of H. R. H. the Duke of Connaught and with Lord Reading as Chairman, is a social agency for promoting friendship and understanding between the people of Great Britain and India.

India House

In March, 1930, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Aldwych, erected and furnished at a cost of £324,000. The design

of this noble building, which has a frontage of about 130 ft opposite the Waldorf Hotel, was the work of Sir Herbert Baker, A.R.A., with Dr Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry, and symbolism an individuality that proclaims it the London house of India. Including basement and mezzanine floors, there are twelve floors in all, the available space for clerical work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase, exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone, carved and pierced in the geometrical patterns of the *jali* in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble. The use throughout of Indian hardwoods, chiefly gurgan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non-Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver gray, koko, laurel and the beautiful dark red padouk have been used. The domes and vaults of the building have been embellished by mural paintings, the work of specially selected Indian artists. The water supply is entirely independent of municipal service, being obtained from two artesian wells sunk some 460 ft below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which is at the depot off the Thames at Belvedere Road, Lambeth.

The Students

Under normal conditions it is the student community which constitutes the greatly preponderating element and creates an Indian problem. Its numbers multiplied ten or twelve-fold in the quarter of a century before the war. After a very considerable temporary check

caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or undergraduate student, there are some youths of good family, including heirs of Indian States admitted into our public schools such as Eton and Harrow. There are over 300 Indians at the Inns of Court. Since the war there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there are fully 2,000 young Indians (some five per cent of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London alone absorbs about half the total.

The Advisers

It is well known that until a few years ago the young Indian apart from inadequately supported unofficial effort and the chance of coming under the influence of English friends of their families, were practically left to their own devices. But in April 1909 Lord Morley, created for their benefit a Bureau of Information and appointed the late Sir Thomas Arnold to the charge of it under the title of Educational Adviser. The Bureau was located at 21, Cromwell-road, together with the National Indian Association and the Northbrook Society, which were thus given spacious quarters for their social work among the young men in India the provincial advisory committee to help and advise intending students have been replaced in some instances by University Committees. The work of the Bureau rapidly expanded, and in consequence Lord Crewe in 1912 re-organised the arrangements under the general charge of a Secretary for Indian students, Mr (now Sir) C. E. Mallet who resigned at the close of 1916. He was succeeded by Dr Arnold under the designation of Educational Adviser for Indian Students to the Secretary of State. Mr N. C. Sen followed Sir T. Arnold as Local Adviser in London. At Oxford the Oriental Delegation, and at Cambridge the Inter-Collegiate Committee have been instituted to deal with Oriental students generally, whilst Local Advisers for Indian students have been appointed at Manchester, Edinburgh and Glasgow.

These arrangements underwent far reaching revision in the autumn of 1920 in connection with the setting up, under the Act of the previous year of a High Commissionership for India in the United Kingdom. The "agency work" Sir William Meyer took over from the Secretary of State included that connected with Indian students. Sir Thomas Arnold accepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr N. C. Sen and Dr Thomas Quayle as Joint Secretaries for the Education Department. The administrative work hitherto divided between the India Office and 21, Cromwell Road was consolidated at the offices of the High Commissioner, thereby obviating a good deal of duplication of files and papers. Dr Quayle is now Secretary in the Education Department of the Office of the High Commissioner and his colleague is Mr P. K. Dutt.

The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrangements had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar. The Committee held that it should be possible to secure admission both to British universities and, subject to certain reservations to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamberlain recommended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the Inns of Court. An Act for the purpose was passed by the Indian Legislature in 1926.

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly the High Commissioner held a conference in July 1925, when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London. The subject had been previously discussed at a meeting of the East India Association (April 27, 1925) when a paper was read by Mr F. H. Brown. The conference came to the conclusion that, since non-official effort admittedly does not meet the need fully the hostel and club at 21, Cromwell-Road, should be maintained, more particularly to provide accommodation for newcomers. A small committee with Mr A. D. Bonarjee (Warden of 21, Cromwell Road) as Secretary was established to assist students in obtaining suitable accommodation. The increasing number of students coming from Indian States raises the question whether the time has not come for provision to be made for them on lines similar to those adopted by the Education Department of the Office of the High Commissioner. The Mysore State opened in 1929 an agency office at Grand Buildings, Trafalgar Square, and appointed a permanent Trade Commissioner.

Under the presidency of Lord Hawke an Indian Gymkhana Club in 1921 acquired its own sports ground at Osterley, the total cost of purchase and equipment being estimated at £15,000. Generous gifts were

made by some Ruling Princes and others, particularly the Maharaja of Patiala, but further help is required. The cricket eleven of the Club has an excellent record in matches at Lords and the Oval and with suburban clubs.

A notable development of 1920 was the opening of the "Red Triangle" Shakespeare Hut in Bloomsbury, off Gower Street, as a union and hostel for Indian and Ceylonese students up to the number of 500. The hostel was removed to permanent premises 106-112, Gower-Street, close to University College in the autumn of 1923. It is Indian both in conception and control, the warden and committee being responsible not to the National Council of Y M C A in London but to the Indian National Council in Calcutta.

While the organization has a definitely moral and spiritual as well as a social purpose, it is not a proselytising agency. There is a steady average of some 550 members and the hostel is exceptionally fortunate in securing the voluntary services of men and women of great distinction in many fields for the regular Sunday afternoon and other lectures. The Indian Students Central Association has a Club house and restaurant at 2 Beauford-Gardens, S W 3.

There has been some recent development in the matter of periodical literature devoted to India. A monthly entitled "India" pays special attention to the social side of British life in India and there is the weekly *New East and India*. There are various political organisations connected with India.

SOCIETIES AND INSTITUTIONS IN LONDON CONNECTED WITH INDIA

BRITISH INDIAN UNION—Promotes friendship and understanding between the two races 8, Grosvenor Gardens, S W 1 *Secretary* Major T Moss

CENTRAL ASIAN SOCIETY—77, Grosvenor Street, W 1 *Hon Secretaries* Major-General Sir William Beynon, K C.I.E., Colonel H Stevens

EAST INDIA ASSOCIATION—To promote the welfare of the inhabitants of India, chiefly by lectures and discussions 3, Victoria Street, S W 1, *Hon Secretary* F H Brown, C.I.E.

INDIA SOCIETY—The study of the arts and letters of India, 3, Victoria Street, S W 1 *Hon Secretary* F J P Richter, M.A.

INDIAN STUDENTS UNION AND HOSTEL—112, Gower Street, W C 1 *Chairman* Dr Edwyn Bevan

INDIAN STUDENTS CENTRAL ASSOCIATION—2, Beauford-Gardens, S W 3—A Club house and restaurant independent of outside support

INDIAN CHAMBER OF COMMERCE IN GREAT BRITAIN—85, Gracechurch Street, E C 3 *Secretary* A H Maru

INDO-BRITISH MUTUAL WELFARE LEAGUE—*Joint Hon Secretaries* Mrs Hannah Sen and Mrs C Hegler (53, Elsworthy Road, N W 3)

INDIAN GYMKHANA CLUB—Thornbury Avenue, Osterley. To promote the physical well-being of Indian students *Secretary* Captain

W R B Berry, 10, King's Bench Wall Temple, E C 4

NATIONAL INDIAN ASSOCIATION—Chief aims to promote the welfare of students 21, Cromwell Road, S W 7 *Secretary* Miss E J Beck

NORTHBROOK SOCIETY—Makes grants to deserving Indian students 21, Cromwell Road, S W 7 *Hon Secretary* E Oliver

ROYAL ASIATIC SOCIETY—Research in the history and antiquities of Asia 74, Grosvenor Street, W 1 *Secretary* Col D. M. F Hoysted, C.B.E., D.S.O.

ROYAL EMPIRE SOCIETY—Formerly Royal Colonial Institute Northumberland Avenue, W C 2 *Secretary* George Plicher

ROYAL SOCIETY OF ARTS—has an Indian section before which lectures are delivered, on industrial, historical and commercial questions, 18, John Street, Adelphi W C 2 *Secretary* G K. Menzies, C.M.G., M.A.

ROYAL INSTITUTE OF INTERNATIONAL AFFAIRS, Chatham House, 10, St James's Square, S W 1 *Secretary* Commander Stephen, King Hall.

PARSEE ASSOCIATION OF EUROPE—London Zoroastrian House, 11, Russell Road, Olympia, W. 14

STUDENT CHRISTIAN MOVEMENT OF GREAT BRITAIN AND IRELAND—*Secretary* R C Mackie, Annandale, North End Road, Golders Green, N W 11

VICTORIA LEAGUE—81, Cromwell Road, S W 7 *Secretary* Miss Gertrude Drayton, C.B.E.

Sport

As was the case in 1930, sport suffered through the political troubles which were prevalent throughout the year but it managed to keep its flag flying. **Cricket** perhaps was the sport which suffered most and for the second year in succession, the famous Quadrangular tournament in Bombay had to be postponed, through the Hindus refusing to participate. This was a great pity as this tournament would have been valuable to the selection committee of the Indian Board of Cricket Control, which had to select the Indian team to go to England in 1932. This committee, however, kept in close touch with local tournaments all over the country and by the end of the year had formed an estimate of the form of over fifty players likely to make the journey and had ear-marked them for trials later on.

Cricket and tennis are the two games which Indians play best as, despite the fact that Indians won the Olympic Games Hockey championship in 1928, the best hockey players in India are the Anglo-Indian and the Indian born European, though the game is largely played by Indians, and the Muslims of the Punjab being very keen and able players. Though the Bombay cricket tournament did not take place the other centres held their Quadrangular cricket tournaments as usual, but even these were affected by the political situation. These games were played at Nagpur, Lahore, Secunderabad and Karachi.

The visit of the English tennis team, who were in India in the early part of the year, gave tennis a big fillip, and the contact Indian players had with these English stars undoubtedly did a lot towards improving their game. In the International match, Great Britain beat India by five matches to two but the Indian players put up a very fine performance.

Towards the end of the year another International team visited India, Japan sending a team consisting of Satoh, Miki, Fujikurajiro and Kawachi and these also proved too good for India's best players. The seventeen year old Fujikurajiro amazed all by his wonderful play and he even beat his own captain, Satoh, in the singles at Calcutta. India is indebted to the South Club, for the visits of these International teams, and this club hopes to arrange for next year, a visit from a representative American tennis team. This contact will undoubtedly improve Indian tennis and it ought not to be long before India takes her place among the foremost tennis playing nations of the world.

Hockey continued to be as popular as ever and additional interest was given to the various tournaments by the fact that in 1932 India was to send a team to Los Angeles to defend her title of hockey champions of the world. The Bombay and Calcutta Customs stood out as the best sides of the year, the two premier tournaments, the Aga Khan Cup in Bombay and the Beighton Cup in Calcutta, being won by them. There is no doubt that these two sides contain the pick of India's hockey talent, and further honours are bound to be their lot in 1932.

Association Football continues to be the principal game of the European and the Army in India and the principal tournaments the I F A Shield in Calcutta, the Durand Cup in Simla and the Rovers Cup in Bombay create wide interest. The Indians in Bengal are taking to the game in increasing numbers and one

or two purely Indian teams can hold their own against the pick of the Military sides, which are the strongest in the country. The attendances at the matches in these tournaments are large, especially in Calcutta, where the Indian has become a keen follower of the game, and what is more thoroughly understands it.

The game is governed by the India Football Association in Bengal and the Western India Football Association in Western India, the two chief centres of the game, and attempts are being made to form other ruling bodies for the North and South of India.

Rugby Football is confined to Europeans and generally to those who have come to India from Great Britain and the usual tournaments were again well supported. Rugby is a game which has only a short season, during the monsoon, but Bombay, Calcutta and Madras run successful tournaments. The Welch Regiment won the All-India Championship which in 1931 was played in Calcutta. The Prince of Wales Volunteers and the Bombay Gymkhana were other successful fiftens.

Golf is played everywhere, sometimes on improvised courses, like that of the Royal Bombay Club, but there are one or two sporting courses in the country, at Calcutta and Nasik, especially, while Gulmarg in Kashmir, has what is undoubtedly the best in the East.

Boxing is booming, especially amateur boxing in Western India where the Bombay Presidency Amateur Boxing Federation is doing very good work in fostering the sport. The Army naturally figures largely in amateur boxing circles in India and this is a sport which is as well controlled as any other in the country. Bengal now has a governing body for boxing and steps are being taken to provide one for the Punjab and Northern India. The tournaments at Mussorie and Lahore are well supported. The Military championships are held at Rawalpindi.

Yachting flourishes in Bombay and Naini Tal, Poona and Calcutta hold regattas during the year. Of rowing there is little but enthusiasts generally manage to organise a race or two in Bombay, Poona, Calcutta and Naini Tal.

Athletics are in a bad way. There is an Olympic Council but it is one in name only. Athletics receive practically no encouragement at all and there is hardly a meeting in India worth calling the name. Calcutta, Madras and Lahore usually have one sports meeting a year, but apart from these, the budding runner, jumper or field sportsman, has little inducement to keep in training. Expert coaches are badly needed, there is not a cinder track in the country and though India possesses one or two sprinters of merit her athletes generally are a long way behind those of Europe. The Olympic Council is handicapped by lack of funds which explains largely their comparative inactivity.

The Turf.—Notwithstanding the general trade depression the Turf Clubs in India more than held their own and excellent sport was provided at all the popular venues. With the previous year's champion Star of Italy out of action, Tel Asur accounted for the King Emperor's Cup at Calcutta before coming over to Bombay to participate in the Western India classics of 1932. A feature of the year was the increased encouragement given to Indian-bred horses. A summary of the chief sporting events of the year is given in the following pages.

Racing

Bangalore

Travancore Cup Distance 7 furlongs —

Mr S C Ghosh's Wise Kiss (8st 3 lbs), Howell 1

Mr P C Barna's Aditibi (7st 7lbs), Alford 2

The Raja of Ramnad's Pamela Mary (7st 9lbs), H McQuade 3

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. If there is a discrepancy, a problem is identified.

1. The first of these is the fact that the

ELLERMAN'S CITY LINE: ELLERMAN'S HALL LINE: ELLERMAN & BUCKNALL STEAMSHIP CO., LTD.

A... I have contributed to the develop-
ment of the line, there is none with a
which I under the Ellerman flag

... when I joined the Board of
... in the Mediterranean
... to Mr. John Bibby, ship
... On the death of Frederick Ley
... after its incorporation
... become connected with the
... A short time later he became
... company was not only continued

... I P. Morgan's recent bid to secure
... In connection he acquired the
... but in view of the fact that
... the Atlantic Sir John Ellerman did not
... the business of the Leyland Line

"City of London" built in 1865

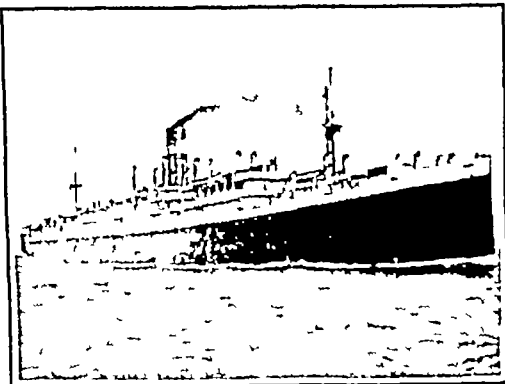

... Sir John Ellerman was able considerably to strengthen his hold on the
... the North Atlantic and with the acquisition, shortly afterwards
... the Western Ocean Line, he found himself controlling the most important fleet
... in the water, and thus acquired a commanding position in the trade
... of the Mediterranean and Near East

A statement in the contract of sale by which J. P. Morgan took over the Leyland
... stated that Sir John Ellerman was not directly to take part in the North Atlantic
... for a limited number of years. With the Mediterranean fleet of the Leyland Line
... and the fleet of the P&O Line under his control, he cast about for an opportunity
... the sphere of his activities. The Western Ocean was closed to him; his eyes
... naturally turned eastwards.

The 'CITY' Line was the first Company with interests in India which was acquired by
... Sir John Ellerman. The purchase of the 'CITY' Line was closely followed by that of
... the 'HALL' Line and later on the 'BUCKNALL' Line. These Companies were
... acquired in chronological order, both in respect of the age of the Companies themselves
... and of their connection with India.

THE 'CITY' LINE.—The 'CITY' Line had its origin in Glasgow in the late 'thirties
... when George Smith & Sons, the founders of the Line, acquired their first sailing ship.
... This vessel the "CONSTELLATION" was despatched to Calcutta early in 1840 and it

was the first voyage of this little ship which inaugurated the connection of the firm with the Calcutta trade in which their vessels with the passing of years were to secure a reputation second to none among the Liners trading with the East. The launch of the '**CITY OF GLASGOW**' in 1848 marked the adoption of that style of nomenclature from which the line was eventually to derive the title which it bears to day. The Smiths, it is interesting to note, began their ship-owning career as merchant shipowners, and it was only gradually that they came to realise the evolution through which the industry was passing. It was some years after their first venture in shipping that they decided to separate their shipping from their other commercial undertakings, but once they had made up their minds to devote themselves to shipowning, they rapidly gained a brilliant and honoured position in the Eastern trade. They took full advantage of the improvement and innovations introduced by naval architects after the reform of the tonnage laws and by the early 'sixties possessed a fleet of ships able to hold their own with, and even to outstrip, any ships afloat.

"City of Paris"

It is a remarkable fact that the performance of contemporary '**CITY**' Liners compare most favourably with those of the China clippers whose names are household words even to-day when their once proud and stately hulls are sunk below the seas or pitifully dragging their careers to an inglorious close under assumed names and foreign flags. The '**CITY OF MADRID**' during a voyage to Australia was in company for one day with the incomparable '**THERMOPLÆ**' and actually covered three hundred and forty nine sea miles in twenty-four hours, whilst her redoubted rival accomplished three hundred and thirty seven. In the same year the '**CITY OF GLASGOW**' achieved a yet more remarkable performance. In company with the '**THERMOPLÆ**' she made a day's run at an average speed of fifteen and a half knots, logging three hundred and seventy-two sea miles in twenty-four hours and beating the famous China racer by twenty four sea miles.

We can thus well understand how the ship of the '**CITY**' Line enabled their owners to secure that premier position in the Calcutta trade which they have retained to this day. The managers of the '**CITY**' Line fully appreciated the revolution in shipping which was to follow the opening of the Suez Canal, and when the opening of the Canal to general traffic was imminent they had already contracted for the building of a steamship. The first '**CITY**' steamer, the '**CITY OF OXFORD**', bound for Calcutta passed through the Canal very shortly after it was opened, to be followed by two sister ships, the '**CITY OF CAMBRIDGE**' and the '**CITY OF POONAH**'. The reliability and performance of these early steamers so amply justified the confidence of their Owners and so fully demonstrated the advantages of the new route that the decision was quickly reached definitely to abandon sail for steam.

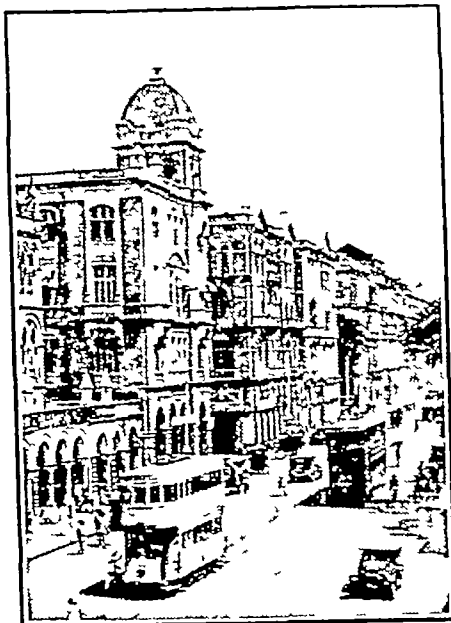

The principal trade of the '**CITY**' Line was, and still is, between Glasgow or Liverpool and Calcutta, although it has made an honourable name for itself, particularly with passengers, in the Bombay trade. In the Calcutta trade of which it was one of the earliest pioneers, the '**CITY**' Line has consolidated and improved the proud position that was won for it in the early 'sixties by the speed and beauty of its clippers and under the guidance of Sir John Ellerman, the great traditions of the Line have been maintained and enhanced.

THE 'HALL' LINE.—Very shortly after Sir John Ellerman had completed the purchase of the '**CITY**' Line he opened negotiations with Robert Alexander & Co for the purchase of the '**HALL**' Line. The Sun Shipping Company, afterwards to become known as the '**HALL**' Line, was founded in the early 'sixties. The firm owed its inception to the enterprise of two men, Robert Alexander and Liston Young, who under the style of Alexander and Young managed the ships registered in the name of the Sun Shipping Company. The Company built a number of sailing ships which were employed in trades where speed was not of capital importance and never acquired reputations comparable with those of their '**CITY**' Line sisters. When the Company went in for steam a regular service to Bombay and Karachi was inaugurated with the first voyage of the '**CITY OF BALTIMORE**' to Bombay. For a number of years the '**HALL**' Line maintained a regular and successful

THE HOUSE *of* GIBBON

ESTABLISHED in 1901 as Exporters of all ferrous and non-ferrous metals, hardware, sugar, sundry goods, etc, to India and Burmah, specializing in Galvanised Corrugated and Plain Sheets, Copper and Yellow Metal Sheets, etc Their proprietary brands of

"Single Khela",
"Pineapple" and
"Winged Wheel" are known throughout the whole of India Messrs GIBBON & Co have during their long years of co-operation with Indian Merchants built up an enviable reputation for integrity and efficiency.

CALLENDER'S CABLE & CONSTRUCTION CO. LTD.

*Sir T O Callender J P, M I E E
(Deputy Chairman and Managing Director)*

CALLENDER'S CABLE AND CONSTRUCTION CO LTD has been in the forefront of the Electrical Industry since 1882 when that Industry, as we now know it, came into being. The Company has never been content simply to meet the ordinary demand for Cables, but has expended large sums on research and experiment, and many of the recent developments in Electrical Distribution are the outcome of its pioneer work. At a time when few manufacturers considered it necessary to spend money on the possible requirements of the distant future, the Callenders were carrying on costly experiments and had installed a well equipped Electrical Research Department with a staff trained for this purpose.

Callender's interest in modern Electrical Engineering began in 1881 when a patent was granted to the late Mr W O Callender, the founder of the business, for the

material since widely used as a Cable insulator and known as Vulcanised Bitumen.

In 1882 Callender's Bitumen Telegraph and Waterproof Co Ltd was formed, and much of the early work in Underground Mains in Great Britain was carried out by that Company. Its operations had increased to such an extent that in 1896 it had outgrown the financial and mechanical resources of the original Company, and in that year (1896) the present Company (Callender's Cable and Construction Co Ltd) was formed to take over the existing business and to extend it on the larger and broader lines then required by the rapidly expanding industry. From small beginnings business has increased until the Company is now an enterprise in which over £2,000,000 is invested in Shares and Debentures.

Callender's have limited their operations chiefly to the business for which the Company was incorporated, viz, the manufacture of Insulated Cables and Wires, coupled with their laying and erection to provide complete networks of mains for the distribution of the energy generated at the Central Station, to the fuseboard of consumers, and subsequently to supply the wires necessary within consumers' buildings.

Underground mains and distribution appliances form the chief speciality manufactured at the Works at Erith, where heavy Super-Tension Cables are design-

Cable Tunnel under the Thames at Chelsea showing Callender Super-Tension Cables for the new Battersea (London) Power Station

ed and manufactured to carry current at the highest pressures now in use, either for the standard super pressures of 33,000, 55,000, and 66,000 volts, or for Extra High Tension Cables for 6,600 and 11,000 volts, or for Low Tension Feeders and Distributors of all types

At the Anchor Works at Leigh, Lancashire, Rubber Insulated Cables of every description are manufactured, including the House Wiring specialties of the firm, known as the **"KALEECO" AND "KALIBOND" WIRING SYSTEMS**

There are few electricity undertakings in Great Britain whether owned by Municipalities or by private Companies, which do not use Callender Cables, and in many important Cities the entire Underground System has been manufactured by Callender's

Callender's have always been pioneers in opening up overseas markets

In 1904 they commenced operations in the East and opened their own offices in Bombay with a staff specially sent from England able to deal with the

cable business which they were convinced was coming in the East

Their anticipations have been fully realised and the development of electricity has provided them with many contracts of the first importance in India

Among other Cities in which cables have been laid are Bombay, both for supply work, hydro-electric work and the electrification of railways, Calcutta, Madras, Rangoon, Hyderabad, Delhi and in a vast number of smaller towns in the Mofussil

Most important schemes of overhead transmission and distribution have been carried out in the United Provinces, in the Punjab, in Madras, and in the Coalfields of Bengal, while track work in connection with the electrification of railways has provided the Company with important contracts

In the Far East Callender's staffs have laid cables in Singapore, Penang, Hong Kong, Shanghai, Bangkok and in many other places

In South America a large amount of work has been carried out in the Argentine, Brazil and Chile

In Australia, New Zealand and South Africa the Company's connections are very old and well established and the name of Callender is well known throughout all the British Dominions and Crown Colonies

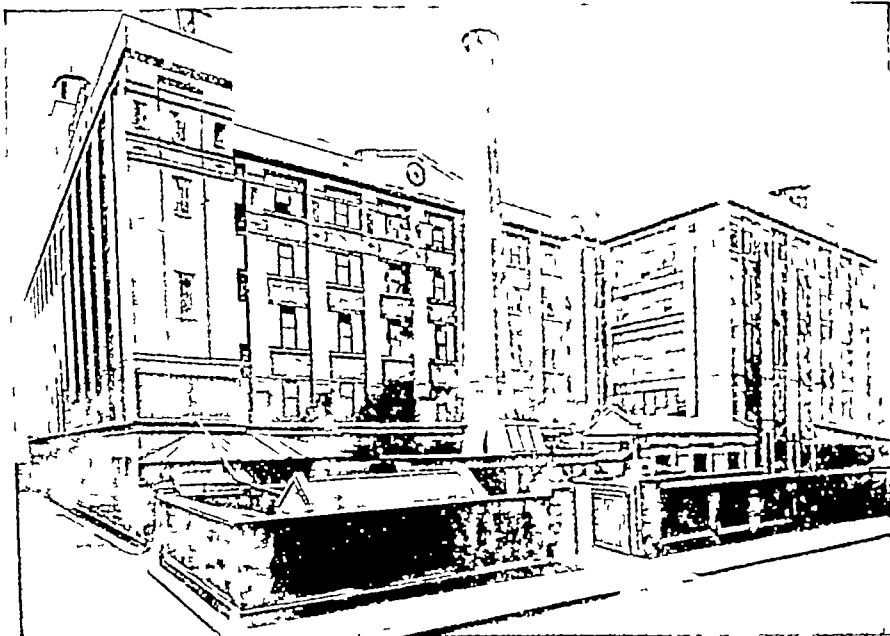

Sir T O Callender (known throughout the Electrical Industry as "Sir Tom") has spent his life in the service of the Company, having been a partner with his father when the original Dielectric Patent was granted in 1881, and for 50 years he has been at the head of the Callender destinies. Although he has widespread interests at Home and Abroad in electrical and kindred undertakings, he maintains his old personal control of the Company's affairs, and is still in close touch with the details of all its branches. He is on the Board of the Lancashire E.P., Yorkshire E.P., Scottish E.P., East African E.P., and Sudan Electric Power Companies, Associated British Manufacturers (Egypt) Ltd., South American Copper Co., Ltd., Thos. Bolton & Sons Ltd.

Thomas De La Rue & Co, Ltd.

A native of Guernsey and a young man of ambition and inventive capacity, Thomas De La Rue came to London in 1817, with a sound knowledge of printing—and infinite confidence. The manufacture of straw hats and embossed paper led, through the card and ornamental paper trade, to the great activities for which the Company is now well known. For a hundred years De La Rue's have been engaged in SECURITY PRINTING and have found loyal customers in Governments and Banks in every Continent. Long standing contracts with the British Post Office, the Government of India, the Crown Colonies, the Bank of England, and many foreign countries—these create a record of which the firm is justly proud.

Letters Patent for the manufacture of Playing Cards were granted to Thomas De La Rue in 1832 and since then their scientific improvements, their designs, changing with the fashion of the day, and the quality of their work, have won for De La Rue's their great name in the card playing world. For fifty years the Company has manufactured Fountain Pens, from the "Anti Stylograph" which was a great advance on the old point writer, to the "ONOTO", an example of modern efficiency. COMMERCIAL PRINTING and especially magazine printing, for which it is particularly well equipped, is another of the Company's important activities.

Their TELEDURON Works produce insulating materials and plastic mouldings for all purposes, and these eminently successful products are becoming increasingly popular in every climate.

Charles Goodall & Son, Ltd

The House of Goodall was founded in 1820 by Charles Goodall who began business as a small manufacturing stationer in a by street off Leicester Square, dealing in all classes of stationery, both commercial and fancy. In about 1835 Charles Goodall started to manufacture Playing Cards and to the development of this side of the business very particular attention was paid between the years 1840 and 1870, until, under the direction of the grandson of Charles Goodall, Josiah Montague Goodall and of his sons, from 1880 to 1920, the House attained a position of unquestioned pre-eminence among the world's makers of Playing Cards. During these years special efforts were directed to the development of trade overseas, with the result that to-day it is true to say that there is no country in the world in which Goodall's is not a household name amongst those who use playing cards.

In 1921 De La Rue's and Goodall's each with a distinguished history of more than a century, were amalgamated and, maintaining the high tradition of each for quality of work and service, they may indeed claim that they play a vital part in the industry of the British Empire, not only for the two thousand people they employ, but for their productions which enhance the prestige of British Manufactures throughout the world.

PRINCIPAL JUTE MILLS OF CALCUTTA.

The Angus Co, Ltd, established in 1913, Proprietors of Angus Jute Works, and Angus Engineering Works, located at Angus P O, Hooghly District, Bengal about 20 miles north of Calcutta

When operating at full capacity the combined works employ staff of about 8000 Indians. Wages paid to Indian staff alone during past 10 year amounted to 17 times the sums received by ordinary Shareholders as dividends or as accretions to Capital. The Company's policy, towards its Indian staff has been to provide so far as possible the best working and living conditions

The majority of labour is housed in quarters provided by the Company. The locality where the works are situated has been improved through the efforts of the Company's medical staff and has been transformed from insanitary bustee and jungle lands to an area where the incidence of malaria has been reduced to nil, small pox is not in existence, the water supply is second to none and health condition generally exceptionally good

The Company's medical staff consists of a European surgeon and four Indian male doctors, a lady doctor and an Indian midwife, compounders, dressers, hospital assistants, malarial squad, school teachers, etc., totalling 51 persons. The report of the Inspector of Factories, Bengal and Assam, submitted to Government in 1929 says —

"The medical relief and attention obtainable by the employees of this Company has no equal in the province, and, it would be safe to say, no superior in any industrial concern in India"

CHOLERA —During 1928 there were no cases of cholera in the Cooly Lines with the exception of one imported from Howrah. Wholesale free inoculation of persons living in our Cooly Lines and of residents of the neighbouring places was carried out

There was a very heavy death rate from cholera in Bengal during 1928, and the value of inoculation was strikingly demonstrated by the absolute freedom from the disease of workers living in the Cooly Lines, while the epidemic was raging in the surrounding villages and on the other side of the Hooghly from Angus

MALARIA —During 1928, apart from a few imported cases, there was no malaria among the employees living in quarters provided by the Company. There were also but few cases in the neighbouring villages under treatment by the Company's anti-malaria squad. Malaria is well under control in the vicinity of Angus, and this may be attributed to the work of the anti-malarial squad, the recurring cost of which is only about Rs 5,000 per year. Coolies trained in anti malarial measures are supplied to any of the neighbouring jute mills who apply for them

The entire production of Jute works are jute cloth and bags of superior quality. The engineering works specialise chiefly in manufacture of complete installation of machinery for Jute Mills, as well as special classes of work for railways such as locomotive cylinders, etc., baling presses and pumps for cotton and jute and other machinery

The policy of the Company in connection with all its manufacture is summed up in its motto prominently posted up in all offices, etc., "Quality is remembered long after price is forgotten"

The ANGUS Co., Ltd., 3 Clive Row, CALCUTTA India.

Established 1913

Proprietors of Angus Jute Works, Angus Engineering Works, Angus, Hooghly Dist, Bengal

The firm is managed by old experienced employees of the firm who have intimate knowledge of the trade and have come from the home of renowned tobacco—Greece

P. GOPALASWAMY NAIDU, Honorary Magistrate, St Thomas Mount, Director and Treasurer, Adambakkam Janopakara Saswathi Nidhi Ltd, Alanthoor, Proprietor, The Diamond Import Co., Madras, P. Gopalaswamy Naidu & Sons, St Thomas Mount

Importers of Diamonds, Semi precious Stones, Synthetic Diamonds, jewellers' machinery, tools and accessories suitable for use in manufacturing and setting of jewellery, Gold & Silver foil, Indian Ink, Chamois Skin, Select Cloths, Diamond wrapping papers, etc

The firm, P Gopalaswamy Naidu & Sons, started in a small way 160 years ago by buying uncut rubies, topaz and other stones to be cut and finished. Their policy has been fair dealing with guarantee of money back and this together with good craftsmanship soon enlisted a large and select clientele for their products which are well known throughout India, Burma, Ceylon and Malaya. Their business has grown to such an extent that it has been necessary to erect more spacious showrooms.

Mr. Gopalaswamy Naidu is a dexterous diamond cutter and an expert jeweller. He has produced by his secret process, which is registered, a finished synthetic "diamond" of unusual brilliancy and hardness which withstands all tests. These Diamonds are known as "Dazlo" diamonds.

The Calendars.

A full Calendar will be found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 3,760 years and 3 months before the beginning of the Christian Era, the year is Luni-solar.

The *Mohammedan*, or era of the *Hejira*, dates from the day after Mahomet's flight from Mecca, which occurred on the night of July 15, 622 A.D. The months are Lunar.

The *Fashi* year was derived from a combination of the *Hejira* and *Samvat* years by the order of Akbar. It is Luni-solar. The *Bengali* year seems also to have been related at one time to the *Hejira*, but the fact of its being Solar made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is Luni-solar. The months are divided into two fortnights—*sudi*, or bright, and *badi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendars.

MURAL PAINTINGS OF THE BOMBAY SCHOOL

BY

W. E. GLADSTONE SOLOMON, I.E.S.,
(*Director, Sir J J School of Art, Bombay*)

An exceptionally beautiful production, containing descriptive narrative of the School's work up to the completion of the Mural Paintings commissioned for New Delhi by the Government of India which gave opportunity for the publication of this excellent work

Thirty full-page illustrations, some of which are in full colours, reproductions of the original Mural Paintings, prepared by the Bombay School of Art, which form part of the beautiful decorations of New Delhi

Brief studies of Indian decorative influences in the past which give a slight sketch of their effect to-day in Bombay, and the following articles "The Moghul Message of Beauty," "The Indian Art Renaissance," "Drawing the Rangoli at Diwali," and "Scenes at a Hindu Wedding in Bombay"

A MAGNIFICENT BOOK

Price **Rs. 10.** By V.P.P. **Rs. 10-9.**

REVEALS SECRET OF PERSONAL INFLUENCE

Simple Method that Anyone Can Use to Develop the Powers of Personal Magnetism, Memory, Concentration, Will-Power, and to correct Undesirable Habits through the wonder-science of Suggestion. 80 page Book Fully Describing this Unique Method and a Psycho-Analysis Character Delineation FREE to all who write at once.

The wonderful power of Personal Influence Magnetism, Fascination, Mind Control, call it what you will, can surely be acquired by everyone no matter how unattractive or unsuccessful, says Mr Elmer E Knowles, author of the new book entitled *The Key to the Development of the Inner Forces*. The book lays bare many astounding facts concerning the practices of the Eastern Yoghis and explains a unique system for the Development of Personal Magnetism, Hypnotic and Telepathic Powers, Memory, Concentration, Will-power, and the correction of undesirable habits through the wonder power of Suggestion.

M Martin Goldhardt writes: My own success with the Knowles System justifies my belief that it does more for the advancement of people than any other existing method. The book, which is being distributed broadcast free of charge, is full of photographic reproductions showing how these unseen forces are being used all over the world and how thousands upon thousands have developed powers which they little dreamed they possessed. The free

distribution of 10,000 copies is being conducted by a large Brussels Institution, and

a copy will be sent post free to anyone interested. In addition to supplying the book free, each person who writes at once will also receive a psycho-analysis character delineation of from 400 to 500 words as prepared by Prof Knowles. If you wish a copy of Prof Knowles' book and a Character Delineation, simply copy the following verse in your own handwriting

I want power of
[mind,
Force and strength
[in my look,
Please read my character
[acter
And send me your
[book

Mr Martin Goldhardt

Also send your full name and address plainly printed (state whether Mr, Mrs or Miss, and address your letter to PSYCHOLOGY FOUNDATION, S A (Dept 1101), No 18, rue de Londres, Brussels, Belgium. If you wish you may enclose 6 annas (stamps of your own country) to pay postage, etc. Be sure to put sufficient postage on your letter. Postage to Belgium is 3 annas.

THE ERICSSON CONCERN.

The Indian branch of this concern is known as Ericsson Telephones Ltd, the head quarters of which are at Calcutta. It is directly under the control of its own British Headquarters in England. Few people in India are aware, not only of the large resources commanded by this concern, but of the varied electrical business controlled.

Some idea of both may be conveyed by the statement set forth below —

MANUFACTURE AND SALE OF LOW TENSION MATERIAL—Telephone instruments and Exchanges, Automatic and Manual Line Transformers, Loading Coils, Equipment for Carrier-Current Telephony, Amplifiers, Equipment for Voice Frequency Signalling Systems, Fire Alarm Apparatus, Equipment for Automatic Fire Alarm Systems, Equipment for Railway Interlocking and Safety Signal Plants, Time Recording, Signal Apparatus, and Electric Clocks, Line Material.

HIGH TENSION MATERIAL—Complete Equipment for Power Stations and Network, A C and D C Generators and Motors, Converters, Transformers, Induction Regulators, Starting Gear, Oil-filled Cable Boxes, High Voltage Condensers, Electricity meters, Acid-proof Fittings and Cables, Cables and Fittings for electrical hot bed installations.

WIRELESS MATERIAL—Transmitters, Receivers, Loud speakers, Accessories, Reserve Parts.

CABLES AND WIRE for Low and High Tension as well as for Wireless, Bare, Hard-drawn Copper Wire and Cable.

COMPLETE INSTALLATIONS carried out by contract.

Plans and tenders on request from —

ERICSSON TELEPHONES, LTD.,

21, Old Court House Street, CALCUTTA.

JUST OUT!

Another fascinating Book by the well-known author of
"Indian Cavalry Standards"

"INDIAN INFANTRY COLOURS"

by

CAPTAIN H. BULLOCK, F. R. Hist. S., I. A.

(The only book existing on the subject)

In a masterful research the author deals with a little-known subject, weaving an interesting and indeed fascinating narrative around the colours carried by Indian Infantry Regiments

In fact this is the only book yet published dealing exclusively with this subject

The scope of this book is immense and it is almost with relief, and most certainly with pleasure, that one wanders through the India of 100 years ago as page follows page in the colourful narrative

Illustrations and Plates add emphasis to the reading matter, and the Frontispiece in colours prepares one for the absorbing literature which follows it

In short here is a work of merit which interests both expert and layman

**It makes an Ideal Present for an
Indian Army officer.**

Price Rs. 15 V.P.P. Rs. 15-10.

“THE ILLUSTRATED WEEKLY OF INDIA” has long been acknowledged to be one of the best edited and most attractive journals in the East. Notwithstanding the high standard attained in the past, the publishers have recently introduced many new features and broadened the scope of the paper generally

Prominence is given to Indian and other News of more than ordinary interest to India, and these together with the general News of the World are presented in a fully illustrated and most attractive form. Authoritative articles on current politics and kindred matters constitute a regular feature

Sport and Drama are ably dealt with by experts. The increasing activities and interests of ladies are prominently catered for.

Each issue contains upwards of 100 illustrations reproduced in a style comparable only with the best.

The “Illustrated Weekly of India” maintains its place as the recognised leading periodical of the East. It is indispensable to those whose interests centre on India and Indian affairs.

If you are not already a subscriber, fill in the attached form and forward it to us together with a remittance covering the period for which you desire to subscribe.

BABU PICHE LAL IN EUROPE.

By the Author of "Warlike Snaps and Snaps"

Few writers have succeeded so well in caricaturing without offence the idiosyncrasies and inconsistencies of the average Indian. Babu Piche Lal is one of the most humorously delightful figures in modern fiction. Europeans and Indians alike will find his eccentricities most entertaining.

Price Rs. 2. By V.P.P. Rs. 2-7-0

WORKS BY B G STEINHOFF.

A BOOK OF POEMS

Price Rs 3 - By V.P.P. Rs 3-7-0

The Temple of Devi and other Poems

Price Rs 3 - By V.P.P. Rs 3-7-0

closed on several occasions the Act provides for sufficient retrospective effect to make all possible claimants barred.

21 The Indian Mines (Amendment) Act. The Indian Mines Act, 1924, confers certain powers and duties on District Magistrates. In addition powers are conferred upon District Magistrates by the Regulations and Rules issued under the Act. The present Act provides for the exercise within the limits of the Federalency towns of the powers conferred upon District Magistrates under the original Act.

22 Heavy Chemical Industry (Protection) Act. This Act imposes a protective duties on maximum chloride and certain other heavy chemicals. The duties on maximum chloride and the heavy chemicals to remain in force till March 31, 1930 and March 1, 1931 respectively. The Government of India in Council is empowered to further increase the duty on maximum chloride. It is noted that this is imported into British India at a price as is likely to render ineffective the protection afforded by this Act.

23 The Indian Press (Emergency Powers) Act. In 1901 the Government of India promulgated Ordinance No. 10 to provide for the better control of the Press and of unauthorised news sheets and newspapers. The present Act secures the powers conferred by the Ordinance and gives them duration for a period of one year with power to the Government of India in Council to extend the Act for a further period not exceeding one year.

Sections 1 to 14 provide for the control of printing presses and newspapers. Under s. 1, sub s. (1) a person keeping a printing press who is required to make a declaration under s. 1 of the Press and Registration of Books Act, 1867, may be required by the Magistrate for reasons to be recorded in writing to deposit with the Magistrate within ten days from the day on which the declaration is made, security not amounting to more than one thousand rupees. This deposit will be refunded on application by the keeper of the press if that press publishes no objectionable matter for a period of three months from the date of the declaration (s. 3, sub s. (2)). If a printing-press in respect of which security has not been required or having been required has been refunded, publishes objectionable matter, the local Government may by notice in writing to the keeper of the press stating or describing the offending matter, order the keeper to deposit with a Magistrate security amounting to not less than five hundred and more than three thousand rupees (s. 3, sub s. (3)).

Section 4 describes the matter which is to be treated as objectionable matter throughout the Act, i.e., matter which incite to or encourage, or tend to incite to or encourage, the commission of any offence or murder or any cognizable offence involving violence, or directly or indirectly express approval or admiration of any such offence, or of any person, real or fictitious, who has committed or is alleged or represented to have committed any such offence. If a printing-press publishes objectionable matter the Local Government has power to declare its security forfeited or where security has not

been deposited to declare the press forfeited. An explanation is added which states that "forfeit" means the forfeiture of the right of printing.

Under s. 5 a person making a declaration under s. 1 of a press who is required to deposit with the Magistrate security amounting, not less than one thousand rupees more than ten thousand rupees. Under s. 6 the Local Government may declare the security of a printed matter forfeited if the press publishes objectionable matter. Sections 7, 8, 9 and 10 relate to newspapers and news sheets. Under s. 7, sub s. (1), a person publishing a newspaper without making a deposit with the Magistrate, Section 14 deals with the consequences of failure to deposit security as required by the Act namely, forfeiture in the case of a newspaper and a notice in writing to the annulment of the declaration under s. 5 of the Press and Registration of Books Act, 1867. Section 11 provides for the return of the deposited security where a person ceases to keep a press or a printing establishment under s. 1 of the Press and Registration of Books Act, 1867. Section 14 deals with the forfeiture of a printing-press under a printing press of a newspaper which is declared forfeited. Section 15 deals with unauthorised news sheets and newspapers. Under s. 16 any person who prints or publishes any unauthorised news sheet and newspaper. A Magistrate may order the press to be destroyed if he considers the press to be unauthorised. Section 17 provides for the seizure and forfeiture of unauthorised presses which are used for producing unauthorised news sheets and newspapers. The offence of disseminating unauthorised news sheets and newspapers is punishable with imprisonment which may extend to six months, or with fine, or with both (s. 18).

Sections 19 to 22 deal with special provisions relating to the seizure of certain documents. Under s. 19 the Local Government is empowered to declare forfeited and to issue search warrants for any newspaper, book or other document whenever made. If it appears to the Local Government to contain objectionable matter. Section 20 empowers the Chief Customs Officer to detain any package brought into British India which he suspects contains objectionable publications. Section 21 prohibits the transmission by post of unauthorised news sheets and newspapers. Section 22 empowers a person in charge of a post office to detain any article other than a letter or parcel which he suspects contains objectionable publications or unauthorised news sheets and newspapers. s. 23 (1) provides for applications to the High Court to set aside orders requiring the deposit of security [under s. 3, sub s. (3) or s. 7, sub s. (3)] or orders of forfeiture (under s. 4, 6, 8, 10 or 19). Provision is also made for an application to the High Court in the case of a printing-press which has been forfeited under sub s. (2) of s. 12, to set aside the order of forfeiture on the ground that the press had not been used in contravention of that section. Section 24 provides that all such applications must be heard and determined by a Special Bench of the High Court consisting of three Judges.

India and the League of Nations.

India is a Founder-Member of the League of Nations and enjoys in it equal rights with other Member-States, a position which she mainly owes to the goodwill shown towards her advancement and aspirations by Great Britain and the Self-Governing Dominions of the British Empire. The League of Nations was established under the terms of the Peace Treaty which was signed in Paris in 1919 after the conclusion of the Great War. Great Britain and the Self-Governing Dominions in 1917 passed a resolution which set India upon the road that led to the high international platform on which she stepped.

India was represented at the Imperial War Conference of 1918, at the Imperial Conference held in London in 1921, 1923, and 1926, and at the Imperial Economic Conference held in London in 1930. The report of the Inter-Imperial Relations Committee of the Imperial Conference, which was adopted by the Conference of 1926, stated the position of Great Britain and the Dominions to be "autonomous communities, equal in status, in no way subordinate to one another in any respect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations. India is not yet a Self-Governing Dominion to the extent indicated in this formula. The first stage in the direction of establishing Responsible Government in India was prescribed by the Government of India Act 1919 but the Governor General of India does not yet (to quote again from the Inter-Imperial Relations Committee) hold in all essential respects the same position in relation to the administration of public affairs" in India as is held by His Majesty the King Emperor in Great Britain. And there are certain other respects in which India's Constitutional position in the Empire is not the same as that of the Self-Governing Dominions. India, for example, is not entitled to accredit a Minister Plenipotentiary to the Heads of Foreign States.

The position enjoyed by India in the Empire governed the position which she entered when, as one of the States of the Empire, she joined in the Paris Peace Negotiations in 1918-19. India's membership of the League of Nations places her in a unique position among all non-self-governing States, Dominions or Colonies throughout the world. She is an original member of the League by virtue of para 1 of article 1 of the Covenant by which the League was established and which states that any fully self-governing State, Dominion or colony named in the Annex may become a member of the League. She is the only original member which is not self-governing and in virtue of the restriction under para 11 of article 1 on the admission of members other than original members, she will so long as the present constitution of the League endures remain the only member which is not a Self-Governing

India's Attitude.

On questions coming before the League, India has exactly the same rights as any other Member State. The Secretary of State for India in His Majesty's Government is ultimately responsible for the appointment of Indian delegates and for their instruction but in practice he and the Government of India act jointly in consultation and agreement with one another. Partly as a result of her membership of the League and partly owing to resolution No. IX adopted by the Imperial War Conference in 1917 recommending *inter alia* recognition of the right of the Dominions and of India to an adequate voice in British foreign policy and foreign relations, India has been given the same representation as the Dominions at all international conferences at which the British Empire is represented by a combined Empire Delegation. On many occasions in fact she has taken the lead in forming world opinion towards the achievement of the League's aims. In particular in the international Labour organisation she has been successful in bringing Empire policy into line with her own on more than one occasion. In many of these conferences, particularly those of the League, Indian delegations have taken an independent line of action sometimes directly opposed to the attitude of other parts of the British Commonwealth. One interesting case occurred in 1920 at the Genoa Maritime Conference when Indian delegates in the face of opposition from the Empire managed to secure a mandate for special treatment for Indian sailors in British shipping, although there was a concerted move from the Empire delegation to get Indian lascars driven off British ships.

India's New Status

It will be observed that the situation created by India's stepping from the Imperial Conference into the Paris Peace Conference and League of Nations in the manner in which she did was in certain respects highly anomalous and one impossible to harmonize with her constitutional position as defined in the Government of India Act. Nevertheless as the Secretary of State in a Memorandum presented to the Indian Statutory Commission by the India Office in 1929 showed, it has been the deliberate object of the Secretary of State to make India's new status a reality for practical purposes within a possible future. It was not legally possible for the Secretary of State to relinquish a constitutional power of control nor consistently with his duty to Parliament could he do so. It has been his constant endeavour to extend its exercise as far as possible to the Government and to allow to the Indian Government the greatest possible freedom of action and influence in the League and of opinion.
